U.S. Customs Service

Treasury Decision

19 CFR Part 4

(T.D. 86-1)

Amendment to the Customs Regulations Concerning the Coastwise Transportation of Certain Articles by Vessels of Guatemala or The Bahamas

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to add Guatemala and The Bahamas to the lists of nations which permit vessels of the U.S. to transport certain articles specified in § 27, Merchant Marine Act of 1920, as amended, between their ports.

Customs has been furnished satisfactory evidence that neither Guatemala nor The Bahamas place any restrictions on the transportation of certain specified articles by vessels of the U.S. between ports in that country. This amendment provides reciprocal privileges for vessels registered in either Guatemala or The Bahamas.

EFFECTIVE DATE: The reciprocal privileges for vessels registered in Guatemala became effective on October 11, 1985. The privileges extended to vessels registered in The Bahamas became effective on November 29, 1985.

FOR FURTHER INFORMATION: Paul Hegland, Carriers, Drawback & Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

Background

Section 27, Merchant Marine Act of 1920, as amended (46 U.S.C. 883) (the "Act"), provides generally that no merchandise shall be transported by water, or by land and water, between points in the U.S. except in vessels built in and documented under the laws of the U.S. and owned by U.S. citizens. However, that 6th proviso of the Act, as amended, by Pub. L. 89-194 (79 Stat. 823, T.D. 66-176)

and Pub. L. 90–474 (82 Stat. 700, T.D. 68–227), provides that upon a finding by the Secretary of the Treasury, pursuant to information obtained and furnished by the Secretary of State, that a foreign nation does not restrict the transportation of certain articles between its ports by vessels of the U.S., reciprocal privileges will be accorded to vessels of that nation, and the prohibition against the transportation of those articles between points in the U.S. will not apply to its vessels.

Section 4.93(b)(1), Customs Regulations (19 CFR 4.93(b)(1)), lists those nations found to extend reciprocal privileges to vessels of the U.S. for the transportation of empty cargo vans, empty lift vans, and empty shipping tanks. Section 4.93(b)(2), Customs Regulations (19 CFR 4.93(b)(2)), lists those nations found to extend reciprocal privileges to vessels of the U.S. for the transportation of equipment for use with cargo vans, lift vans, or shipping tanks; empty barges specifically designed for carriage aboard a vessel and certain equipment for use with these barges; certain empty instruments of international traffic; and certain stevedoring equipment and material.

On October 9, 1985, the Department of State advised the Director, Carriers, Drawback & Bonds Division, of the Customs Service Headquarters that Guatemala places no restrictions on the transportation of the articles listed in the Act by vessels of the U.S. between ports in Guatemala. The effective date of such notification was October 11, 1985.

On November 19, 1985, the Embassy of the Commonwealth of The Bahamas advised the Commissioner of Customs that The Bahamas place no restrictions on the transportation of the articles listed in the Act by vessels of the U.S. between ports in The Bahamas. The effective date of such notification was November 29, 1985.

The Carriers, Drawback & Bonds Division of Customs is of the opinion that satisfactory evidence has been furnished to establish the reciprocity required in § 4.93(b). Therefore, the Director of the Division has determined that, effective retroactively to the dates of notification stated above, Guatemala and The Bahamas should be added to the lists of nations set forth in § 4.93(b)(1) and (2).

By Treasury Department Order 165–25 the Secretary of the Treasury has delegated authority to the Commissioner of Customs to prescribe regulations relating to §§ 4.22, 4.81a(b), 4.93(b)(1) and (b)(2), 4.94(b), and 10.59(f), Customs Regulations, (19 CFR 4.22, 4.81a(b), 4.93(b)(1) and (b)(2), 4.94(b), and 10.59(f)). These sections relate to lists of nations entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated this authority to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office of Regulations and Rulings, who then re-delegated it to the Director, Regulations Control and Disclosure Law Division.

FINDING

On the basis of the information received from the Secretary of State, and the Embassy of the Commonwealth of The Bahamas, as described above, it is determined that neither the Government of Guatemala nor The Bahamas places any restrictions on the transportation of the articles specified in the 6th proviso of § 27 of the Merchant Marine Act of 1920, as amended, by vessels of the U.S. between ports in either Guatemala or The Bahamas, respectively. Therefore, reciprocal privileges are accorded as of October 11, 1985, to vessels registered in Guatemala, and as of November 29, 1985, to vessels registered in The Bahamas.

LIST OF SUBJECTS IN 19 CFR PART 4

Customs duties and inspection, cargo vessels, maritime carriers, vessels.

REGULATIONS AMENDMENTS

To reflect the reciprocal privileges granted to vessels registered in either Guatemala or The Bahamas, Part 4, Customs Regulations (19 CFR Part 4), is amended in the following manner:

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The authority citation for Part 4, continues to read as follows:
Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103;
§ 4.93 also issued under 19 U.S.C. 1322(a); 46 U.S.C. 883.

2. Sections 4.93(b)(1) and (b)(2), Customs Regulations (19 CFR 4.93(b)(1), (b)(2)), are amended by adding "Guatemala" and "Bahamas, The", in appropriate alphabetical order to the list of nations entitled to reciprocal privileges.

INAPPLICABILITY OF PUBLIC NOTICE AND DELAYED EFFECTIVE DATE REQUIREMENTS

Because this is a minor amendment in which the public is not particularly interested and there is a statutory basis for the described extension of reciprocal privileges, notice and public procedure pursuant to 5 U.S.C. 553(b)(B) are unnecessary. In accordance with 5 U.S.C. 553(d)(1), a delayed effective date is not required because this amendment grants an exemption.

INAPPLICABILITY OF REGULATORY FLEXIBILITY ACT

This document is not subject to the provisions of 5 U.S.C. 603, 604, as added by § 3 of Pub. L. 96-354, the "Regulatory Flexibility Act." That Act does not apply to any regulations such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) or any other statute.

EXECUTIVE ORDER 12291

This amendment does not meet the criteria for a major regulation as defined in § 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

DRAFTING INFORMATION

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices in the Customs Service participated in its development.

Dated: December 20, 1985.

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

U.S. Customs Service

Customs Service Decisions

DEPARTMENT OF THE TREASURY,
OFFICE OF THE COMMISSIONER OF CUSTOMS,
Washington, DC.

The following are decisions of the United States Customs Service which are of sufficient interest or importance to warrant publication in the CUSTOMS BULLETIN.

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

(C.S.D. 86-1)

This ruling holds, under 19 U.S.C. 1313(a), that drawback may be claimed on the exportation of articles manufactured or produced in the United States with merchandise imported under item 807.00, Tariff Schedules of the United States.

Date: August 12, 1983
File: DRA-1-09-CO:R:CD:D
216162 GS

Issue: May drawback be claimed on the exportation of articles manufactured or produced with merchandise imported under item 807.00, Tariff Schedules of the United States?

Facts: Integrated circuits are fabricated in the United States on raw silicon wafers of both foreign and domestic origin. The fabricated wafers and other components are exported to Malaysia for assembly into protective packages and then returned to the United States as unfinished integrated circuits under item 807.00, TSUS. In the United States the unfinished integrated circuits are used in manufacture or production to produce finished integrated circuits, some of which are exported.

Law and Analysis: When the unfinished integrated circuits are returned to the United States, if entry under item 807.00 is claimed and also drawback on the fabricated wafers used in their assembly, the claim for entry under 807.00 will be granted if it is in order and the claim for drawback denied (C.S.D. 82-160, August 25, 1982; Circular Letter DRA-1-DB, March 28, 1962).

Some of the unfinished integrated circuits are used to manufacture or produce finished integrated circuits (I.C.'s) which are exported. The manufacturer wishes to claim drawback on the duties paid on the merchandise used to manufacture or produce these finished I.C.'s. This merchandise was imported into the United States under two entries—that for the silicon wafers and that for the unfinished I.C.'s.

The first question therefore is whether two or more consumption entries covering the same merchandise may be identified or designated for drawback. In C.S.D. 81-215, May 7, 1981, it was ruled that this is permissible. The situation in the current case is slightly different, in that the second consumption entry covers merchandise which incorporates articles manufactured from the merchandise imported on the first consumption entry. This is not a material difference for the legal issue under consideration and therefore C.S.D. 81-215 applies.

The next issue is whether drawback is payable upon the exportation of products manufactured with the use of fabricated American-made components assembled abroad and imported under 807.00, TSUS.

This question was decided in an unpublished ruling dated December 19, 1977 (DRA-1-R:CD:D RS, 208439) which is quoted below in its entirety.

> You asked whether drawback is payable upon the exportation of products manufactured with the use of fabricated American-made components assembled and imported under item 807.00, TSUS. The duty on such components is measured by the value added to the American parts as the result of the foreign assembly operation.
>
> The drawback statute relevant to this case, 19 U.S.C. 1313(a), provides for payment of drawback "upon the exportation of articles manufactured or produced in the United States with the use of imported merchandise. * * *" There is no requirement in the statute or the relevant Customs Regulations that the duty-paid imported merchandise be of foreign origin. The only requirement is that the merchandise designated as the basis of claim be imported and duty-paid.
>
> Accordingly, drawback of duties paid under item 807.00, TSUS, is permissible under the provisions of 19 U.S.C. 1313(a) and Part 22 of the Customs Regulations.

It should be noted that the holding reached below is completely in accord with both the intent and technical wording of Headnote 1(b) of Subpart B, Part 1 of Schedule 8, TSUS. This Headnote states that this "subpart shall not apply to any article exported * * * (b) with benefit of drawback;"

The intent of this provision is to prevent one from using both drawback and 807 to avoid duties. Thus if drawback were not denied on the fabricated wafers when entry under item 807 was granted, assuming both were claimed (first paragraph above under

Law and Analysis), the finished IC's which remained in the United States would have been produced from silicon wafers imported free of duty. Duty on these IC's would have been paid only on the assembly operation. However, the intent of the headnote is not to deny drawback on merchandise which is exported, for if it did it would be in conflict with the drawback law, which permits drawback of all duties on exported articles. Furthermore the headnote is written to apply to past exportations—not future exportations taking place after the admission under 807.

Holding: Drawback may be claimed on the exportation of articles manufactured or produced in the United States with merchandise imported under 807.00, TSUS

(C.S.D. 86-2)

This ruling holds that under 19 U.S.C. 1677(g)(a), voluntary interest payments made by an importer on deposits of countervailing or antidumping duties before liquidation may be refunded if found not to be payable, upon liquidation or reliquidation, and may also be the subject of a protest under 19 U.S.C. 1514.

Date: July 9, 1985
File: ENT-1 CO:R:E:E
728393 JL

LEONARD L. ROSENBERG, Esq.,
SANDLER & TRAVIS, P.A.,
444 Brickell Avenue,
Miami, Florida 33131.

DEAR MR. ROSENBERG: In your letter of May 2, 1985, you asked for a binding ruling on behalf of your client, Meldisco, Division of Melville Corporation, that countervailing duties paid voluntarily as the result of the findings of a review by the Department of Commerce are refundable with interest in the event of a later decision reducing or eliminating duties and that said deposit would stop the accrual of interest which could legally be assessed pursuant to 19 U.S.C. 1677(g).

You state that in Treasury Decision 80-13 Customs published a suspension of liquidation of all entries of certain Brazilian footwear and your client was required to make a deposit of countervailing duties in the amount of 1 percent as a result. You state that on April 19, 1985, the Department of Commerce published the results of its administrative review conducted pursuant to 19 U.S.C. 1675 and found countervailable bounties or grants in the amount of 8.84 percent *ad valorem* for entries made during calendar year 1980 and ordered Customs to begin liquidations of those entries which had been suspended pursuant to Treasury Decision 80-13. You continue that the Customs Service has been enjoined from liquidating those entries by the United States Court of International Trade (Case No. 85-04-00579). Your client is offering to make the voluntary pay-

ments in order to stay the accrual of additional interest at the time of liquidation.

19 U.S.C. 1677g(a), was amended on October 10, 1984, by Public Law 98-573, and provides as follows:

> (a) General Rule.—Interest shall be payable on overpayments and underpayments on amounts deposited on merchandise entered, or withdrawn from warehouse, for consumption on and after—
>
> (1) The date of publication of a countervailing or antidumping duty order under this subtitle or section 1303 of this title, or
>
> (2) The date of a finding under the Antidumping Act, 1921.

This provision therefore provides for the payment of interest on the difference between the cash deposits of estimated countervailing or antidumping duties and the duties finally assessed on the entries. Where there is no difference between the two figures, then no interest would be collected.

You asked that if it is finally determined that if any part of the countervailing duties deposited voluntarily as well as any amount representing interest alleged to be due on the amount of the countervailing duties voluntarily deposited are not owed, that such duties would be returned to the importer with all applicable interest charges, in the same manner as countervailing duties deposited at the time of entry.

Customs is of the opinion that all monies voluntarily tendered and accepted on an entry before its liquidation are characterized as "estimated duties" and may be refunded pursuant to a liquidation or reliquidation, and may be the subject of a protest under 19 U.S.C. 1514.

(C.S.D. 86-3)

This ruling holds that replacement tires and repair parts designated for use with containers are considered "equipment for use with containers" under the sixth proviso of the Jones Act (46 U.S.C. 883 and 19 CFR 4.93).

Date: September 19, 1985
File: VES-3-03-CO:R:CD:C
107844 DHR

Mr. JOHN E. BOUCHARD,
General Manager,
Moller Steamship Company, Inc.,
1667 K Street, NW.,
Washington, D.C. 20006.

DEAR MR. BOUCHARD: Reference is made to your letter of August 9, 1985, concerning the applicability of the Sixth Proviso of the Jones Act (46 U.S.C. 883) and section 4.93, Customs Regulations (19

CFR 4.93), to certain merchandise transported between points in the United States.

Under the Sixth Proviso and section 4.93, foreign-flag vessels of certain nations and United States-flag vessels not qualified to engaged in the coastwise trade may transport empty cargo vans, empty lift vans, and empty shipping tanks and equipment for use with cargo vans, lift vans, or shipping tanks between points embraced within the coastwise laws of the United States if those articles are owned or leased by the owner or operator of the transporting vessel and are transported for his use in handling his cargo in foreign trade. In accordance with section 4.93(c), Customs Regulations, the articles must be identified on any Cargo Declaration, Customs Form 1302, required to be filed under part 4 of the Customs Regulations (19 CFR part 4). Section 4.93(c) also requires that such a Cargo Declaration include a statement that the articles are owned or leased by the owner or operator of the transporting vessel and are transported for his use in handling his cargo in foreign trade.

You ask whether replacement tires and repair parts can be considered "equipment for use with" cargo vans, lift vans, or shipping tanks, as that phrase is used in the Sixth Proviso and section 4.93. You state that because of contrary Customs rulings, you and other vessel operators have been forced to transport your own replacement tires and repair parts for containers between points in the United States by trucks or rail at a significant expense even though your own vessels are moving between those points. The Honorable Mario Biaggi, Chairman, House Subcommittee on Merchant Marine, has also written us concerning this matter.

After a complete review of this matter, we have concluded that the phrase "equipment for use with" cargo vans, lift vans, or shipping tanks in the Sixth Proviso of the Jones Act and in section 4.93, Customs Regulations, includes replacement tires and parts for cargo vans, lift vans, or shipping tanks, provided that the tires and parts are owned by the owner or operator of the transporting vessel, are intended for cargo vans, lift vans, or shipping tanks owned or leased by the owner or operator of the transporting vessel, and are transported for his use in handling his cargo in foreign trade. The requirements of section 4.93(c), Customs Regulations, regarding any required Cargo Declaration, Customs Form 1302, are applicable to replacement tires and parts for cargo vans, lift vans, or shipping tanks being transported coastwise.

If replacement tires or parts for cargo vans, lift vans, or shipping tanks are transported between coastwise points on foreign-flag vessels of nations not granted reciprocal privileges under the sixth proviso (see list in section 4.93(b)(1), Customs Regulations) or, even if transported by qualifying vessels, are not owned or leased by the owner or operator of the transporting vessel and transported for his use in handling his cargo in foreign trade, severe liabilities will

be incurred under 46 U.S.C. 883. If the requirements of section 4.93(c), Customs Regulations (see also section 4.81(e), Customs Regulations), relating to any required Cargo Declaration, Customs Form 1302, are violated, penalties will be assessed under 19 U.S.C. 1584.

(C.S.D. 86-4)

This ruling holds that privileged foreign merchandise removed from a foreign trade zone is subject to the rate of duty and tax in effect on the date privileged foreign status was filed for and not at the rate of duty in effect at the time of transfer to a Customs territory for consumption (19 U.S.C. 81c and section 146.21(c)(3)(i), Customs Regulations).

Date: September 24, 1985
File: FOR-1-CO:R:CD:D
218295 L

Issue: Imported distilled spirits are admitted to a foreign trade zone and are granted the status of privileged foreign merchandise prior to October 1, 1985. Are these spirits subject to the increased distilled spirits tax imposed by section 27 of P.L. 98-369, effective October 1, 1985, if transferred to customs territory for consumption after that date?

Facts: No specific facts are presented. The question is raised in connection with the impending increase in the distilled spirits tax rate.

Law and Analysis: Section 27 of P.L. 98-369 increases the rate of tax on distilled spirits from $10.50 to $12.50 per proof gallon. Section 27 also establishes the effective date of the amendment as October 1, 1985.

The first proviso to section 3 of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81c) provides:

> That whenever the privilege shall be requested and there has been no manipulation or manufacture effecting a change in tariff classification, the appropriate customs officer shall take under supervision any lot or part of a lot of foreign merchandise in a zone, cause it to be appraised and taxes determined and duties liquidated thereon. Merchandise so taken under supervision may be stored * * * and * * * be sent into customs territory upon the payment of such liquidated duties and determined taxes thereon.

The Customs Regulations, section 146.21(c)(3)(i), provide that when privileged foreign status is requested "* * * merchandise shall be subject to * * * the rates of duty and tax in force, on the date of filing * * *".

Section 146.21, Customs Regulations, provides in part that "[A] status as privileged foreign merchandise and the consequent determination of taxes and liquidated duties cannot be abandoned".

Statute and regulation require that when privileged status is requested taxes be determined and duties liquidated. Once privileged status is attained it cannot be abandoned. Accordingly, imported distilled spirits in a foreign trade zone prior to October 1, 1985, with the status of privileged foreign and removed from the zone for consumption subsequent to October 1, 1985, are subject to the rates of duty and tax in effect at the time the request for privileged foreign status was filed.

Holding: Privileged foreign merchandize removed from a foreign trade zone is subject to the rate of duty and tax in effect at the time the request for privileged foreign status was filed and not at the rate in effect at the time of transfer to Customs territory for consumption.

(C.S.D. 86-5)

This ruling sets forth the country of origin marking requirements applicable under 19 U.S.C. 1304, 19 CFR 134.41(b) and 19 CFR 134.46 to certain athletic footwear and shoe boxes displaying symbols associated with a country other than the country of origin.

Date: January 2, 1986
File: MAR-3 CO:R:E:E
729096 LR

Issue: Whether the country of origin marking at the base of the tongue or inside the heel on athletic footwear satisfies the requirements of 19 U.S.C. 1304 where the footwear and/or the box also displays symbols associated with a country other than the country of origin.

Facts: It has been brought to Customs attention that certain athletic shoes are being imported which may not satisfy the country of origin marking requirements of 19 U.S.C. 1304. The specific circumstances are described below.

Case I

The shoes in question are manufactured in the Republic of Korea. Although they are marked "Made in Korea" at the base of the tongue label, a variety of British symbols appear on the shoes. First, a British flag is prominently displayed on the top of the footwear. Second, the size labels on the inside of the shoe and on both ends of the box make reference to UK and USA sizing. Finally, the shoe box lid is a reproduction of the British flag. There is no country of origin marking on the shoe box.

Case II

The shoes are manufactured in the R.O.C. (Taiwan). The country of origin is printed on the inside of the heel of the shoe and on the bottom of the shoe box. The American flag appears on the side of the shoe. The box has a reproduction of the American flag as its

lid and the sides of the box are labeled "Action Shoes Dallas, Texas."

Applicable Law and Analysis: Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304) requires that every article of foreign origin imported into the United States be marked in a *conspicuous* place as legibly, indelibly, and permanently as the nature of the article will permit in such manner as to indicate to an ultimate purchaser in the United States the English name of the country of origin (emphasis added). The Customs Service has interpreted the requirement that articles be marked in a conspicuous place to mean that they must be marked in a place where the ultimate purchaser is able to find the marking easily. (*See* 19 CFR 134.41(b)).

Although Customs would normally consider a country of origin marking at the base of the tongue label or on the inside of the heel to be conspicuous, this is not necessarily the case where foreign symbols (other than that of the country of origin) appear on the article and/or its container.

The Customs Service has recognized that the presence of a geographic location other than the country in which the article was produced on an imported article or its container may mislead the ultimate purchaser as to the true country of origin. Thus, in cases where words indicating possible origin other than the actual country of origin appear on the article, Customs requires that the country of origin marking shall appear in close proximity to and in at least comparable size letters to such words, and preceded by "Made in," "Product of," or other words of similar meaning. (19 CFR 134.46). The purpose of this regulation is to alleviate the possible confusion that is created by these words.

We believe that the presence of symbols associated with a country other than the country of origin may also mislead the ultimate purchaser as to the country of origin. This is especially true where the foreign symbols are more readily visible than the country of origin marking.

In this case, the British and American symbols on the shoes and the boxes are far more prominent than the country of origin marking in the shoes or at the bottom of the box. After viewing the British or American flag on both the lid of the box and the shoes, the UK/USA size label on the shoes and the box (or the words "Action Shoes Dallas, Texas" on the box), we believe that most consumers would conclude that Great Britain or the United States is the country of origin. In light of these prominently displayed British or American symbols, it would take a very determined consumer to ascertain that the country of origin is the Republic of Korea or Taiwan. Based on the facts presented, we find that the country of origin marking at the base of the tongue or inside the heel is not conspicuous.

In order to satisfy the statutory requirements that the imported articles be marked in a conspicuous place, Customs will require

that both the shoes and the shoe box be marked with the country of origin (in the manner described below). The marking of the shoe box will immediately alert the ultimate purchaser of the true country of origin and eliminate any confusion caused by the symbols. Although 19 CFR 134.24(d)(3) states that if the container is normally opened by the ultimate purchaser prior to purchase, only the article need be marked, this regulation would not apply where Customs finds that the article itself is not conspicuously marked and that the marking of the container was necessary to satisfy the basic requirements of section 1304.

We also find that the presence of the UK/USA size labels on both the shoes and the box or the words "Action Shoes Dallas, Texas" on the box creates confusion as to the country of origin which can be alleviated by application of 19 CFR 134.46.

Holding: Due to the presence of symbols associated with a country other than the country of origin on the shoe and/or the shoe box, the country of origin marking at the base of the tongue or inside the heel is not conspicuous. This defect would be cured by an additional permanent country of origin marking on the outside of the box which is: (1) preceded by the words "Made in" or "Product of"; (2) placed either on the top of the lid or the side of the box—preferably on the side of the box containing information about the size and style of the shoe; and, (3) in lettering at least ⅛ inch high.

Also, due to the presence of words or geographic location (*e.g.* UK/USA on the size labels on the shoes and the shoe boxes or the words "Action shoes Dallas, Texas" on the boxes) the country of origin marking on the inside at the base of the tongue or on the inside of the heel does not satisfy the requirements of 19 CFR 134.46. This defect would be cured by placing a country of origin marking preceded by the words "Made in" or "Product of" in close proximity to and in letters of at least comparable size to such words.

Case I

In order to satisfy the statutory requirements, both ends of the shoe box must be permanently marked "Made in Korea" or "Product of Korea" in close proximity to and in at least comparable size letters to the UK and USA references. The shoes must also be permanently marked "Made in Korea" or "Product of Korea" in close proximity to and in at least comparable size letters to the UK/USA sizing labels.

Case II

In order to satisfy the statutory requirements, in addition to the country of origin markings on the shoes, both sides of the shoe box must be permanently marked "Made in Taiwan" or "Product of Taiwan" or other similar words in close proximity to and in at least comparable size letters (but not less than ⅛ inch high) to the words "Action Shoes Dallas, Texas".

Effective date: Merchandise entered for consumption or withdrawn from warehouse for consumption on or after March 1, 1986, is subject to the ruling.

U.S. Customs Service

Proposed Rulemakings

19 CFR Part 141

Proposed Customs Regulations Amendments Relating to Entry of Merchandise

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: The Tariff Act of 1930 allows the consignee of imported merchandise to designate a customs broker to make entry. Small shipments of merchandise having various consignees are more efficiently and effectively handled if consolidated into large shipments under a master bill of lading or master air waybill prepared by a foreign freight consolidator which covers the numerous individual packages in the shipment. The foreign freight consolidator normally consigns the consolidated shipment to a freight forwarder, courier service or other person in the U.S. This consignee is normally not the same consignee identified on the individual bills of lading or individual air waybills which make up the master bill of lading or master air waybill. When the consignee named in the master bill of lading or master air waybill appoints a broker of its own choosing to make entry, the actual consignees of the merchandise named in the individual bills are often frustrated in two respects. First, entry is made by a broker not of their choosing and, second, entry is often made at a port not of their choosing. Further, additional expenses may be incurred. This document proposes to amend the entry procedures to prevent frustration of the wishes of the actual consignees identified on the individual bills.

DATES: Comments must be received on or before February 24, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229. Comments relating to the information collection aspects of the proposal should be addressed to Customs, as noted above, and also the Office of Information and Regulatory Affairs, Atten-

496-724 O - 86 - 2

tion: Desk Officer for U.S. Customs Service, Office of Management and Budget, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Jerry Laderberg, Entry, Licensing, and Restricted Merchandise Branch, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

SUPPLEMENTARY INFORMATION:

BACKGROUND

A customs broker is a person who is licensed by the Customs Service to transact Customs business on behalf of importers and other persons. Section 484, Tariff Act of 1930, as amended (19 U.S.C. 1484), provides for the entry of merchandise. Section 484(a)(1)(C) provides that when an entry of merchandise is made, the required documentation shall be filed either by the owner or purchaser of the merchandise or, when appropriately designated by the owner, purchaser, or consignee of the merchandise, a broker. A problem has arisen with respect to the appointment of a broker by the consignee of consolidated shipments.

Small shipments of merchandise having various consignees are more efficiently and effectively handled if consolidated into a large shipment. Consolidated shipments to the U.S., usually by containers, have two sets of documents. One set of documents consists of a master bill of lading or master air waybill covering the container and its contents. Individual bills of lading or individual air waybills, also known as "house" bills of lading or "house" air waybills comprise the second set of documents. The master bill of lading or master air waybill is prepared by a foreign freight consolidator who ordinarily consigns the container to a freight forwarder, courier service or similar party in the U.S. The consignee designated by the foreign freight consolidator is normally not the same consignee identified on the individual bills of lading or individual air waybills which make up the master bill of lading or master air waybill. When the consignee named in the master bill of lading or master air waybill appoints a broker of its own choosing to make entry, the actual consignees of the merchandise named in the individual bills are often frustrated in two respects. First, entry is made by a broker not of their choosing and second, entry is often made at a port of entry not of their choosing. Further, additional expenses may be incurred.

To prevent the foregoing situation from happening, Customs proposes to amend § 141.11, Customs Regulations (19 CFR 141.11), relating to evidence of the right to make entry for importations by common carrier by adding a new paragraph (c) covering consolidated shipments. The proposal would provide that in the case of consolidated shipments by common carrier, entry will not be made by a broker appointed by the consignee named in the master bill of

lading or master air waybill, if (1) a consignee on any one of the individual bills of lading or individual air waybills which make up the master bill of lading or master air waybill, has designated another broker to make entry, or (2) any one of the individual bills of lading or individual air waybills indicates that entry will be made by the actual owner or purchaser. However, if the broker designated on an individual bill of lading or individual air waybill is contacted and fails to timely respond to make entry, the consignee named in the master bill of lading or master air waybill may disregard the designation and appoint a broker of its choosing to make entry. Under the proposal, the consignee named in the master bill of lading or master air waybill will submit with the entry filed with Customs a signed statement to the effect that none of the individual bills of lading or individual air waybills which make up the master bill of lading or master air waybill have designated a broker, or a different broker from the one identified in the master bill of lading or master air waybill, or have indicated that entry will be made by the actual owner or purchaser, or in the case of an actual designation, the designated broker was contacted and failed to timely respond to make entry. The statement may be stamped, typed or printed on the entry documentation provided to Customs. It will not be treated as a missing document for which a bond may be provided. If the signed statement is not submitted, entry will be made by the broker designated by the consignee of each individual bill of lading or individual air waybill which makes up the master bill of lading or master air waybill or by the actual owner or purchaser.

Because the proposed amendment applies only to consolidated shipments, it will not apply to those aspects of express delivery operations, courier service operations or similar delivery operations that do not involve consolidated shipments, or delivery operations that do not use individual house bills of lading or air waybills. Nor will it apply to any carrier where the shipper contractually agrees that the carrier is the consignee and may appoint a broker of its own choosing to make entry.

COMMENTS

Before adopting this proposal, consideration will be given to any written comments (preferably in triplicate) that are submitted timely to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 522), § 1.4, Treasury Department Regulations (31 CFR 1.4) and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), or regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

EXECUTIVE ORDER 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

REGULATORY FLEXIBILITY ACT

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that, if adopted, the proposed regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis requirement of 5 U.S.C. 603 and 604.

PAPERWORK REDUCTION ACT

This document is subject to the Paperwork Reduction Act. Accordingly, a copy has been submitted to the Office of Management and Budget for review and comment pursuant to 44 U.S.C. 3504(h). Public comments relating to the information collection aspects of the proposal should be addressed to Customs and to the Office of Management and Budget at the addresses set forth in the ADDRESS portion of this document.

DRAFTING INFORMATION

The principal author of this document was John E. Elkins, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

LIST OF SUBJECTS IN 19 CFR PART 141

Customs duties and inspection, Imports, Brokers.

AMENDMENTS TO THE REGULATIONS

It is proposed to amend Part 141, Customs Regulations (19 CFR Part 141), as set forth below.

PROPOSED AMENDMENTS

PART 141—ENTRY OF MERCHANDISE

1. It is proposed that the general authority citation for Part 141, Customs Regulations (19 CFR Part 141), continue to read as set forth below:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

2. It is proposed to amend § 141.11 by adding a new paragraph (c) to read as follows:

§ 141.11 Evidence of right to make entry for importations by common carrier.

* * * * * * *

(c) *Consolidated shipments by common carrier.* In the case of consolidated shipments by common carrier, entry shall not be made by a broker appointed by the consignee named in the master bill of lading or master air waybill, if (1) a consignee on any one of the individual bills of lading or individual air waybills, which makes up the master bill of lading or master air waybill, has designated on the individual bills of lading or individual air waybills another broker to make entry, or (2) any one of the individual bills of lading or individual air waybills indicates that entry will be made by the actual owner or purchaser. Except that, if the broker designated on the individual bill of lading or individual air waybill is contacted and fails to timely respond to make entry, the consignee named in the master bill of lading or master air waybill may disregard the designation and appoint a broker of its choosing to make entry. The consignee named in the master bill of lading or master air waybill shall submit with the entry a signed statement to the effect that none of the individual bills of lading or individual air waybills which makes up the master bill of lading or master air waybill have designated a broker, or a different broker from the one identified in the master bill of lading or master air waybill, or have indicated that entry will be made by the actual owner or purchaser, or in the case of an actual designation, the designated broker was contacted and failed to timely respond to make entry. The required statement may be stamped, typed or printed on the entry documentation provided to Customs. The signed statement shall not be treated as a missing document for which a bond may be provided. If the signed statement is not submitted, entry shall be made by the broker designated by the consignee of each individual bill of lading or individual air waybill which makes up the master bill of lading or master air waybill or by the actual owner or purchaser.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: December 9, 1985.
DAVID D. QUEEN,
Assistant Secretary of the Treasury.

19 CFR Parts 4, 6, 10, 12, 19, 54

Proposal to Eliminate Certain Information Collection Requirements From Customs Regulations

ACTION: Proposed rule.

SUMMARY: In accordance with the directives of the Paperwork Reduction Act, Customs has reviewed its regulations in an attempt to reduce or eliminate obsolete or burdensome regulatory inform-

tion collection requirements. That review revealed numerous collection requirements which Customs believes may no longer be necessary. This notice invites comments in regard to this matter before making a final decision as to the retention or deletion of these requirements.

DATES: Comments must be received on or before February 24, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to, and inspected at, the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Herb Geller, Duty Assessment Division, (202-535-4161), or Pat Barbare, Office of Inspection and Control (202-566-8151), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On June 10, 1983, a general notice was published in the Federal Register (48 FR 26831), which advised the public that in compliance with the Regulatory Flexibility Act (5 U.S.C. 601), Customs was undertaking a review of its regulations to identify those regulations having a significant economic impact on a substantial number of small entities and to seek ways of modifying procedures to reduce or eliminate obsolete or burdensome regulatory requirements. The initial comment period was to have closed on August 9, 1983, however, by notice published in the Federal Register on July 27, 1983 (48 FR 34061), an extension of the comment period was granted to October 11, 1983. Four comments were received in response to this notice. All respondents agreed with the idea of regulatory reduction. There were several specific suggestions for modifying existing regulations and one generalized comment endorsing regulatory reform but only if it could be accomplished without diminishing Customs enforcement and revenue collection capabilities.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), as part of Customs continuing effort to ensure that paperwork burdens are not imposed on the public unless the practical value of information sought is worth the burden of its collection, and after analysis of the comments received in response to the 1983 notice, Customs now proposes to amend the Customs Regulations (19 CFR Chapter 1), by deleting certain information collection requirements contained in Parts 4, 6, 10, 12, 19 and 54, Customs Regulations (19 CFR Parts 4, 6, 10, 12, 19, 54). Because of these proposed deletions, conforming changes would also be necessary to other sections of the regulations.

A list of those regulations proposed for deletion follows:

19 CFR section	Description
§ 4.41(a)	Application for permission to enter wrecked cargo.
§ 6.12(g)	Requirement to post a copy of schedule of charges for servicing aircraft at an airport.
§ 10.6(a)	Certificate of foreign shipper that boxes or barrels were made from American shooks or staves.
§ 10.6(b)	Certificate of box maker that boxes or barrels were made from American shooks or staves.
§§ 10.9 (g), (h)	Certificate of owner, importer, consignee or agent that processed articles entered are a portion of articles exported for processing that are covered by a certificate of registration.
§ 10.10	Statement of cameraman, shipper, or other person identifying films and stating that they were exposed abroad and are shipped for use as newsreel of current events abroad.
§ 10.35(b)	Declaration by importer of a model of women's wearing apparel that the article will be used solely as a model, etc.
§ 10.35(d)	Requirement to mark for identification purposes imported models of women's wearing apparel.
§ 10.50	Declaration of American artist residing temporarily abroad in support of duty-free entry of a work of art.
§ 10.53 (a), (b)	Declaration in connection with the entry of antiques.
§ 10.54(b)	Certificate of manager or other responsible employee of the Gobelin or other factory or producer establishing the character of the Gobelin or other hand-woven tapestry in support of duty-free entry.
§ 10.56(f)	Declaration of owner or consignee that vegetable oil has been rendered permanently unfit for use as food.
§ 10.58(a)	Requirement as to marking of bolting cloth for milling purposes in support of duty-free entry.
§ 10.64a	Declaration for withdrawal of fuel from a Customs bonded warehouse to be laden as aircraft supplies.
§ 10.66(a)(2), (b)	Declaration of foreign shipper that merchandise was exported from the U.S. for temporary use at an exhibition and is being returned.
§ 10.70(a)	Declaration in connection with the entry of purebred animals for breeding purposes.
§ 10.72	Declaration in connection with the entry of horses or mules imported solely for slaughter.
§ 10.73	Certificate of ultimate consignee of cows being imported solely for dairy purposes in support of claim for reduced rate of duty.
§ 10.74(a)	Owners descriptive list of domestic animals driven across boundary for pasturage.

19 CFR section	Description
§ 10.74(b)	Declaration in connection with the return of domestic animals previously driven across boundary for pasturage.
§ 10.79	Declaration of master of taking vessel in support of duty-free entry of products of American fisheries.
§ 10.82(a)(1)	Certificate of person making withdrawal of salt used in curing fish taken by an American vessel.
§ 10.82(a)(2)	Certificate of master and at least one other person employed on vessel in connection with the withdrawal of salt used for curing fish.
§ 10.82(a)(3)	Certificate of at least two persons employed on shore in curing fish with salt.
§ 10.82(b)	Certificate of person employed on shore curing fish with salt.
§ 10.90(a)	Application of importer for the importation of master records and metal matrices.
§ 10.90(b)	Statement evidencing agreement between importer and manufacturer concerning the use of master records and metal matrices.
§ 10.90(d)	Declaration of importer as to use of master records and metal matrices.
§ 10.93	Record of receipt by manufacturer, processor or dealer who enters, withdraws, or receives wool or hair under bond.
§ 10.94	Records of manufacturers or processor with respect to products or substances resulting from wool or hair.
§ 10.95 (a), (c), (f)	Records of manufacturer, processor or dealer pertaining to enumerated articles of wool or hair delivered from his premises.
§ 10.95(b)	Declaration of manufacturer, processor or dealer pertaining to delivery of wool or hair.
§ 10.96	Reports of use or transfer of wool or hair in violation of bond.
§ 10.98(e)	Report of smelting or converting plant pertaining to the use of copper-bearing fluxing material.
§ 10.106	Declaration of importer in connection with wheat unfit for human consumption.
§ 10.108(b)	Statement in connection with entry of articles previously imported into U.S. with duty paid, exported under lease, and now being reimported.
§ 10.110	Certificate for strategic materials acquired by the Commodity Credit Corporation as result of barter or exchange of agricultural commodities or products.
§ 10.134	Declaration by importer of intended use of merchandise imported under actual use provisions of tariff schedules.

19 CFR section	Description
§ 12.99	Declaration by importer or consignee in support of a permitted entry of a switchblade knife.
§ 19.16	Various reporting requirements relating to the operation of cigar manufacturing warehouses.
§ 54.6(a)	Statement of importer that articles in chief value of metal are to be used in such a manner which renders them fit only for recovery of the metal content.

COMMENTS

Before adopting this proposal, consideration will be given to any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.6, Treasury Department Regulations (31 CFR 1.6), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

REGULATORY FLEXIBILITY ACT

Pursuant to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* it is certified that, if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

EXECUTIVE ORDER 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

DRAFTING INFORMATION

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

PROPOSED AMENDMENTS TO THE REGULATIONS

It is proposed to amend Parts 4, 6, 10, 12, 19, and 54, Customs Regulations (19 CFR Parts 4, 6, 10, 12, 19, 54), as set forth below:

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The general authority citation for Part 4 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103.

2. It is proposed to amend § 4.41(a) by removing the words "written application for permission to enter the wrecked cargo", and inserting, in their place, the words, "entry on Customs Form 7501".

PART 6—AIR COMMERCE REGULATIONS

1. The general authority citation for Part 6 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1624, 49 U.S.C. 1474, 1509.

2. It is proposed to amend § 6.12(g) by removing the last sentence.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation for Part 10 continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1623, 1624.

2. It is proposed to revise the heading and text of § 10.6 to read as follows:

§ 10.6 Shooks and staves; claim for duty exemption.

An importer, seeking an exemption from duty on account of boxes or barrels made from American shooks or staves, must make such claim on Customs Form 3311 at the time of filing the entry. Upon receipt, from the district director at the port of exportation of the shooks and staves, of corroboration that the records of expor-

tation do not conflict materially with such claim, the exemption may be allowed. If the claim for an exemption is disallowed in full or in part, the importer may file a request within 15 days of the date of the district director's notice to him of any disallowance, for referral of the question to the Commissioner of Customs for review.

3. It is proposed to amend § 10.9 by removing paragraphs (g) and (h) and redesignating paragraphs (i), (j), (k), and (l) as (g), (h), (i), and (j), respectively.

4. It is proposed to amend Part 10 by removing § 10.10 and marking it "Reserved". It is also proposed to amend Part 10 by removing footnote 8 to § 10.10.

5. It is proposed to amend § 10.35 by removing paragraphs (b) and (d), and redesignating paragraph (c) as (b).

6. It is proposed to amend Part 10 by removing § 10.50 and marking it "Reserved". It is also proposed to amend Part 10 by removing footnote 45 to § 10.50.

7. It is proposed to amend § 10.53 by removing paragraphs (a) and (b) and redesignating paragraphs (c), (d), (e), (f), (g), (h), and (i) as (a), (b), (c), (d), (e), (f), and (g), respectively. It is further proposed that Part 10 be amended by removing footnote 48 to § 10.53.

8. In redesignated §§ 10.53 (b) and (c), and phrase, "paragraph (g)" is removed and, "paragraph (e)" is inserted, in its place.

9. In redesignated § 10.53(e)(6), the phrase, "paragraphs (a), (b) and (c)" is removed and, "paragraph (a)" is inserted, in its place.

10. It is proposed to amend § 10.54 by removing the "(a)" in front of the first paragraph and by removing paragraph (b).

11. It is proposed to amend § 10.56(f) by placing a period after the word "denatured" and removing the remainder of the paragraph, including the form.

12. It is proposed to revise § 10.58(a) to read as follows:

§ 10.58 Bolting cloths; marking.

(a) As a prerequisite to the free entry of bolting cloth for milling purposes under item 357.25, Tariff Schedules of the United States, the cloth shall be indelibly marked from selvage to selvage at intervals of not more than 4 inches with the words "bolting cloth expressly for milling purposes" in block letters 3 inches in height. Bolting cloths composed of silk imported expressly for milling purposes shall be considered only such cloths as are suitable for and are used in the act of process of grading, screening, bolting, separating, classifying, or sifting dry materials, or dry materials mixed with water, if the water is merely a carrying medium.

* * * * * * *

13. It is proposed to amend Part 10 by removing footnote 55 to § 10.58.

14. It is proposed to amend Part 10 by removing § 10.64a and marking it "Reserved".

15. It is proposed to amend § 10.66 by removing subparagraph (a)(2) and by redesignating subparagraphs (a)(3) and (a)(4) as (a)(2) and (a)(3), respectively.

16. It is also proposed to amend § 10.66(b) by removing the last sentence.

17. It is proposed to amend § 10.70 by removing paragraph (a) and by redesignating paragraph (b) as (a) and revising the section heading and first sentence to read, as follows:

§ 10.70 Purebred animals for breeding purposes; certificate.

(a) In connection with the entry of purebred animals for breeding purposes under item 100.01, Tariff Schedules of the United States, no claim for free entry shall be allowed in liquidation of the entry until the district director has received from the Department of Agriculture a certificate that the animal is purebred of a recognized breed and duly registered in a book of record recognized by the Secretary of Agriculture for that breed. * * *

18. It is also proposed to amend § 10.70 by redesignating paragraph (c) as (b).

19. It is proposed to amend Part 10 by removing footnote 64 to § 10.70.

20. It is proposed to amend Part 10 by removing § 10.72 and marking it "Reserved." It is also proposed to amend Part 10 by removing footnote 66 to § 10.72.

21. It is proposed to amend Part 10 by removing § 10.73 and marking it "Reserved." It is also proposed to amend Part 10 by removing footnote 67 to § 10.73.

22. It is proposed to revise the heading and text of § 10.74 to read as follows:

§ 10.74 Animals straying across boundary for pasturage; offspring.

When domestic animals for which free entry is to be claimed under item 100.03, Tariff Schedules of the United States, have strayed across the boundary line, they may be returned; together with their offspring, without entry if brought back within 30 days; otherwise entry shall be required. The owner of any such animal shall report its return to the nearest Customs offices and hold it for such inspection and treatment as may be deemed necessary by a representative of the Agricultural Research Service of the Department of Agriculture and any such arrival found not to have been so reported or held shall be subject to seizure and forefeiture pursuant to 18 U.S.C. 545.

23. It is proposed to amend Part 10 by removing footnote 68 to § 10.74.

24. It is proposed to revise § 10.78(a) to read as follows:

§ 10.78 Entry.

(a) No entry shall be required for fish or other marine products taken on the high seas by vessels of the U.S. or by residents of the

U.S. in undocumented vessels owned in the U.S. when such fish or other products are brought into port by the taking vessel, or are transferred at sea to another fishing vessel of the same fleet and brought into port.

* * * * * * *

25. It is proposed to amend Part 10 by removing § 10.79 and marking it "Reserved."

26. It is proposed to amend Part 10 by removing § 10.82 and marking it "Reserved."

27. It is proposed to revise § 10.83(a) to read as follows:

§ 10.83 Bond; cancellation; extension.

(a) If it shall appear to the satisfaction of the district director holding the bond referred to in § 10.80, that the entire quantity of salt covered by the bond has been duly accounted for, either by having been used in curing fish or by the payment of duty, the district director may cancel the charges against the bond. The district director may require additional evidence in corroboration of the proof of use produced.

* * * * * * *

28. It is proposed to amend § 10.90 by removing paragraphs (a), (b), and (d) and by redesignating paragraphs (c), (e), (f), and (g) as (a), (b), (c), and (d), respectively.

29. It is proposed to amend Part 10 by removing footnote 81 to § 10.90.

30. It is also proposed to amend newly designated paragraph 10.90(d) by removing the phrase, "If and when the application is approved" and changing the word "entries" to "Entries".

31. It is proposed to amend Part 10 by removing §§ 10.93 and 10.94 and marking them "Reserved." It is also proposed to remove footnote 86 to § 10.94.

32. It is proposed to amend § 10.95 by removing paragraphs (a), (b), (c), and (f) and by redesignating paragraphs (d) and (e) as (a) and (b), respectively.

33. It is proposed to amend Part 10 by removing § 10.96 and marking it "Reserved". It is also proposed to remove footnote 87 to § 10.96.

34. It is proposed to amend § 10.98 by removing paragraph (e).

35. It is proposed to amend Part 10 by removing § 10.106 and marking it "Reserved."

36. It is proposed to amend § 10.108 by removing the "(a)" in front of paragraph (a), and by removing paragraph (b).

37. It is proposed to amend Part 10 by removing § 10.110 and marking it "Reserved." It is also proposed to remove footnote 103 to § 10.110.

38. It is proposed to amend § 10.134 by removing the words, "filing with the entry for consumption or for warehouse a declaration as to the intended use of the merchandise, or by".

39. It is proposed to revise § 10.136 to read as follows:

§ 10.136 Suspension of liquidation.

Liquidation of an entry covering merchandise pursuant to § 10.134, shall be suspended until proof of use is furnished or the 3-year period allowed for production thereof has expired.

40. It is proposed to amend § 10.139 by removing the phrase, "the declaration of intent required by § 10.134" and inserting, in its place, "an entry pursuant to § 10.134".

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for Part 12 is revised to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624. §§ 12.105–12.109 also issued under 19 U.S.C. 2094. §§ 12.110–12.117 also issued under 7 U.S.C. 136 *et seq.* §§ 12.118–12.127 also issued under 15 U.S.C. 2601 *et seq.;*

§ 12.1 also issued under 21 U.S.C. 371(b);
§ 12.3 also issued under 7 U.S.C. 135h, 21 U.S.C. 381(b);
§ 12.4 also issued under 21 U.S.C. 381(b);
§ 12.6 also issued under 7 U.S.C. 1854, 19 U.S.C. 1303;
§ 12.10 also issued under 7 U.S.C. 151–162;
§ 12.15 also issued under 19 U.S.C. 1558;
§ 12.16 also issued under 7 U.S.C. 1592(b);
§§ 12.21–12.23 also issued under 42 U.S.C. 262;
§ 12.26 also issued under 18 U.S.C. 42;
§ 12.28 also issued under 18 U.S.C. 42, 19 U.S.C. 1527;
§ 12.34 also issued under 19 U.S.C. 1202 (Sch. 7, 9A, hdnote 1);
§ 12.37 also issued under 27 U.S.C. 203;
§ 12.39 also issued under 19 U.S.C. 1337, 1623;
§§ 12.40–12.41 also issued under 19 U.S.C. 1305;
§§ 12.42–12.44 also issued under 19 U.S.C. 1307;
§ 12.73 also issued under 19 U.S.C. 1484, 42 U.S.C. 7522, 7601;
§ 12.85 also issued under 19 U.S.C. 1623, 46 U.S.C. 4302, 4306, 4310;
§§ 12.95–12.103 also issued under 18 U.S.C. 545.

2. All other statutory authority cited at the end of various sections in Part 12 is removed.

3. It is proposed to amend Part 12 by removing § 12.99 and marking it "Reserved."

PART 19—CUSTOMS WAREHOUSES, CONTAINER STATIONS AND CONTROL OF MERCHANDISE THEREIN

1. The general authority citation for Part 19 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1624.

2. It is proposed to amend Part 19 by removing § 19.16 and marking it "Reserved."

PART 54—CERTAIN IMPORTATIONS TEMPORARILY FREE OF DUTY

1. The authority citation for Part 54 is revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624.

2. It is proposed to amend § 54.6 by removing paragraph (a) and by redesignating paragraphs (b), (c), and (d) as (a), (b), and (c), respectively.

3. It is also proposed that in redesignated paragraph (a), the phrase "paragraph (c)" be removed and "paragraph (b)" inserted, in its place.

4. It is proposed to amend Part 54 by removing footnote 1 to § 54.6.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: December 12, 1985.

DAVID D. QUEEN,
Acting Assistant Secretary of the Treasury.

ELEKTROSCHMELZWERK KEMPTEN, GMBH, ET AL., PETITIONERS *v.* UNITED STATES INTERNATIONAL TRADE COMMISSION, RESPONDENT

(Appeal No. 85-1863)

W. SCHLAFHORST & CO., ET AL., PETITIONERS *v.* UNITED STATES INTERNATIONAL TRADE COMMISSION, RESPONDENT

Before FRIEDMAN, RICH, and DAVIS, *Circuit Judges.*

ORDER [1]

Surface Technology, Inc. (STI) filed a complaint alleging unfair acts and methods of competition in violation of § 337 of the Tariff Act of 1930 before the International Trade Commission. Elektroschmelzwerk Kempten, GMBH (ESK) and W. Schlafhorst and Co. (Schlafhorst) participated as respondents before the ITC. Ultimately the Commission found no violation of § 337. All three parties have filed appeals from the ITC's determination.

Pursuant to 19 U.S.C. § 1337(c), a party adversely affected by a final determination of the ITC may appeal to this court.

In view of the ITC's finding of no violation of § 337 by ESK and Schlafhorst, these parties are without standing to appeal. *American Telephone and Telegraph Company* v. *U.S. International Trade Commission,* 626 F.2d 841 (CCPA 1980). Accordingly, their appeals will be dismissed.

ESK and Schlafhorst are entitled to participate in STI's appeal before this court in which they may raise any claim in support of the ITC's determination of no violation. *Krupp International, Inc.* v. *U.S. International Trade Commission,* 626 F.2d 844 (CCPA 1980). This court, however, will not review those portions of the presiding officer's determinations on which the Commission has taken no position. *Beloit* v. *Valmet Oy,* 742 F.2d 1454 (Fed. Cir. 1984). Accordingly,

It is ordered:

(1) ITC's motions to dismiss cross-appeal Nos. 85-1862 and 85-1863 are granted.

(2) ESK's and Schlafhorst's motions to intervene as appellees in appeal No. 85-1163 are granted.

---

[1] This Order, originally issued on April 10, 1985, as an unpublished order, is reissued for publication, with correction of typographical errors.

(3) ESK's motion to consolidate appeal Nos. 85-1862 with 85-1863 and STI's motions to intervene in appeal Nos. 85-1862 and 85-1863 are rendered moot.

(4) The Clerk shall set a revised briefing schedule.

Court No. 85-11-01578

Before WATSON, *Judge.*

Memorandum Opinion and Order

(Decided December 17, 1985)

Olsson and Frank, P.C., (Richard L. Frank, and *David F. Weeda* on the brief), for the plaintiffs.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, (*Platte B. Moring III*), for the defendant.

Busby, Rehm, and Leonard P.C., (Will E. Leonard, Jonathan Hemenway Glazier and *Munford Page Hall II* on the brief), for the defendant-intervenors.

WATSON, *Judge:* The plaintiff importers and processors of pistachio nuts brought this action for declaratory and injunctive relief against a ruling of the Customs Service, the effect of which would be that the containers of pistachio nuts which they sell must be marked to show the country of origin of the nuts.

The ruling in question, T.D. 85-158, was published on September 18, 1985, (50 Fed. Reg. 37842) and determined that roasting and other treatment of imported pistachio nuts did not result in their substantial transformation. Substantial transformation is the standard used by the Customs Service to determine whether articles are exempt from the general requirement of Section 304 of the Tariff Act of 1930, as amended, (19 U.S.C. § 1304) that all articles of foreign origin be marked to indicate the country of origin.

The effective date of the ruling in question was postponed for two months and is now scheduled to go into effect on December 18,

1985 (50 Fed. Reg. 42683, October 22, 1985). Further postponement of the effective date was denied by the Commissioner of Customs on November 8, 1985.

On November 12, 1985 plaintiffs commenced this action, which, together with the government's cross-motion to dismiss, has been given an expedited schedule of briefing. A hearing on all pending matters was held on December 12, 1985.

As a result, the court has determined that the action does not satisfy the jurisdictional requirements of 19 U.S.C. § 1581(h), the only jurisdictional basis available to plaintiffs for judicial review prior to the importation of the affected articles.

The provision of 19 U.S.C. § 1581(h) reads as follows:

> (h) The Court of International Trade shall have exclusive jurisdiction of any civil action commenced to review, prior to the importation of the goods involved, a ruling issued by the Secretary of the Treasury, or a refusal to issue or change such a ruling, relating to classification, valuation, rate of duty, marking, restricted merchandise, entry requirements, drawbacks, vessel repairs, or similar matters, but only if the party commencing the civil action demonstrates to the court that he would be irreparably harmed unless given an opportunity to obtain judicial review prior to such importation.

The action described in 19 U.S.C. § 1581(h) is also controlled by the terms of 19 U.S.C. §§ 2639(b) and 2643(c)(4) which read as follows:

> 19 U.S.C. § 2639
>
> * * * * * * *
>
> (b) In any civil action described in section 1581(h) of this title, the person commencing the action shall have the burden of making the demonstration required by such section by clear and convincing evidence.
>
> 19 U.S.C. § 2643(c)
>
> * * * * * * *
>
> (4) In any civil action described in section 1581(h) of this title, the Court of International Trade may only order the appropriate declaratory relief.

It is clear that this dispute centers on the consequences of a ruling, the effect of which is sufficiently certain to represent a genuine legal dispute. This disposes of the government's argument that the matter is not yet sufficiently related to a specific import transaction to obtain jurisdiction under subsection (h). In this case, the consequences of the ruling will be felt by all importations of pistachios made after December 18, 1985.

On the question of the ripeness of the dispute, the case of *Pagoda Trading Co.* v. *United States,* 6 CIT 296, 577 F. Supp. 22 (1983) is easily distinguished. In that unsuccessful attempt to obtain pre-importation judicial review, it was not clear that the classification

ruling involved would apply to the articles which plaintiff was going to import. Here there is no such doubt; the legal dispute is sufficiently concrete, and it is the failure to show irreparable harm which is the impediment to jurisdiction.

The general appropriateness of 19 U.S.C. § 1581(h) also disposes of plaintiff's attempt to assert an alternative jurisdictional basis under 19 U.S.C. § 1581(i), the residual jurisdiction of this court. It is plain that an action designed to obtain judicial review of a ruling prior to importation cannot avoid the special provision of § 1581(h) by stating a cause of action under the court's residual jurisdiction. No claimant would willingly choose the strictures of 1581(h) if they could be avoided by bringing the action under 1581(i), and the former provision would become a dead letter. See generally, *United States* v. *Uniroyal, Inc.*, 69 CCPA 179; 687 F.2d 467 (1982).

The fact remains that for those who consider themselves sufficiently aggrieved by rulings to seek judicial review prior to importation of the articles involved, 19 U.S.C. § 1581(h) is the proper jurisdictional vehicle. The question then becomes whether the harm of the ruling is sufficient to justify an exception to the normal post-importation procedures for obtaining relief.

In this action the harm is alleged to be the cost of conforming to the country-of-origin labeling requirements. The court has carefully examined the affidavits submitted by the parties on this point. It is the considered judgment of the court that the costs of conforming to the ruling have not been shown to be of such magnitude as to constitute a clear threat to the profitable continuation of a prudently operated business. The court has not been persuaded that the use of adhesive labels to add the country of origin is an unacceptable or impractical interim measure. This method would allow the use of current label inventories until they are depleted.

In any event, even the prospect of having to print completely new labels, was not sufficiently connected to injury to the overall financial health of the plaintiffs to demonstrate the requisite harm.

In sum, the court has not been persuaded that the normal post-importation methods of obtaining judicial relief will be inadequate to deal with the grievances raised by plaintiffs.

For these reasons the court decides to grant the government's cross-motion to dismiss the action.

In this disposition of the action, the court does not reach the merits of plaintiffs' claims that the ruling was contrary to law, arbitrary, capricious and discriminatory.

For the reasons given above it is hereby

Ordered that defendant's motion to dismiss be, and the same hereby is, granted.

ERRATA

FRANK E. ALLEN *v.* DONALD R. REGAN, SECRETARY OF THE TREASURY, WILLIAM VON RAAB, COMMISSIONER OF CUSTOMS, AND UNITED STATES CUSTOMS SERVICE (Court No. 84-11-01655, Slip Op. 85-126)

Treasury Decisions

(T.D. 86-2)

Revocation of Harbor Weighers Incorporated as a Customs Approved Public Gauger

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of revocation.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), Harbor Weighers Incorporated, P.O. Box 485, Wilmington, California 90748, was approved to gauge imported petroleum and petroleum products on March 23, 1977. Notice of the approval was published as T.D. 77-97. Harbor Weighers recently informed Customs that it will discontinue its services as a public gauger.

Accordingly, the approval of Harbor Weighers Incorporated to gauge imported petroleum and petroleum products in all Customs Districts is revoked.

EFFECTIVE DATE: December 31, 1985.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington D.C. 20229 (202-566-2446).

Dated: December 30, 1985.

Technical Services Division.

(T.D. 86-3)

Approval of Captain G. McKay & Sons Marine, Inc., to Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of approval.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), Captain G. McKay & Sons Marine, Inc., 9 Park Lane, Galveston, Texas 77551, has applied to Customs for approval to

gauge imported petroleum and petroleum products. It has been determined that Captain G. McKay & Sons Marine, Inc., meets all of the requirements to be a Customs approved public gauger.

Accordingly, the application of Captain G. McKay & Sons Marine, Inc., to gauge imported petroleum and petroleum products in the Customs Districts of Houston, Texas, Port Arthur, Texas, and Laredo, Texas, is approved.

EFFECTIVE DATE: January 1, 1986.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington D.C. 20229 (202-566-2446).

U.S. Customs Service

Treasury Decisions

(T.D. 86-4)

Revocation of Lowell L. Glenn (All-Glenn's, Inc.) as a Customs Approved Public Gauger

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of revocation.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), Lowell L. Glenn (All-Glenn's, Inc.) of 9952 Spinnaker Drive, Huntington Beach, California 92646, was approved to gauge imported petroleum and petroluem products in all Customs districts on May 9, 1979. Notice of approval was published as T.D. 79-140. One of the conditions which each public gauger must comply with in order to be approved and to keep approval in force is to notify Customs, in writing, within 60 days of any change in name, address, ownership, or financial condition. After exhausting all feasible means to establish contact with Mr. Glenn, Customs has been unable to locate him or even to determine if he is still in business.

Accordingly, the approval of Lowell L. Glenn (All-Glenn's, Inc.) to gauge imported petroleum and petroleum products in all Customs Districts is revoked.

EFFECTIVE DATE: December 31, 1985.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2446).

Chief, Technical Section,
Technical Services Division.

(T.D. 86-5)

Recordation of Trade Name: "UNITEK CORPORATION"

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of recordation.

SUMMARY: On June 6, 1985, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "UNITEK CORPORATION" was published in the Federal Register (50 FR 23866). The notice advised that before final action was taken on the application, consideration would be given to any relevant data, views, or arguments submitted in opposition to the recordation and received not later than August 5, 1985.

Unipacific Corporation, a California corporation, commented in opposition to recordation of the trade name, citing concern that "UNITEK CORPORATION" is confusingly similar to Unipacific Corporation's "UNITECH" trademark registered on the Principal Register of the U.S. Patent and Trademark Office (Reg. No. 1,222,480), used for consumer electronic equipment, namely, portable stereo radios, mini-portable cassette players, FM Converter cassette modules, stereo headphones and televisions.

We find that the two trademarks lawfully co-exist. Therefore, genuine articles bearing the "UNITECH" trademark shall not be seized or detained as confusingly similar to "UNITEK CORPORATION."

Accordingly, as provided in section 133.14, Customs Regulations (19 CFR 133.14), the name "UNITEK CORPORATION" is recorded as the trade name used by Unitek Corporation, a corporation organized under the laws of the State of California, located at 2724 South Peck Road, Monrovia, California 91016. The trade name is used in connection with the developing and marketing of products manufactured in the United States for orthodontists, endodontists and other dental specialists, as well as for general dentists and dental laboratories.

(T.D. 86-6)

Approval of Halcyon Transport Corporation to Gauge Imported Petroleum and Petroleum Products in Additional Customs Districts

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of approval to gauge in additional districts.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), Halcyon Transport Corporation was approved to gauge imported petroleum and petroleum products in the Houston District on February 10, 1984, under T.D. 84-44. Recently, Halcyon Transport Corporation notified Customs that its area of operations had expanded, and requested that its approval be modified to include cities within the Customs Districts of Port Arthur, Texas, and New Orleans, Louisiana. Since Halcyon Transport Corporation has complied with all requirements, Customs is granting this request.

Accordingly, Halcyon Transport Corporation is approved to gauge imported petroleum and petroleum products in the Customs Districts of Houston, Texas, Port Arthur, Texas, and New Orleans, Louisiana.

EFFECTIVE DATE: January 6, 1986.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229. (202-566-2446).

DATED: January 6, 1986.

ROGER J. CRAIN,
Chief, Technical Section,
Technical Services Division.

(T.D. 86-7)

This notice limits the decision in Appeal No. 85-670, decided June 14, 1985, holding that certain sewing machine needles may be entered free of duty under the Generalized System of Preferences.

DEPARTMENT OF THE TREASURY,
OFFICE OF THE COMMISSIONER OF CUSTOMS,
Washington, D.C., December 20, 1985.

In *The Torrington Co.* v. *United States*, —— CAFC ——, No. 85-670 (Fed. Cir. June 14, 1985), the Court of Appeals for the Federal Circuit affirmed a Court of International Trade decision holding that certain industrial sewing machine needles made in Portugal

are entitled to duty-free entry under the Generalized System of Preferences. The court held that the raw material imported into Portugal, wire, was substantially transformed into new and different articles of commerce, swaged needle blanks, and that the swaged needle blanks were then substantially transformed into other new and different articles of commerce, sewing machine needles. As a result, the value of the swaged needle blanks was includable in the value of the materials produced in the beneficiary developing country (Portugal) for purposes of section 503(b)(2) of the Trade Act of 1974, 19 U.S.C. 2463(b)(2). Since the sum of the value of the materials produced in Portugal plus the direct costs of processing operations performed in Portugal therefore amounted to more than 35 percent of the appraised value of the imported sewing machine needles, duty-free treatment was applied.

The United States Customs Service disagrees with the court's determination that the process whereby sewing machine needles were produced from the swaged needle blanks constituted a substantial transformation into new and different articles of commerce. The parties to the case stipulated that in the form of swaged needle blanks, the articles were already dedicated for use solely as sewing machine needles with a predetermined blade diameter, and that in the majority of cases, a particular type of swaged needle blank became only a single particular type of needle. Slip op. at 16. Thus, the articles already possessed their inherent character and use as swaged needle blanks; they did not acquire those qualities as a result of the simple refinement made to them once they were in blank form. Therefore, no substantial transformation occurred, so the value of the swaged needle blanks should not have been includable in the value of the materials produced in Portugal for purposes of meeting the 35 percent value-content requirement of the Generalized System of Preferences.

Accordingly, the *Torrington* decision shall be applied only in those instances in which the factual situation conforms to the one on which the decision is based.

JOHN P. SIMPSON,
for Commissioner of Customs.

U.S. Court of Appeals for the Federal Circuit

(Appeal No. 85-2473)

UNION MANUFACTURING CO., INC., APPELLANT-RESPONDENT *v.* U.S. INTERNATIONAL TRADE COMMISSION, APPELLEE-PETITIONER

Paul T. Meiklejohn and *John M. Calimafde*, Hopgood, Calimafde, Kabil, Blaustein & Judlowe, of New York, New York, represented appellant.

William E. Perry, *Lyn Schlitt* and *Michael P. Mabile*, Office of the General Counsel, United States International Trade Commission, of Washington, D.C., represented appellees.

Appealed from: United States International Trade Commission.

(Appeal No. 85-2473)

UNION MANUFACTURING CO., INC., APPELLANT-RESPONDENT, *v.* U.S. INTERNATIONAL TRADE COMMISSION, APPELLEE-PETITIONER, on motion to dismiss

Before MARKEY, *Chief Judge*, NEWMAN and BISSELL, *Circuit Judges*.

NEWMAN, *Circuit Judge*.

ORDER

The motion of the United States International Trade Commission (ITC) to dismiss this appeal for lack of jurisdiction is denied.

BACKGROUND

Union Manufacturing Co. (Union) asserts that it has for five years been seeking relief from the importation from Korea of confusingly similar and often-defective copies of its vacuum bottles. On October 15, 1981 the ITC, pursuant to 19 U.S.C. § 1337, instituted an investigation based on a complaint filed by Union. Twelve Korean firms, including Han Baek Trading Co., Ltd. (Han Baek), were named as respondents to the investigation. Investigation No. 37-TA-108, *Certain Vacuum Bottles and Components Thereof*, 45 Fed. Reg. 53,543 (1981).

On August 3, 1982 the Commission's administrative law judge (ALJ) issued a recommended determination that the named respondents had violated section 337 of the Tariff Act of 1930. This determination was based on findings of common law trademark infringement and false designation of origin in connection with the importation into and sale within the United States of the vacuum bottles, the effect or tendency of which was to destroy or substantially injure an efficiently and economically operated United States industry.

The ITC rejected the ALJ's recommended determination in a Notice of Termination published on October 29, 1982, *In re Certain Vacuum Bottles and Components Thereof,* 219 USPQ 637 (U.S. Int'l Trade Comm'n 1982), on the basis that Union had not proven by survey evidence that its vacuum bottle design had acquired a secondary meaning. Union filed a Petition for Reconsideration on November 11, 1982, and a Motion for Relief from the ITC's Order on March 23, 1983, both of which were denied by the Commission on May 24, 1983.

Based on new evidence of consumer confusion showing, *inter alia,* that more than eighty additional imported vacuum bottles were mistakenly returned to Union because they were defective, Union subsequently requested a new investigation. The ITC denied Union's request on February 9, 1984, stating that "eighty returned vacuum bottles is at most evidence that 80 people associate the design of the vacuum bottle with Union", and not sufficient proof of secondary meaning.

On learning of the first ITC action, Union filed suit in October 1982 against Han Baek in the Southern District of New York, alleging false designation of origin and trademark infringement pursuant to section 43(a) of the Lanham Act, 15 U.S.C. § 1125(a). On June 7, 1984, a jury found for Union on the false designation of origin claim and for Han Baek on the trademark infringement claim. *Union Mfg. Co., Inc.* v. *Han Baek Trading Co.,* 224 USPQ 228 (S.D.N.Y. 1984). On July 10, 1984 the district court entered judgment enjoining Han Baek from importing the offending vacuum bottles into the United States and further ordered Han Baek to recall all infringing bottles sold during the preceding year. (Union advises that Han Baek did not comply with this order or with an order of contempt.)

Han Baek appealed to the U.S. Court of Appeals for the Second Circuit. On April 4, 1985 the Second Circuit vacated the district court's judgment on the false designation of origin claim, on the ground that the jury had been improperly instructed. *Union Mfg. Co., Inc.* v. *Han Baek Trading Co., Ltd.,* 763 F.2d 42 (corrected opinion), 226 USPQ 12 (uncorrected opinion) (2d Cir. 1985).

The Second Circuit also held that ITC decisions in trademark and unfair competition cases are to be accorded *res judicata* effect, although that effect would be applied only prospectively to Union.

Id. at 44-46, 226 USPQ at 13-15. The Second Circuit observed that Union had not appealed the adverse ITC decisions at the time they were made, and suggested that Union appeal the ITC decisions to this court, stating in its corrected opinion that:

> [S]ince at the time of that [ITC] judgment there was no statutory time limit on appeals from ITC determinations, *SSIH Equipment S.A.* v. *United States International Trade Commission*, 673 F.2d 1387, 1390-91 (C.C.P.A. 1982), Union might still be able to obtain review in the Federal Circuit unless that Court concludes either that a recently enacted statute of limitations applies to bar an appeal at this time, or that an appeal is barred by laches * * *. Under these circumstances, we will direct the District Court to stay further proceedings for thirty days to afford Union an oportunity to pursue an appeal of the ITC decision to the Federal Circuit, and, if an appeal is promptly sought, until the appeal is decided. If Union fails to seek review in the Federal Circuit within thirty days or if the Federal Circuit adjudicates the appeal on its merits, the District Court shall dismiss the complaint. If, on the other hand, the appeal, though taken within thirty days of this decision, is not adjudicated on its merits, then the District Court shall vacate the stay and retry the case.

Id. at 46 (footnote omitted).

Union duly filed the suggested appeal in this court within thirty days of the Second Circuit decision. The ITC now moves to dismiss the appeal as untimely, relying on 19 U.S.C. § 1337(c) 1984)[1] which provides in relevant part:

> Any person adversely affected by a final determination of the Commission under subsection (d), (e), or (f) of this section may appeal such determination, within 60 days after the determination becomes final, to the United States Court of Appeals for the Federal Circuit for review in accordance with chapter 7 of Title 5.

The ITC contends that the Commission determination was final on either October 29, 1982 or May 24, 1983, and that Union is barred by the sixty day statutory time limit.

Union argues in opposition to the motion that this statutory time limit was not enacted until 1984 and does not have retroactive effect. Union asserts that it should not be deprived of its appellate rights when the statute itself is silent on the point, and that the interest of justice requires that doubt be resolved in favor of permitting it to appeal. Union argues that its appeal is in accordance with the decision of the Second Circuit, that it had no reason to appeal earlier, and that acceptance of the appeal would implement the request of the Second Circuit and facilitate resolution of this long-standing matter.

[1] Technical Amendments to the Federal Courts Improvement Act of 1982, Pub. L. No. 98-620, § 413, 98 Stat. 3335, 3362 (1984).

ANALYSIS

I

By the Customs Court Act of 1980 Congress deleted the sixty day time limit for appeals from final determinations of the ITC.[2] In *SSIH Equipment S.A.* v. *U.S. Int'l Trade Comm'n,* 673 F.2d 1387, 1391, 213 USPQ 529, 532 (CCPA 1982), the Court of Customs and Patent Appeals held that the statute must be applied in accordance with its terms, and therefore that "there is no fixed time limit on appeals from final determinations of the Commission".

Thus no statutory time limit for appeals was in effect at the time of the ITC's denial of Union's requests for relief. The sixty day limit was added to 19 U.S.C. § 1337(c) by amendment enacted on November 11, 1984. At that date Union had received a favorable jury verdict in the district court, and Han Baek's appeal to the Second Circuit was pending.

The statute is silent on the intended effect of the amendment on unappealed ITC decisions issued prior to November 11, 1984, and it is silent as to its effective date. The legislative history sheds no light on this question, although it plainly states Congress' desire to reinsert "the original 60 day time-period for taking an appeal from a determination of the International Trade Commission". H.R. Rep. No. 98-619, 98th Cong., 2d Sess. 1, 4, *reprinted in* 1984 U.S. Code Cong. & Ad. News 5708, 5796.

The ITC argues that Union's right to appeal the ITC's determinations was extinguished no later than sixty days after November 11, 1984. It argues that under the principle of *Sohn* v. *Waterson,* 84 U.S. (17 Wall.) 596, 600 (1873), the limitation for previously accrued actions runs from the effective date of the later-enacted statute. Although the statute here is silent as to its effective date, the ITC argues that it is the date of enactment.

The *Sohn* rule has often been followed, as a modification of the general rule that statutes that imposed limits where none had existed should be construed only prospectively, unless the statutory language is specifically to the contrary or if there is a necessary implication to contrary effect. *Harvey* v. *Tyler,* 69 U.S. (2 Wall.) 328, 347 (1864).

Subsequent decisions of the Supreme Court have made clear that neither rule need be mechanically applied. The Court has frequently affirmed the power of the legislature to pass statutes of limitations for periods less than those prescribed at the time a cause of action arose, *see, e.g., Koshkonong* v. *Burton,* 104 U.S. 668, 675 (1881), but the Court has consistently emphasized that any shortened time period must be

> subject to the fundamental condition that a reasonable time, taking all the circumstances into consideration, be given by

[2] Customs Court Act of 1980, Pub. L. No. 96-417, § 604, 94 Stat. 1727, 1744 (1980).

> the new law for the commencement of an action before the bar takes effect.

In *In re Brown,* 135 U.S. 701, 707 (1890), the Court elaborated upon the requirement that the shortened time period be "reasonable", noting:

> What would be reasonable in one class of cases would be entirely unreasonable in another.
>
> It is necessary, therefore, to look at the nature and circumstances of the case before us, and of the class of cases to which it belongs.

Again in *Wilson* v. *Iseminger,* 185 U.S. 55, 63 (1902), the Court stated that the time allowed cannot be "manifestly so insufficient that the statute becomes a denial of justice". *See also Terry* v. *Anderson,* 95 U.S. 628, 633 (1877) ("the question is one of reasonableness" and "for what is reasonable in a particular case depends upon its particular facts").

The ITC asserts that our decision is controlled by *Bradley* v. *School Board of Richmond,* 416 U.S. 696, 715 (1974), that held "even where the intervening law does not explicitly recite that it is to be applied to pending cases, it is to be given recognition and effect". *Bradley* did not involve the retroactive application of a statute of limitations but rather the applicability of a new attorneys fee statute enacted while a case was pending before the Court of Appeals.

The Court was careful to state that its decision in *Bradley* did not "purport[] to hold that courts must always thus apply new laws to pending cases in the absence of clear legislative direction to the contrary", and that exceptions " 'had been made to prevent manifest injustice,' citing *Greene* v. *United States,* 376 U.S. 149 (1964)". *Id.* at 715, 716 (footnote omitted). When the statute is silent, the courts may determine the reasonableness of applying new statutes of limitations to the specific circumstances involved. In the case before us the statute is silent as to both existing appeal rights and effective date. In this statutory silence, we are not required to adopt an inflexible interpretation that extinguishes all preexisting opportunities for appeal, whatever the circumstances.

We interpret the silence of Congress as intending that a just transition shall ensue. In implementation of the tradition of enabling judicial review when feasible, we hold that Union's procedure was not unreasonable under the circumstances, and that its appeal is not barred by the statute.

We therefore consider whether Union's appeal is barred by laches. As dicussed *supra,* Union was proceeding with a jury trial before the United States district court. In reliance on the statute then in effect and reinforced by the decision in *SSIH,* Union was subject to no statutory time limit within which to appeal the ITC's 1982 and 1983 determinations. In February 1984 the ITC denied

Union's request for a new investigation, and in June 1984 the jury found in Union's favor on its section 43(a) claim; Han Baek was enjoined and held in contempt. When the 60-day limit was enacted on November 11, 1984, and on the date 60 days thereafter that the ITC says was Union's last chance to appeal, the Second Circuit had not decided the appeal from the jury verdict.

The Second Circuit recognized the possibility that this court would accept Union's appeal as timely. The ITC has not argued that it was prejudiced by Union's delay in filing this appeal. *See Leinoff* v. *Louis Milona & Sons, Inc.*, 726 F.2d 734, 741, 220 USPQ 845, 850 (Fed. Cir. 1984). In view of all the circumstances, we conclude that this action is not barred by laches.

II

The ITC agrees that its October 29, 1982 and May 24, 1983 adverse decisions are final determinations. The ITC argues, however, that the February 9, 1984 decision is not a final determination under subsection (d), (e), or (f) of section 1337 and therefore is not appealable pursuant to § 1337(c). The ITC moves dismissal of that portion of the appeal.

We deny this motion, without prejudice to its renewal at argument on the merits. From the limited record before us, it appears that the facts are closely related. We think it premature to bar any requisite review of ancillary material. *Refractarios Monterrey, S.A.* v. *Ferro Corp.*, 606 F.2d 966, 970 n.10, 203 USPQ 568, 572 n.10 (CCPA 1979), *cert. denied*, 445 U.S. 943, 205 USPQ 488 (1980). *See also American Telephone and Telegraph Co.* v. *U.S. Int'l Trade Comm'n*, 626 F.2d 841, 842, 206 USPQ 222, 223 (CCPA 1980) ("court will consider evidentiary matters associated with statutory final determinations"). In *SSIH*, 673 F.2d at 1389-90, 213 USPQ at 530-32, the CCPA held that the denial of a motion to reopen the record to consider new evidence is appealable. To the extent that the denial of a reinvestigation is related to the prior final determination on appeal, it is premature for us to decide whether the interests of justice and of economy of litigation are served if the February 9, 1984 ITC decision is insulated from all scrutiny.

Accordingly, IT IS ORDERED:

(1) Petitioner's motion to dismiss this appeal as untimely is denied.

(2) Petitioner's motion to dismiss that portion of the appeal concerning the February 9, 1984 decision of the ITC is denied without prejudice.

(3) Appellant's brief is due 60 days from the date of its receipt of this Order.

DATED: December 17, 1985.

(Slip Op. 85-129)

VICTOR A. CAVAZOS, A/C CONSTRUCTIONES PROTEXA, S.A., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82-11-01600

Before: RE, *Chief Judge.*

Memorandum Opinion and Order

[Defendant's motion to dismiss granted; action dismissed.]

(Decided December 27, 1985)

Stein Shostak Shostak & O'Hara (Marjorie M. Shostak), for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch (*Veronica A. Perry*), for the defendant.

RE, *Chief Judge*: In this action, the plaintiff, Victor A. Cavazos, challenges the refusal of the Customs Service to reliquidate certain tractors and parts entered at the port of Laredo, Texas. The Customs Service classified the merchandise as "[t]ractors * * * whether or not equipped with power take-offs, winches, or pulleys, and parts of such tractors: other," under item 692.3522, TSUS. Plaintiff contests this classification, and contends that the merchandise is entitled to be entered duty-free under item 800.0035, TSUS, as "[p]roducts of the United States when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means while abroad."

Pursuant to Rule 12(b)(5) of the Rules of this Court, the defendant has moved to dismiss the action for failure to state a claim upon which relief may be granted. Plaintiff opposes the motion, and asks that the matter be heard on the merits.

Since plaintiff has failed to state a claim upon which relief may be granted, the action is dismissed.

On August 8, 1980, plaintiff, the importer of record, received at the port of Laredo, Texas, a shipment of merchandise, which was described on the customs invoices as "tractors and parts thereof."

On the consumption entry form, plaintiff sought duty-free treatment of the tractors and parts under item 800.0035 as "American goods returned." The Customs Service did not grant duty-free treatment, and classified the merchandise under item 692.3522, TSUS, as tractors and parts thereof, and liquidated the entry on December 29, 1980.

On February 17, 1981, plaintiff timely filed a protest of the classification. The protest was denied by the Customs Service on March 30, 1981. Thereafter, in a letter received by the District Director of Customs on June 4, 1981, plaintiff requested reliquidation of the merchandise as "American goods returned." In support of this request, plaintiff submitted two manufacturer's affidavits, which declared that the cylinder brackets of the tractors were manufactured in the United States. The District Director returned this letter because plaintiff had not specified under which section of law or regulation the relief was being requested. Plaintiff resubmitted the affidavits on June 26, 1981, and requested reliquidation "under 520(c) of the Customs Regulations." On April 6, 1982, Customs denied plaintiff's request, and plaintiff thereafter filed this action.

The plaintiff contends that Customs made a mistake of fact that is correctable under section 520(c)(1) of the Tariff Act of 1930, 19 U.S.C. § 1520(c)(1) (1982).

Section 514 of the Tariff Act of 1930, 19 U.S.C. § 1514 (1982 & West Supp. 1985), sets forth the proper procedure for an importer to protest the classification when the importer believes that the Customs Service has misinterpreted the applicable law, and has improperly classified the imported merchandise. In addition, Customs may reliquidate an entry to correct a mistake of fact, clerical error, or other inadvertence which has caused an error in liquidation. Tariff Act of 1930 § 520(c), 19 U.S.C. § 1520(c). Section 520(c) provides, in part:

> (c) Notwithstanding a valid protest was not filed, the appropriate customs officer may, * * * reliquidate an entry to correct—
>
> (1) a clerical error, mistake of fact, or other inadvertence not amounting to an error in the construction of law, adverse to the importer and manifest from the record or established by documentary evidence, in any entry, liquidation, or other customs transaction, when the error, mistake, or inadvertence is brought to the attention of the appropriate customs officer within one year after the date of liquidation or exaction.

19 U.S.C. § 1520(c)(1) (1982).

For the purposes of section 520(c), a mistake of fact has been defined as "a mistake which takes place when some fact which indeed exists is unknown, or a fact which is thought to exist, in reality does not exist." *C.J. Tower & Sons* v. *United States*, 68 Cust.

Ct. 17, 22, C.D. 4327, 336 F. Supp. 1395, 1399 (1972) *aff'd*, 61 CCPA 90, C.A.D. 1129, 499 F.2d 1277 (1974).

In this case, plaintiff alleges that "duty was assessed on the merchandise * * * because of a mistake of fact, i.e., the Customs officials believed that the merchandise did not consist of products of the United States returned after having been exported, without having been advanced in value or improved in condition." Plaintiff's conception of mistake of fact, however, is without basis in law, and cannot support this action.

It is well established that a determination by the Customs Service that merchandise is covered by a certain provision of the TSUS is a conclusion of law. *See, e.g., Mattel, Inc.* v. *United States*, 72 Cust. Ct. 257, 262, C.D. 4547, 377 F. Supp. 955, 960 (1974); *Fibrous Glass Products* v. *United States*, 63 Cust. Ct. 62, 65, C.D. 3874 (1969), *appeal dismissed*, 57 CCPA 141 (1970). Therefore, an erroneous classification of imported merchandise is not remediable as a mistake of fact under section 520(c). *Mattel, Inc., supra*, 72 Cust. Ct. at 262, 377 F. Supp. at 960. The courts have consistently held that section 520(c)(1) may only be used to correct mistakes of fact or inadvertence, and may not be used to rectify allegedly incorrect interpretations of law. *Computime, Inc.* v. *United States*, 9 CIT ——, Slip Op. 85-115, at 5 (Nov. 1, 1985); *see also, Hambro Automotive Corp.* v. *United States*, 66 CCPA 113, 120, C.A.D. 1231, 603 F.2d 850, 855 (1979); *PPG Industries, Inc.* v. *United States*, 7 CIT 118, Slip Op. 84-27, at 9 (Mar. 28, 1984). Plaintiff seeks to challenge the classification of the imported merchandise. This, however, is an issue of law not remediable by section 520(c). "Section 520(c)(1) is 'not an alternative to the normal liquidation-protest method of obtaining review,' but rather affords 'limited relief' where an unnoticed or unintentional error has been committed." *Computime, Inc.* v. *United States, supra*, Slip Op. 85-115, at 6 (quoting *C.J. Tower & Sons* v. *United States*, 68 Cust. Ct. 17, 21, C.D. 4327, 336 F. Supp. 1395, 1399 (1972), *aff'd*, 61 CCPA 90, C.A.D. 1129, 499 F.2d 1277 (1974)).

In this case, plaintiff has not shown that any mistake of fact was made in the classification of its merchandise. The question presented in this case is clearly a legal question. The question is whether the imported merchandise can properly be classified as American goods returned. This question was raised by plaintiff's original section 514 protest which challenged the classification of the merchandise. *See* 19 U.S.C. § 1514(a)(2) (1982 & West Supp. 1985).

Plaintiff had requested duty-free treatment on the consumption entry form. The record, however, shows that, on the form, it is noted that plaintiff had not supplied the appropriate documents to support his claim. Thus, it is clear that the appropriate customs officer made a legal determination as to the classification of the merchandise on the basis of the facts presented, and in light of plaintiff's claimed classification. Moreover, the record shows that plain-

tiff contested this legal conclusion in plaintiff's original protest, and that the protest was denied by Customs.

Plaintiff, however, has not challenged the denial of his original protest. Instead, plaintiff has sought to utilize section 520(c) to challenge the classification. This is an obvious attempt to use a section 520(c) procedure as a substitute for a challenge to the classification of the merchandise pursuant to section 514(a)(2). On the facts presented, it is clear that plaintiff's allegation of a mistake of fact is, in reality, a challenge to the legal conclusion of the Customs Service.

It is the determination of the Court that plaintiff has not stated a claim upon which relief can be granted under section 520(c). Plaintiff has not pursued the appropriate statutory remedy to challenge the allegedly incorrect classification of the imported merchandise. Accordingly, defendant's motion to dismiss is granted, and the action is dismissed.

ALHAMBRA FOUNDRY, ET AL., PLAINTIFFS *v.* UNITED STATES, DEFENDANT AND SOUTH BAY FOUNDRY, ET AL., INTERVENORS

Court No. 83-4-00500

Before Carman, *Judge.*

MEMORANDUM OPINION AND ORDER

[Plaintiffs' motion for judgment upon the agency record granted in part and denied in part.]

(Decided December 30, 1985)

Simonelli & Hall (*Michael H. Hall* on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch (*A. David Lafer* on the motion) for the defendant.

Brownstein, Zeidman & Schomer (*David Amerine* and *Irwin Altschuler* on the motion) for the intervenor.

CARMAN, *Judge:* In this action plaintiffs challenge a final affirmative countervailing duty determination of the Department of Commerce, International Trade Administration (ITA) regarding ironmetal construction castings from Mexico. *see* 48 Fed. Reg. 8834 (1983). Defendant and defendant-intervenors oppose the motion and claim that the final determination, issued pursuant to 19 U.S.C. § 1303 (1982), is supported by substantial evidence upon the administrative record.

BACKGROUND

Subsequent to plaintiffs' petition alleging that numerous governmental programs conferred bounties or grants upon the ironmetal construction castings industry in Mexico, the ITA made an affirmative preliminary determination and stated that it was investigating the alleged subsidization practices from January 1 to September 30, 1982. 47 Fed. Reg. 56377 (1982). In issuing the preliminary determination published on December 16, 1982, the ITA was required to use the "best information available" in accordance with 19 U.S.C. § 1677e, since the ITA had not yet received responses to its counter-

vailing duty questionnaire from the Mexican government. On the basis of this information, presumedly much of it obtained from petitioners (*see* Record at 136, letter from plaintiffs), the ITA estimated the net bounty or grant to equal 40.53 percent *ad valorem*.

In the final determination reached February 17, 1983, the ITA determined the net bounty or grant to be 2.85 percent *ad valorem*. The verification report, however, was not placed in the record until March 8, 1983. Upon plaintiffs' motion for reconsideration of its motion to strike the verification report from the record and defendant's cross-motion for remand in order to allow all parties to provide the ITA with comments on the report and accompanying exhibits, the Court, on July 2, 1984, granted the cross-motion for remand. The ITA filed its remand results on September 11, 1984, and concluded that no changes in the final determination were warranted.

The final determination stated the following programs constituted countervailable subsidies:

(1) FOMEX [1] pre-export and export financing loans at preferential interest rates;
(2) FONEI [2] long-term financing at preferential interest rates;
(3) FOGAIN [3] priority industry/regionally targeted financing at preferential interest rates;
(4) State tax incentives; and
(5) Import duty reductions and exemptions (although the ITA found that the production facilities used in the manufacture of the subject product did not appear to have been imported).

The ITA determined that CEPROFI [4] tax credits conferred bounties or grants, but had not been granted for the production of merchandise subject to the investigation, and that the CEDI [5] program, also providing countervailable tax certificates, had been suspended.

The following programs were determined not to confer bounties or grants:

(1) Government control of Mexican iron and steel industries;
(2) Dual level currency exchange;
(3) Free zone and in-bond assembly programs; and
(4) COMESEC Mexican credit insurance at preferential rates.

---

[1] FOMEX (Fund for the Promotion of Exports of Mexican Manufactured Products) is a government trust which provides low-interest loans to Mexican companies to promote the manufacture and sale of exported products. 48 Fed. Reg. at 8834.

[2] FONEI (Fund for Industrial Development) is a specialized financial development fund, administered by the Bank of Mexico, which grants long-term credit at below-market rates for the creation, expansion or modernization of enterprises and to foster industrial decentralization. 48 Fed. Reg. at 8835.

[3] FOGAIN (Fund for the Guarantee of Development of Medium and Small Industry) provides financing at interest rates below prevailing commercial rates based upon whether a small or medium business has a designated priority status or based upon its geographical location. 48 Fed. Reg. at 8835.

[4] CEPROFI (Certificates of Fiscal Promotion) are nontransferrable tax certificates used to promote the goals of NIDP. These tax credits are provided to Mexican companies for locating in certain regions, investing in certain infant industries, generating jobs, investing in new plants and equipment, and purchasing Mexican capital goods. 48 Fed. Reg. at 8836.

[5] CEDI (Certificado de Devolucion del Impuesto), suspended by the Mexican Government in August 1982, was also a tax rebate. The certificates were direct export subsidies with their value equal to a percentage of the value of qualifying exports. 48 Fed. Reg. at 8836.

Finally, the ITA determined that the following programs were not used by the iron-metal construction castings industry:

(1) Government-financed facilities;
(2) Mexican Institute for Foreign Trade (IMCE) promotional benefits;
(3) Trust for Industrial Parks, Cities, and Commercial Centers (FIDEIN) benefits;
(4) National Preinvestment Fund for Studies and Parks (FONEP) benefits;
(5) Favorable tax treatment;
(6) Discounts on Industrial Energy and Basic petrochemicals; and
(7) FOMIN [6] preferential financing.

Plaintiffs in this action now make the following challenges, as the Court discerns them, to the final determination of the ITA:

(1) the ITA failed to explain in its determination how it arrived at the benchmark interest rates used in calculating FOMEX and FONEI benefits;
(2) the ITA failed to properly determine the subsidy amounts from FONEI and FOGAIN financing;
(3) the ITA failed to fully investigate the extent of receipt of state tax exemptions, or free or low-priced land incentives;
(4) the ITA failed to properly calculate the benefit of a state tax exemption received;
(5) the ITA failed to investigate import duty reductions and exemptions for equipment purchased prior to the investigation;
(6) the determination that the receipt of a CEPROFI tax credit was connected only to merchandise not the subject of the investigation is unsupported by substantial evidence;
(7) the ITA's determination that the dual level currency exchange does not confer a bounty or grant is unsupported by substantial evidence;
(8) the ITA failed to investigate whether FOMEX loan guarantees conferred bounties or grants;
(9) the ITA's determination that none of the firms received IMCE benefits is unsupported by substantial evidence;
(10) the ITA failed to investigate benefits from FIDEIN industrial park programs;
(11) the ITA failed to investigate benefits provided by National Financeria, S.A.;
(12) the ITA's determination that the Mexican construction castings industry did not receive discounts on basic petrochemicals or industrial energy supplies is unsupported by substantial evidence;
(13) the ITA failed to investigage whether foreign debt restructuring constituted a bounty or grant;

[6] FOMIN (Fondo National de Fomento Industrial) operates as a trust fund and provides funding to companies through stock acquisition or the provision of convertible loans at rates below those of commercial lending institutions. 48 Fed. Reg. at 9837.

(14) the ITA failed to set forth in its determination the exchange rates used to calculate the net benefit received by the Mexican construction castings industry; and

(15) the verification report submitted subsequent to the final determination should not be included as part of the administrative record.

OPINION

Judicial review of a final countervailing duty determination is provided under 19 U.S.C. § 1516a(b)(1)(B) (1982), which requires the court to hold the determination unlawful if it is found "to be unsupported by substantial evidence upon the record, or otherwise not in accordance with law." The standard of review has been well explicated in many judicial decisions, *see Carlisle Tire and Rubber Co.* v. *United States*, 9 CIT ———, Slip Op. 85-110 (October 24, 1985), but is essentially a limited review of the agency determination, insuring that agency conclusions are reasonably drawn from some evidence, more than a mere scintilla, in light of the record as a whole. However, the court is not placed in the position of having to weigh the evidence. *Consolo* v. *Federal Maritime Commission*, 383 U.S. 607, 620 (1966). With these considerations in mind, the Court concludes that twelve of the determinations and conclusions contested by plaintiffs in this action are supported by substantial evidence upon the record. In those instances where the Court is not able to affirm the administrative determinations, it is primarily because information in the record and the briefing is not sufficiently clear to enable the Court to meaningfully review the issues or to determine what actually transpired during the investigation. These three issues—challenge two to the calculation of FONEI and FOGAIN benefits, challenge four to the calculation of the state tax benefit, and challenge fourteen to the failure to set forth exchange rates—must therefore be remanded to the ITA.

1. *Commercial Interest Rates*

In calculating the benefits from the Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX), the ITA used as a benchmark for the commercial rate of interest the national average commercial rate for comparable short-term peso or dollar-denominated loans during the first nine months of 1982 as determined from information supplied by the Department of the Treasury. 48 Fed. Reg. at 8835. The source of Treasury's information was in turn the Bank of Mexico's publication *Economic Indicators*. Administrative Record at 474-76. For the Guarantee and Development Fund for Medium and Small Industries (FOGAIN), the ITA used as their benchmark the national average commercial interest rate for comparable peso-denominated loans in 1981 as provided by the Department of the Treasury, 48 Fed. Reg. at 8835-36. For the Fund for Industrial Development (FONEI), the ITA used the 1977 average commercial rate for peso-denominated loans as

obtained from the Mexican government's *Diario Official*. *Id.* at 8835. Plaintiffs' contention that the determinations of benchmark interest rates must be explained is therefore unfounded. It is presumed that the Treasury Department acted with regularity in obtaining interest rate data. It was therefore reasonable for the ITA to rely on this information, as well as that provided by official publications of the Mexican government, as "the best information otherwise available" in determining its benchmark interest rates for purposes of this investigation. *See* 19 U.S.C. § 1677e (1982).

2. *Calculation of FONEI and FOGAIN Benefits*

Plaintiffs contend that the methodology used by the ITA in calculating these benefits failed to take into account all of the costs which would be incurred in obtaining commercial loans in Mexico. First, maintain plaintiffs, the ITA's methodology of comparing payment streams of hypothetical commercial loans using the benchmark interest rates with the payment streams of the subsidized loans disregarded the Mexican practice with respect to both commercial loans and subsidized loans of requiring the payment of interest at the beginning of loan periods. *See* Administrative Record at 146, 602, 576, 1116. According to plaintiffs, "[t]he result is reduction in the calculated benefit, resulting from treating each benefit as occurring one year too late in the loan period. The effect is to decrease the total grant equivalent, since each benefit is discounted for an extra year at the benchmark rate in the benefit calculation." Plaintiffs' brief at 19–20.

Plaintiffs, citing Administrative Record at 682–96, 576, allege that the ITA failed to account for 3-month holidays from the repayment of principle of certain FOGAIN loans, and further citing Administrative Record at 146, 602, that the payment of commissions and maintenance of compensating balances for commercial loans were not taken into account.

In response to these contentions, defendant argues simply that "[t]he ITA's methodology does not have to be the most reasonable in order to be upheld by this Court nor need it be the methodology that this Court would have selected had it been the decisionmaker. *Asahi Chemical Industry Co.* v. *United States*, 4 CIT 120, 123, 548 F. Supp. 1261, 1264 (1982)." Defendant's Brief at 18. While the Court agrees that the ITA in its discretion may choose one methodology or another in calculating the benefits of bounties or grants, any methodology employed must reasonably accurately reflect factual information in the administrative record. It does not readily appear from the record or the briefs that the ITA took into account in the calculation of FONEI and FOGAIN benefits the payment of "up-front" interest, 3-month holidays from the payment of principle on FOGAIN loans, and the payment of commissions and maintenance of compensating balances for commercial loans. Accordingly, the Court must remand these issues to the ITA to determine

whether this additional information in the record as pointed out by plaintiffs has any significant impact upon the ITA's determination.

3. *State Tax Exemptions or Free or Low-Priced Land Incentives*

The Mexican government's reponse to the questionnaire indicated that none of the companies investigated received state tax exemptions. Administrative Record at 101-102, 256. During the verification, however, the ITA found that one of the foundries did benefit from a partial exemption of a state tax because it produced products exclusively for export. In light of this finding, as well as other evidence in the record that other of the firms also produced only for export, plaintiffs argue that the ITA's finding that only one of the firms received state tax exemptions is not supported by substantial evidence upon the record.

Although the Court should not weigh the evidence, "the Court must consider the record as a whole" and consider "evidence on the record which detracts from the substantiality of the evidence relied on by the agency in making its determination." *Carlisle Tire & Rubber Co.* v. *United States*, 9 CIT ———, Slip Op. 85-110, at 8 (October 24, 1985). Viewing the record as a whole, the Court is convinced that there is sufficient "evidence as a reasonable mind might accept as adequate to support [the] conclusion" that only one firm received state tax exemptions for exportation. *See Consolidated Edison Co.* v. *National Labor Relations Board*, 305 U.S. 197, 229 (1938). Onsite verification at three other firms did not disclose receipt of state tax benefits. It appears that at least one of these firms also produced only for export. *See* Administrative Record at 259. The ITA's determination is therefore sustained.

Concerning land at reduced prices, plaintiffs have not met their burden of pointing to any evidence in the record detracting from the ITA's conclusion that none of the firms investigated received this benefit.

4. *Calculation of State Tax Benefit*

Plaintiffs also challenge the ITA's calculations of the state tax benefit as received by the one firm by pointing out that if the ITA's calculations are correct, wages paid by the firm over the investigative period amounted to less than .09 percent of total sales. Defendant avoids this argument, countering only that plaintiffs have failed "to demonstrate in a concrete fashion that the net amount of the benefit has in fact been undervalued." Defendant's Brief at 22. Intervenors state that the ITA's verification report explains the method of calculation in detail and as well sets forth the records used to support the calculation. The ITA's explanation consists entirely of the following:

> We examined a schedule showing how much Fundicion Tijuana would have had to pay for 1982 had it not received such an exemption (M-1). The total tax amount for the period, January 1, 1982 through September 30, 1982 came to 260.23035.

The "records," or schedule referred to, consist solely of a column of unintelligible figures. *See* Administrative Record at 1065. There is no indication of where the numbers came from, who prepared them, or even what they purport to represent. This issue must therefore be remanded to the ITA for further clarification of the methodology employed by the ITA in calculating the amount of the state tax benefit received.

5. *Import Duty Reductions and Exemptions*

Plaintiffs contend that the ITA did not investigate import duty reductions and exemptions received for equipment imported prior to the 1982 investigative period. Although the ITA did find that *de minimus* benefits had been conferred under this program for certain tools imported from the United States, defendant claims that the verification report shows that none of the machinery or parts imported prior to 1982 was purchased from the United States. Since the record indicates that the ITA did inquire into the issue and plaintiffs have not overcome the government's presumption of correctness, the ITA's finding that only *de minimus* benefits from import duty reductions and exemptions is supported by substantial evidence on the record.

6. *Certificate of Fiscal Promotion (CEPROFI)*

The ITA determined that only one of the companies subject of the investigation received a CEPROFI tax credit, but for the manufacture of a product other than the iron-metal municipal construction castings under investigation and for a related increase in company employment. 48 Fed. Reg. at 8836. Plaintiffs contend that to the extent that the increase in employment was due to the production of municipal castings, the tax credit related to the employment increase is countervailable. The Court finds, however, that the ITA's finding that the employment increase was related to the production of a product other than the castings under investigation is a reasonable inference from the record, which indicates that municipal castings were a small part of the company's production and that the production of such castings was stopped in 1981, while the CEPROFI credit was granted for an increase in employment in 1980, 1981 and 1982. Administrative Record at 608 and 610. Accordingly, the Court finds that the ITA determination concerning CEPROFI benefits is supported by substantial evidence and is in accordance with law.

7. *Currency Exchange Rates*

Plaintiffs argue that the ITA improperly considered the exchange rate program that became operational after the period of the investigation while ignoring the program that was in effect at the time of the investigation. The dual level exchange control system alleged by plaintiffs to be countervailable was itself not enacted until September 6, 1982, shortly before the close of the January 1 to September 30, 1982 period under investigation. The pro-

gram actually analyzed by the ITA, however, was substantially modified, as announced in the *Diario Official* on December 13, 1982. This revised program would therefore apparently be the only one relevant to entries of the merchandise under investigation made after the publication of the ITA's affirmative preliminary determination on December 16, 1982. *See* Plaintiffs' brief at 26-27. The Court accepts as reasonable the ITA's consideration of the most current currency exchange program, which was in effect prior to the publication of the countervailing duty order on March 2, 1983, and the termination of the investigation. *See* C.F.R. § 355.6(b)(3).

8. *FOMEX Loan Guarantees*

Plaintiffs contend that the ITA did not investigate the FOMEX loan guarantee program. The ITA did, however, investigate the overall FOMEX program an make a determination as to which firms received *any* FOMEX benefits. *See* Administrative Record at 589-91. Intervenors additionally point out that the FOMEX credit insurance program is operated by COMESEC. Intervenor's Brief at 38. The ITA explicitly determined that COMESEC Mexican credit insurance at preferential rates did not confer a bounty or grant. 48 Fed. Reg. at 8837.

9. *Mexican Institute for Foreign Trade Benefits (IMCE)*

IMCE promotes Mexican foreign trade and coordinates efforts stimulating foreign trade, apparently through a variety of means including general advertising and promotion of Mexican products in international markets, as well as the provision of information and assistance directly to manufacturers, merchants, distributors and exporters. Administrative Record at 620. The ITA has verified "that none of the companies exporting the merchandise under investigation used any of the services offered by the IMCE." 48 Fed. Reg. at 8837. Plaintiffs nevertheless contend that the ITA failed to adequately investigate and determine what subsidy benefits may be conferred upon the iron-metal construction castings industry from general advertising and promotion. *See e.g.,* Administrative Record at 278-84 (promotional questionnaire, firm list, catalog and advertisement apparently distributed by IMCE). Although the ITA could have perhaps done more in looking into this aspect, the Court finds the ITA's reliance on the questionnaire response and verifications at IMCE and the firms, which indicated that none of the firms had received IMCE benefits, was reasonable.

10. *Full Investigation of Industrial Park Programs*

Based on the preliminary determination that several programs required additional information, *see* Administrative Record at 177, plaintiffs allege that the ITA made no further effort to acquire the needed information. Among the programs are land at reduced cost and state tax incentives (dealt with *supra* p. 9-10), FOMEX loan

guarantees (dealt with *supra* p. 13), benefits provided by National Financiere, S.A., and benefits of industrial park programs.

The ITA's finding regarding industrial parks is supported by substantial evidence. The verification report clearly shows that none of the companies investigated are located in industrial parks and therefore do not receive benefits under the Trust for Industrial Parks, Cities and Commercial Centers (FIDEIN). *See* Administrative Record at 595.

11. *Full Investigation of National Financeria*

Plaintiffs allege that the ITA failed to investigate and make determinations regarding programs administered by National Financeria. The ITA made explicit determinations regarding FIDEIN and FONEP, both programs administered by the National Financeria. *See* 48 Fed. Reg. at 8837, *see also* Administrative Record at 598. The Court finds that the ITA's actions and determinations in this regard to be supported by substantial evidence and in accord with the law.

12. *Industrial Energy Discounts*

The ITA's determination, *See* 48 Fed. Reg. at 8837, that Mexican producers of iron construction castings did not receive discounts on basic petrochemicals or industrial energy supplies is sustained. The determination is supported by the Mexican government's questionnaire response, Administrative Record at 103, 256, Administrative Record at 598-99, and on-site review of electric bills for each company verified. Administrative Record at 599.

13. *Failure to Investigate Foreign Debt Restructuring*

Plaintiffs allege that the ITA failed to make any investigation or determination regarding certain programs brought to the attention of the ITA during the investigation, as would be required by 19 U.S.C. § 1677d. Defendant appears not to have responded to this issue at all in its brief, while intervenors argue essentially that since the ITA should have made a negative determination regarding these programs, the failure to amend the notice of investigation to include these programs constitutes harmless error. Intervenors assert further that there is a lack of any suggestion in the verification that the foreign debt repayment schedule was altered in any way. Given that plaintiffs have not pointed to any evidence in the record supporting their claim other than their own conclusory statements made during the administrative proceeding, the Court affirms the ITA in not investigating and making a determination regarding this issue.

14. *Exchange Rates*

Plaintiffs challenge the ITA determination for failing to set forth the exchange rates used by the ITA in calculating the net benefit received by the Mexican iron castings exporters. Presumably plaintiffs are concerned with whether the exchange rates employed re-

sulted in an undervaluation of the bounty or grant conferred. Defendant answers this contention in a footnote stating that the ITA, pursuant to 31 U.S.C. § 5151(c), uses exchange rates published by the Secretary of the Treasury. Defendant's Brief at 16, n. 5. Alternatively, intervenors allege that the exchange rates used were set by the Mexican government and cites the Administrative Record at 499–503. The Court is unable to discern from the record and the briefs what exchange rates the ITA in fact used in this case. Accordingly, the Court must order a remand to determine what exchange rates were used and if they were in accordance with law.

15. *Verification Report*

Plaintiffs again challenge the conclusion of the verification report as part of the administrative record. Although the verification report was placed with the record subsequent to the final determination, the report consists of information and exhibits compiled prior to the final determination. Plaintiffs, had the opportunity to comment on the verification report during the remand to the ITA. As the report does not appear to be a *post hoc* rationalization of the final determination, *see e.g., Citizens to Preserve Overton Park* v. *Volpe,* 401 U.S. 402, 419–20 (1971), but rather a compilation of material gathered during the administrative proceeding, the verification report is properly part of the administrative record within the meaning of 19 U.S.C. § 1516a(b)(2)(A) (1982).

CONCLUSION

In order to determine whether all of the ITA's determinations are supported by substantial evidence upon the agency record, the Court requires further clarification and determination regarding the following challenges:

(2) the calculation of FONEI and FOGAIN benefits,
(4) the calculation of the benefit of the state tax exemption received, and
(14) the exchange rates used by the ITA in calculating the net benefit used.

With respect to plaintiffs' other challenges in this case, the Court finds that the ITA determinations are supported by substantial evidence upon the record. Plaintiffs' motion for judgment upon the agency record is therefore granted in part and denied in part, and the case is remanded for further action consistent with this opinion.

(Slip Op. 85-131)

BALTIMORE SECURITY WAREHOUSE CO., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 85-11-01690

Before CARMAN, *Judge*

MEMORANDUM OPINION

[Plaintiff's motions for preliminary injunction and for review upon the agency record denied; Defendant's motion for summary judgment granted.]

(Decided December 13, 1985)

Allen, Thieblot & Alexander (J. Edward Martin, on the motion) for the plaintiff. *Richard K. Willard,* Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Civil Division (*Susan Handler-Menahem* on the motion) for the defendant.

CARMAN, *Judge:* Plaintiff, Baltimore Security Warehouse Company, moved for a preliminary injunction restraining the United States Customs Service (Customs) from revoking plaintiff's bonded warehouse status, and for review of Customs' final determination revoking such status.[1] Defendant United States cross-moved for summary judgment. On December 13, 1985, the Court heard argument. Ruling from the bench, the Court denied plaintiff's motion and granted defendant's motion for summary judgment. This opinion follows that order.

BACKGROUND

On February 9, 1983, Customs directed plaintiff to show cause pursuant to 19 C.F.R. § 19.3(e) (1982) (now 19 C.F.R. § 19.3(f)) why its bonded warehouse status should not be revoked. The notice stated the following grounds for revocation:

> As a result of a U.S. Customs Service Investigation, it was found that you did not adequately safeguard merchandise in your warehouse and that there was a high degree of pilferage at Baltimore Security Warehouse, Inc., particularly with regard to crystal glassware imported by Import Associates. It was also found that the merchandise and paperwork regarding your account with Import Associates were so poorly handled that the importer could not match items with the proper warehouse entry or importation.

Pursuant to 19 C.F.R. § 19.3(e), Customs could revoke the bonded status of a warehouse for a variety of reasons, including:

---

[1] In its complaint filed with this court, plaintiff requested the relief, *inter alia,* of an injunction. In its brief, plaintiff argued that the Custom's determination be overturned. The Court understood plaintiff to move for a preliminary injunction pursuant to Rule 65(a) and for judgment upon the agency record pursuant to Rule 56.1. Upon consent of both parties, the Court ordered the motions consolidated under Rule 65(a)(2).

(3) The warehouse proprietor or an officer of a corporation which has been granted the right to operate a bonded warehouse is convicted of or has committed acts which would constitute a felony, or a misdemeanor involving theft, smuggling, or a theft-connected crime;

(4) The warehouse proprietor does not provide secured facilities or properly safeguard merchandise within the bonded warehouse.

Plaintiff requested a hearing on the issue of revocation, which was held on April 13, 14 and 18, 1983. Both parties filed post hearing memoranda. On October 5, 1983, the hearing officer made her recommendation that plaintiff's bonded warehouse status be revoked, which she forwarded to the Regional Commissioner of Customs for the Northeast Region (Commissioner). By letter dated November 18, 1985, the Commissioner informed plaintiff that its bonded warehouse status was revoked, effective ten days after receipt of the letter.[2]

By complaint dated November 29, 1985, plaintiff asked this court for a temporary restraining order enjoining Customs from revoking its bonded warehouse status. The court, per Senior Judge Newman, issued a temporary restraining order on December 2, 1985, pursuant to Rule 65(b). The order was to expire on December 12, 1985.

This case was assigned to me on December 3, 1985. I ordered that the motion for preliminary injunction be combined with the action on the merits, pursuant to Rule 65(a)(2), and ordered that the temporary restraining order be extended to December 19, 1985, pursuant to Rule 65(b), with consent of the parties, in order to provide for the oral argument to be held on December 13, 1985.

OPINION

Plaintiff maintained that the Commissioner's determination revoking its bonded warehouse status should be overturned on a variety of grounds: 1) Customs did not have jurisdiction over the subject matter of this action, 2) the agency proceedings were procedurally defective, 3) improper evidence was admitted at the administrative hearing, 4) the agency findings were not supported by substantial evidence in the record, and 5) the agency action was barred by the equitable doctrine of laches.

---

[2] The text of the letter was as follows:

This is to inform you that I have decided to revoke the bonded warehouse status of Baltimore Security Warehouse, pursuant to my authority in 19 CFR 19.3(f). I am sending this decision to you because you are the legal representative of Baltimore Security Warehouse and ask you to notify the appropriate parties.

A hearing on this matter was held on April 13, 14 and 18, 1983, in Baltimore, Maryland. My decision is based on the recommendation of the hearing officer that the bonded status of Baltimore Security Warehouse be revoked and the evidence presented at that hearing which indicates violations of section 19.3(e)(3) and (4) of title 19 of the Code of Federal Regulations. These sections provide that the bonded status of a warehouse may be revoked if an officer of a warehouse has committed acts which would consititute a felony, or a misdemeanor involving theft, or if the warehouse proprietor does not provide secured facilities or properly safeguard merchandise within the bonded warehouse. The allegations based on these sections have been amply proved at the hearing.

This decision takes effect 10 days after receipt of this notice.

1. *Jurisdiction*

In its complaint plaintiff averred that Customs did not have jurisdiction because the property involved was not bonded and Customs had jurisdiction only over bonded property.[3] Plaintiff did not press this argument in its brief. Customs has authority under 19 U.S.C. § 1556 (1982) to promulgate rules and regulations for establishing bonded warehouses. 19 C.F.R. § 19.3(e), promulgated pursuant to that authority, provides that bonded warehouse status may be revoked if Customs finds that the proprietor or corporate officer has been convicted of, or has committed acts constituting specified crimes. The section does not require that these convictions or acts have any relation to bonded merchandise. Customs acted within the scope of its statutory authority as it was not exercising any power over particular property, but rather its power to establish bonded warehouses under 19 U.S.C. § 1555 (1982).

2. *Procedural Defects*

Plaintiff claimed that the agency proceedings were defective in several ways. Plaintiff first contended that the Commissioner's determination did not include findings of fact or reasons for the revocation, as required by the regulations. The regulations provide that "[T]he Regional Commissioner shall thereafter render his decision in writing, stating his reasons therefor." 19 C.F.R. § 19.3(e). The Commissioner's letter stated that plaintiff's bonded warehouse status was being revoked because plaintiff had violated 19 C.F.R. §§ 19.3(e)(3) and (4), and the allegations based on these sections had been "amply proved at the hearing." The reason for the revocation could not be more clear. Moreover, the letter referred to proofs at the hearing and also to the findings of the hearing officer. This was adequate to inform plaintiff of the findings upon which the determination was based. Plaintiff next claimed that the recommendation of the hearing officer did not include findings of fact. On the contrary, the recommendation includes numerous factual findings, which formed the basis of the recommendation.[4] Plaintiff urged that the hearing officer did not independently assess the evidence on the record because her findings of fact incorporated the proposed findings of fact submitted by counsel for Customs. The adoption of proposed findings is a not uncommon judicial practice and, standing alone, does not indicate that the adjudicator did not independently assess the evidence.

Plaintiff next claimed that the findings contained in the recommendation were improper because the hearing officer did not

[3] At the agency level, plaintiff made a motion to dismiss for lack of jurisdiction and because the agency was not following the Administrative Procedures Act § 554(d) (5 U.S.C. § 554(d) (1982)). In its complaint, plaintiff asked the court to review the agency's denial of that motion, but pursued only the issue of jurisdiction. The Court notes that plaintiff showed no violation of § 554(d).

[4] For example, the hearing officer found that merchandise was seized from Smith Sales, that the merchandise had been imported by Import Associates and stored in bond at plaintiff's warehouse, and that plaintiff had sold the merchandise to parties who testified at the hearing. These are not conclusory statements, as plaintiff suggests, but rather basic findings of fact.

impose upon Customs the burden of proving its case beyond a reasonable doubt. One of the grounds for revoking plaintiff's bonded warehouse status was the finding that plaintiff had

> committed acts which would constitute a felony, or a misdemeanor involving theft, smuggling or a theft connected crime

19 C.F.R. § 19.3(e). The proceeding below was a civil and not a criminal proceeding, and the reasonable doubt standard does not apply. The hearing officer was persuaded that the plaintiff committed the acts complained of, and that is sufficient. On review, this Court will sustain that determination so long as it is supported by substantial evidence on the record. *See generally American Spring Wire Corp.* v. *United States*, 8 CIT 20, 590 F. Supp. 1273 (1984), *aff'd* 760 F.2d 249 (1985).

Plaintiff next complained that it did not receive a copy of the hearing officer's recommendation until after the revocation determination had issued and plaintiff had brought its case to this court. Plaintiff pointed to no statute or regulation, however, requiring Customs to furnish it with a copy of the recommendation. The official record contained the recommendation and plaintiff could have received it at any time by simply requesting a copy. Moreover, plaintiff has not shown that it was in any way prejudiced because it did not receive a copy.

Plaintiff's final procedural complaint was that the Commissioner did not make his determination on the full record. Plaintiff reached this conclusion from statements made by counsel for defendant, during a teleconference on December 6, 1985, that exhibits from the hearing had been sent to Washington, D.C. and then on to New York. The Commissioner issued his determination from Boston. Such a statement, without more, is inadequate to show that the Commissioner did not consider the complete record.

3. *Evidence at the Hearing*

At the administrative hearing, plaintiff objected to the introduction of hearsay evidence. Although plaintiff did not press this issue in its brief to the court, its complaint does not mention evidentiary objections made at the administrative hearing. Section 557(d) of the Administrative Procedure Act (5 U.S.C. § 557(d)) provides that:

> any oral or documentary evidence may be received, but the agency as a matter of policy shall provide for the exclusion of irrelevant, immaterial, or unduly prejudicial evidence.

Administrative adjudicatory proceedings are not governed by the formalized strict Federal Rules of Evidence but by the Administrative Procedure Act. Hearsay evidence is admissible in such proceedings.

Plaintiff also argued at length in its brief that certain evidence admitted at the hearing was seized from premises known as Smith Sales, in violation of the fourth amendment to the United States

Constitution. A party lacks standing to assert a fourth amendment violation where it was not on the premises at the time of the search, alleges no proprietary or possessory interest in the premises, or is not accused of a possessory crime. *Brown* v. *United States* 411 U.S. 223, 229 (1973). Since none of these situations existed, plaintiff had no standing to request suppression of the evidence.

4. *Substantial Evidence*

Plaintiff asserted that certain factual findings of the hearing officer were in error. This Court must uphold agency action unless it is unsupported by substantial evidence in the record. *See* 5 U.S.C. § 706(2)(E) (1982). At the hearing, Customs introduced substantial evidence that plaintiff had committed the acts complained of. Plaintiff also introduced evidence tending to exculpate it, and offered alternative theories to explain evidence introduced by Customs. It is not for the Court, however, to weigh the conflicting evidence. It is sufficient that there is "such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." *American Spring Wire,* 8 CIT 20, Slip Op. 84-83 (July 11, 1984) (quoting *Universal Camera Corp.* v. *NLRB,* 340 U.S. 474, 477 (1951)). Although plaintiff clearly was not satisfied by the findings of the hearing officer, since there was relevant evidence from which reasonable inferences could be drawn to support the conclusion determined by the hearing officer, the determination of the hearing officer must be permitted to stand.

5. *Laches*

Plaintiff's final ground for arguing that the agency action should be overturned was that Customs was barred by the equitable doctrine of laches. To establish the defense of laches, a party must show both unreasonable delay and some prejudice caused by the delay. *Costello* v. *United States,* 365 U.S. 555 (1965). Customs held the hearing in April of 1983 but did not act to revoke plaintiff's bonded warehouse status until November of 1985. Whether or not the delay was unreasonable, plaintiff has failed to show that it was prejudiced. Plaintiff can hardly claim prejudice when the delay allowed it to keep its bonded warehouse status during that time.

CONCLUSION

Plaintiff failed to show that the agency action was procedurally defective or that the determination was not supported by substantial evidence upon the record. Because of the Court's disposition of the case on its merits, the Court also denied plaintiff's motion for a preliminary injunction. Plaintiff's motions have been denied, the Court granted defendant's motion for summary judgment and dismissed the case.

Treasury Decisions

(T.D. 86-8)

Petitioners' Desire To Contest Decision Denying Domestic Interested Party Petition Requesting Reclassification of Certain Fuel Grade Ethanol

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of petitioners' desire to contest decision on domestic interested party petition.

SUMMARY: This document advises the public of the desire of several domestic interested parties to contest Customs decision denying their petition requesting the reclassification of certain imported fuel grade ethanol. Customs has determined that the ethanol imported from several Caribbean Basin countries may qualify for duty-free entry under the Caribbean Basin Economic Recovery Act. The petitioners contend that the ethanol is incorrectly classified and they have advised Customs of their intention to pursue this matter through appropriate court proceedings.

DATE: January 22, 1986.

FOR FURTHER INFORMATION CONTACT: Harold Singer, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

Background

On January 29, 1985, a petition was filed with Customs under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), on behalf of several domestic interested parties dissatisfied with Customs determination that certain fuel grade ethanol imported from Carribbean Basin countries may qualify for duty-free entry under the Caribbean Basin Economic Recovery Act (CBERA; 19 U.S.C. 2701). The product at issue, ethyl alcohol (ethanol) imported for use as a fuel, is classified under item 901.50, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202), at a rate of duty of 60¢ per gallon. (This 60¢ per gallon duty is in addition to a 3% ad valorem duty on ethanol for nonbeverage purposes from item 427.88, TSUS.)

However, some ethanol may enter the U.S. free of duty since Customs has ruled that the transformation of beverage grade ethanol from a non-beneficiary country to motor fuel ethanol in a beneficiary country through azeotropic distillation is sufficient to make the motor fuel a product of the beneficiary country for purposes of the CBERA.

The domestic interested parties advanced two basic arguments in their petition. First, it was argued that fuel grade ethanol is not a new or different article of commerce from beverage grade ethanol as the only significant difference in the composition of the two is their water content. It was also contended that the azeotropic method of distillation, which involves adding benzene or some other chemical to 190 proof ethanol and then heating the mixture so that the benzene will vaporize and carry away most or all of the water, is not a substantial manufacturing process.

A notice of receipt of the petition was published in the Federal Register on April 11, 1985 (50 FR 14250), advising the public of the petitioners' contentions and requesting comments on the petition. Of the many comments received in response to the notice, numerous commenters chose to discuss policy issues concerning the Caribbean Basin Initiative. However, it is Customs view that there is only one controlling issue in this case; whether azeotropic distillation of 190 proof ethanol to 199+ proof ethanol is a substantial transformation.

Discussion of Comments

The arguments that azeotropic distillation is not a substantial processing operation are that (1) dehydration is merely the opposite of dilution and dilution is clearly not considered a sufficient operation to entitle an article to duty-free treatment pursuant to § 10.195, Customs Regulations (19 CFR 10.195); (2) azeotropic distillation is just a simple boiling and cooling procedure; (3) the process does not require many workers; (4) the incremental capital, energy and labor requirements are miniscule when compared with the total cost of converting agricultural feedstock to ethanol, and (5) there is no significant distinction between proof enrichment from 194–199+ and from 190–199+, and Customs has ruled that enrichment from 194–199+ would not be sufficient to entitle the ethanol to duty-free treatment.

It is Customs view that if removal of water were to be considered *per se* an operation not sufficient to entitle an article to duty-free treatment under the CBI, it could have been listed in the statute or regulations as easily as dilution was listed. Further, the addition of water to a product is generally a much more simple process than removing water.

Azeotropic distillation is more than a simple boiling and cooling procedure. The process involves complex equipment, sensitive instruments and trained personnel. In the particular operation chal-

lenged in this petition, the equipment includes a dehydration column over 150 feet high and 7 feet in diameter, over 60 stainless steel trays, each with nearly 100 valves, plus weirs and downcomers, all manufactured to exacting standards. The Entrainer Recovery Column is 90 feet tall, 3 feet in diameter with nearly 60 stainless steel valve trays of its own. There are reboilers, heat exchangers, condensers, reflux tanks, decanters, surge tanks, vents, pumps, meters, structure and mechanical systems required to maintain these columns.

In *Uniroyal, Inc.* v. *United States*, 542 F Supp. 1026, 3 CIT 220, *aff'd* 702 F2d 1022 (Fed Cir. 1983), the court stressed that factors such as cost and skill can be considered in determining whether a substantial transformation has occurred. In this case, the personnel must be trained to correctly monitor the azeotropic distillation process, and there has been an ample capital investment.

According to one comment, the drying process, *per se*, is not complex. Any complexity associated with the ternary distillation and directly associated process steps is in the design of the equipment and control apparatus. It is our view that the technical nature of the design of the equipment and the skill required of the workers to operate and monitor the system is of sufficient complexity to take the operation out of the simple combining, packaging or mere dilution categorization. While the number of workers involved in any specific operation is a factor to be considered in determining whether a substantial processing operation has occurred, it is not a controlling factor. In this particular case, we believe that the amount of local employment involved in the operation would not deter us from finding substantial processing.

We do not agree with the argument that the conversion of 190 proof ethanol to absolute ethanol is a minor step in the manufacture of ethanol from grain and therefore cannot be a substantial transformation. Obviously, the relative cost of any one step in an overall process will decrease as the number of steps increases. Further, each operation must be examined on its own as to whether it is a substantial transformation.

Finally, Customs holding in a General Headnote 3(a) case (19 U.S.C. 1202) that there is not a substantial transformation when ethanol of 194 proof is brought up to 199+ proof through azeotropic distillation was based on the fact that an entire azeotropic distillation operation was not occurring in the insular possession. Customs looks at all operations on a case-by-case basis in determining whether substantial transformation occurs. In the particular case where an operation was proposed to make ethanol anhydrous from a level of 194 proof, it was Customs view that since a partial azeotropic distillation operation had already occurred, merely finishing the azeotropic distillation operation in the insular possession would not be sufficient to make the 199+ proof ethanol a product of that

insular possession. In this instance an entire azeotropic distillation operation is occuring in the beneficiary country.

Among the arguments set forth as to why 199+ proof ethanol is not a new and different article of commerce than ethanol of up to 190 proof are: (1) There is no chemical change between the 190 proof and 199+ proof alcohol—the only difference is that water is removed; (2) there is no clear distinction between hydrous and anhydrous ethanol for many industrial uses; and (3) hydrous ethanol is used in Brazil as motor fuel.

It is Customs view that the extra 5 percent water that is missing from the anhydrous ethanol which causes the difference in specification is significant enough to make the anhydrous a new or different article of commerce. It is the absence of water that makes 200 proof ethanol suitable for particular uses, while it is the presence of water that makes 190 proof ethanol unsuitable for those same uses. Also, 190 and 200 proof ethanol have different freezing points, boiling points, densities, viscosities, vapor pressures and flash points.

Further evidence that 190 proof and 200 proof ethanol are different articles is the price differential between the two. For the past year, the *Chemical Marketing Reporter* has stated that the price of tax-free absolute ethanol is 12 cents per gallon higher than that of 190 proof tax-free ethanol. There is a price difference of about 8 percent. A price difference of about 5 percent is to be expected since the anhydrous product contains 5 percent more alcohol, but a price difference of 8 percent reflects, in part, the additional dehydration steps involved.

Regarding the claim that 190 proof ethanol is used as motor fuel, the Brazilian government built a fleet of motor vehicles that used 190 proof ethanol as a defense against rising oil prices, but those vehicles and others like them were specially designed for that use. The modifications needed to enable the average car in the U.S. to use 190 proof ethanol would be more than minor and such vehicles are not commercially available in the U.S.

In the U.S., gasohol can have a maximum of 10 percent anhydrous ethanol according to EPA regulations (see 47 FR 14596, April 5, 1982). Only absolute ethanol can be blended with gasoline and technical references examined by Customs indicated that for ethanol to be blended with gasoline, to make gasohol, the entire fuel delivery system from refinery to tank trucks to underground tanks in filling stations, must be dry. Water, even a small amount, will "split" the blend, causing the blend to separate into an aqueous phase and a hydrocarbon phase. Accordingly, it is Customs view that anhydrous ethanol has a use in the U.S., for blending to make gasohol, that hydrous ethanol will not serve. While hydrous and anhydrous ethanol may both serve some industrial uses, our research reveals that anhydrous ethanol even when used for industrial purposes is used generally for purposes where water cannot be

tolerated, such as in certain manufacturing processes and for certain solvents.

Decision on Petition and Notice of Petitioners' Desire To Contest

After careful analysis of the petition, supplemental submissions, and all comments received, Customs has decided to continue to consider the azeotropic distillation of up to 190 proof ethanol to 199+ proof ethanol in a beneficiary country of the Caribbean Basin Initiative a substantial transformation of the ethanol making the 199+ proof ethanol a new and different article of commerce entitled to duty-free entry. The petitioners were informed by letter dated November 19, 1985 (CLA-2 CO:R:CV:V 553849 HS), through their counsel, that Customs is of the opinion that the current classification is correct and their petition is therefore denied.

In response to Customs decision to deny the petition, on November 19, 1985, the petitioners filed notice of their intention to contest the decision in accordance with § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23 Customs Regulations (19 CFR 175.23).

Customs has reconsidered the matter in light of the petitioners' letter, but remains of the opinion that its November 19, 1985, decision is correct. That decision will stand in the absence of a contrary judgment rendered by the U.S. Court of International Trade or the U.S. Court of Appeals for the Federal Circuit.

Authority

This notice is published under the authority of § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

U.S. Customs Service

Proposed Rulemaking

19 CFR Part 101

Proposed Customs Regulations Amendment Relating to the Customs Field Organization in the New Orleans District

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations by establishing a new Customs port of entry, on a 2-year trial basis, to be known as Shreveport-Bossier City, in the New Orleans, Louisiana, Customs district. The change is being proposed as part of Customs continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public.

DATE: Comments must be received on or before March 24, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Richard Coleman, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

The Caddo-Bossier Port Commission filed an application with Customs requesting the establishment of a new Customs port of entry at Shreveport, Louisiana, and Bossier City, Louisiana. A review of that application has confirmed that the proposed port meets the minimum Customs criteria for establishing ports of entry. Cargo processing activities will be carried out utilizing modern electronic data transfer equipment compatible with Customs systems.

Customs ports of entry are places (seaports, airports, or land border ports) designated by the Secretary of the Treasury where

Customs officers or employees are assigned to accept entries of merchandise, clear passengers, collect duties, and enforce the various provisions of Customs and related laws. Staffing at ports of entry may range from one to several hundred employees, depending on the volume of business. However, most new ports of entry are staffed by at least a port director, one or more inspectors, and a secretary.

The Secretary of the Treasury is advised by the Commissioner of Customs in matters affecting the establishment, abolishment, or other change in ports of entry. Customs ports of entry are established under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order 10289, September 17, 1951 (3 CFR 1949–1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101–5 (47 FR 2449).

The limits of the proposed port of entry of Shreveport-Bossier City will be the city limits of Shreveport and Bossier City. The basis upon which Customs is recommending establishing a port of entry at Shreveport-Bossier City, on a 2-year trial basis, is the proposed port's commitment to handle a sufficient amount of imported merchandise to meet minimum port of entry workload standards. These standards were published as a notice in the Federal Register on March 9, 1982 (47 FR 10137). At the end of the 2-year period, the practicability of maintaining a port of entry at Shreveport-Bossier City will be reevaluated in light of the actual Customs workload.

COMMENTS

Before adopting this proposal, consideration will be given to any written comments timely submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4) and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. to 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

EXECUTIVE ORDER 12291

Because this proposal relates to the organization of Customs, it is not a regulation or rule subject to E.O. 12291.

REGULATORY FLEXIBILITY ACT

It is certified that the provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are not applicable to this proposal because it will

not have a significant economic impact on a substantial number of small entities.

Customs routinely establishes and expands Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although the proposal may have a limited effect upon some small entities in the Shreveport-Bossier City area, it is not expected to be significant because establishing and expanding port limits at Customs ports of entry in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Lists of Subjects in 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

PART 101—GENERAL PROVISIONS

Proposed Amendment to the Regulations

If the proposed change is adopted, the list of Customs regions, districts, and ports of entry in § 101.3, Customs Regulations (19 CFR 101.3), will be amended accordingly.

Authority

This amendment is proposed under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949-1953 Comp. Ch. II), and pursuant to authority provided by Treasury Order No. 101-5 (47 FR 2449).

Drafting Information

The principal author of this document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

William von Raab,
Commissioner of Customs.

Approved: December 19, 1985.
David D. Queen,
Acting Assistant Secretary of the Treasury.

(Slip Op. 86-1)

OLD REPUBLIC INSURANCE CO., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 83-6-00801

Before DICARLO, *Judge.*

Defendant moves to dismiss action by surety challenging Customs classification for lack of jurisdiction, claiming that the protest was not timely filed.

Held: Plaintiff filed its protest within 90 days of the mailing of a notice of demand for payment against a bond and its action is timely. A previous letter from Customs did not constitute notice of demand for payment since it lacked information available to Customs which would provide a surety sufficient means of ascertaining the bond against which demand for payment was made.

[Defendant's motion to dismiss for lack of jurisdiction is denied.]

(Decided January 2, 1986)

Sandler & Travis, P.A. (*Gilbert Lee Sandler* and *Randall E. Baad*), for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, (*Kenneth N. Wolf*), for the defendant.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Plaintiff, a surety, brings this action challenging the United States Customs Service's (Customs) classification of merchandise invoiced as "LPG equipment for cars" under item 711.78, Tariff Schedules of the United States (TSUS). Defendant moves to dismiss the action for lack of jurisdiction claiming that the protest was not timely filed. The motion is denied.

On September 10, 1980, the merchandise entered the United States under a single entry consumption entry bond. The entry was liquidated, and a bill for duties sent to the importer was not paid.

On November 5, 1981, Customs mailed to plaintiff a letter which in part states:

> Enclosed herewith is a listing of 484 bills due to the United States Customs Service totaling $1,166,344.81 owed by principals for whom you are surety and which are due and payable immediately. Formal demands were made on the principals involved but the bills remain unpaid. Under the terms of your bond you are an original promisor and debtor with each of your principals.
>
> This is a formal demand upon you for immediate payment of the amounts noted on the enclosures hereto:

Attached to the letter was a computer printout listing 484 bills. The listing for the bill in question set forth the bill number, the billing date, the port of entry and the amount due. No information concerning the bill was set forth in the columns on the printout designated "Delinquent Debtor Name and Address" and "Entry No." [1]

On January 29, 1982 Customs sent another letter to plaintiff, saying in part:

> Attached is a list of 5 bills amounting to $21,777.48 for which we are enclosing copies of the applicable entries and bonds.
>
> Full payment of $21,777.48 must be made within thirty (30) days from the date of this notice. Failure to satisfy this formal demand may result in a recommendation to the Secretary of the Treasury that you no longer be authorized to act as surety on Customs Bonds.

The list attached to the January 29, 1982 letter provided the name of the importer for each of the five listed bills. The enclosed copy of the single entry bond for the transaction in question contained the importer's name as well as the entry number.

On February 12, 1982, plaintiff filed a protest challenging the classification of the merchandise, and on December 3, 1982, the protest was denied as untimely. On June 1, 1983, plaintiff brought this action contesting the denial of the protest.

Defendant alleges that, under 19 U.S.C. § 1514(c), plaintiff had 90 days from the November 5, 1981 mailing in which to file a protest; the letter of January 29, 1982 was a follow-up demand that did not cause the jurisdictional period to run anew; and the action must be dismissed because the February 12, 1982 protest was filed more than 90 days after November 5, 1981.

Plaintiff argues that the action is timely because the November 5, 1981 letter provided insufficient information to notify it that demand was being made on the applicable bond; a sufficient demand was not mailed until January 29, 1982; and the February 12, 1982 protest is timely because it was filed within 90 days of January 29, 1982.

---

[1] The copy of the printout attached as Exhibit C to the Memorandum in Support of Defendant's Motion to Dismiss contains additional handwritten information. At oral argument, defendant's counsel advised the Court that such information did not appear on the printout at the time of the November 5, 1981 mailing.

The issue before the Court is whether the November 5, 1981 letter was a sufficient notice of demand for payment against the applicable bond.

A decision by Customs regarding the classification of merchandise and the rate and amount of duty chargeable is final and conclusive unless a protest is timely filed. 19 U.S.C. § 1514 (a). The Court does not have jurisdiction over any action where a protest was filed later than the time provided by statute. *San Francisco Newspaper Printing Co.* v. *United States*, 9 CIT ——, 620 F. Supp. 738 (1985); *Texas Mex Brick & Import Co.* v. *United States*, 72 Cust. Ct. 291, C.R.D. 74-2, 371 F. Supp. 579 (1974). Section 1514(c)(1)(A) provides that protests may be filed by "importers or consignees shown on the entry papers, or their sureties." The section further provides:

> A protest by a surety which has an unsatisfied legal claim under its bond may be filed within 90 days from the date of mailing of notice of demand for payment against its bond. If another party has not filed a timely protest, the surety's protest shall certify that it is not being filed collusively to extend another authorized person's time to protest as specified in this subsection.

19 U.S.C. § 1514(c)(2). Neither the statute nor the regulations specify what information must be provided to a surety in the notice of demand in order to commence the running of the 90-day period in which a protest may be filed. *See* 19 U.S.C. § 1514(c)(2); 19 C.F.R. § 174.12(e)(3) (1985).

Plaintiff argues that a notice which does not enable a surety to determine the transaction for which a protest may be filed is deficient. It contends that the printout attached to the November 5, 1981 letter, which listed 484 bills, did not give plaintiff "notice of demand for payment against its bond" under section 1514, because it did not identify the entry, importer or bond applicable to the bill in question. Defendant disagrees, arguing that even though the November 5, 1981 letter and printout did not identify the importer's name, the entry number or the bond for the bill in question, the notice of demand was nonetheless sufficient. It contends that section 1514 only requires that the notice set forth a monetary demand.[2]

Defendant states that a surety must obtain on its own the information necessary to identify the protestable transaction, and that if plaintiff requested information from Customs concerning any of the 484 bills listed on the computer printout, Customs would have identified for plaintiff the corresponding importer, entry number or

[2] Defendant cites several cases in support of its contention that a bald demand for payment is sufficient in the absence of a requirement that a demand be particularized. The cases are inapposite as none deals with a situation where the recipient was potentially liable to the demanding party on numerous bonds or accounts. *See, e.g., In re Marin Motor Oil, Inc.*, 740 F.2d 220 (3d Cir. 1984) (timeliness of demand for reclamation under bankruptcy laws); *Miller* v. *Davis*, 34 A. 265, 88 Me. 454 (Sup. Jud. Ct. 1896) (demand for payment of taxes).

bond. Defendant argues that if Customs did not respond to such an inquiry in a timely manner, "the Government would conceivably agree or the Court could find that a toll may operate during the 'unavailability' of the requested information."[3]

Defendant also argues that a surety could monitor CUSTOMS BULLETIN notices of liquidation or require its principals to notify it when an entry covered by a bond is liquidated. By filing its protests within 90 days of liquidation or reliquidation under section 1514, a surety could protect its interests without waiting to receive notice of demand for payment.

Defendant's reasoning would deny effect to Congress' amendment of section 1514 in 1979.[4] To protect the rights of sureties, Congress specifically provided that sureties receive actual notice of a principal's failure to pay. Congress also recognized that sureties should not have to rely solely upon their defaulting principals for information concerning protestable transactions:

> It is also clear under present law that sureties have had difficulty in fulfilling the prerequisites to suit in the Customs Court due to the frequent failures of the sureties to receive notice of the failure of the importer to pay the duties until after the time for filing a protest has expired. Section 1001(b)(3)(E) would remedy this problem by permitting a surety to file a protest in its own name and by extending the time within which it may file a protest so long as it certifies that it is not filing the protest simply because the importer allowed his time to file a protest to expire without filing a protest.

S. Rep. No. 249, 96th Cong., 1st Sess. 254 (1979), *reprinted in* 1979 U.S. Code Cong. & Ad. News 381, 640.

Defendant essentially admits that it would be impossible for plaintiff to ascertain without Customs assistance, the entry number, bond or importer's name applicable to a bill which is identified on a computer printout only by a bill number assigned by Customs. A surety would have less time to prepare its protest than that contemplated by the statute if the bond on which demand is being made could not be ascertained until some time after the demand letter from Customs is received. The statute plainly states that the 90-day limitations period shall run "from the date of *mailing* notice of demand for payment * * *." 19 U.S.C. § 1514(c) (1982) (emphasis added). A letter to a surety which does not constitute notice of demand for payment cannot be cured upon Customs provision of supplemental information by alternative means, without reducing the time provided for the preparation of a protest by a surety.

Defendant's contention that the government could agree to toll the limitations period during the unavailability of information requested by a surety is misplaced. Customs does not have the power

---

[3] Defendant's Supplemental Memorandum in Support of Motion to Dismiss, at 7.
[4] Trade Agreements Act of 1979, Pub. L. No. 96-39, § 1001(b)(3)(E), 93 Stat. 144, 305 (1979).

to enlarge the jurisdiction of the court. *San Francisco Newspaper Printing Co.* v. *United States,* 9 CIT ——, 620 F. Supp. 738 (1985). "A time limitation that is a jurisdictional prerequisite is not subject to waiver of estoppel." *Id.* at 5; *see Zipes* v. *Trans World Airlines, Inc.,* 455 U.S. 385, 392-93 (1982); *United States* v. *Reliable Chemical Co.,* 66 CCPA 123, 128, C.A.D. 1232, 605 F.2d 1179, 1184 (1979).

If a demand for payment lacks information available to Customs which would provide a surety sufficient means of ascertaining the bond on which demand for payment is being made, such a demand does not constitute notice of demand for payment against a bond. Since the November 5, 1981 letter and accompanying printout did not contain any information from which plaintiff could ascertain that a demand was being made on the bond in question, it did not constitute notice of demand for payment against plaintiff's bond.

The Court holds that the mailing of the November 5, 1981 letter did not start the running of the 90 days in which plaintiff was required to file a protest, and that sufficient notice of demand for payment was not mailed until January 29, 1982. The protest filed on February 12, 1982 was timely.

Defendant's motion is denied. So ordered.

DAN-DEE IMPORTS, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 81-5-00582

[Judgment for plaintiff.]

(Decided January 3, 1986)

Weltz, Stedina & Posner (*Herbert T. Posner*) for plaintiff.

Richard K. Willard, Assistant Attorney General, *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office and *Judith M. Barzilay,* Civil Division, United States Department of Justice, for defendant.

OPINION

RESTANI, *Judge:* This matter is before the court for decision following trial. The issue before the court is whether the merchandise at issue should be classified for tariff purposes as dolls under item 737.22 of the Tariff Schedules of the United States (TSUS), under item 737.95, TSUS, as toys, not specifically provided for, under item 270.25, TSUS, as books, not specifically provided for, or under item 737.52, TSUS, as toy books.

The merchandise in question was imported from Taiwan during 1978 and 1979, and consists of stuffed cloth figures, each of which represents one of several children's fairy tales or stories.[1] Each

[1] A detailed description of the item is contained in the court's opinion on plaintiff's motion for summary judgment. *Dan-Dee Imports* v. *United States,* 7 CIT 241, Slip Op. 84-49 at 3-4 (April 30, 1984).

figure has a human or animal face and a general human shape.[2] Each figure bears three or four apron-like flaps which are raised to show a new face and to reveal a new "page" of words of a children's story on a background depiction of "clothing." Thus, as the flaps are raised a new character appears.

Plaintiff's basic argument is that the merchandise in question is more than a doll and cannot be classified under the *eo nomine* TSUS item for dolls. Defendant argues that the merchandise is essentially a doll, that the flap/pages are incidental to the merchandise and do not destroy its essential nature as a doll. It is well settled that "where an article is in character or function something other than as described by a specific statutory provision—either more limited or more diversified—" it cannot be classified within that *eo nomine* provision. *Robert Bosch Corp.* v. *United States*, 63 Cust. Ct. 96, 103-04, C.D. 3881 (1969).

In order to determine whether the merchandise was more than a doll, the court heard testimony on the marketing and use of the figures.[3] Defendant's witnesses were not persuasive on the issue of whether the merchandise was used, sold or purchased as a doll. Mrs. Susan Crowley, a toy store owner, said nothing which was inconsistent with a conclusion that the flap/pages are a vital feature of the merchandise. Mrs. Crowley's account of her observations and marketing techniques was somewhat sketchy and her testimony regarding observation of a five-year-old with the merchandise was consistent with plaintiff's view that the merchandise is more than a doll. Likewise, the testimony of Mrs. Susan Abelson, an owner of one of the figures and a mother, did not outweigh that provided by plaintiff's witnesses. Mrs. Abelson testified that her daughter treated the figure as a doll, but Mrs. Abelson's daughter received the figure when she was two or three years old. Had she received it when she was older or had she been shown to use it differently, she may have treated it as a book or as a more complex toy than a doll. On the other hand, plaintiff's witnesses were clear and convincing in their testimony that essentially the merchandise is marketed and used as an educational toy.

Overall, the testimony at trial revealed that the merchandise may be used as some dolls are used, that is, "mothered" and held. The testimony also revealed that the merchandise is used to amuse or teach children in more complex ways. The item can be read and has other characteristics of a short children's book. It has the equivalent of cloth pages which contain the essential elements of a story. The flap/pages describe, in printed words, the characters and the plot of familiar children's tales. Perhaps the item would appeal to very young children whether or not it contained the words of a

[2] The court notes that contrary to its previous opinion, every figure does not bear a totally human representation. One figure depicts three pigs and one wolf in anthropomorphic form. The court's ruling, however, does not rest on the non-human feature of some of the figures.

[3] Use may be considered in making a decision as to whether an *eo nomine* provision applies. *United States* v. *Quon Quon Co.*, 46 CCPA 70, 72-73, C.A.D. 699 (1959).

story, but the testimony made clear that older children, and the adults who purchase the item for children, view the flap/pages and their contents as more than an incidental feature of the item.

As in other cases, there is a major selling feature which makes the merchandise in the case at bar more than a doll. *House of Ideas, Inc.* v. *United States,* 2 CIT 68 (1981), (papier-mâché clown bank); *Janex Corp.* v. *United States,* 80 Cust. Ct. 146, C.D. 4748 (1978) (plastic Raggedy Ann/Andy with enclosed light); *Cragston Corp.* v. *United States,* 51 CCPA 27, C.A.D. 832 (1963) (wind-up baby with walker). As the evidence revealed, the "book" aspect is fundamental to the merchandising of this article. This outweighs the fact that the article was labeled a "Tell-A-Story Doll" or a "Storybook Doll." The merchandise is in fact sold and used as more than a doll.

As to plaintiff's claimed classifications, the item does not appear to fit item 737.52, TSUS, "Toy books, including coloring books and books the only reading matter in which consists of letters, numerals or descriptive words." The actual printed words exceed the limitations of item 732.52, TSUS. See *A.C.G. Export Import* v. *United States,* 66 Cust. Ct. 128, C.D. 4181 (1971).

It is clear from the case of *Russ Berrie* v. *United States,* 76 Cust. Ct. 218, 223, C.D. 4659 (1976) (papier-mâché figures with attached message), the "dolls" may include items which are not solely for a child's amusement. Toys, on the other hand, must be used chiefly to amuse children. *Fred Bronner Corp.* v. *United States,* 57 Cust. Ct. 428, 435, C.D. 2832 (1966). Although there was a great deal of testimony about the book-like features of the merchandise, not one witness gave testimony that obviates the conclusion that the major intended use of the merchandise is the amusement of children. As with other educational toys, it is purchased, in part, to foster mental development, but the primary purpose of the article is amusement.

The merchandise is also not a book as that object is commonly understood. Its toy or doll-like features make it something other than or more than a book.

The court concludes, based on all the evidence, that the item at issue must be classified under item 737.95, TSUS, as toys, not specifically provided for. Thus, in this case, not only has the presumption of correctness attaching to the government's classification been overcome, but plaintiff has established a different classification by a preponderance of the evidence.

UNITED STATES, PLAINTIFF *v.* ONE RED LAMBORGHINI (VIN ZA190000ELA12133), AND ONE BLACK LAMBORGHINI (VIN ZA190000ELA12144), DEFENDANTS

Court No. 85-10-01393

Before DICARLO, *Judge.*

Plaintiff brings action *in rem* under 19 U.S.C. § 1592(c)(5) (1982) seeking forfeiture of vehicles seized by Customs as improperly entered.

Held: 19 U.S.C. § 1592 does not provide a cause of action for forfeiture *in rem.* The action is dismissed.

(Decided January 6, 1986)

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, Civil Division, Department of Justice (*J. Kevin Horgan*) for plaintiff.

Stein Shostak Shostak & O'Hara (*Robert Glenn White*) for *amicus curiae* Brigitte Kritschker.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Plaintiff brings this *in rem* action under section 592(c)(5) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1592(c)(5) (1982), seeking forfeiture of two vehicles seized by the United States Customs Service (Customs) as improperly entered into the United States. Plaintiff sought a warrant for the arrest of the vehicles pursuant to 28 U.S.C. § 2461(b) (1982).[1] The Court did not sign the arrest warrant and requested, *sua sponte,* that plaintiff submit a memorandum setting forth the legal basis for its action.[2] The Court holds that section 592 does not provide a cause of action for forfeiture *in rem.* The action is dismissed.

BACKGROUND

On September 4 and 7, 1984, Brigitte Kritschker, a citizen of the Federal Republic of Germany, entered one Lamborghini Jalpa automobile at Jacksonville, Florida, and Los Angeles, California, respectively, under item 812.30, Tariff Schedules of the United

---

[1] 28 U.S.C. § 2461(b) provides in part:

> Unless otherwise provided by Act of Congress, whenever a forfeiture of property is prescribed as a penalty for violation of an Act of Congress * * * forfeiture may be enforced by a proceeding by libel which shall conform as near as may be possible to proceedings in admiralty.

Rule C (3) of the Supplemental Rules for Certain Admiralty and Maritime Claims provides that an *in rem* action by the United States for forfeiture for federal statutory violation proceeds by issuance of an arrest warrant by the clerk for seizure of the property.

In *United States* v. *Gold Mountain Coffee, Ltd.,* 8 CIT 247, 597 F. Supp. 510, 515, *reh'g denied,* 8 CIT 336, Slip Op. 84-135 (Dec. 17, 1984), the Court held that since the clerk of this Court may not make the determinations required by section 592(c)(5), property subject to forfeiture under that provision cannot become subject to the process of the Court by action of the clerk, but only by action of the Court. Thus, in this action, the arrest warrant was forwarded to the Court.

[2] The Court requested that plaintiff brief the legal basis for its action since (1) there was no previous judicial determination whether section 592 provides for an *in rem* action for forfeiture and (2) under Rule C (6) of the Supplemental Rules no claimant would come forward until after publication of notice of the arrest of the vehicles.

States (TSUS).[3] According to Ms. Kritschker, she returned to the Federal Republic of Germany on September 11, 1984. On or about September 20, 1984, Customs agents seized both vehicles at Fort Worth, Texas.

On October 16, 1984, Customs issued a pre-penalty notice and notice of seizure to Ms. Kritschker pursuant to section 592(c)(5). On January 9, 1985, Ms. Kritschker responded to the pre-penalty notice, requesting administrative relief from the *in personam* penalty and from the seizure of the two vehicles. On March 6, 1985, Customs issued a penalty notice to Ms. Kritschker, alleging fraudulent violations of section 592. Ms. Kritschker responded to the penalty notice with a petition for mitigation, pursuant to 19 U.S.C. § 1618 (1982) on April 3, 1985, requesting that if the vehicles were not released by Customs within 21 days, the seizure be referred to the appropriate government attorneys for commencement of judicial forfeiture proceedings.

On May 10, 1985, Ms. Kritschker brought an action requesting that the Court order Customs to release the vehicles or refer the matter to the Department of Justice to "initiate proceedings on the seizure." *Kritschker* v. *Greenleaf,* No. 85–5–00657 (CIT).[4] On June 10, 1985, the United States counterclaimed in *Kritschker* for civil penalty for fraudulent violation of section 592.

On September 19, 1985, the Court granted plaintiff's motion in *Kritschker* to dismiss the counterclaim as untimely. The Court held: (1) the United States may not bring an action under section 592 against an importer who has pending a petition for mitigation or remission under 19 U.S.C. § 1618 before a final determination is provided to the importer pursuant to section 592(b)(2); (2) Ms. Kritschker's petition had not been denied; and (3) Ms. Kritschker had neither withdrawn her petition nor waived her rights to a determination by bringing her action.[5]

---

[3] Item 812.30, TSUS covers:

> articles imported by or for the account of any person arriving in the United States who is not a returning resident thereof:
>
> * * * * * * *
>
> Automobiles * * * imported in connection with the arrival of such person and to be used in the United States only for the transportation of such person, his family and guests, and such incidental carriage of articles as may be appropriate to his personal use * * *.

[4] The complaint alleged three causes of action. The first claimed violation of 19 U.S.C. §§ 1602-1604 (1982), which require Customs officials to report seizures immediately to appropriate authorities, including the United States Attorney for the district in which the violation occurred, and the United States Attorney General to "forthwith * * * cause the proper proceedings to be commenced and prosecuted, without delay," unless such proceedings are not warranted. 19 U.S.C. § 1604. The second cause of action alleged plaintiff was denied use of her property without due process under the Fifth Amendment to the Constitution. The third cause of action sought review of defendants' actions under the Administrative Procedure Act, 5 U.S.C. § 702 (1982).

[5] On October 9, 1985, the Court denied plaintiff's motion for judgment on the pleadings in *Kritschker,* and offered plaintiff an expedited trial date. Plaintiff in *Kritschker* then made an oral motion to voluntarily dismiss the action without prejudice. On October 21, 1985, plaintiff indicated that it would not seek action on its motion until disposition of this action.

On October 17, 1985, Customs issued its determination on Ms. Kritschker's supplemental petition. Customs said it had reasonable cause to seize the vehicles under section 592, and determined that Ms. Kritschker's false statements to Customs were the result of fraud. Notice of Customs determination was mailed to Ms. Kritschker's counsel October 30, 1985. Ms. Kritschker had until December 16, 1985 to respond. She did not respond.

On December 19, 1985, the United States moved to amend its answer in *Kritschker* to include a counterclaim for civil penalties for fraudulent violation of section 592. That motion is pending.

On October 4, 1985, the United States brought this action *in rem* under section 592 against the vehicles.

DISCUSSION

The question presented by plaintiff's action is whether Congress has provided for forfeiture actions *in rem* under section 592.

"In construing a federal statute it is appropriate to assume that the ordinary meaning of the language that Congress employed 'accurately expresses the legislative purpose.' " *Mills Music, Inc.* v. *Snyder*, ———, U.S. ———, 105 S.Ct. 638, 645 (1985), quoting *Park'n Fly* v. *Dollar Park and Fly, Inc.*, ——— U.S. ———, 105 S.Ct., 658, 662 (1985). Section 592 states in part:

> (a) Prohibition
>
> (1) General Rule
>
> Without regard to whether the United States is or may be deprived of all or a portion of any lawful duty thereby, no person, by fraud, gross negligence, or negligence—
>
> (A) may enter, introduce, or attempt to enter or introduce any merchandise into the commerce of the United States by means of—
>
> (i) any document, written or oral statement, or act which is material and false, or
>
> (ii) any omission which is material, or
>

>
> A fraudulent violation of subsection (a) of this section is punishable by a civil penalty in an amount not to exceed the domestic value of the merchandise.
>
> * * * * * * *
>
> (5) Seizure
>
> If the Secretary has reasonble cause to believe that a person has violated the provisions of subsection (a) of this section and that such person is insolvent or beyond the jurisdiction of the United States or that seizure is otherwise essential to protect the revenue of the United States or to prevent the introduction of prohibited or restricted merchandise into the customs territory of the United States, then such *merchandise may be seized and, upon assessment of a monetary penalty, forfeited unless the monetary penalty is paid within the time specified by law.* Within a reasonable time after any such seizure is made, the Secretary shall issue to the person concerned a written statement containing the reasons for the seizure. After seizure of merchandise under this subsection, the Secretary may, in the case of restricted merchandise, and shall, in the case of

> any other merchandise (other than prohibited merchandise), return such merchandise upon the deposit of security not to exceed the maximum monetary penalty which may be assessed under subsection (c) of this section.

(Emphasis added.)

Section 592 was extensively revised in 1978.[6] The Senate and the conference report said that

> The penalty for violation of section 592 would be changed from an in rem penalty, forfeiture of the merchandise, to an in personam penalty, a monetary liability of the importer. However, seizure of the merchandise would be permitted if the Secretary of the Treasury has "reasonable cause to believe" the importer is insolvent, outside U S. jurisdiction, or that seizure is "necessary" to protect the revenue or prevent the importation of restricted goods. The seized merchandise would, in general, be forfeited to the United States only if the monetary penalty is not paid.

S. Rep. No. 95–778, 95th Cong., 2d Sess. 19, *reprinted in,* 1978 U.S. Code Cong. & Ad. News 2211, 2230; Conf. Rep. No. 95–1517, 95th Cong., 2d Sess. 10, *reprinted in,* 1978 U.S. Code Cong. & Ad. News 2249, 2252.

Simply stated, the 1978 revisions to section 592 terminated the *in rem* action under that provision. There is nothing in the language or legislative history of the current section 592 that indicates that Congress intended that provision to provide an *in rem* cause of action for forfeiture of merchandise.

Plaintiff argues that the statement in the legislative history quoted above that "seized merchandise would, *in general,* be forfeited to the United States only if the monetary penalty is not paid" (emphasis added) leaves open the possibility that merchandise might be forfeited in some circumstances other than for nonpayment of monetary penalty.

But the question posed by plaintiff's action is whether section 592 provides for *in rem* actions, not whether forfeiture is only permitted where the monetary penalty is unsatisfied.[7] The Court does not find the language cited by plaintiff "a clearly expressed legislative intention to the contrary" of the language of the statute providing only for an *in personam* action. *See Consumer Product Safety Comm'n* v. *GTE Sylvania, Inc.,* 447 U.S. 102, 108 (1980).

Plaintiff says that it is compelled to seek a prompt judicial determination of the propriety of the seizure and detention of the vehi-

---

[6] *See* Customs Procedure Reform and Simplification Act of 1978, Pub. L. No. 95–410, § 110, 92 Stat. 888 (1978). Under prior law, the only penalty that could be assessed in a section 592 action was forfeiture of the merchandise involved or a penalty equal to the domestic value of the merchandise. Under current law, the amount of any penalty is to be determined *de novo* by the Court. 19 U.S.C. § 1592 (e). *See United States* v. *F.A.G. Bearings, Ltd.,* 8 CIT 294, 598 F. Supp. 401 (1984); Note, *Anachronism Laid to Rest: Customs Reform Act Accomplishes Long Overdue Reform of Section 592 of the Tariff Act of 1930,* 10 Law and Pol'y in Int'l Bus. 1305, 1314 (1978).

[7] The answer to this question remains unclear. In *United States* v. *Tabor,* 9 CIT ——, 608 F.Supp. 658, 665 (1985), the Court dismissed a claim for forfeiture in an action also seeking civil penalties. The Court held that in the forfeiture language of section 592(c)(5) "Congress appears to have provided a particular, but nonexclusive, manner for satisfaction of a judgment." 608 F.Supp. at 665.

cles or risk losing its only security for payment of the penalty on due process grounds or by the depreciation of the vehicles during the pendency of the administrative proceedings.[8] Plaintiff acknowledges that it is required to seek a post-seizure judicial determination of the legality of the seizure and detention within a reasonable time after seizure, *see United States* v. *$8,850,* 461 U.S. 555 (1983), and says that section 592 must be construed to permit some judicial approval of the seizure during the pendency of the administrative *in personam* proceedings.

There may be, as the United States argued in *Kritschker,* a statute under which *in rem* proceedings for forfeiture of merchandise is permitted. *See* 18 U.S.C. § 545 (1982). However, jurisdiction over such actions is provided in the district courts. 28 U.S.C. § 1355 (1982).[9] Jurisdiction over actions under section 592 is exclusive in this Court. 28 U.S.C. § 1355. *See United States* v. *Gold Mountain Coffee, Ltd.,* 8 CIT 247, 597 F. Supp. 510, 515, *reh'g denied,* 8 CIT 336, Slip Op. 84-135 (Dec. 17, 1984); *United States* v. *Tabor,* 9 CIT ——, 608 F. Supp. 658, 665 (1985).

The Court understands the desirability of adjudicating all claims arising out of an import transaction in one forum. But, "[t]he relevant question is not whether, as an abstract matter, the rule advocated by petitioner accords with good policy. The question we must consider is whether the policy petitioners favor is that which Congress effectuated * * *. Courts are not authorized to rewrite a statute because they might deem [it] susceptible of improvement." *Badaracco* v. *Commissioner,* —— U.S. ——, 104 S.Ct. 756, 765 (1984).

In rem actions under section 592 may be desirable for the reasons advanced by plaintiff. But section 592 is, on this point, plain and unambiguous; it does not provide for *in rem* actions.

The action is dismissed. Judgment will be entered accordingly.

---

[8] To afford due process to potential claimants, plaintiff asks the Court to "approve" the detention of the vehicles. Memorandum in Support of the United States' Claim for Forfeiture, at 7. To avoid depreciation of the vehicles, plaintiff says that it will deposit the proceeds of their sale in an escrow account from which the civil penalty will be satisfied. *Id.*, at 16.

[9] 28 U.S.C. § 1355 (1982) provides:

> The district courts shall have original jurisdiction, exclusive of the courts of the States, of any action or proceeding for the recovery or enforcement of any fine, penalty, or forfeiture, pecuniary or otherwise, incurred under any Act of Congress, except matters within the jurisdiction of the Court of International Trade under section 1582 of this title.

28 U.S.C. § 1582(a) (1982) provides for jurisdiction in this Court of any action brought by the United States under section 592.

NOTICE

The Procedural Handbook of the United States Court of International Trade, prepared by the staff of the Office of the Clerk, is now available. The Handbook provides basic information for the practitioner in processing actions under the court's Rules. It is intended to serve solely as a convenient guide and reference source, which consolidates and summarizes various procedures before the court.

The cost of the Handbook is $10.00. If you are interested in receiving a copy of the Handbook, please fill out the form below and return to:

Treasury Decisions

(T.D. 86-9)

Approval of William C. Brann II To Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Approval.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), William C. Brann II of 4423 18th Street, Bacliff, Texas 77518, applied to Customs for approval to gauge imported petroleum and petroleum products. It has been determined that Mr. Brann meets all of the requirements to be a Customs approved public gauger.

Accordingly, the application of William C. Brann II to gauge imported petroleum and petroleum products in all Customs Districts is approved.

EFFECTIVE DATE: January 27, 1986.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2446).

Dated: January 27, 1986.

ROGER J. CRAIN,
Chief, Technical Section,
Technical Services Division.

(T.D. 86-10)

Approval of United Surveyors of Chemicals, Inc. To Gauge Imported Petroleum and Petroleum Products

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Approval.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), United Surveyors of Chemicals, Inc., of 7501 Bayway Drive, Baytown, Texas 77520, applied to Customs for approval to

gauge imported petroleum and petroleum products. It has been determined that United Surveyors of Chemicals meets all of the requirements to be a Customs approved public gauger.

Accordingly, the application of United Surveyors of Chemicals, Inc., to gauge imported petroleum and petroleum products in the Customs Districts of Houston, Port Arthur, and Laredo, Texas, and New Orleans, Louisiana, is approved.

EFFECTIVE DATE: January 23, 1986.

FOR FURTHER INFORMATION CONTACT: Roger J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington D.C. 20229 (202-566-2446).

Dated: January 27, 1986.

ROGER J. CRAIN,
Chief, Technical Section,
Technical Services Division.

(T.D. 86-11)

Recordation of Trade Name: "SUPREME IMPORT EXPORT CO., INC."

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Recordation.

SUMMARY: On March 14, 1985, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "SUPREME IMPORT EXPORT CO., INC." was published in the Federal Register (50 FR 10341). The notice advised that before final action was taken on the application, consideration would be given to any relevant data, views, or arguments submitted in opposition to the recordation and received not later than May 31, 1985.

Supreme International Corporation commented in opposition to the recordation of the trade name citing concern that because "SUPREME IMPORT EXPORT CO., INC." is confusingly similar to Supreme International Corporation it might be restrained from participating in import transactions under their established name.

SUPREME IMPORT EXPORT CO., INC. has indicated that it has no objection to goods arriving in the United States for Supreme International Corporation. Therefore, goods bearing the name "Supreme International Corporation" shall not be seized or detained as confusingly similar to "SUPREME IMPORT EXPORT CO., INC."

Accordingly, as provided in section 133.14, Customs Regulations (19 CFR 133.14), the name "SUPREME IMPORT EXPORT CO., INC." is recorded as the trade name used by Supreme Import Export Co., Inc., a corporation organized under the laws of the State of New York, located at 900 Broadway, New York, New York

10003. The trade name is used in connection with the following merchandise manufactured in Hong Kong, Korea, Japan, Taiwan and the Philippines; playing cards; cigarette lighters; cellophane tape; toothbrushes; padlocks; cassette tapes; pens; batteries; cameras and curling irons.

EFFECTIVE DATE: January 31, 1986.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

Dated: January 24, 1986.

EDWARD T. ROSSE,
Acting Director,
Entry Procedures and Penalties Division.

19 CFR Part 6 (T.D. 86-12)

Amendments to the Customs Regulations Concerning Access to Customs Security Areas

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Interim regulations.

SUMMARY: This document amends the Customs Regulations on an interim basis to require the use and display of a Customs approved identification strip or seal on existing identification cards worn by employees at airports accommodating international air commerce. Uniformed Federal, State, and local enforcement personnel are excepted from the requirement. The additional identification would be required for all non-exempt persons located at, operating out of, or employed by, affected airports, who request access to Customs security areas in order to perform functions associated with their employment. The amendment also requires that an authorized official of the employer attest, in writing, that a background check of employment history and references has been conducted on their affected employees.

EFFECTIVE DATE: March 5, 1986.

COMMENTS

The amendments contained in this document are being published on an interim basis in order to put into action as quickly as possible a standard policy regarding the Customs role in airport security in light of the ever-growing terrorist threat. However, written comments received before (60 days from the date of publication) will be

considered in determining whether any changes to the interim regulations are required before a final rule is published.

ADDRESS: Written comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Customs Service Headquarters, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Operational Aspects: Charles P. Bartoldus, Office of Inspection and Control (202-566-2140). Legal Aspects: Ellen McClain, Office of the Chief Counsel (202-566-2482), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Various provisions of the Tariff Act of 1930, as amended (19 U.S.C. 1202 *et. seq.*), which are made applicable to aircraft by 19 U.S.C. 1644, 49 U.S.C. App. 1509, and § 6.10, Customs Regulations (19 CFR 6.10), provide the statutory authority for Customs officers to control the entry and clearance of aircraft arriving in the U.S. from foreign countries and the inspection of the crew, passengers, baggage, stores, and cargo carried aboard those aircraft. Section 1109 of the Federal Aviation Act of 1958, as amended (49 U.S.C. App. 1509), authorizes the Secretary of Transportation to designate airports as ports of entry for civil air navigation. Section 582, Tariff Act of 1930, as amended (19 U.S.C. 1582), authorizes the Secretary of the Treasury to prescribe regulations for the detention and search of persons and baggage. These regulations are set forth in Parts 6 and 162, Customs Regulations (19 CFR Parts 6 and 162). Implicit in the search and inspection authority and the right to designate airports is the right to maintain a controlled and secure Customs area which facilitates and insures the integrity of the authorized search and inspection.

Customs finds it necessary to improve integrity and security in authorized inspection areas, due in large measure to the recent sharp increases in threats to airport security posed by terrorist organizations. The current regulations in 19 CFR Part 6 are inadequate for controlling access to the Customs security areas to the extent necessary. The arrival of an aircraft from abroad necessitates the services of numerous persons representing various specialties, such as ground crews, refueling personnel, baggage handlers, and food service personnel, among others. While all of these persons may have legitimate business associated with the arrival of an international flight, Customs needs a method by which access to the aircraft and inspection areas will be restricted, as well as some assurance that the service personnel themselves have been found trustworthy by their employers. While the Federal Aviation Administration has general responsibility for security at airports, Cus-

toms has determined that it is necessary to amend 19 CFR Part 6 to provide Customs with the needed authority and procedures to achieve these goals at the areas under the Customs jurisdiction. The purpose of this amendment is to establish an identification system for all employees whose duties require access to Customs security areas at airports handling international air commerce, with the exception of uniformed Federal, State, and local enforcement personnel. Because of recent terrorist incidents at foreign airports, threats of violence at U.S. airports, and in an effort to improve the security of these areas by restricting access to authorized employees, Customs will require that employees apply for a Customs approved identification strip or seal to be affixed to existing identification cards once an authorized official of the employer attests that background checks of employment history have been conducted. Customs will issue the identification strip or seal, once satisfied that the issuance of the additional identification will neither endanger the revenue nor threaten the security of the entire security area (which may include the arriving airplane, ramp area, and Customs baggage and passenger inspection facilities).

The requirement for a background investigation of employees will only be required with regard to employees hired after November 1, 1984. For all employees hired before that date, the authorized official of the employer need only attest to the fact that the employee was employed before November 1, 1984.

Further, the amendments provide identification of a "Customs security area" within which the previously described procedures will be enforced. This area may include the deplaning and ramp areas, as defined by the district director of Customs, as well as the baggage and passenger inspection areas. These areas will be posted once designated. In airports with areas dedicated only to international arrivals, the posted area will be restricted at all times. In airports in which international and domestic flights share arrival facilities, the restriction times will be posted to the extent they are identifiable.

COMMENTS

Before adopting the interim regulations as a final rule, Customs will give consideration to any written comments (preferably in triplicate) timely submitted to the Commissioner. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR § 103.11(b)), on normal business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Customs Service Headquarters, Room 2426, 1301 Constitution Avenue, NW., Washington D.C. 20229.

INAPPLICABILITY OF NOTICE PROVISIONS

Recent terrorist attacks against European airports and American citizens have pointed out a need to develop adequate and immediate plans for handling high-risk arrivals of aircraft. Customs is responsible for the protection of arriving passengers, airport personnel, and federal employees while in the Customs security area.

Therefore, in light of the threat to public safety, it has been determined that, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure are contrary to the public interest.

E.O. 12291 AND REGULATORY FLEXIBILITY ACT

Because the amendment does not meet the criteria for a "major rule" within the meaning of § 1(b) of E.O. 12291, Customs has not prepared a regulatory impact analysis.

Because of the need to expedite the issuance of this regulation, Customs has not yet been able to determine if the regulation will have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601–612). However, Customs will continue to review this matter and will consider any comments submitted on this aspect of the project before issuing a final rule.

PAPERWORK REDUCTION ACT

The interim regulations are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501). Accordingly, an application for approval of the interim regulations has been submitted to the Office of Management and Budget.

LIST OF SUBJECTS IN 19 CFR PART 6

Air carriers, Air transportation, Aircraft, Airports.

DRAFTING INFORMATION

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

AMENDMENTS TO THE REGULATIONS

Part 6, Customs Regulations (19 CFR Part 6), is amended as set forth below:

PART 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1624, 1644, 49 U.S.C. App. 1474, 1509.

2. Part 6 is amended by adding a new § 6.12a, to read as follows:

§ 6.12a Access to Customs Security Areas.

(a) For the purposes of this section, the term "Customs security area" means the federal inspection services area (as provided for by § 6.12(e) of this Part), designated for processing passengers, crew, their baggage and effects arriving from foreign countries, as well as the aircraft deplaning and ramp areas and other restricted areas designated by the district director of Customs. These areas will be posted as restricted to the extent possible, and are established for the purpose of prohibiting unauthorized entries or contact with persons or objects.

(b) With the exception of uniformed Federal, State, and local enforcement personnel, all persons located at, operating out of, or employed by any airport accommodating international air commerce, or its tenants or contractors, including air carriers, who have unescorted access to the Customs security areas must openly display or produce upon demand, a Customs approved identification card, or strip or seal to be issued and affixed by Customs to existing airport identification cards. The approved identification card, strip or seal, shall be in the possession of the person in whose name it is issued at all times when he is in the Customs security areas. An approved identification card, strip or seal shall not be issued to any person whose employment, if necessitating access to the Customs security areas will, in the judgment of the district director, endanger the revenue or the security of the areas. Grounds for denial of access shall include, but are not limited to:

(1) Any cause which would justify suspension or revocation of the identification card under the provisions of paragraph (h) of this section;

(2) Evidence of a pending or past investigation which establishes criminal, or dishonest conduct, or a verified record of such conduct.

The district director shall give written notification to any person whose application for access to the Customs security area is denied, fully stating the reasons for such denial. The applicant shall have the opportunity to rebut the denial of his application in writing.

(c) An application for an approved identification strip or seal as required by this section, shall be filed by the applicant with the district director on Customs Form 3078. For employees hired on or after November 1, 1984, an authorized official of the employer shall attest in writing that a background check has been conducted on the applicant, to the extent allowable by law, including, at a minimum, references and employment history, to the extent necessary to verify representations made by the applicant relating to employment in the preceeding five (5) years. For employees hired before November 1, 1984, the authorized official of the employer need only attest to the fact that the employee was hired before that date. The authorized official of the employer shall attest that to the best of its knowledge, the applicant meets the conditions necessary to con-

duct duties in the Customs security area. Records of background investigations must be available for verification by Customs for a period of one year following cessation of employment.

(d) An employee may apply, in writing, for a new application under certain circumstances. In such instances, the approved identification shall be promptly submitted by the employee to the district director. The circumstances justifying the issuance of a new authorization strip or seal are as follows:

(1) A change is employee name;
(2) A change in employee address;
(3) A change in the name or ownership of his employing company; or
(4) A change in employer or airport authority identification card format.

(e) The identification strip or seal shall be removed by the district director when for security reasons it is necessary to change the nature of the identification.

(f) The loss or theft of an identification card, with strip or seal affixed, shall be promptly reported by the holder to the district director, and may be replaced as provided in paragraph (d) of this section.

(g) If an approved identification card is presented by a person other than the one to whom it was issued, such identification strip or seal shall be forthwith removed and destroyed.

(h) An authorized seal or strip may be removed and the district director may revoke or suspend access to the Customs security area for any of the following reasons:

(1) Such approved identification card was obtained through fraud or the misstatement of a material fact;

(2) The holder of such approved identification card is convicted of a felony, or convicted of a misdemeanor involving theft, smuggling, or any theft-connected crime;

(3) The holder permits the approved identification card to be used by any other person, or refuses to openly display or produce it upon the proper demand of a Customs officer;

(4) The continuation of privileges would, in the judgment of the district director, endanger the revenue or security of the area;

(5) The holder refuses or neglects to obey any proper order of a Customs officer, or any Customs order, rule, or regulation; or

(6) The holder no longer requires access to the Customs security area for an exteneded period of time. If such a holder returns to duties in the Customs security area within 1 year, a Customs Form 3078 as required by paragraph (c) of this section need not be submitted.

(i) The district director shall suspend or revoke access to the Customs security area by serving notice of the proposed action in writing upon the holder of an approved identification card and a copy of such notice to the holder's employer. Such notice shall be in the

form of a statement specifically setting forth the grounds for revocation or suspension of the privilege and shall be final and conclusive upon the holder unless he shall file with the district director a written notice of appeal within 10 days following receipt of the notice of revocation or suspension. The notice of appeal shall be filed, in duplicate, and shall set forth the response of the holder to the statement of the district director. The holder, in his notice of appeal, may request a hearing.

(j) The following procedures will govern the conduct of a hearing requested under paragraph (i) of this section:

(1) *Notification of and time of hearing.* If a hearing is requested, it shall be held before a hearing officer designated by the Commissioner of Customs or his designee within 30 days following application thereof. The holder shall be notified of the time and place of hearing at least 5 days prior thereto.

(2) *Conduct of hearing.* The holder may be represented by counsel at the revocation or suspension hearing. All evidence and testimony of witnesses in such proceeding, including substantiation of charges and the answer thereto, shall be presented with both parties having the right of cross-examination. A stenographic record of the proceedings shall be made and a copy furnished to the holder. At the conclusion of such proceedings or review of a written appeal, the hearing officer or the district director, as the case may be, shall forthwith transmit all papers and the stenographic record of the hearing, if held, to the Commissioner of Customs or his designee, together with his recommendation for final action.

(3) *Additional arguments.* Following a hearing and within 10 calendar days after delivery of a copy of the stenographic record, the holder may submit to the Commissioner of Customs or his designee, in writing, additional views and arguments on the basis of such record.

(4) *Failure to appear.* If neither the holder nor his attorney appear for a scheduled hearing, the hearing officer shall conclude the hearing and transmit all papers with his recommendation to the Commissioner of Customs or his designee.

(k) The Commissioner or his designee shall render his decision, in writing, stating his reasons therefor, with respect to the action proposed by the hearing officer or the district director. Such decision shall be transmitted to the district director and served by him on the holder.

(l) When an approved identification is required under paragraph (b) of this section, and the district director determines that the application for the identification cannot be administratively processed in a reasonable period of time, any employer may, upon written request, have a temporary approval issued by the district director to his employee if he can show to the satisfaction of the district director that a hardship to his business would result pending issuance of an approved identification.

(1) The temporary identification shall be valid for a period of 60 days. The district director may renew the temporary identification for additional 30-day periods if he determines that the circumstances under which the temporary identification was originally issued continue to exist. The temporary identification strip or seal shall be removed and destroyed by the district director when the permanent approved identification is issued or the privileges granted thereby are withdrawn.

(2) The provisions of this paragraph shall also apply to temporary employees and official visitors requiring access to the Customs security area. In the case of temporary employees, the identification shall be valid for a period of 30 days. In the case of official visitors, the temporary identification strip or seal shall be valid for the day of issuance only, and shall be affixed to a temporary card issued by the district director. Temporary employee and official visitor identifications are renewable for periods equal to their original period of validity.

(3) The temporary identification strip or seal may be removed from any employee or official visitor identification card at any time if, in the judgment of the district director, continuation of the privileges granted thereby would endanger the revenue or if the holder of the temporary identification refuses or neglects to obey any proper order of a Customs officer, or any Customs order, rule, or regulation.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: January 27, 1986.

19 CFR Part 10

(T.D. 86-13)

Customs Regulations Amendment Relating to Marking Requirements for Cargo Containers

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to relieve the owners or operators of certain cargo containers from countries subject to column 1 of the Tariff Schedules of the United States (TSUS), from the burden of affixing certain identifying

markings to them. It has been determined that the containers already display the identity of their owner/operator as well as serial numbers which make individual container identification possible. Further, whether of foreign or domestic manufacture, once exported, these containers are entitled to readmission without compliance with the regulatory marking requirements. Accordingly, the markings required will be limited to those unique identifying marks which already appear on the containers.

EFFECTIVE DATE: March 5, 1986.

FOR FURTHER INFORMATION CONTACT: Donald H. Reusch, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pursuant to General Headnote 6, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202), containers or holders for imported merchandise, if imported empty; and the usual or ordinary types of shipping or transportation containers or holders, if imported containing or holding articles; and if designed for, or capable of reuse; are subject to tariff treatment as imported articles and as such are subject to duty upon each importation, unless specifically exempted. Lift vans and other shipping containers of the large ocean-going type are provided for in item 640.30, TSUS, currently dutiable at the rate of 1.3 percent ad valorem, if imported from countries subject to column 1 of the tariff schedules.

By § 143 of Pub. L. 97-446 (96 Stat. 2342) dated January 12, 1983, Congress temporarily suspended duty on certain of the large ocean-going freight containers imported from column 1 countries, which would be otherwise dutiable under item 640.30, TSUS. Specifically, a new item 911.80 was added to the TSUS which provided for the duty-free entry until December 31, 1986, of containers specially designed and equipped to facilitate the carriage of goods by one or more modes of transport without intermediate reloading. In order to qualify for duty-free treatment under item 911.80, TSUS, a container must have a gross mass rating of at least 40,000 pounds. The legislative history to Pub. L. 97-446 indicates that the subject freight containers will become permanently free of duty on January 1, 1987. (See Presidential Proclamation No. 4707, of December 11, 1979, published in the Federal Register on December 13, 1979 (44 FR 72348)).

Regardless of whether dutiable, containers entering the customs territory of the United States are subject to certain requirements concerning the presence of identifying markings. The marking requirements for imported containers are set forth in § 10.41b, Cus-

toms Regulations (19 CFR 10.41b), which provides for the release from Customs custody without payment of duty of serially numbered substantial holders or outer containers. Those containers qualifying for treatment under item 911.80, TSUS, are presently subject to the requirements of § 10.41b.

Section 10.41b includes requirements for all types of substantial holders and outer containers for which duty-free entry is sought under one of the three provisos of item 808.00, TSUS. The first proviso in item 808.00, TSUS, permits duty-free entry for substantial holders and containers which are products of the U.S. The second proviso includes foreign-made containers and holders which have been previously imported with duty, if any, having been once paid. The third proviso covers holders and containers which have been specified by the Secretary of the Treasury as instruments of international traffic, including their repair components and accessories and equipment. These amendments only apply to the first and second proviso. They do not pertain to containers or holders entered under the third proviso, as instruments of international traffic. Section 10.41b requires that containers and holders of all descriptions imported under item 808.00, TSUS, display the designation "808.00 (TSUS)", the district and port code numbers for the Customs port of entry, the Customs entry number as well as the last two digits of the fiscal year in which duty was paid, the name of the owner, and the owner-assigned serial number. The purpose of these requirements is to enable Customs to determine that duty, if applicable, has previously been paid at the time of first entry.

In regard to the 40,000 pound rated containers which were the subject of Pub. L. 97-446, it is noted that they already bear the identity of the owner or operator, as well as the owner/operator-assigned serial number. Whether foreign-made or of U.S.-manufacture, the containers, once exported, are entitled to be brought back into the U.S. without entry, and duty-free upon compliance with the marking provisions of of § 10.41b. Furthermore, a large number of the subject containers are in use and owing to their existing markings and their size, they are readily distinguishable from other containers and holders to which the marking requirements apply.

In view of the circumstances peculiar to containers which were the subject to Pub. L. 97-446, it has been determined that the generally applicable marking requirements prescribed in § 10.41b(c), Customs Regulations (19 CFR 10.41b(c)), serve no useful purpose, and the subject containers should be relieved of compliance with this burdensome requirement. Accordingly, § 10.41(b) is being amended to reflect this determination.

Inapplicability of Public Notice Requirements

Because this amendment merely implements a statutory requirement, relieves a regulatory burden, and involves a matter in which

the public is not particularly interested, pursuant to 5 U.S.C. 553(b)(B), notice and an opportunity for public comment are not necessary.

Regulatory Flexibility Act

This document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). That Act does not apply to any regulation such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. et seq.), or any other statute.

Executive Order 12291

This amendment does not meet the criteria for a major regulation as defined in § 1(b) of E.O. 12291. Accordingly, a major impact analysis is not required.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 10

Customs duties and inspection, Imports, Packaging and containers.

Amendments to the Regulations

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation for Part 10, Customs Regulations (19 CFR Part 10), continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1623, 1624.

2. Section 10.41b is revised by amending paragraph (c) to read as follows:

§ 10.41b Clearance of serially numbered substantial holders or outer containers.

* * * * * * *

(c)(1) In the case of serially numbered holders or containers of foreign manufacture, other than those provided for in paragraph (c)(2) of this section, for which free clearance under the second provision in item 808.00, Tariff Schedules of the United States (19 U.S.C. 1202), is claimed, the owner shall place thereon the following markings:

(i) 808.00.

(ii) The district and port code numbers of the port of entry, the entry number, and the last two digits of the fiscal year of entry covering the importation of the holders and containers on which duty was paid.

(iii) The name of the owner, either positioned as indicated in the example below, or elsewhere conspicuously shown on the holder or container.

(iv) The serial number assigned by the owner, which shall be one of consecutive numbers and not to be duplicated. For example: 808.00 * * * 10-1-366-63 * * * Zenda * * * 2468.

(2) In the case of substantial holders or containers of either U.S. or foreign manufacture, specially designed and equipped to facilitate the carriage of goods by one or more modes of transport without intermediate reloading, each having a gross mass rating of at least 40,000 pounds, for which duty-free entry is requested under either the first or the second proviso in item 808.00, Tariff Schedules of the United States (19 U.S.C. 1202), is claimed, only the following clear, conspicuous and durable markings are required to be on the container:

(i) The identity of the owner or operator of the container.

(ii) The serial number assigned by the owner or operator of the container, which shall be one of consecutive numbers and shall not be duplicated.

ALFRED R. DE ANGELUS,
Acting Commissioner of Customs.

Approved: January 14, 1986.

FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

U.S. Customs Service

Proposed Rulemaking

19 CFR Part 101

Proposed Customs Regulations Amendment Relating to a Change in the Customs Service Field Organization—Brunswick, Georgia

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule; solicitation of comments.

SUMMARY: This document proposes to amend the Customs Regulations to change the Customs field organization by extending the geographical limits of the port of entry at Brunswick, Georgia. Currently, Customs officers at the port service many locations which are outside the Brunswick city limits, those limits having been the unofficial port limits. This proposed expansion will better serve the public by including several locations routinely requiring Customs service within the official port limits.

DATE: Comments must be received on or before April 4, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Richard Coleman, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, Customs proposes to amend § 101.3, Customs Regulations (19 CFR 101.3), by extending and officially defining the geographical limits of the port of entry of Brunswick, Georgia, located in the Savannah, Georgia, Customs District in the Southeast Region.

498-398 0 - 2

Currently, there is no official definition of the Brunswick port limits. The Brunswick city limits have been serving as the port limits. However, Customs officers at the port routinely service many locations which are outside the city limits, and an additional out-of-port terminal facility recently began operation. Therefore, this proposed change would expand the Brunswick port limits to include those several locations now receiving service.

The proposed expanded port limits are as follows: Beginning from the intersection of the boundary between the counties of Camden and Glynn and tht Atlantic Ocean, and proceeding in a northwesterly direction along the Little Satilla River to U.S. Highway Interstate 95; then in a northeasterly direction along U.S. Highway Interstate 95 to the boundary between McIntosh and Glynn Counties; then in a easterly direction along the Altahama River to the Atlantic Ocean; then in a southerly direction along the Atlantic coastline to the place of beginning.

If the proposed change is adopted, the list of Customs regions, districts, and ports of entry in § 101.3(b) Customs Regulations, will be amended accordingly.

COMMENTS

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

AUTHORITY

This change is proposed under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by E.O. No. 10289, September 17, 1951 (3 CFR 1949–1953 Comp. Ch. II) and pursuant to authority provided by Treasury Department Order No. 101–5 (47 FR 2449).

LIST OF SUBJECTS IN 19 CFR PART 101

Customs duties and inspection, Imports, Organization.

REGULATORY FLEXIBILITY ACT

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal. Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the

U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this change may have a limited effect upon some entities in the Brunswick, Georgia, area, it is not expected to be significant because the extension of the limits of Customs ports of entry in other locations has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Regulatory Flexibility Act. Accordingly, it is certified under the provisions of § 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the amendment, if adopted, will not have a significant economic impact on a substantial number of small entities.

EXECUTIVE ORDER 12291

Because the proposed amendment relates to the Customs field organization, pursuant to § 1(a)(3) of E.O. 12291 this proposal is not subject to that E.O.

DRAFTING INFORMATION

(Appeal No. 85-2707)

Motion

ARMSTRONG RUBBER CO., ET AL., PLAINTIFF/APPELLEES *v.* UNITED STATES, DEFENDANT/APPELLANT *v.* HANKOOK TIRE MFG. CO., ET AL., DEFENDANT/APPELLEE

Before MARKEY, *Chief Judge*, BALDWIN and BISSELL, *Circuit Judges*.

ORDER

The court has before it certain motions of Hankook Tire Mfg. Co., Ltd., Hankook Tire American Corp., Kumho & Co., Inc., Kumho U.S.A., Inc., Hyosung. Corp., and Hyosung America, Inc. (jointly, movants), to intervene in this appeal from an August 8, 1985 decision of the Court of International Trade (CIT). Movants

were formal intervenors in the CIT proceedings on the side of appellant, the U.S. International Trade Commission (ITC), by virtue of their participation in the ITC antidumping proceedings under review, and their status as interested parties pursuant to 19 U.S.C. § 1677(9)(A).

The court has also received the December 19, 1985 motion of appellees Armstrong Rubber Co. and the B.F. Goodrich Company (Armstrong et al.) to dismiss the appeal for lack of jurisdiction.

On August 15, 1985, the ITC filed its notice of appeal with this court. On August 19, 1985, the appellees, Armstrong et al., filed a motion for alteration of judgment under the purported authority of USCIT R. 59(e). That motion was denied by the CIT on September 18, 1985.

Armstrong et al. has argued that the filing of the USCIT 59(e) motion nullified the ITC's August 15, 1985 notice of appeal, and that the ITC's failure to file a subsequent notice of appeal from the September 18, 1985 order of the CIT has rendered this appeal untimely. The ITC and movants have requested an enlargement of time, until January 13, 1986, to respond to this motion. The request for an enlargement of time to respond to the motion is granted.

Movants have also requested intervention into this appeal. Movants, however, did not file a notice of appeal in the CIT, relying instead upon paragraph 9(a) of this court's procedural handbook as the basis for their participation in this appeal. Movants argue that paragraph 9(a) grants them the position of appellants simply by the filing of a notice of appearance and that this status was allegedly confirmed in oral conversation with members of the clerk's staff.

Regarding the movant's motions to intervene, paragraph 9(a) of the court's procedural handbook states:

> A party who appears as an intervenor in a lower court proceeding shall be considered a party to the appeal upon the filing of a notice of appearance.

Further, the handbook carries the express qualification:

> This handbook does not amend, modify, or substitute for any of the court's rules. Appeals are governed by the Federal Rules of Appellate Procedure (FRAP) with modifications and additions by Local Rules (CAFC) dictated by the nature of the court's jurisdiction.

FRAP 3 specifically directs that an appeal permitted as of right *shall* be taken by filing a notice of appeal with the clerk of the court from which the appeal is taken within the time allowed by FRAP 4. Further, that rule specifically requires each party seeking to act independently to overturn or modify a judgment to file a notice of appeal. The general rule that the filing of the notice of appeal is mandatory and jurisdictional (*United States* v. *Robinson*, 361 U.S. 220, 224 (1960)) extends to all appeals. *Jackson Jordan, Inc.* v. *Plasser Amer. Corp.*, 725 F.2d 1373, 1376 (Fed. Cir. 1984).

Thus, movants' reliance upon Paragraph 9(a) of the handbook in this case is unjustified. By filing a notice of appearance, movants have the right to participate as a party in the appeal. However, having failed to file a notice of appeal, movants' motion to participate in this appeal as appellants must be denied. Thus, the brief and response to the motion to dismiss proffered by movants is accepted in support of the position of the United States (appellant) and will be considered to that extent.*

Dated: January 14, 1986.

For the Court,

JEAN GALLOWAY BISSELL,
Circuit Judge.

*This treatment of movants is in accordance with Supreme Court rules on *appeals* to that court. See Supreme Court Rule 10.4.

Decisions of the United States Court of International Trade

(Slip Op. 85-132)

DONNA KELLEY, ET AL., PLAINTIFFS *v.* SECRETARY, UNITED STATES DEPARTMENT OF LABOR, DEFENDANT

Court No. 85-03-00437

Opinion and Order

(Decided December 30, 1985)

Donna Kelley, pro se.

Richard K. Willard, Assistant Attorney General, *David M. Cohen*, Director, Commercial Litigation Branch, *Platte B. Moring III, Civil Division, United States Department of Justice, for defendant.*

RESTANI, *Judge*: Plaintiffs, former employees of the American Thread Company's (American Thread) plant in Tallapoosa, Georgia (Tallapoosa plant), challenge the Secretary of Labor's determination denying eligibility of former employees of the Tallapoosa plant to apply for trade adjustment assistance under section 223 of the Trade Act of 1974 (Act), 19 U.S.C. § 2273 (1982).[1] Certification for eligibility to apply for adjustment assistance requires an affirmative determination by the Secretary of Labor under the three-part test of section 222.[2] The Secretary of Labor determined that the nexus between increased imports and worker separations required by the third element of Section 222 was lacking and thus the workers in question were denied eligibility to apply for adjustment assistance.

---

[1] One determination was issued covering petitions filed by employees of American Thread's Tallapoosa and Willimantic plants. 50 Fed. Reg. 569. Investigations of those petitions were conducted separately, in large part, and only the Tallapoosa determination is currently before the court.

[2] Section 222 provides:

> The Secretary shall certify a group of workers as eligible to apply for adjustment assistance under this part if he determines—
>
> (1) that a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,
>
> (2) that sales or production, or both, of such firm or subdivision have decreased absolutely, and
>
> (3) that increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales of production.
>
> For purposes of paragraph (3), the term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

19 U.S.C. § 2272 (1982, & 1983 Supp. I).

This court has authority to review a decision of the Secretary of Labor denying a petition for eligibility to apply for adjustment assistance. 19 U.S.C. § 2395(a) (1982). The court is bound by findings of fact by the Secretary of Labor supported by substantial evidence. 19 U.S.C. § 2395(b) (1982). The issue before the court is, therefore, whether there is substantial evidence on the administrative record to support the Secretary's determination that there was lacking the requisite causal nexus between increased imports of "like or directly competitive articles" and worker separations.[3]

Before addressing this issue, however, the court must consider defendant's jurisdictional challenge. Workers may challenge the Secretary of Labor's final determination on a petition for adjustment assistance by filing an action with this court within sixty days after notice is given. 19 U.S.C. § 2395(a) (1982). 29 CFR § 90.19(a) (1984) provides that the notice referred to in 19 U.S.C. § 2395(a) is notice via publication in the Federal Register. Notice of denial of eligibility to apply for adjustment assistance was published in the Federal Register on January 4, 1985, and plaintiffs' summons and complaint were not deemed filed until March 28, 1985. Defendant argues that plaintiffs thereby failed to comply with the sixty day statute of limitations and that this court, therefore, lacks jurisdiction over plaintiffs' substantive cause of action. Normally, in accordance with regulations and under case law, the sixty day period would run from the time constructive notice is given; the date of the Federal Register publication. Section 2395(a), however, is not so specific in its definition of notice. The court concludes, therefore, that the statute requires a consideration of whether notice was proper in the context of other applicable statutes and regulations. Section 223 of the Act provides that the Secretary of Labor must act on a petition for trade adjustment assistance within sixty days after such petition is filed.[4] 19 U.S.C. § 2273(a) (1982). The Secretary of Labor's final determination was published in the Federal Register approximately four months after plaintiffs' petition was filed, far exceeding the sixty day statutory provision. Although failure to comply with this deadline does not make the Secretary of Labor's determination *ultra vires*, *Katunich* v. *Donovan*, 8 CIT —, 594 F. Supp. 744, 748–49 (1984), the court determines that certain consequences flow from a late determination. As previously recognized by this court,

> It is well settled that "essence of due process is the requirement that a person in jeopardy of serious loss [be given] notice of the case against him *and opportunity to meet it.*" *Mathews* v. *Eldridge*, 424 U.S. 319, 348 (1976) (quoting Frankfurter, J., concurring in *Joint Anti-Facists Committee* v. *McGrath*, 341 U.S.

---

[3] See subparagraph (3) of section 222 in footnote 2.

[4] Regulations governing these proceedings break down this 60 day period further; a recommendation by the Office of Trade Adjustment Assistance (OTAA) on a petition is due within 45 days after such petition is filed and a final determination by the Secretary of Labor is due 15 days thereafter. 29 C.F.R. §§ 90.15–90.16 (1984).

> 123, 171–72 (1951)) (emphasis added). It is also true that "because of the *ex parte* nature of the certification process, and the remedial purpose of the trade adjustment assistance program, the Secretary is obliged to conduct his investigation with the utmost regard for the petitioning workers." *Local 167, International Molders and Allied Workers' Union* v. *Marshall,* 643 F.2d 26, 31 (1st Cir. 1981).

Estate of William Finkel v. *Donovan,* 9 CIT —, Slip Op. 85–80 at 9–10 (July 31, 1985).

Particularly where, as here, a party is proceeding *pro se* before the Secretary of Labor, the court finds that the Secretary's failure to comply with the statutory time constraints regarding issuance of a final determination makes it inappropriate to hold that publication in the Federal Register places plaintiffs on constructive notice and thereby marks the beginning of the sixty day statute of limitations. Congress could not have intended a *pro se* party to constantly search the Federal Register for the final determination of the Secretary of Labor for months beyond the sixty days within which such determination is due under the statute. Under the circumstances of this case, actual notice should have been provided and constructive notice will not mark the running of the statute of limitations. In a somewhat similar situation the court noted, "[t]he cost and administrative burden of conveying the additional information is minimal when compared with the benefits reaped by the parties and the court in devoting their efforts to the merits of the case rather than to procedural issues." *Tyler* v. *Donovan,* 3 CIT 62, 66, 535 F. Supp. 691, 694 (1982).[5] Plaintiffs did not receive actual notice of the negative determination until February 18, 1985. By filing a summons and complaint on March 28, 1985, plaintiffs were well within the sixty day statute of limitations.[6]

As indicated, the court must review the Secretary's decision to determine if it is supported by substantial evidence. Substantial evidence is characterized as " 'more than a mere scintilla.' " *Dan Stipe* v. *U.S. Department of Labor,* 9 CIT —, Slip Op. 85–112 at 3 (October 25, 1985) (quoting *Consolidated Edison Co.* v. *NLRB,* 305 U.S. 197, 229 (1938)). "It means such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." *Id.* The Office of Trade Adjustment Assistance (OTAA), is charged with conducting investigations of petitions for adjustment assistance. 29 C.F.R. § 90.12 (1984). Although OTAA has a duty to inves-

---

[5] Defendant's procedures may have been further defective in that notice of a negative determination must be given promptly to the "group of workers concerned." 29 C.F.R. § 90.34 (1984). Defendant claims that it provided such notice to American Thread's personnel manager on January 2, 1985. Not only was this notice sent to an office in a different state from the one in which the plant was located, but it can hardly be said to have been sent to the "group of workers concerned."

[6] In *Waschko* v. *Donovan,* 4 CIT 271 (1982), this court held that plaintiff, who filed its summons and complaint 61 days after the Secretary of Labor published his negative determination in the Federal Register, was time barred by the statute of limitations. *Waschko* is distinguishable from the case at bar, however, because the court in *Waschko* made an affirmative finding that the Secretary of Labor published the negative determination within the 60 day limit imposed by the statute. *Id.* at 272.

tigate, *Cherlin* v. *Donovan*, 7 CIT —, 585 F. Supp. 644, 647 (1984), "[t]he court must show 'substantial deference' to the methods chosen by Labor to execute its statutory responsibilities, 'only remanding a case if [the method] is so marred that [Labor's] finding is arbitrary or of such a nature that it could not be based on 'substantial evidence.'" *Dan Stipe*, Slip Op. 85–112 at 4 (quoting *United Glass & Ceramic Workers of North America* v. *Marshall*, 584 F.2d 398, 405 (D.C. Cir. 1978)).

In completing its investigation, OTAA conducted customer surveys based on sales information provided by American Thread. The surveys compared sales data from 1983 with 1982 and data from the first eight months of 1984, the year of the plant closing, with the same period in 1983. It is clear that OTAA may use surveys to establish whether there is the requisite nexus between increased import penetration and worker separations. *Dan Stipe*, Slip Op. 85–112 at 4; *Cherlin*, 585 F. Supp. at 647 (both citing *United Glass*, 584 F.2d at 405 and *Local 167, International Molders and Allied Workers Union* v. *Marshall*, 643 F.2d 26, 29–31 (1st Cir. 1981)).

OTAA surveyed five of the six companies that decreased their purchases of cotton and synthetic sewing thread from the Tallapoosa plant in 1983 as compared to 1982.[7] The one company not surveyed decreased its purchases by less than five percent of the total decline represented by the other five companies. Of these five companies, none reported purchases of imported cotton or synthetic thread during the 1982–83 period. In comparing the first eight months of 1984 with the same period in 1983, OTAA surveyed three of the six companies that decreased purchases from the Tallapoosa plant during that period. The three companies *not* surveyed decreased their purchases from the Tallapoosa plant by more than twice as much during this period as those companies that were surveyed, with one of the companies not surveyed accounting for almost two-thirds of the total decline of the six companies. No explanation was offered on the record for the failure to survey these three companies.[8] The failure to consider data from the company that accounted for the largest decline in orders during the 1983–84 period or to explain the absence of this data from the record determines that the methodolgy was not in accordance with law and, as such, cannot support a conclusion that the Secretary of Labor's determination is supported by substantial evidence.

Defendant relies heavily on OTAA's data for the 1982–83 period in arguing that the Secretary of Labor's determination is supported by substantial evidence. Defendant makes no mention, however, of the 1983–84 survey data. As noted, the worker separations took place in 1984. It is presumed, therefore, that, absent explanation

[7] Plaintiff's petition alleged that cotton and synthetic sewing thread was the article produced by the Tallapoosa plant, the sale or production of which was being hurt by increased imports.

[8] An "X" on the Tallapoosa plant customer list marked next to the company that decreased orders by the largest amount during the 1983–84 period may indicate that this company was surveyed. In any event, survey data from this company was omitted from the record without explanation.

for an alternative approach, 1984 is the base period for the investigation and that data for the 1983–84 period should be considered. *See Katunich*, 594 F. Supp. at 752. Thus, although the survey of the 1982–83 period appears to have been conducted in accordance with law, survey data of those earlier years is insufficient in itself to satisfy the substantial evidence standards. *See* id. Additional data compiled by OTAA shows that although there was not a dramatic change in production or sales at the Tallapoosa plant between 1982 and 1984, there was a significant decline in employment at the Tallapoosa plant, both in numbers of employees and in employee hours, in 1983 as compared to 1982 and during the first eight months of 1984 as compared to the same period in 1983. Further, OTAA states that imports of cotton and synthetic thread increased by 46.4 percent in 1983 over the 1982 level and by 75.5 percent during the first six months of 1984 compared with a similar period in 1983. Together, the lack of a complete survey and the lack of any identification of the cause of worker separations between 1982 and 1984 as something other than the large increase in imports, renders the decision unsupported by substantial evidence.[9]

Plaintiff challenges the scope of the investigation because OTAA and the Secretary of Labor failed to consider the impact of imports such as shoes and luggage on the sale of domestic cotton and synthetic thread or the impact of immigration on the United States labor force. The third element of section 222 requires that a substantial cause of the worker separations must be imported articles "like or directly competitive" with articles produced by the workers whose petition for adjustment assistance is being considered. 19 U.S.C. § 2272(3) (1982). Case law interpreting this provision establishes that to be "like or directly competitive" within the meaning of the statute, the imported articles must be " 'interchangeable with or substitutable for' the article under investigation." *Dan Stipe*, Slip Op. 85–112 at 5 (quoting *Holloway*, 585 F. Supp. at 1430, quoting *Machine Printers*, 595 F.2d at 862). Under this standard, plaintiffs' argument on the need to consider the impact of imported finished articles and of immigrant labor fails. *See also United Shoe Workers of America, AFL–CIO* v. *Bedell*, 506 F.2d 174, 186–87 (D.C. Cir. 1974) (shoe counters and shoes are not "like or directly competitive" under predecessor to section 222); *International Union, United Auto, Aerospace and Agricultural Implement Workers of America* v. *Donovan*, 8 CIT —, 592 F. Supp. 673, 679 (1984) (automotive wheels and automobiles are not "like or directly competitive"); *Gropper* v. *Donovan, CIT* —, 6569 F. Supp. 883, 887 (1983) (finished fabric and knit fabric garments are not "like or directly competitive").

[9] The record includes an explanation for the poor performance of U.S. industrial thread producers in 1982. There is no suggestion of a connection, nor is there substantial evidence on the record from which to infer such a link, however, between the problems of the industry in general in 1982 and the worker separations that occurred at the Tallapoosa plant in 1983 and 1984.

Finally, plaintiff contends that there was a lack of substantial evidence to support a determination on hand knitting yarn because no survey was conducted as to this article. As noted, however, plaintiffs' petition for adjustment assistance, listed only "cotton and synthetic sewing thread" as an article produced by the Tallapoosa plant, the sale or production of which was being hurt by increased imports. In addition, hand knitting yarn is not "like or directly competitive" with cotton and synthetic sewing thread. OTAA was thus justified in so limiting the scope of its investigation, thereby excluding hand knitting yarn from the survey of Tallapoosa plant customers.

The court concludes that this matter must be remanded to the Secretary of Labor for further development of the administrative record on the issue of whether increased imports of cotton and synthetic thread "contributed importantly" to worker separations at the Tallapoosa plant.

(Slip Op. 86-4)

VOLUME FOOTWEAR RETAILERS OF AMERICA, PLAINTIFF *v.* UNITED STATES, DEFENDANT

Consolidated Court No. 83-10-01500

Memorandum Opinion

[Plaintiff's motion for rehearing and vacatur of this Court's December 10, 1985 order granted.]

(Decided January 3, 1986)

Mudge, Rose, Guthrie, Alexander & Ferdon (*Donald B. Cameron, Jr.*, and *Teresa M. Polino, Esqs.*, on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *David M. Cohen*, Director, Commercial Litigation Branch (*Velta A. Melnbrencis*, Esq., on the motion), for the defendant.

Collier, Shannon, Rill & Scott (*Lauren R. Howard, Michael R. Kershow and Jeffrey S. Beckington, Esqs.*, on the motion), for the intervenor.

CARMAN, *Judge:* This case was originally dismissed by the Clerk, United States Court of International Trade, on May 15, 1985 pursuant to a stipulation of dismissal. On October 28, 1985, the defendant moved for dissolution of the preliminary injunctions which the Court had originally ordered on November 9, 1983, and August 10, 1984. On December 10, 1985, the Court ordered the preliminary injunctions dissolved. Plaintiff then moved for rehearing and vacatur of the December 10 order.

On December 16, 1985, the Court ordered a stay of all liquidations previously covered by the preliminary injunctions until 5:00 p.m. on January 3, 1986, in order to allow for oral argument on January 3 at 10:00 a.m. Ruling from the bench, the Court granted the motion for rehearing and vacated its December 10 order.

Facts

In this consolidated action challenging the final results of an administrative review of a countervailing duty order on nonrubber footwear from Spain, plaintiff obtained two preliminary injunctions. The first, in Court No. 83-10-01500, restrained the United States Customs Service (Customs) from liquidating entries of nonrubber footwear from Spain occurring between certain dates and classifiable under certain provisions of the Tariff Schedules of the United States (TSUS). The injunction was issued on November 9, 1983, and stated that "[t]his preliminary injunction is in effect until otherwise ordered by this Court." The Court issued the second preliminary injunction in Court No. 84-8-01083, on August 10, 1984, which similarly restrained Customs from liquidating entries of nonrubber footwear from Spain. This injunction contained no provision for its termination.

On May 8, 1985, the parties signed a stipulation of dismissal, which was followed by the Clerk's order dismissing the case on May 15, 1985. Neither the stipulation of dismissal nor the order of dismissal referred to the outstanding injunctions. Defendant thus based its motion for dissolution of the preliminary injunctions on the failure of either the injunctions themselves, the stipulation, or the order to provide for the termination of the injunctions.

Opinion

The narrow issue briefed by the parties and before the Court at oral argument was whether the preliminary injunctions dissolved upon the dismissal of the case on May 15, 1985, or whether the injunctions remained in force until the Court's Order of December 10, 1985. All of the parties apparently agree that there was no reason for the injunctions to survive the dismissal of the action. Plaintiff, in whose interest the injunctions were originally granted, strenuously argued in both its opposition to defendant's motion for dissolution and its motion for rehearing that the injunctions terminated as a matter of law at the time of the dismissal. Defendant correspondingly stated the following in its motion for dissolution:

> Inasmuch as this consolidated action was dismissed voluntarily by plaintiff which obtained the injunctions, it is obvious that there is no reason why the injunctions should continue in effect and why entries covered by the injunctions should not be liquidated by the U.S. Customs Service as directed by the International Trade Administration of the Department of Commerce.

Defendant's Motion for Dissolution of Preliminary Injunction at 3. Intervenor, Footwear Industrial of America, Inc., explained further:

> Here, the party bound by the injunctions—the government—merely seeks an explicit order from this Court which would

> permit it to proceed with liquidation of entries of Spanish footwear in accordance with the results of its administrative review of the countervailing duty order on nonrubber footwear from Spain, an administrative determination which the VFRA [plaintiff] has elected not to challenge on the merits. The VFRA, the original movant for the preliminary injunctions, has indicated that it too has no desire for the injunctions to remain in force.

Intervenor's Memorandum in Support of Defendant's Motion for Dissolution of Preliminary Injunctions at 4.

In light of these assertions, the Court issued the order on December 10, 1985 dissolving the injunctions. The Court viewed the order as a *pro forma* act erasing any ambiguity that the preliminary injunctions continued in force.

At the time of the motion for dissolution, however, the defendant did not alert the Court to what plaintiff now alleges was defendant's motive for bringing the motion for dissolution and the potential effect of having the injunctions terminate on December 10 rather than on May 15. Section 1504(d), Title 19 U.S.C. (1982) may require that Customs liquidate entries within 90 days after a preliminary injunction suspending liquidation is lifted.[1] Whether this is so, or any result from such a conclusion, was not a question before the Court with either the motion for dissolution or the motion for rehearing. The Court nonetheless appreciates the potential importance of the termination date of the injunctions and therefore granted the plaintiff's motion for rehearing.

It is abundantly clear that a preliminary injunction dissolves when the case is dismissed or final judgment is entered. *See* 7-pt. 2 J. Moore, J. Lucas, K. Sinclair, *Moore's Federal Practice*, § 65.07 at 65–86 (2d. ed. 1985), *citing Coleman* v. *Hudson River Bridge Co.*, 6 F. Cas. 63, (C.C. N.D.N.Y. 1862) (No. 2,983) and *Sweeney* v. *Hanley*, 126 F. 97 (9th Cir. 1903). *See also Madison Square Garden Boxing, Inc.* v. *Shavers*, 562 F.2d 141, 144 (2d Cir. 1977); *Consumers Union of the United States, Inc.* v. *Consumer Product Safety Comm'n*, 561 F.2d 349, 356 (D.C. Cir. 1977), *vacated on other grounds*, 434 U.S. 1030 (1978); *Heasley* v. *United States*, 312 F.2d 641, 648 (8th Cir. 1963); *Hamilton Watch Co.* v. *Benrus Watch Co.*, 206 F.2d 738, 742 (2d Cir. 1953). It is true that special circumstances may warrant providing for the expiration of an injunction upon some event other than dismissal of the action or final judgment. In *Al Tech Speciality Steel Corp.* v. *United States*, 6 CIT 257, 575 F. Supp. 1285 (1983), for example, the court enjoined liquidation of certain entries and provided that "unless sooner modified or vacated for good cause shown this order shall expire *ex proprio vigore* thirty days

---

[1] 19 U.S.C. § 1504(d) reads:

(d) Limitation.—Any entry of merchandise not liquidated at the expiration of four years from the applicable date specified in subsection (a) of this section, shall be deemed liquidated at the rate of duty, value, quantity, and amount of duty asserted at the time of entry by the importer, his consignee, or agent, unless liquidation continues to be suspended as required by statute or court order. When such a suspension of liquidation is removed, the entry shall be liquidated within 90 days therefrom.

after publication in the Federal Register of notice of defendant's redetermination." 575 F. Supp. at 1287. The court was concerned with "preserving its jurisdiction and, concommitantly, plaintiffs' judicial review rights" regarding the substantive aspects of the case pending a remand and redetermination on certain issues in the case. *Id.* But in the case at bar, none of the parties has presented the slightest reason why the injunctions should have survived the dismissal of the action. In fact, counsel for defendant at the oral argument characterized its motion for dissolution of the preliminary injunctions as really being a motion for clarification of the May 15 order of dismissal. A motion for clarification may have been well taken. The motion for dissolution, on the other hand, clouded what was apparently the real issue and reason for the defendant's motion.

Given that all of the parties agree that the government should be free to liquidate the subject entries pursuant to the stipulation of dismissal and that the same circumstances existed at the time of the dismissal on May 15, 1985, the Court's order of December 10, 1985, dissolving the preliminary injunctions, was vacated. Absent any suggestion that any rights required protection after May 15, 1985, the preliminary injunctions are deemed to have expired on that date.

NEC CORPORATION, PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 85-7-00948

Before WATSON, *Judge.*

Memorandum Opinion and Order

(Decided January 10, 1986)

Tanaka Walders & Ritger (*Patrick F. O'Leary* on the brief), for the plaintiff.
Richard K. Willard, Assistant Attorney General, *David M. Cohen*, Director, Commercial Litigation Branch (*Velta A. Melnbrencis*), for the defendant.

WATSON, *Judge:* Plaintiff NEC Corporation has moved, pursuant to 28 U.S.C. § 2646 and Court of International Trade Rule 59(a), for rehearing and amendment of this court's judgment of November 19, 1985 dismissing this case. The motion was filed herein on December 6, 1985. Defendant filed a responsive memorandum on December 27, 1985, to which plaintiff filed a reply on January 6, 1986.

The court initially notes that on December 4, 1985, prior to the filing of this motion, plaintiff filed a notice of appeal to the Federal Circuit of the November 19, 1985 judgment. Hence, although plaintiff's motion for rehearing was filed within the thirty days permitted under Rule 59, a question remains whether plaintiff's prior notice of appeal deprives this court of jurisdiction to rule on the

motion. In discussing the application of Rule 59 of the Federal Rules of Civil Procedure, after which Rule 59 of this court was patterned, Professors Wright and Miller state:

> If notice of appeal is given, the subsequent filing of a motion for new trial, even if otherwise timely, is ineffective because jurisdiction of the case is no longer in the district court. The preferable procedure in that situation is to allow the motion to be filed in the district court. If the district court considers the motion favorably it then can ask that the case by remanded from the appellate court so that it may grant the motion.

11 Federal Practice and Procedure: Civil § 2821 (1973) (citations omitted). The court will follow the procedure outlined by Wright and Miller, and accordingly will consider the merits of plaintiff's motion for rehearing.

In the previous ruling, the court held that plaintiff's attempt to file the summons commencing this action by certified mail without affixing sufficient postage did not meet the requirements for date-of-mailing filing under Rule 5(g) of this court and thus was unsuccessful. Because plaintiff's subsequent attempt to file the summons was untimely, the action was dismissed for lack of jurisdiction. *See* Slip Op. 85–116. Plaintiff now seeks to introduce "newly discovered evidence" which allegedly demonstrates that the postage affixed to the envelope containing the summons was in fact sufficient. This so-called "new evidence" is the original certified mail receipt prepared by the secretary to plaintiff's counsel, a copy of which is attached as Appendix A to plaintiff's memorandum, filed December 6, 1985. Plaintiff acknowledges that it failed to pay the fee for the return receipt, but contends that this should not have prevented delivery of the summons to the clerk under applicable postal regulations. Plaintiff argues that the postage affixed to the envelope containing the summons satisfied the "proper postage" requirement of Rule 5(g).

For present purposes, the court may assume, without deciding, that the newly produced evidence, the original certified mail receipt, was previously unavailable to plaintiff's counsel even with due diligence, and that the "proper postage" requirement for date-of-mailing filing under Rule 5(g) does not include the return receipt fee. Even so, the minimum required postage, according to plaintiff's own calculations, would be $1.65—comprised of $.90 to cover the weight of the envelope and its contents, and a certified fee of $.75.

Plaintiff accurately describes the original certified mail receipt prepared by the secretary to plaintiff's counsel in footnote 3 of its memorandum, filed December 6, 1985, as follows:

> As indicated, the receipt shows $.90 to cover the postage and $.75 to cover the certified fee. The total shown on the receipt is $1.45 which represents a mathematical error.

The crucial question, therefore, is whether plaintiff's counsel affixed $1.65 to the envelope containing the summons or whether the total affixed was only $1.45 as shown on the receipt.

The court, in an effort to resolve this matter, has examined the cover to the original envelope. That envelope is contained in the court file because plaintiff's counsel used the same envelope for the subsequent successful certified mailing of the summons. The postage for the latter mailing was affixed by a printed stick-on label. A partial lifting of that label reveals that the postage for the original mailing was printed directly onto the envelope. The amount printed is unquestionably $1.45. Hence, the original affixed postage was $.20 less than the amount required under plaintiff's own calculations.

Accordingly, because the court has previously ruled that the failure to affix sufficient postage defeats date-of-mailing filing under Rule 5(g), it is

ORDERED that plaintiff's motion for rehearing and amendment of judgment is hereby denied.

(Slip Op. 86–6)

ASTA DESIGNS, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82–4–00483

Before CARMAN, *Judge.*

Memorandum Opinion and Order

[Plaintiff's motion for summary judgment denied.]

(Decided January 10, 1986)

Breneman, Georges, Hellwege & Yee (William D. Breneman, Esq., on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Civil Division (*Veronica A. Perry,* on the motion), for the defendant.

CARMAN, *Judge:* The plaintiff, Asta Designs, Inc., has moved for summary judgment pursuant to Rule 56. Plaintiff asks the Court to find that its imported merchandise is properly classifiable under item 654.02 of the Tariff Schedules of the United States (TSUS), rather than under item 653.75 (TSUS). Because the case raises material issues of fact, the Court cannot say as a matter of law that plaintiff's merchandise is not classifiable under item 653.75 (TSUS). Plaintiff's motion is therefore denied.

Background

Plaintiff imports enameled cooking and kitchen ware, constructed of steel and covered with enamel. The pots and lids of the cook-

ing and kitchen ware in controversy [1] have gold-plated stainless steel rims. The United States Customs Service (Customs) classified these articles under item 653.75 (TSUS), which covers

> Articles not specially provided for of a type used for household, table, or kitchen use; toilet and sanitary wares; all the foregoing and parts thereof, of metal: . . .
> Articles, wares and parts, of base metal, coated or plated with precious metal: . . .
> Coated or plated with gold.

Plaintiff protested, arguing that the articles should instead be classified under item 654.02 (TSUS), which covers "[a]rticles not specially provided for, . . . of base metal: Enameled or glazed with vitreous glasses."

Opinion

Plaintiff's position is that the articles should not be classified under item 653.75 (TSUS) because the gold-plated stainless steel rims are "separate and separable" from the articles and, without the rims, no part of the articles is "coated or plated with goal." Plaintiff also argues that, in any event, stainless steel is not a "base metal" as defined in Schedule 6 of the (TSUS).

Defendant counters that stainless steel is clearly within the definition of base metal and that the rims are an integral part of the articles. If plaintiff maintains otherwise, according to defendant, then these are questions of fact to be resolved at trial. Defendant points out that an additional question of fact is whether the gold-plated rims constitute a more then insignificant or negligible element of the articles.

A motion for summary judgment may be granted only when no material issues of fact exist. *See Golding Bros.* v. *United States*, 6 CIT 118, Slip Op. 83–89 (1983); *S.S. Kresge* v. *United States*, 77 Cust. Ct. 154, C.R.D. 76–6 (1976). This case involves factual disputes between the parties that are material to resolving the central issue. Although the TSUS contains a definition of base metal which appears to encompass stainless steel, the TSUS is drafted in commercial, not scientific terms. *C. J. Tower & Sons* v. *United States*, 41 CCPA 195, 199, C.A.D. 550 (1954). Whether stainless steel is a base metal in commercial terms appears to be a question of fact.

Another question of fact is whether the gold-plated rims are separate and separable from the articles classified, as plaintiff insists, or are an integral part of the articles, as defendant asserts. If the rims are an integral part of the articles, then a further question of fact exists as to whether the rims are an insignificant and negligible part of the articles. *See Saji & Kariya Co.* v. *United States* 9 Ct. Cust. Appls. 78, 80–81, T.D. 37945 (1919) (silver-plated rim was sig-

[1] Plaintiff protested the classification of entry numbers 297978, 298063, 430024, 430119, 430235, 292397-5 (Court No. 82-4-00483), and number 80-26902 (Court No. 82-11-01582). The entries occurred in 1980 and 1981.

nificant part of vase, placing it in classification of silver-plated articles, even though only 10 percent of the external surface was so plated).

Because this case presents questions of fact which must be resolved at trial, plaintiff's motion for summary judgment is denied.

(Slip Op. 86–7)

UNITED STATES, PLAINTIFF *v.* AMERICAN MOTORISTS INSURANCE COMPANY; DEFENDANT AND THIRD PARTY PLAINTIFF *v.* THE BUCKEYE FIREWORKS MFG. CO., INC., ET AL, THIRD PARTY DEFENDANTS

Court No. 84-06-00860

Before DICARLO, *Judge.*

Plaintiff brings an action against a surety for collection of customs duties. Defendant-third party plaintiff moves for summary judgment dismissing action, and alternatively moves for summary judgment in its favor against third party defendants. Plaintiff cross-moves for summary judgment against defendant.

Held: Defendant is liable for customs duties under the terms of its bonds. When Customs has liquidated entries "no change," and the importer's checks for estimated duties are subsequently dishonored, the importer and surety whose bonds cover the entries are not released from any obligation to pay duties.

[Plaintiff's cross-motion for summary judgment is granted. Defendant's motion for summary judgment is denied in part.]

(Decided January 10, 1986)

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Department of Justice (*Judith M. Barzilay*), for the plaintiff.

Russotti & Barrison (*Harvey Barrison*), for the defendant.

Memorandum Opinion and Order

DICARLO, *Judge:* This is an action pursuant to 28 U.S.C. § 1582(2) (1982) to collect customs duties from a surety on its bonds. Before the Court are defendant's motion for summary judgment dismissing the action, its alternative motion for summary judgment in its favor against the third party defendants, and plaintiff's cross-motion for summary judgment pursuant to Rule 56 of the Rules of this Court.

There is no dispute as to the relevant facts. On June 4, 1979, two consumption entry bonds were executed by Buckeye Fireworks and Novelty, Co., Inc. (importer) as principal, and by defendant as surety.

On June 14, 1979 and June 20, 1979, merchandise covered by the bonds entered the United States at the Port of Baltimore, Maryland. The United States Customs Service (Customs) received from the importer two checks in the amounts of $5,345.76 and $4,571.52 representing estimated duties on the entries. Customs deposited the checks on July 11, 1979 and July 16, 1979, and liquidated the entries without change on July 13, 1979 and July 19, 1979.

The checks were dishonored by the drawee bank on July 18, 1979 and July 24, 1979. On November 24, 1980, Customs notified defendant that the importer had not paid duties on the entries covered by the bonds. Customs was unsuccessful in collecting the amounts due from either the importer or the surety, and on June 21, 1984, an action was commenced against the surety to recover duties in the amount of $9,917.28 plus interest.

Defendant raises four affirmative defenses in its answer, first, that plaintiff fails to state a claim upon which relief can be granted. The Court disagrees, and finds the complaint sufficient as it alleges defendant to be a surety on bonds covering entries on which duties have not been paid in accordance with Rule 8 of the Rules of this Court.

Defendant's third affirmative defense is that plaintiff has failed to join an necessary parties the importer, one of its officers, and as affiliated company. This defense lacks merit since defendant would be jointly and severally liable under the terms of its bonds with respect to any duties which may be owed.

Defendants fourth affirmative defense is that Customs is barred from obtaining a judgment in this case on account of alleged violations of section 112 and 113 of the Accounting and Auditing Act of 1950, as amended, 31 U.S.C. § 3512 (1982). Defendant does not discuss the relevance of those provisions, which establish standards for systems of accounting and internal controls in executive agencies, and the Court holds that those provisions have no application to the facts and circumstances of this case.

Defendant's second affirmative defense sets forth the theory upon which it bases its motion for summary judgment. Defendant contends that (1) plaintiff liquidated the entries "no change;" (2) liquidation is the final computation or ascertainment of the duties accruing on an entry; (3) the entries were never reliquidated by plaintiffs; and (4) plaintiff is therefore barred from alleging nonpayment as a matter of law.

Defendant's theory, as augmented by defendant's brief, apparently is based upon the belief that when Customs has liquidated entries "no change" and the importer's checks for estimated duties are subsequently dishonored, the importer and the surety whose bonds cover the entries are released from and obligation to pay duties. Defendant concludes its theory with the proposition that "[i]n the absence of a reliquidation, the liquidation released the surety from any further obligation for duties."[1]

Defendant fails to appreciate the purpose of the liquidation and reliquidation procedures. Liquidation is "the final computation or ascertainment of the duties or drawback accruing on an entry." 19 C.F.R. § 159.1 (1985). By liquidating the entries "no change" Cus-

[1] Brief of American Motorists Insurance Company, Defendant and Third Party Plaintiff in Support of its Motion for Summary Judgment, at 5.

toms determined that duties on the entries had been estimated correctly.

Defendant offers no authority for the proposition that an importer and its surety are released from paying outstanding duties when Customs has liquidated the entries without change. It is clear, however, that an importer and its surety are liable for the payment of duties when checks tendered to Customs are subsequently dishonored.

> Customs officers may receive uncertified checks, United States notes, and circulating notes of national banking associations in payment of duties on imports, during such time and under such rules and regulations as the Secretary of the Treasury shall prescribe; but if a check so received is not paid the person by whom such check has been tendered shall remain liable for the payment of the duties and for all legal penalties and additions to the same extent as if such check had not been tendered.

19 U.S.C. § 1648 (1982); *see* 19 C.F.R. § 141.1(b) (1985).

Defendant's argument that Customs was required to reliquidate the entries when the checks were dishonored is also misplaced. Customs may reliquidate entries "to correct errors in appraisement, classification, or any other element entering into the liquidation or reliquidation . . . ." 19 C.F.R. § 173.3 (1985). This procedure, like liquidation, involves the computation of duties, and has nothing to do with the obligation of an importer or surety to pay the amount determined to be owed. Defendant, therefore, is not entitled to a judgment dismissing the action as a matter of law. The Court reserves decision on defendant's alternative motion for summary judgment with respect to its third party action.

Turning to the government's cross-motion for summary judgment, there is no dispute that defendant is surety on the bonds covering the entries and neither the importer nor defendant have paid duties on the entries. Under the terms of its bonds, defendant is jointly and severally liable for these duties. Plaintiff is therefore entitled to judgment as a matter of law.

Defendant's motion for summary judgment dismissing this action is denied. Plaintiff's cross-motion for summary judgment is granted. Judgment will be entered accordingly. So ordered.

(Slip Op. 86-8)

RBW, INC., PER C. J. TOWER & SONS OF BUFFALO INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82-6-00825

Before CARMAN, *Judge.*

Memorandum Opinion

[Judgment for plaintiff.]

(Decided January 13, 1986)

Mandel and Grunfeld (*Steven P. Florsheim* on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Civil Division (*Barbara Epstein* on the motion) for the defendant.

CARMAN, *Judge:* This case, presented by the parties on stipulated facts in lieu of trial, involves the proper tariff classification of books of crossword puzzles, word games, and "search-a-word" puzzles. The United States Customs Service (Customs) classified the merchandise as puzzles under item 735.20 of the Tariff Schedules of the United States (TSUS), which reads:

> Puzzles; game, sport, gymnastic, athletic, or playground equipment; all the foregoing, and parts thereof, not specially provided for.

Plaintiff claims, however, that the merchandise is properly classified under item 270.25 as "books not specially provided for," which are duty-free. In the alternative, plaintiff seeks classification of its merchandise as "toy books" under item 737.52, also duty-free.

Stipulated Facts

The imported merchandise consists of a collection of puzzle sheets bound as books in paperback covers. The sheets include textual and pictorial matter. Some of the books. "Puzzlers Crosswords No. 1" through "Puzzlers Crosswords No. 12" contain rear pages with promotional text on both sides, and the "Treasury of Puzzles" also has a table of contents page. All of the imported articles have a front and rear cover and an inside title page with copyright text on the reverse side.

Plaintiff, a printing company, printed and bound the puzzles. Plaintiff then sold the books to publishers in the United States, who in turn sold the books to book distributors, other publishers, or directly to mass-market retailers such as K-mart and Zayre department stores. At the retail level, the merchandise is sold in book stores, drug and notion stores and general department stores. In those bookstores that display books by category, merchandise simi-

lar or identical to the subject merchandise is generally displayed in the "puzzle" section.

Defendant conceded in its answer that the merchandise does fit the description of books for tariff classification purposes, and that books are provided for under item 270.25, TSUS. Defendant has further conceded in the stipulated facts that one of the books subject of this action, which is entitled "The Super Activity, Puzzle and Game Book," is properly classified as a book under item 270.25 because it contains mostly pages of other activities with only some pages of puzzles.

Opinion

Defendant makes two arguments supporting Customs' classification of the merchandise as puzzles under item 735.20, TSUS. First, argues defendant, although the merchandise is described by the tariff provisions for both books and puzzles, the provision for puzzles more specifically describes the merchandise. Defendant alternatively contends that even if the merchandise is equally described by both provisions, item 735.20 for puzzles is still the proper classification because it calls for the highest original duty rate. Both of these contentions depend upon the premise that the merchandise qualifies as puzzles within the meaning of item 735.20. The Court finds, however, that the merchandise does not consist of puzzles for tariff classification purposes and is therefore properly classified under plaintiff's claimed classification of item 270.25 for books.

Plaintiff poses as its primary support for the conclusion that the imported merchandise does not fall within the ambit of item 735.20 the doctrine of *noscitur a sociis*. Meaning that "it is known from its associates," the doctrine is a tool for statutory construction that provides for deriving the meaning of a term from the meaning of other words with which the questioned term is associated. *Nightwriter Corp.* v. *United States*, 69 Cust. Ct. 191, 196–97, C.D. 4393 (1972). As item 735.20 provides for the classification not only of puzzles, but also for game, sport, gymnastic, athletic, or playground equipment, plaintiff argues that the requirement of manipulation associated with these enumerated items also applies to "puzzles." Essentially, continues plaintiff, item 735.20 puzzles include articles such as "jig-saw puzzles, 'teasers' such as bent pieces of plastic or wood objects requiring assembly, or disassembly or reformation." Plaintiff's Brief at 8.

Defendant contends that the doctrine of *noscitur, a sociis* may not be utilized in interpreting the *eo nomine* term "puzzles" because, like other rules of construction, *noscitur a sociis* is only applicable when the language of a statute is ambiguous. Defendant asserts that item 735.20 clearly and unambiguously provides for puzzles, without limitation to any particular type of puzzles. Defendant cites a dictionary definition of "puzzles," contends that crossword puzzles fall within this definition, and apparently be-

lieves that the dictionary definition is the common meaning of the term as was intended by Congress in the tariff designation for puzzles.

Defendant cites *Funk and Wagnall's New Standard Dictionary of the English Language* (1956) for the definition of puzzle as

> 1. [a] thing difficult to understand or solve; a thing or problem that perplexes; especially something purposely arranged so as to require time, patience and ingenuity to arrive at the solution of its intricacies; a problem, riddle . . .

The Court has additionally consulted *Webster's New International Dictionary* (2d ed. 1958), which offers the following definition:

> 2. Something which perplexes or embarrasses; a difficult problem or question; an enigma; hence, a toy, contrivance, question, or problem designed for testing ingenuity; as, a crossword *puzzle.*

Given the breadth of the definitions, as well as their abstract nature, the Court finds that the term puzzle as used in the context of tariff classification is ambiguous and that the Court may consider aids in construing the statute and disclosing legislative intent.

To begin, item 735.20 is a basket provision covering "all games and puzzles, including toy games and puzzles, and all sport, gymnastic, athletic, and playground equipment . . . not specially provided for elsewhere in the schedules." *Tariff Classification Study, Schedule 7* 287 (1960). The original language proposed called for the classification of "[g]ames and puzzles, including toy games and puzzles; sport, gymnastics, or athletic equipment n.s.p.f. [not specially provided for]," *id.* at 884, but was changed to clarify "that the item was intended to cover under the term 'games' all game equipment and parts of such equipment not specially provided for . . . and under the term 'gymnastic equipment' all playground equipment, not specially provided for such as swings, see-saws, and slides." *id.* at 287. Item 735.20 brought together articles which prior to the TSUS had been scattered throughout the tariff act and were often classified according to their material composition of chief value. *E.g., Tariff Act of 1930,* par. 397 (articles composed of various metals), par. 409 (articles of rattan, bamboo, osier or willow), par. 412 (manufactures of wood or bark), par. 1539(b) (manufactures of which synthetic resin is the chief binding agent). The Court has not been directed to any evidence showing the scope of the term "puzzles," but is persuaded that item 735.20 does generally cover manipulable articles and larger pieces of equipment made out of various materials. There appears to be no indication of congressional intent, on the other hand, to include publications of word-oriented puzzles under this provision.

A puzzle is often an abstract dilemma, which may be presented via a variety of media. It may be a mathematical or geometric

problem expressed in terms of geometrically shaped objects. Or, it may be communicated through written language. As an abstraction, the puzzle itself is not the imported article, but rather the medium which presents the puzzle. In the case before the Court, *books* containing crossword and search-a-word puzzles are the articles in question.

Defendant argues, nevertheless, that the content of the subject books are the controlling criteria for tariff classification purposes. For example, in *Bauer Alphabets, Inc.* v. *United States*, 54 Cust. Ct. 255, C.D. 2540 (1965), the court considered the contents of folders consisting of pages displaying type styles. Finding an absence of authorship and that the type was not intended to be read for its textual substance, the court disallowed plaintiff's claim for classification as printed matter of foreign authorship under paragraph 1410 of the Tariff Act of 1930. *id.* at 262. Similarly, in *Brooks Bros.* v. *United States*, 68 Cust. Ct. 91, C.D. 4342 (1972), the question was the proper classification of a diary that contained printed matter. The court held that the "primary design and function" of the article as a diary warranted its classification as a diary rather than as a book or other printed matter. *Id.* at 98.

Although the primary design and function of the subject merchandise appears to be for the presentation and solution of puzzles dealing with words, potential arbitrary distinctions may develop as a result of classifying crossword puzzle books as puzzles since books presenting problems or puzzles totally in the form of text would presumedly be classified as books. (For example, defendant has already stipulated that one of the imported books originally subject of this action is properly classified as a book because it contains "activity pages.") And although considerations of creativity and susceptibility of authorship no longer appear consequential, *compare* item 270.25, TSUS (1980) *with* par. 1410, Trade and Tariff Act of 1930, the Court notes that crossword puzzles are susceptible of authorship. Classification on the basis of textual considerations or layout would be entirely arbitrary criteria.

The stipulations of the parties further support the classification of plaintiff's imported merchandise as books under item 270.25. The merchandise is manufactured by a printing company and distributed exclusively through book channels. The merchandise is sold in book stores and other stores which sell books. While not determinative, such facts have "obvious probative value" and lead to the conclusion that the merchandise is properly classified as books. *See Montgomery Ward & Co.* v. *United States*, 62 Cust. Ct. 718, 724, C.D. 3853 (1969).

Plaintiff has additionally directed the Court to the *Standard Industrial Classification Manual* (1957), which, while not specifically mentioning crossword puzzles, makes the distinction between the miscellaneous manufacturing industry which produces products

such as games and puzzles (Group 394, Industry Number 3941) from the printing and publishing industry (Group 273, Industry Number 3941).[1] In light of the foregoing discussion regarding item 735.20 as the provision for various manufactures constituting games and puzzles and other athletic and playground equipment, the Court finds that plaintiff's books of word puzzles are more closely associated with the printing and publishing industry than with the industry producing games and puzzles.

Rejecting defendant's classification of the books as puzzles, the Court also rejects plaintiff's alternative claim that the imported books are properly classified as toy books under item 737.52.[2] A review of the statute as well as the case law indicates that toy books are "limited to such books as are without reading matter other than letters, numerals, or descriptive words." *A.C.G. Export Import* v. *United States*, 66 Cust. Ct. 128, 131, C.D. 4181 (quoting *B. Westermann Co. (Inc.)* v. *United States*, 17 CCPA 75, 77-78, T.D. 43,361 (1929)). Plaintiff's merchandise contains words that are not limited to mere descriptions of accompanying pictures and thus does not fall under the category of "toy books." *See id.*

Conclusion

The articles in controversy are clearly books within the meaning of item 270.25. Item 735.20, on the other hand, covers various manufactured articles constituting puzzles and games and athletic equipment. The Court determines that plaintiff has satisfied its burden of establishing that Customs' classification under this latter provision is incorrect. *See* 28 U.S.C. § 2639 (1982); *Jarvis Clark Co.* v. *United States*, 733 F.2d 873, 878, *reh'g denied* 739 F.2d 628 (Fed. Cir. 1984). Agreeing with plaintiff's first proposed alternative, the Court holds that books of printed word puzzles are properly classified under item 270.25, TSUS.

GREGORY W. CARMAN,
Judge.

[1] The Standard Industrial Classification Manual has been relied upon as some indication of legislative intent since it was used by the Tariff Commission as a reference in preparing the tariff schedules. *See Associated Hobby Manufacturers, Inc.* v. *United States*, 65 Cust. Ct. 357, 360-61, C.D. 4103 (1970), aff'd, 59 CCPA 54, C.A.D. 1037, 452 F.2d 1405 (1972); *Tariff Classification Study. Submitting Report* 8 (1960).

[2] Item 737.52 states in full:

Toy books, including coloring books and books the only reading matter in which consists of letters, numerals, or descriptive words.

JUDGMENT

UNITED STATES COURT OF INTERNATIONAL TRADE

GREGORY W. CARMAN, *Judge*

RBW, INC., PER C. J. TOWER & SONS OF BUFFALO, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82-6-00825

This case having been duly submitted for decision and the Court, after due deliberation, having rendered a decision herein; now, in conformity with said decision,

IT IS HEREBY ORDERED: Judgment is rendered for plaintiff. The Customs Service is directed to reclassify the subject merchandise under item 270.25 and make refunds as appropriate, together with any interest as provided by law.

Dated: New York, N.Y., this 13th day of January 1986.

GREGORY W. CARMAN,
Judge.

(Slip Op. 86-9)

GEORGE CHAPMAN, PLAINTIFF *v.* HON. RAYMOND J. DONOVAN, DEFENDANT

Court No. 85-1-00049

Before DICARLO, *Judge.*

Plaintiff, on behalf of employees at a Redwood City, California chemical plant, challenged a denial of certification of eligibility to apply for trade adjustment assistance benefits by the Secretary of Labor (Labor). On October 25, 1985, the Court held that Labor's determination that imports did not contribute importantly to the employees' separation was not supported by substantial evidence on the record and remanded the action. Labor has now issued a revised determination certifying the workers' eligibility.

Labor's revised determination certifying eligibility is supported by substantial evidence.

[The revised determination is affirmed.]

(Decided January 16, 1986)

George Chapman, pro se.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch (*Sheila N. Ziff*), for defendant.

Memorandum Opinion and Order

DiCarlo, *Judge:* On October 25, 1985, the Court held that a final determination by the Secretary of Labor (Labor) that workers at the Duolite International, Inc. (Duolite) plant at Redwood City, California were ineligible for trade adjustment assistance under section 223 of the Trade Act of 1974 (the Act), 19 U.S.C. § 2273 (1982), was not supported by substantial evidence on the record. *Chapman* v. *Donovan*, 9 CIT —, Slip Op. 85–113 (October 25, 1985). Labor's determination was vacated and the action remanded.

Labor found that the workers were ineligible for assistance because an increase in imports did not contribute importantly to reduced production at the Redwood City plant and to the workers' separation from employment.[1]

The Court found the record did not support Labor's determination in two respects.

First, Labor based its determination in part on the negligible level of nationwide imports of "surface active agents" into the United States in 1982. But there was no indication whether "surface active agents" are "like or directly competitive," as required by 19 U.S.C. § 2272(3), to the ion exchange resins produced at the Redwood City plant, and, by considering only 1982 data on national imports of "surface active agents," Labor ignored a dramatic increase in ion exchange resin imports from a Duolite plant in France in the first five months of 1984.

Second, there was not substantial evidence in the record to support a conclusion that the workers were separated for a reason other than imports. Nothing in the record indicated where consumers of the products produced at the Redwood City plant turned for ion exchange resins after that plant reduced production.

On December 5, 1985, Labor filed with the Court a supplement to the administrative record. A "Revised Determination on Reconsideration" was published in the Federal Register on December 10, 1985. 50 Fed. Reg. 50356 (1985).

After further investigation Labor found that imports of ion exchange resins increased from an estimated five percent of domestic production in 1983 to seven percent in 1984, and continued to increase in the first six months of 1985. Rohm & Haas Company, which acquired Duolite's plants in Redwood City and France in May, 1984, increased company imports and supplied the same cus-

---

[1] The notice of Labor's determination stated in part:

Petitioners allege that increased imports by Duolite contributed importantly to the separation of workers at the Redwood City plant. Imports from Duolite's facility in France increased substantially in January through May 1984 compared to the same period in 1983. However, production at Redwood City did not decline during this period.

In May 1984 Diamond Shamrock Corporation, Duolite's parent company, completed negotiations with a major international chemical manufacturer for the sale of Duolite's Redwood City plant and the Duolite plant located in France.

Subsequent to taking over the Redwood City facility, the new firm restructured the production schedule resulting in the separation of several workers in June 1984.

Imports of surface-active agents are negligible. Imports were less than two percent in relation to domestic production in 1982. Although 1983 domestic production figures are not yet available, trade and industry sources indicate that imports remained at less than two percent in relation to domestic production.

49 Fed. Reg. 49,733 (1984).

tomers previously supplied by Duolite. Rohm & Haas officials said that sales of imported products were more profitable than sales of domestic products because of the increased value of the dollar relative to European currencies.

Labor concluded that increased imports of articles like or directly competitive with ion exchange resins produced at the Redwood City plant contributed importantly to the separation of workers at that plant, and certified the eligibility of those workers to apply for adjustment assistance. The determination affected an estimated seventy workers.

The Court holds that the revised determination is supported by substantial evidence on the record, and is affirmed. Judgment will be entered accordingly. So ordered.

Dated: January 16, 1986, New York, N.Y.

(T.D. 86-14)

Revision of Criteria for Establishing Parts of Entry and Stations

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of revised criteria.

SUMMARY: This notice is to advise the public that Customs has revised the criteria it uses in determining whether to grant requests for the establishment of Customs ports of entry and stations. The revision set forth in this document modifies and expands upon certain criteria which Customs has followed since 1982 in evaluating these requests. It reflects the increased minimum value for commercial entries and deletes any reference to informal entries. In addition, the revision requires a commitment by any applicant that is attempting to qualify for port or station status by satisfying the cargo workload standard (2500 consumption entries), to make optimal use of electronic data transfer capability to permit integration with Customs Automated Commercial System.

The revised criteria will permit Customs to obtain more efficient use of its personnel, facilities, and resources and provide improved service to carriers, importers, and the public.

EFFECTIVE DATE: February 5, 1986.

FOR FURTHER INFORMATION CONTACT: Richard C. Coleman, Office of Inspection, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

By T.D. 82-37, published in the Federal Register on March 9, 1982 (47 FR 10137), Customs set forth the criteria it uses in determining whether to grant requests for the establishment of Customs ports of entry and stations. Under the heading "Criteria" of T.D. 82-37, number (2)(b) states the following:

(2) The actual or potential Customs workload (minimum number of transactions per year), in the area must be: (b) 2,500 consumption entries (formal (over $250 in Customs value), informal (under $250 in Customs value));"

Since the publication of T.D. 82-37, Customs has implemented the Automated Commercial System (ACS) which provides a means for the electronic processing of entries of imported merchandise. ACS is a national teleprocessing system that encompasses approximately 2,000 programs and processes 250,000 transactions per day. ACS includes a number of interdependent modules and computer-to-computer interfaces with the private sector which, together, automatically process enforcement and statistical data spanning the full range of Customs processing for imported merchandise. Current ACS modules are Antidumping and Countervailing Duty, Automated Broker (Importer) Interface, Bonds, Collections and Revenue, Drawback, Entry Summary Processing, Fines, Penalties and Forfeitures, In-bond, Information Exchange, Liquidations, Manifests, Protests, Quota, Carrier and Port Authority Interfaces, Cargo and Entry Summary Selectivity, and Warehouse. It is anticipated that ACS will be fully operational in 1987. To take full advantage of the potential of ACS to expedite the entry of imported merchandise, in determining whether to grant requests for the establishment of Customs ports and stations, Customs will now require a commitment by the applicant port or station to make optimal use of electronic data transfer capability to permit integration with ACS.

In an unrelated matter, by § 206 of Pub. L. 98-573, the Trade and Tariff Act of 1984, Congress amended § 498(a)(1), Tariff Act of 1930 (19 U.S.C. 1498(a)(1)), by increasing the statutory limit for informal Customs entries from $250 to $1,250. After thorough consideration of the issue, Customs determined that, with the exception of specific exclusions, the informal limit for all articles would be set initially at $1,000, with the option to increase it to $1,250 in the future. This change was reflected in amendments to the Customs Regulations published as T.D. 85-123 in the Federal Register on July 23, 1985 (50 FR 29949). Accordingly, a further criteria revision reflects the increased minimum value of $1000 for commercial entries, instead of $250. In addition, all references to informal entries in the criteria are deleted since they are not a factor in determining potential cargo activity. As a result of these changes, number 2(b) under "Criteria" listed in T.D. 82-37, is revised to read as follows:

(b) 2,500 consumption entries (each valued over $1000). The applicant must commit to optimal use of electronic data input means to permit integration with any Customs system for electronic processing of entries.

These changes will permit Customs to obtain more efficient use of its personnel, facilities, and resources and provide improved service to carriers, importers, and the public.

All of the other criteria in T.D. 82-37 will continue to be used in evaluating requests for new service.

19 CFR Part 134

(T.D. 86-15)

Country of Origin Marking of Imported Pipe and Pipe Fittings of Iron or Steel

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of required alternative marking methods.

SUMMARY: In a notice previously published in the Federal Register, Customs acknowledged that certain pipe and pipe fittings of iron or steel, cannot be marked with the country of origin by any of the methods prescribed by § 207 of the Trade and Tariff Act of 1984, without rendering such articles unfit for the purpose for which they are intended or violating industry standards for such articles. The notice solicited public comments as to which pipe and pipe fittings of iron or steel cannot be marked by any of the prescribed methods. This document sets forth which articles may be exempted from the marking methods prescribed by § 207 and are eligible for marking by alternative methods.

EFFECTIVE DATE: February 5, 1986.

FOR FURTHER INFORMATION CONTACT: Steven I. Pinter, Entry Procedures and Penalties Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On October 30, 1984, the President signed Pub. L. 98-573, the Trade and Tariff Act of 1984, which made numerous changes to the

Tariff Act of 1930. Section 207 of Pub. L. 98-573 amended § 304, Tariff Act of 1930 (19 U.S.C. 1304), requiring, without exception, that all imported pipe and pipe fittings of iron or steel be permanently marked to indicate the proper country of origin of the article by means of die stamping, cast-in-mold lettering, etching, or engraving.

Pursuant to 19 U.S.C. 1304, every article of foreign origin, or its container, imported into the U.S., shall be marked in a conspicuous place as legibly, indelibly, and permanently *as the nature of the article or its container will permit*, in such a manner as to indicate to an ultimate purchaser in the U.S. the English name of the country of origin of the article, unless specifically exempted. Part 134, Customs Regulations (19 CFR 134), sets forth the country or origin marking requirements of 19 U.S.C. 1304.

It was brought to Customs attention that certain pipe and pipe fittings of iron or steel cannot be marked by any of the four prescribed methods without rendering such articles unfit for the purpose for which they are intended or violating industry standards for such articles.

Under the laws of statutory construction, § 207 and 19 U.S.C. 1304, which it amends, should be read in *pari materia*, so that pipe and pipe fittings which by their nature will not permit marking by any of the four prescribed methods will not be barred from entering the U.S. Such a construction would allow for alternative methods of marking, such as stencilling or tagging in bundles. Accordingly, by a document published in the Federal Register on January 9, 1985 (50 FR 1064), Customs solicited public comments as to which pipe and pipe fittings of iron or steel cannot be marked by any of the means prescribed in § 207 without rendering such articles unfit for the purposes for which they were intended or violating industry standards for such articles.

Customs has already taken the position that the new marking requirements will apply to iron or steel pipes, tubes, and blanks therefor, as defined in Headnote 3(e), Schedule 6, Part 2, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), which covers tubular products, including hollow bars and hollow billets, of any cross-sectional configuration, by whatever process made, whether seamless, brazed, or welded, and whether with an open or lock seam or joint, of the kind classifiable under items 610.30-610.58, 688.30, TSUS. However, it does not include hollow drill steel of the kind defined in Headnote 3(e), Schedule 6, Subpart 2B, TSUS, and classifiable under items 607.05-607.09, TSUS. By a correction document published in the Federal Register on January 31, 1985 (50 FR 4524), Customs stated that the new marking requirements of § 207 will also apply to pipe and tube fittings of iron or steel (bends, branches, drains, reducers, etc.) of the kind classifiable under items 610.62-610.93, 688.32, TSUS, as well as those pipe and

tube fittings of iron or steel of the kind classifiable under items 606.71 and 606.73, TSUS.

Required Alternative Marking List

After reviewing the numerous comments received in response to the notice and the best technical information available, Customs has identified certain categories of articles which cannot be marked by any of the methods prescribed by § 207 without impairing the articles with respect to their intended use, or without violating applicable industry standards. The categories of articles so identified were listed and communicated in the form of a telex to Customs field offices on March 18, 1985, and subsequently amended by telexes dated April 15, 1985, and May 13, 1985. Copies of those telexes were made available to all interested parties. The purpose of this notice is to publish in a final and definitive format the categories which may be marked to indicate their country of origin by methods other than those prescribed by § 207.

Inasmuch as this notice is merely a restatement of existing requirements and contains no substantive changes in the previously adopted rules, and because the requirements of § 207 became effective on November 14, 1984, no delayed effective date is necessary.

Categories of Articles Exempted From § 207 Marking Requirements; Thin-Walled Pipes and Fittings

Carbon and low-alloy steel tubing or fittings with wall thicknesses less than .08 inch (this exception is provided because the statutory methods of marking would be illegible on the relatively rough surfaces of these articles).

High-alloy (nickel, chromium, molybdenum, or combinations thereof) articles which have wall thicknesses less than .08 inch and which the importer certifies (in writing to the district director) will actually be used in an application or environment in which marking by a statutory method would substantially diminish or destroy the utility of the articles.

Required alternative marking methods: paint stencilling, or tagging of bundles or containers.

Small-Diameter Pipes and Fittings

Fittings having nominal diameters of one-fourth inch or less.

Pipes having inner diameters of 1.9 inches or less.

Required alternative marking methods: paint stencilling, or tagging of bundles or containers.

Other Fittings

Fittings which meet American Petroleum Institute (API) specifications (or equivalent mill specifications) 5AC or higher, including 5AX and 5AQ.

High-alloy (nickel, chromium, molybdenum, or combinations thereof) fittings ordered to National Aeronautic and Space Administration (NASA) or military specifications which prohibit marking by any of the statutory methods.

Small galvanized iron fittings of the following types (dimensions stated are nominal diameters):

Elbows 90 degrees—one-eighth and one-fourth inch.
Elbows 45 degrees—one-eighth and one-fourth inch.
Street elbows 90 degrees—one-eighth and one-fourth inch.
Street elbows 45 degrees—one-eighth and one-fourth inch.
Tees—one-eighth and one-fourth inch.
Crosses—one-eighth and one-fourth inch.
Couplings (sockets)—one-eighth and one-fourth inch.
Locknuts—one-eighth, one-fourth, three-eighths, and one-half inch.
Bushings—one-fourth by one-eighth, three-eighths by one-eighth, three-eighths by one-fourth, one-half by one-eighth, one-half by one-fourth, one-half by three-eighths inch.
Unions—one-eighth, one-fourth, and three-eighths inch.
Caps—one-eighth, one-fourth, three-eighths, and one-half inch.
Plugs—one-eighth, one-fourth, three eighths, one-half, three-fourths, and one inch.
Reducing elbows—one-fourth by one-eighth inch.
Reducing tees—one-fourth by one-eighth inch.
Reducing coupling—one-fourth by one-eighth inch.
Spun iron fittings with a Brinell hardness number in excess of 500 (five hundred).

Required alternative marking methods: paint stencilling, or tagging of bundles or containers.

Oil Country Tubular Goods

Oil Country Tubular Goods (OCTG) which meet API specifications (or equivalent mill specifications) 5AC or higher, including 5AX and 5AQ.

Solution-annealed austenitic ferritic duplex stainless steel.

"Green" tubes which are two and seven-eighths inches or smaller in outer diameter, and which are certified by the importer (in writing to the district director) to be for redrawing.

Required alternative marking method: paint stencilling.

Line Pipe

High-test line pipe meeting API specifications (or equivalent mill specifications) 5L grades X-42 and higher.

Pipe meeting API specification (or equivalent mill specification) 5LU.

Required alternative marking methods: paint stencilling, or tagging of bundles or containers.

Mechanical Tubing

Mechanical tubing which meets American Society of Testing and Materials (ASTM) specification A-511, A-512, A-513, A-519, A-554, A-787, or A-789.

Any other such articles for which the importer certifies (in writing to the district director) that the tubing will actually be used in an application or environment in which marking by a statutory method would substantially diminish or destroy the utility of the tubing.

Required alternative marking method: paint stencilling.

Coated Pipe

Galvanized, plastic-coated, aluminized, galv-alum, porcelain enamel-coated, and vinyl-coated pipe.

Required alternative marking method: paint stencilling, or tagging of bundles or containers.

"Mother" Tubes

So-called "mother" tubes which are certified by the importer (in writing to the district director) to be for redrawing.

Required alternative marking method: paint stencilling.

Structural Pipe

Structural pipe which meets API specifications (or equivalent mill specifications) 2H and 2B.

Required alternative marking method: paint stencilling.

Pressure Tubing

Pressure tubing which meets ASTM specification A-161, A-178, A-179, A-192, A-199, A-200, A-209, A-210, A-213, A-214, A-226, A-249, A-250, A-333, A-334, A-423, A-557.

Tubing for which the importer certifies (in writing to the district director) that it is for actual use in an application or environment in which marking by one of the statutory methods would substantially diminish or destroy the utility of the tubing.

Required alternative marking method: paint stencilling.

Ornamental Pipes, Tubes, and Fittings

Ornamental pipes, tubes, and fittings of all types, having highly polished surfaces.

Required alternative marking methods: Each piece is separately marked with a durable tag or sticker securely affixed to the article, or is separately wrapped in a protective wrapping which clearly indicates the country of origin.

SPUN IRON PIPE

Spun iron pipe with a Brinnel hardness number of 500 or more. Required alternative marking methods: paint stencilling, or tagging of bundles or containers.

Foreign Trade Zones; Specialized and General Provisions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document revises Customs Regulations relating to foreign trade zones to provide a new audit-inspection method of zone supervision by Customs. A foreign trade zone is a defined area, considered to be outside the Customs territory of the U.S., where certain lawful activities can be conducted with a minimum of formalities. A zone provides a site at or adjacent to a Customs port of entry where operations involving foreign merchandise can take place, which otherwise might have been done abroad for tariff and trade reasons. The revision sets forth the general provisions applicable to the administration of all zones and other specialized provisions applicable to subzones and zone sites. In addition, changes in the language of the regulations will clarify some provisions, eliminate inconsistencies, and conform the regulations to current administrative practices.

EFFECTIVE DATE: May 12, 1986.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In 1934, Congress enacted the Foreign-Trade Zones Act to expedite and encourage foreign commerce. The Act created domestic foreign trade zones and was designed to stimulate international trade and create jobs in the U.S. At that time, zones were envisioned as storage, manipulation, and transshipment (exportation) centers. In 1950, an amendment to the Act was passed, authorizing manufacturing and exhibition inside zones. Foreign trade zones (zones) are areas within the U.S. (but outside the "Customs territory of the U.S.," as defined in § 101.1(e), Customs Regulations (19 CFR 101.1(e)), where foreign or domestic merchandise may be brought for manipulation, manufacture, assembly or other processing, or for storage or exhibition, provided that these operations are not otherwise prohibited by law. Foreign merchandise may be brought into a zone without being subject to the usual Customs entry procedures and payment of duty. Foreign or domestic merchandise may be exported or entered into the Customs territory from a zone. Quota restrictions do not normally apply to foreign merchandise in a zone. Merchandise moved to a zone for export may be considered exported upon its admission to a zone for purposes of excise tax rebates and drawback.

Zones are established under the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a-81u), and the general regulations and rules of procedure of the Foreign-Trade Zones Board (the Board), Department of Commerce (15 CFR Part 400). Part 146, Customs Regulations (19 CFR Part 146), governs the admission of merchandise into a zone; the manipulation, manufacture, destruction, or exhibition in a zone; the exportation of merchandise from a zone; and the transfer of merchandise from a zone into the Customs territory.

Typically, a foreign trade zone is a fenced-in area with a general warehouse type building or buildings and access to all modes of transportation. Space is available for leasing to firms for authorized zone activity. Some zones have industrial park characteristics or are located within such facilities and have lots on which zone users can construct their own facilities. Subzones are locations au-

is in the public interest but cannot be accommodated within an existing zone.

Between 1934 and 1970, just 12 zones were approved by the Board. At this time, there are 109 general purpose zones and 60 subzones. It has been estimated that the volume of business in zones has multiplied substantially from 1970 to the present with zones now handling about $4.8 billion worth of merchandise each year.

As can be appreciated from the foregoing, the number of zones and the operations conducted therein have increased tremendously in recent years. Historically, Customs has administered zones and their operations by the physical presence of Customs officers at the various zone locations. However, as time has passed, Customs staffing available to supervise zones has declined while zones have continued to proliferate. This has resulted in delays in the approval of activation of a given zone, and has presented problems for Customs in the exercise of effective control over some zone operations, especially subzone manufacturing activities. Therefore, Customs undertook an effort to devise a method to reduce Customs staffing requirements in zones and other areas (notably bonded warehouses) without endangering the revenue or law enforcement priorities, while also not hampering the growth of those areas and not impeding commerce.

The audit-inspection program approach to administration of those areas of Customs responsibility, which de-emphasizes the physical presence of a Customs officer to supervise each transaction, was successfully implemented in regard to the operation of bonded warehouses (see T.D. 82-204, published in the Federal Register on November 1, 1982 (47 FR 49355)). Audit-inspection is a method of supervision based on spot checks and audits of foreign trade zone activities as represented in records maintained by the zone operator. This method is substituted in lieu of physical on-site supervision by Customs when merchandise is admitted to, transferred from, or processed in the zone.

The principal advantage for Customs of audit-inspection is that it requires fewer Customs personnel to administer the zones. The principal advantages for the importing community are that (1) merchandise may be admitted, transferred, or processed without a Customs officer being present, allowing increased flexibility in zone operations, and (2) for most zones, the reimbursable cost paid to Customs is reduced. Audit-inspection is based on several procedures, which are essential for its proper functioning and success. These procedures are:

1. The determination by Customs of the identity and nature of the merchandise through examination before or upon admission to the zone so that the initial responsibility of the operator for the merchandise can be determined.

sion to the zone so that the initial responsibility of the operator for the merchandise can be determined.

2. The issuance of a prior permit by Customs to the zone operator for admission, transfer to the Customs territory, and processing in the zone.

3. The assumption by the zone operator of responsibility for the merchandise, maintaining records concerning the merchandise, and physical supervision of the zone. Quantities of merchandise received at the zone and transferred to the Customs territory are determined jointly by the zone operator and the carrier.

4. The performance by Customs of spot checks and audits to determine whether the zone operator is properly supervising the zone and maintaining records of the merchandise. The cost of the spot checks and audits is reimbursed to Customs through an annual fee charged the zone operator for this service.

5. The assessment of liquidated damages in an amount sufficient to ensure performance of the operator's duties and responsibilities under the rules and regulations needed for proper zone supervision and recordkeeping.

6. The temporary suspension by Customs of zone operations which do not comply with the rules and regulations.

It is noted that Customs initiated use of the audit-inspection method in August 1983, on the basis of voluntary agreements between Customs and zone operators. At present, 12 subzones and 6 general-purpose zones have entered into voluntary agreements to use the audit-inspection method to administer their operations. Customs has taken that limited experience under the zone audit-inspection method into account in preparing this revision.

To implement the audit-inspection method of supervision in foreign-trade zones, it is necessary to substantially revise Part 146, Customs Regulations (19 CFR Part 146), concerning the administration of foreign trade zones, and to revise to a much lesser extent, Parts 18, 24, 112, 113, 141, 144, 178 and 191, to conform them to changes made by the revision to Part 146. Accordingly, by notice published in the Federal Register on July 17, 1984 (49 FR 28855), an extensive revision of Part 146 and minor conforming revisions of Parts 18, 24, 112, 141, 144 and 191 were proposed. A detailed discussion of the proposed amendments to Part 146 can be found on pages 28856–28859 of the notice.

Interested parties were given until October 15, 1984, to submit written comments. However, by notice published in the Federal Register on September 11, 1984 (49 FR 35658), the comment period was extended to November 30, 1984, as an accommodation to the National Association of Foreign-Trade Zones. Approximately 150 comments were received in response to the notice. A discussion of the comments and our responses to the comments follow.

sions of the proposal. Many commenters question the reasonableness of the proposed fees, penalties and liquidated damages provisions. They also allege that the proposal is inconsistent with genrally accepted accounting principles and the Foreign-Trade Zones Act, and that it could impede the flow of commerce. Commenters further complained that the proposed regulations do not provide an orderly transition to the new audit-inspection system and that they were unduly complex and restrictive. Specific comments and our responses are as follows:

Comment: Under the proposed regulations, Customs would treat merchandise destined for a zone as imported and subject to examination prior to admission to the zone, unless a subzone or zone site qualifies under special procedures for exemption from the prior examination requirement. This treatment of zone-destined merchandise may impede or delay shipments.

Response: We disagree. Merchandise which is destined for a zone is imported, within the meaning of § 101.1(h), Customs Regulations. Under § 499, Tariff Act of 1930, as amended (19 U.S.C. 1499), imported merchandise is subject to examination in Customs territory. Therefore, examination of zone-destined merchandise is already provided for under the law. The frequency and intensity of these examinations, however, will be reduced by selective examination procedures. Also, only occasional examinations will be necessary at certain subzones and zone sites because shipments to these sites are repetitive, liability for violations is known in advance, and elaborate audit trails for checking for diversions of the merchandise exist.

Comment: The proposed regulations do not clearly distinguish between physical and record identification of merchandise. The two systems cannot work together. Record identification is the only viable system under the proposed revision.

Response: We disagree, The physical and record systems of identifying merchandise are compatible. Under the specific identification system, the zone operator maintains a zone lot control system, physically segregating his merchandise by zone lots and controlling identification of merchandise by zone lot records from admission through final zone removal. Under the record identification system, the merchandise is identified by inventory records, using a Customs-approved inventory method, *e.g.,* the first-in, first-out method (FIFO). Both methods require a reconciliation, at least annually, of physical merchandise on hand to quantities reflected by the Customs-approved inventory method. Any discrepancies would require corrective action by the operator.

The physical identification of merchandise is required to ensure reliability of admissions, inventory record accuracy, and proper zone status requests, among other things. For these reasons, it is retained in the regulations.

zone status requests, among other things. For these reasons, it is retained in the regulations.

Comment: The proposal provides no mechanism or guidance for transition to the audit-inspection method of supervision. Serious consideration should be given to grandfathering in some zones or allowing them sufficient time to change over to the new method.

Response: We disagree. Allowing some zone operations to be grandfathered in, *i.e.*, granted an exemption from the new foreign trade zone regulations, is not feasible because it would result in the perpetuation of different sets of rules for some zones. The intent of the proposed regulations is that one set of rules should govern all zone operations.

The regulatory changes will become effective as a final rule 90 days from the date of publication, except that zones with Alternative Inventory Control Systems (AICS) will have either 180 days after the publication date or to the end of their current business year to comply with the new recordkeeping regulations. This 90-day period, instead of the 30-day period ordinarily granted, will allow zone operators a sufficient period of time for bringing their inventory system into compliance with the new regulations.

Zones under the AICS are different from other zones in that the record of inventory is maintained by the zone grantee or operator, or by the individual zone firms or their agents, under the supervision of the grantee or operator, rather than by Customs. The zone grantee or operator is responsible for the posting of inventory ledgers, the supervision of individual zone firms which maintain their own inventory records, the correction of inventory discrepancies, the conducting of periodic selective inventories of open lots of all zone firms, and various additional tasks which require time and other resources to handle the paperwork associated with these tasks. Because of the complexity of operating this type of inventory control system, these zones will require more time than non-AICS zones to convert to the audit-inspection supervision system under the new regulations. For this reason zones under AICS will be given either 180 days from the date of publication of the new regulations or to the end of their business year to bring their inventory system into compliance with the new regulations. However, they will be subject to the 90-day period for bringing all other aspects of their zone operations into compliance with the new regulations.

Conversion to audit-inspection supervision under the new regulations will occur as follows:

All zone operators, except as noted below, will furnish a certification that their inventory control and recordkeeping system complies with the new regulations, a procedures manual, the date of the end of their business year, and the annual fee on or before the date the new regulations take effect, and the prescribed zone operator's bond. If these requirements are not complied with by the ef-

In addition, the following actions will be taken with respect to specific zones:

(a) *Zones where Customs has maintained inventory records.* Customs will provide a listing of inventory balances for all lots in the zone on the effective date. The operator will have 30 days to review the lot balances, conduct a physical inventory, and resolve any differences with Customs. On or before the end of the 30-day period, the operator will sign to accept the lot balances as reflecting the inventory on hand on the effective date, with such adjustments as are mutually agreed to between the operator and the district director.

(b) *Zones with voluntary audit-inspection agreements.* Zone operators will have the option of conducting a physical inventory before the effective date and certifying as to specific quantities of merchandise for which they are responsible on the effective date. Otherwise, they will be held responsible for losses and overages unless they can clearly show, with competent evidence, that the losses and/or overages occurred before the effective date.

(c) *Zones with alternative inventory control systems.* Zone operators may request postponement of the procedures manual and certification requirements until one of the following dates:

(i) 90 days after the effective date of the new regulations; or

(ii) end of their current business year.

With respect to paragraph (c), the district director may approve the request for a postponement if he is satisfied that the postponement is necessary for the conversion of the operator's recordkeeping system to comply with the requirements of Subpart B, Part 146, Customs Regulations. During the interim before the procedures manual and certification are received, the operator will be allowed to maintain the inventory and recordkeeping system as agreed under the AICS, and he need not meet the requirements of Subpart B. However, the operator must meet and follow all the other requirements of the new regulations upon their effective date. The same physical inventory option will be available for zones with an AICS as for zones with a voluntary audit-inspection agreement. If that option is not exercised, any losses or overages found after the effective date will be considered to have occurred after the effective date, unless the operator can clearly show, with competent evidence, that the losses and/or overages occurred before the effective date.

Comment: The proposed regulations are inconsistent with generally accepted accounting principles as well as modern business practices.

Response: The commenters do not point to any specific instance of inconsistency. However, we do not that Customs method of identifying merchandise by the first-in, first-out (FIFO) method does not conform to generally accepted accounting principles (GAPP) under

tifying merchandise by the first-in, first-out (FIFO) method does not conform to generally accepted accounting principles (GAPP) under which FIFO is used to determine the value of goods in an ending inventory. Customs use of FIFO to indentify merchandise expedites the movement of goods in and out of zones. It is used as an alternative to specific identification of merchandise.

Comment: While the proposed regulations provide for the removal of Customs officers from zones, there are no provisions detailing the methods and the time restraints for transmitting data and documents to Customs, particularly when a zone is remote from a Customs office. There should be a variety of mechanisms to transmit data and documents to expedite zone operations.

Response: We disagree. The regulations need not specify the method of transmittal. Many methods of transmittal, such as mail, messenger delivery, or electronic transmittal, can be accommodated so long as they can be administratively handled by Customs. There should be no problem with timely delivery of the required documentation to Customs on the part of any zone since, in order to be designated a foreign trade zone, it must be in or adjacent to a port of entry.

There are specific provisions for the timing of the transmittal and receipt of documentation by Customs from zone operators, such as in § 146.40(a) and (b), and wherever else specific provisions are necessary. In the absence of any stated provisions, documentation must be received by Customs before a permit to admit, handle or transfer merchandise can be issued.

Comment: The regulations should include a provision allowing merchandise to be temporarily removed from a zone for repair, restoration, or incidental operations and then returned to the zone.

Response: Customs has been testing such a proposal with, as yet, inconclusive results. If the test has favorable results, the procedure will be implemented on a permanent basis through a separate rulemaking proceeding.

Comment: One commenter states that Customs should not extend its concept of adjacency, in respect to subzones, beyond 35 miles from a port. Other commenters believe that subzones that are distant from ports should not be required to deliver merchandise and documentation to Customs, as is required in proposed § 146.15(a).

Response: The adjacency concept, and its application to subzones which are 35 miles from a port, is under review in a separate rulemaking proceeding at the Department of Commerce. Since this entire issue is under review, proposed § 146.15 is premature. Accordingly, it has been deleted from the final regulations.

Comment: Several commenters believe that the proposed regulations are too complicated, impose unnecessary requirements, and make zones less manageable.

Response: We have simplified the proposed regulations and removed certain requirements. The regulations, as revised, impose

498-399 O - 86 - 2

own recordkeeping and inventory control requirements. The requirements for recordkeeping are similar to those any conscientious businessman would adhere to in the supervision of his business. The revised regulations make zones more, not less, manageable. They also allow Customs to carry out its mission of protecting U.S. revenue and enforcing importation laws and regulations more efficiently.

Comment: Many commenters criticize the criteria under proposed § 146.14 for allowing domestic status merchandise to be admitted to a zone without a prior application and permit for each shipment. They believe the criteria are too stringent, particularly those involving commercially identical merchandise and merchandise which has been combined so that it has lost its identity.

Response: We agree with these comments. Therefore, proposed § 146.14 is deleted. The subject matter of § 146.14 is transferred to § 146.43, which is further amended to specify that no prior permit will be required for the admission, handling, or transfer to Customs territory of domestic status merchandise except (1) when mixed or combined with merchandise of another zone status, or (2) when so ordered by the Commissioner of Customs under certain circumstances. This latter authority on the Commissioner's part allows Customs to properly control domestic status merchandise in unusual circumstances. The zone operator must still maintain proper inventory records of domestic status merchandise as prescribed in Subpart B, Part 146, Customs Regulations, even if no permit is required.

Comments: Several commenters inquire as to the authority for Customs allowing activation of a zone under § 146.6. They also question whether this allowance is not more appropriately within the authority of either the Board or the zone grantee.

Response: Authority for Customs approval of activation of zones is found in the individual grants to the zones and subzones, as well as the Act itself. The grants contain provisions to the effect that operations at the zone shall not commence until the grantee obtains all the necessary permits from Federal authorities, and that the grant is subject to an agreement between the grantee and Customs regarding compliance with requirements for the protection of the revenue.

Section 15(b) of the Foreign-Trade Zones Act (19 U.S.C. 81o(b)) gives the Secretary of the Treasury broad authority to approve regulations for the protection of the revenue under the Act, while § 9 (19 U.S.C. § 81(i)) directed the Board to cooperate with Customs. The activation procedure is the method which Customs has chosen for protecting the revenue. Through this procedure Customs is assured that the zone is ready to receive merchandise in zone status.

Comment: Section 146.65 creates a new valuation concept, *i.e.*, "total zone value." There are a substantial number of Customs rul-

Comment: Section 146.65 creates a new valuation concept, *i.e.*, "total zone value." There are a substantial number of Customs rulings dealing with zone valuation issues. These rulings should serve as the proper guidance for Customs position on this issue.

Response: "Total zone value" may be a new regulatory term, but it is not a novel regulatory concept. It is the value provided for by current § 146.48(e). Its significance relates to the valuation of recoverable waste or scrap from a zone operation and situations where the rate of duty applicable to nonprivileged foreign merchandise is dependent on the value of the article being transferred from a zone. Section 146.65 therefore, accurately reflects the current Customs position on zone valuation matters.

Comment: Many commenters are concerned with proposed § 146.8, which authorizes the zone operator to affix and break Customs in-bond seals. Heretofore, only Customs officers could affix and break Customs in-bond seals.

Response: Since under the audit-inspection approach a Customs officer will no longer be physically present in most cases, it is necessary that the zone operator be given authority in certain areas to perform functions that were previously conducted by Customs. One of these is the authority to affix and break in-bond seals. Under the new regulation, the zone operator will report to Customs any discrepancies in seal condition. This will protect the zone operator from liability when it is determined that the loss of merchandise occurred prior to arrival of the merchandise at the zone site.

Comment: Special procedures for admitting and removing zone merchandise limited to subzones and zone sites should be extended to general-purpose zones. Also, the criteria for admittance and removal are too stringent for most zones.

Response: We disagree. The audit-inspection requirement is that a permit is required before admission to a zone or transfer to Customs territory. The purpose of proposed § 146.13 is to exempt shipments from this prior permit requirement only when they are repetitive, predictable, and relatively unchanging over a period of time. The exemption was intended to be restrictive because of Customs experience that a major portion of trade destined for zones is non-repetitive and difficult to predict.

In response to the comments on this subject, however, Customs has made a number of changes in the special procedures. First, the criteria for direct delivery are moved to § 146.39 since they are applicable only to merchandise being admitted to a zone, and § 146.13 is deleted.

Secondly, the criteria for direct delivery as they appear in § 146.39 have been simplified. There is now no requirement for direct transmittal of statistical information to the Bureau of the Census. Also, the criteria have been grouped according to those that apply to merchandise and those that apply to the operator. The specific restriction of the direct delivery procedure to subzones

the zone operator is not the owner or purchaser of the merchandise (as interpreted by Customs in Customs Directive 3530–02, dated November 6, 1984). The criteria for direct delivery ensure that not only are the shipments repetitive and relatively unchanging, but also that the zone operator is in a position to see that they remain so.

Finally, the criteria for direct delivery no longer apply to merchandise transferred from a zone for weekly entry or permit for consumption, transportation, or exportation under proposed §§ 146.63 and 146.69. Instead, the criteria for a weekly permit under the direct delivery procedure in these sections is whether the merchandise is manufactured or changed to its final form just shortly (within 24 hours) before physical transfer from the zone. These sections are necessary for assembly-line type operations where there otherwise would be little time for examination of the merchandise and furnishing of proper entry documentation after the merchandise is in its final form but before physical removal from the zone. By allowing a weekly entry based on an estimate of merchandise to be removed during the week, Customs has prior information as to merchandise to be removed and documentation to serve as the basis of physical examination of the merchandise. At the same time, the assembly-line operation need not be delayed pending acceptance of an entry and Customs examination of the merchandise.

Comment: To qualify for many of the more liberal procedures, zones must provide statistical data directly to the Bureau of the Census instead of providing a statistical carbon copy of Customs Form 214–A, titled "Application For Foreign Trade Zone Admission And/Or Status Designation" to Customs. This may be very difficult for many zone users, and it abrogates the responsibility of Customs to collect statistics.

Responses: We disagree. Customs responsibility is to support the Census in collecting foreign trade statistics. In some instances, Census has allowed direct transmittal of statistics by zone importers, relieving Customs of the necessity of collecting a copy of Customs Form 214–A. Normally, collection of this form is very important to Census because it ensures that statistical information is collected on each and every shipment to a zone. Direct transmittal of statistics is permitted by Census only when it is satisfied through other means that each and every shipment will be covered by the direct transmittal.

Census has indicated that trade statistics need not be collected for domestic status merchandise admitted to a zone. Therefore, the criteria in proposed § 146.13(b)(1) is not needed. Also, Customs will not, except as ordered by the Commissioner, require a prior permit for the admission of domestic status merchandise to a zone.

Under proposed § 146.13(b), direct transmittal of statistical information to Census is necessary to qualify a zone importer for direct

delivery of merchandise to a zone without a prior permit to admit merchandise. Section 146.40 requires importers to submit Customs Form 214 for merchandise recorded into the zone inventory and recordkeeping system the previous business day. The previous business day may not occur until several weeks after the merchandise is physically received in the zone. Census is concerned that statistical information on zone importations may not be reported timely.

To alleviate Census concern, yet reduce barriers to use of the direct delivery procedures by importers under § 146.40, Customs has decided to allow two alternatives to meeting Census statistical reporting requirements. The zone importer must either have a direct transmittal arrangement with Census or he must submit an individual Customs Form 214 and 241–A under § 146.40(c)(2) for each shipment, within 10 days after the end of the month in which the merchandise is physically received in the zone. No extension will be authorized to this statistical reporting requirement. The statistics for each shipment of merchandise to the U.S., including nationality of the shipping vessel or aircraft, date of exportation, and date of importation, must be reported separately.

These requirements are being incorporated into § 146.40 inasmuch as § 146.13 is deleted, as discussed above.

Comment: Many commenters object to proposed regulations concerning Customs examination and documentation requirements before or upon admission to zones. Specifically, the objections are that the examination required by the proposed regulations (1) is contrary to the Act; (2) would unreasonably delay the shipment of merchandise to zones; (3) reduces the advantages to using zones; and (4) would result in insufficient supervision for the proper enforcement of the foreign trade zone regulations. Commenters also state that examination should only be done in zones, that removal of Customs officers from zones would make it impossible to examine merchandise there, that commercial invoices are not usually available for presentation before or upon admission to a zone, further delaying shipments, and that merchandise admitted to a zone but destined only for exportation should not be examined by Customs.

Responses: We do not agree. Physical examination is a key principle of audit-inspection supervision because it enables Customs to determine the initial responsibility of the operator for the merchandise. Proper duty assessment and enforcement of admissibility requirements are also benefits of zone merchandise examination. The authority for such examinations is found in §§ 4, 8, and 15(b) of the Act (19 U.S.C. 81d, h, and o(b)), as well as in § 499 of the Tariff Act of 1930, as amended (19 U.S.C. 1499).

The purpose of providing a commercial invoice or similar documentation is to assist Customs in physical examination by disclosing the purported nature of the merchandise. It also aids in plan-

ning examinations under Customs selective examination procedures.

Furthermore, the proposed examination and documentation requirements do not unreasonably delay shipments to zones. First, under selective examination procedures, only about 20–30 percent of shipments are examined. Secondly, merchandise destined for zone sites under direct delivery procedures (§ 146.40) is examined even less frequently. Thirdly, if proper documentation is not available or is incomplete, the merchandise may be temporarily deposited in the zone, pending its receipt and Customs examination (§ 146.35).

Additionally, the examination and documentation requirements do not decrease the advantages of zones. First, there would not be unreasonable delays. Secondly, zone importers would not have to await the arrival of a Customs officer to physically supervise admission, as under the existing system. Thirdly, at worst the delays caused by examination and documentation requirements and those caused by awaiting the arrival of a Customs officer for physical supervision are equal. Zones will have very significant advantages conferred upon them under the Act.

As to the place of examination, we believe that this should be left to the discretion of the district director, so as to allow the most efficient deployment of personnel to carry out Customs tasks. In many cases, examination can be done more quickly at the dock, where Customs officers may be stationed full time, rather than at a zone with no full-time Customs officers.

The main purpose of audit-inspection supervision is to replace the physical supervision of zones. It does not deal directly with Customs staffing of zones for examination or documentation purposes. If the workload of a zone is large enough to warrant assignment of an officer full-time to examine merchandise and review documentation, the district director may do so. If the zone workload is light and commitments to other segments of the import community heavy, it would be inefficient and unreasonable to assign a full-time officer to a zone. There is nothing in the Act or elsewhere that obliges Customs, in its deployment of personnel, to accord zones more favorable treatment than other segments of the importing community.

Audit-inspection supervision will not result in ineffective enforcement of U.S. laws and regulations in zones. Under this system, Customs does not abandon supervision; rather, it supervises in a different manner, relying on physical supervision and recordkeeping by zone operators, enforced through liquidated damages, penalites, and suspension procedures. Customs believes these deterrents will provide better enforcement than physical supervison.

As to merchandise with no invoice or an incomplete invoice, we note that this merchandise may be sent to a zone for temporary deposit. Customs will accept alternate documentation in lieu of a

commercial invoice, providing the documentation provides a clear description of the nature of the merchandise. However, Customs experience has been that commercial invoices exist for most zone shipments.

Finally, with regard to merchandise destined only for exportation, this merchandise is subject to examination for identification purposes under audit-inspection supervision just as any other merchandises destined for zones.

Comment. Proposed § 146.73(d)(2) prohibits duty-paid merchandise from being futher processed in a zone. This provision is contrary to the Act and Customs Headquarters Ruling 215870. It therefore should be deleted.

Response: Whether or not the provision is contrary to Ruling 215870, the regulations take precedence. The prohibition against further processing of duty-paid merchandise is applicable only to merchandise previously in a zone, and not to all duty-paid merchandise.

The purpose of proposed § 146.73(d)(1) was to allow merchandise to remain in a zone after it had been constructively transferred to Customs territory and entered. It was intended to accommodate zone users who wished to make entry for a large amount of merchandise, but for various commercial reasons did not wish to immediately remove all or some of the merchandise from the zone. The prohibition on further processing was intended to avoid abuse of this privilege by an assortment of schemes designed to circumvent high duty rates or import restrictions. Examples of such schemes are as follows:

1. Merchandise is entered for consumption at a duty rate of 5 percent. After entry the merchandise is retained in the zone, or it is removed but shortly thereafter returned to the same or a different zone in domestic status. Then it is further manufactured into a product whose rate of duty is 25 percent. However, the merchandise is no longer subject to duty since it is now wholly in domestic status.

2. There is a quota on sugar products containing over 65 percent sucrose. The importer adds another product to the sugar in a zone to produce a product with less than 65 percent sucrose content, which is not subject to the quota. The importer files an entry on the product in the latter state, but the merchandise is retained in the zone in domestic status. Then the added product is sifted out, leaving a sugar product containing 90 percent sucrose. The merchandise is no longer subject to quota upon its ultimate removal from the zone because it is in domestic status.

3. A firm produces pharmaceutical products in a zone. During an intermediate stage of processing, the merchandise is in a condition subject to a free rate of duty, while the final rate of duty would be 15 percent. The intermediate stage is transitory, lasting no more than an hour. During this period, the firm files an entry at the free

rate of duty. The intermediate stage merchandise is left in the zone for continuous processing, or is piped in a loop that runs into Customs territory and immediately back into the zone, whereupon the firm requests readmission in domestic status. By the time Customs accepts the entry and has an opportunity to examine the merchandise, it is no longer in its condition as entered. Besides circumventing the higher rate of duty, the merchandise covered by the entry can no longer be examined for verification or appraisement purposes.

Entry for consumption in these cases is a sham. Merchandise which is entered but not commingled with U.S. commerce is not, in Customs opinion, entered for consumption, and such entries may be declared null and void and cancelled by the district director. We note that there is a line of court decisions in support of the view that entered for consumption means that the merchandise has entered U.S. commerce as an integral part thereof. See *U.S.* v. *Rolls Royce of America, Inc.*, T.D. 41202 and *U.S.* v. *Mussman and Schafer*, C.A.D. 506, C.D. 1367.

Section 3 of the Act permits zones two choices in the rate of duty upon entry for consumption—the rate of duty on the merchandise in its condition when the choice is made, or the rate of duty on the merchandise in its condition when transferred to Customs territory. A sham consumption entry allows a third choice—the rate applicable to the merchandise in an intermediate stage of processing in the zone.

In lieu of a prohibition on further processing, proposed § 146.73(d)(1) (now § 146.71(d)(1)) is being amended to authorize district directors to reject or cancel consumption entries from zones when the merchandise is not timely removed from the zone after entry, and merchandise removed from the zone does not enter U.S. commerce and is subsequently readmitted to a zone in domestic status. If the merchandise is so readmitted and the entry cancelled, it will be restored to its last zone status and a new entry required upon its transfer to Customs territory. This amendment closes an existing loophole so as to protect the revenue and properly enforce U.S. import laws and regulations.

A determination as to whether merchandise has not entered the commerce will be made by district directors on a case by case basis, considering factors such as the following:

1. Length of time the merchandise was outside the zone before readmission.
2. Whether readmission was requested by the importer of record or his agent, or a person acting in collusion with the importer of record.
3. Credible evidence that there was an intent by the importer or others, at the time of entry, to seek readmission to the zone.

4. The merchandise evades a higher rate of duty or an import restriction because of its having been admitted in domestic status.

5. The merchandise was not used or was not the subject of a bona fide sale by the importer after entry.

6. The merchandise was not further processed or manufactured outside the zone, or such processing or manufacture was minimal or cosmetic in nature.

Entries of merchandise readmitted in zone-restricted status will not be cancelled under this provision. It is noted that the position set forth in § 146.71(d)(1) is consistent with those in §§ 146.61, 146.63(c)(1) and 146.71(d)(2) in that merchandise which was entered but never removed from the zone is treated as constructively transferred back to the zone in its previous zone status.

An exception is made in § 146.71(c) from the general requirement of prompt zone removal for articles for use in a zone, such as production equipment, construction materials, and articles to be consumed in a zone.

A new § 146.71(d)(3) is added to clarify that merchandise which is actually entered into commerce may be readmitted to a zone in domestic status.

Comment: Several commenters were concerned that under the revised regulations, Customs would no longer approve a zone's procedures manual.

Response: Currently, Customs has three methods of supervising zones: (1) Customs maintained zone inventory ledgers; (2) Alternative Inventory Control Systems (AICS) maintained by the zone operator; and (3) the Audit-Inspection Program where the zone operator maintains his inventory control. Only under AICS has Customs approved a zone operator's inventory control system. The reason for Customs allowing the AICS method of operating a zone stems from the fact that Customs did not have regulatory guidelines available for use by zone operators. However, there were some problems with the AICS method due to Customs limited ability to assist in the design of sophisticated data processing systems within short time frames so as to allow zones to be activated. Also, several zone systems were approved where zone operations were delayed sometimes for several years, resulting in the original system either being rendered obsolete or in need of major changes at the time the zone was activated.

Accordingly, Customs decided to provide much needed inventory control guidelines in the regulations and allow the individual zones to adopt their own inventory systems within the guidelines devised by Customs. Questions as to whether particular elements of a proposed inventory control and recordkeeping system meet the criteria in revised Subpart B, Part 146, Customs Regulations, may be referred to the district director for a non-binding ruling, or to Customs Headquarters for a ruling in accordance with Part 177, Cus-

toms Regulations (19 CFR Part 177). Customs will not review any system in its entirety to render an opinion as to whether it meets all of the criteria in Subpart B.

Comment: Since the Government's expense in providing Customs officers at the zone is reimbursed by the zone itself, there is no logical reason why Customs personnel cannot be permanently stationed at the zone.

Response: Although the expense of maintaining a Cusoms officer at a zone is a consideration in our decision to implement audit-inspection supervision, there are other considerations of equal value. One is that audit-inspection supervision would provide protection to the revenue, which is equal to or greater than that under the existing systems. This was apparent from a 4-year study of warehouses which had converted to audit-inspection supervision. Another consideration is that the new system allows Customs to assign personnel to other areas which have a higher priority. A great many zone operators, grantees and users do not realize that Customs warehouse and zone officer positions, although they are fully reimburseable, are counted against Customs overall personnel ceiling. If officers are assigned to warehouses and zones, there will be fewer officers for assignment to higher priority tasks.

Comment: The proposed regulations do not reduce recordkeeping and information costs to operators.

Response: We disagree. To meet present document filing requirements, zone operators must gather, maintain, and compile certain data on their zones's admissions and removals and file required documents with Customs. Under the proposal, data gathering and maintenance needs will not change appreciably, but required document filings will be reduced dramatically. We estimate 50,000–70,000 annual form filings will be eliminated by the proposal, resulting in operator data handling and form filing cost reductions of from $600,000 to $700,000. We regard document cost reductions of an average $10,000 per year per activated zone site to be real and significant.

Comment: Since Customs no longer will be approving operator procedures manuals in their entirety, it is not fulfilling its obligations to assist the importing and exporting public. Customs should therefore provide some instruction to zone operators.

Response: We agree. Accordingly, Customs will provide the following assistance to the importing and exporting public:

1. Every attempt has been made to make the new regulations clear and concise.
2. Rewrite the Customs pamphlet on foreign trade zones.
3. Develop a booklet on foreign trade zones for operators and users.
4. Provide informational seminars for the public on the new regulations.

5. Rewrite operational guidelines based upon the new regulations.

6. Provide materials and seminars for Customs personnel, as well as the public.

Comment: Because of its impact, the proposal qualifies as a major rule under E.O. 12291 and thus requires a regulatory analysis.

Response: We disagree. Section 1(b) of E.O. 12291 requires a regulatory impact analysis for a proposal when one or more of the following criteria are met:

(1) A net national economic cost of $100 million or more;

(2) Significant cost increases for consumers; and

(3) Adverse effect upon the international competitiveness of U.S. firms.

In conducting an initial regulatory analysis under the terms of the Regulatory Flexibility Act (5 U.S.C. 603, 604), we concluded that none of the criteria was met.

Comment: Many commenters object to the panalty and liquidated damages provisions of the proposed regulations as excessive, unwarranted and not comparable to the bonded warehouse liquidated damages provisions or the penalties for fraud under § 592, Tariff Act of 1930, as amended (19 U.S.C. 1592). They also question the authority of district directors to suspend a zone's activated status, claiming that this action amounts to revocation of the zone grant.

Response: As to the liquidated damages and penalties provisions of the new regulations not being comparable to those for bonded warehouse, we note that there are considerable differences between zones and bonded warehouses. Merchandise in a bonded warehouses is in Customs territory, has been entered, and is secured by both the warehouse proprietor's bond and the warehouse entry bond, whereas merchandise in a zone is not in Customs territory, is not entered and is not generally subject to the Customs laws or the bonding requirements. Also, there is much greater freedom to manufacture and manipulate merchandise in a zone than in a bonded warehouse. In view of this relative freedom from Customs control of activities in zones as compared to warehouses, the bonding requirements proposed are minimal.

As to the comment that the liquidated damages provisions under the new regulations should be consistent with those for bonded warehouses, we note that the proposed liquidated damages provisions for restricted merchandise or alcoholic beverages are consistent with those for such articles under the importor's and warehouse proprieter's bonds. They are in a higher amount than liquidated damages for other merchandise. This is necessary to remove the economic incentive to breach the bond, in certain cases, in order to evade quota, licensing, labeling or other restrictions.

With respect to liquidated damages claims not relating to merchandise, the liquidated damages proposed were in an amount to be determined by the district director, but not more than $200. Sev-

eral commenters, however, were of the opinion that liquidated damages for non-merchandise related defaults of the zone operator's bond should be consistent with those for default of the warehouse proprietor's bond. Customs agrees with this position. Therefore, proposed § 146.81 is deleted, and the zone operator's bond in § 113.73, Customs Regulations (19 CFR 113.73), is modified to include the provisions previously appearing in § 146.81. Liquidated damages for merchandise and non-merchandise related defaults of the zone operator's bond will conform to these applicable to the warehouse proprietor's bond as well as other Customs bonds.

The only *penalty* provision in the new regulations is a restatement of 19 U.S.C 81s (§ 19, the Act), which authorizes a fine of not more than $1,000 for violation of the Act or any regulations thereunder. The regulations in Part 146, Customs Regulations, are regulations under the Act. The penalty for fraud under 19 U.S.C. 1592 is the domestic value of the merchandise plus any duties. These two penalty provisions are concerned with preventing two different types of activity which bear no relationship to each other. The penalties can in no way be compared to each other.

With respect to Customs authority to suspend activation of a zone, in proposed § 146.83, we note that §§ 3, 5, 8 and 15(b) of the Act (19 U.S.C. 81c, e, h, o(b)), confer authority upon the Secretary of the Treasury to make rules and regulations under the Act. Customs derives this authority from the Secretary.

Suspension of activation of a zone is not a revocation of the zone grant, which is the only remedy currently available to Customs for improper activity or continued violations of the foreign trade zones regulations, provided that the Board orders the revocation. Furthermore, under § 18 of the Act (19 U.S.C. 81r), the zone grant cannot be revoked without giving four months notice and taking other actions.

Suspension gives Customs an alternative method for dealing with improper activity in a zone. It allows Customs to single out the improper activity, subzone, or zone site involved and apply certain sanctions, without disturbing other proper zone activities. For example, suspension may be limited to the activities of a particular site, such as suspension of the privilege to admit merchandise for a particular activity, and it may not necessarily be directed at the activation of the zone as a whole. Proposed §§ 146.83 (a) and (b)(1) (now §§ 146.82 (a) and (b)(1)) have been modified to clarify this procedure.

Some commenters also object to the proposed regulations on suspension on the grounds that they recognize only the operator as a party to suspension proceedings. These commenters suggest that grantees and users also be made parties to suspension proceedings. Customs agrees with this suggestion with respect to grantees, and, accordingly, we have added new paragraph (4) to § 146.83(b) to recognize the grantee. However, we do not agree that a user should be

a party. Approval of zone activation is given to a grantee or operator, not to users. Suspension, or partial suspension, of that approval is a matter between Customs and the grantee or operator who is responsible for the zone.

Finally, it is noted that suspensions are for a limited period, are designed for fast action to minimize developing problems, and are substantially less onerous than revocation provisions applicable to customs brokers, warehouses proprietors, container station operators, and cartmen.

Comment: Language is not used consistently and accurately throughout the proposal. In describing the process of merchandise flow through a zone, the following words are used: admit, brought, enter, receive, remove, transfer, deliver, and withdraw. Also the terms zone, zone site, noncontiguous zone site, zone user, zone firm and zone seller are used with different intents but without definition.

Response: Customs does not agree with this comment. Nevertheless, it appears that some commenters do not understand, or misunderstand, the use of a number of terms. Accordingly, it has been decided to revise and expand the definitions section and, through editorial changes throughout the proposed regulations, improve clarity. "Secretary", "Board', "State," "Corporation", "Public Corporation", "Private Corporation", "Applicant", "Grantee", and "Zone", are defined in § 1 of the Act (19 U.S.C. 81a), and wherever those terms appear in Part 146, they are used in consonance with their statutory meaning, unless otherwise stated. The statutory definitions will not be repeated in the new regulations.

Definitions of several terms, i.e., "subzone", "operator", and "user" have appeared in the proposed regulations of the Board published on February 18, 1983, in the Federal Register (48 FR 7189). As it is not known when those proposed regulations may become final, and as the use of these words is necessary in these regulations, their definitions have been added to § 146.1. If it appears necessary, the definitions may be modified when the proposed regulations of the Board become final.

The terms "zone site" and "noncontiguous zone site" result from particular grants of authority by the Board to establish and operate a zone. It is believed that grantees and operators of those sites are aware of their meanings. The term "noncontiguous zone" has been deleted from these regulations wherever it appears. A definition of "zone site" has been added.

The exclusion of production equipment, building materials, and supplies from the definition of "merchandise" in § 146.1(h) is consistent with Customs decision on this subject. Production equipment, building materials, and supplies are not "merchandise" within the meaning of § 3 of the Act (19 U.S.C. 81c) for the reasons set forth in Customs Service Decision (C.S.D.) 79-418. Also, in H.R. 98-267 on H.R. 3398 (Trade and Tariff Act of 1984, June 24, 1983),

at page 36, it is stated that the Act does not apply to machinery and equipment. They are, therefore, dutiable upon entry.

This position is supported by 19 U.S.C. 1311, the statute establishing bonded manufacturing warehouses, which specifically prohibits the duty-free entry of imported implements, machinery, or apparatus to be used in the construction or repair of any bonded manufacturing warehouse or for the prosecution of the business carried on therein. It would be inconsistent for Customs to prohibit the duty-free entry of such articles into a manufacturing warehouse, from which manufactured goods must be exported, and to permit the duty-free entry of the same articles into a zone. If zones had no such limitation, they would have a distinct advantage over domestic manufacturers since domestic manufacturers are required to enter and pay duty on those articles.

Review does not reveal differing intents in the use of "zone user", "zone firm", and "zone seller" and their meaning is self-evident in context. However, a definition of "user" has been added to § 146.1, and an effort has been made to remove the terms or to further clarify their meaning by editorial changes.

"Enter", where used, refers to the entry of merchandise into the Customs territory of the United States. "Withdrawal" refers to withdrawal from warehouses. Both words are used in the ordinary tariff sense.

To minimize confusion, and since goods are neither entered into nor withdrawn from a zone in the tariff sense, the words "admit", for bringing goods into a zone in zone status, and "transfer", for taking goods out of a zone, have been used. Definitions of these words have been added. "Brought", "receive", "remove", and "deliver", wherever used, have their ordinary meaning. While inconsistent and inaccurate use of the terms in the proposed regulations is not evident, their use has been reviewed and editorial changes have been made wherever appropriate.

Comment: Several commenters objected to the procedures for appealing decisions of the district director denying applications to activate a zone or suspending the activated status of a zone, but these comments were not specific.

Response: We see no problem with the appeal procedure for suspensions of the activated status of a zone or of certain activities in a zone. The procedures include the right to request a hearing and to obtain the decision of the regional commissioner.

With respect to denial of an application to activate a zone or zone site, the decision of the district director is considered the final adminstrative decision for several reasons. First, there may not even be an appealable right. The grant to establish and operate a zone is conditioned upon the grantee's obtaining all necessary permits and licenses, and securing the permission of the district director to begin operations in the zone. Where the district director denies activation because the conditions have not been complied

with, or for other stated reasons, denial of activation does not result in denial of an appealable right since the right to activate the zone has not been granted.

Secondly, the district director is more closely connected with the application for and activation of a zone than Customs regional or headquarters officials. Appeals of denials to the Customs region or to Headquarters would result in little more than delay and inquiries into the factual basis of the decision. We believe that the Board and the courts provide the most suitable forum for appeals from denials of activation on the part of the district director.

Comment: The annual fees proposed for zones are unreasonably high.

Response: We disagree. The purpose of the annual fee is to recover Customs costs incurred in carrying out the audit-inspection supervision program. The annual fee to be charged each zone is a function of the degree of complexity in Customs auditing and inspection of zones.

Under the present inspectional system, Customs bills zone operators approximately $1.3 million annually for inspectional services. Zone operators recover this expense in their fee and rental/lease billings to zone users. We estimate that the Customs component of these fees paid by zone users averages $870 per year per user.

Under the proposed audit-inspection system with different fee tiers, Customs billings to operators of general purpose zones will amount to approximately $1 million per year, versus the estimated $1.3 million at present. The Customs component of small business users' payment to operators will average $670 per year per user, versus the $870 per year per user at present. Future increases in the annual fee will reflect cost increases incurred by Customs in delivering audit and inspection services. These increases will consist largely of annual rises in labor costs. It is expected that labor costs, and thus annual fees charged zone operators, will rise by a moderate 2–4 percent each year.

The proposed fees, therefore, are not unreasonable. Moreover, the proposed annual fee has been restructured into a three-tiered system with the larger, more active zones set to pay higher fees than the smaller zones. This would provide equitable treatment for the smaller zones in that they would no longer subsidize the larger zones. Appendix B reflects the revised structure of the annual fee.

Comment: Many commenters requested clarification of the respective liabilities to Customs of grantees, operators, and users of zones.

Response: As the privilege of establishing, operating, and maintaining a zone is given to a grantee, Customs is of the opinion that all liabilities to Customs involving zone activities reside ultimately with the grantee of the zone. If the operator is not the grantee, these liabilities can be minimized by the operator's being named as principal on the zone operator's bond. There is no liability to Cus-

toms on the part of zone users, other than users that are also operators. It is the grantee or the grantee and operator who have responsibilities to Customs with the attendant liabilities. Grantees are free to make whatever contractual agreements regarding indemnification with operators and users that they choose. Furthermore, Customs is not aware of any way that a grantee can divest itself of all liability, or limit its liability, in the event of loss or damage to Customs resulting from zone activities. While 19 U.S.C. 1623(c) and § 113.51, Customs Regulations (19 CFR 113.51), authorize the cancellation of bonds or bond charges under certain circumstances, that authority does not apply to prospective transactions nor does it extend to the waiver of any lawful claims against the grantee, not secured by bond, that arise from zone activities.

Comment: A few comments were received concerning Subpart D, Part 146. The commenters stated that many of the sections and subsections of Subpart D were definitional in nature and should be in Subpart A.

Response: The subject matter of Subpart D—the status of merchandise in a zone is of sufficient importance to merit its own subpart. The terms "privileged foreign merchandise," "nonprivileged foreign merchandise," "domestic merchandise," and "zone-restricted merchandise" do not appear in the Act. They were coined to describe the status of certain merchandise in a zone with reference to particular provisos of § 3 of the Act (19 U.S.C. 81c). In that sense, the terms are not definitional but descriptive, in that they simply provide a name for conditions prescribed by law, *e.g.*, "zone-restricted" describes the status of merchandise subject to the fourth proviso of 19 U.S.C. 81c.

One commenter urged that § 146.44 (zone-restricted merchandise) be expanded to include a requirement that merchandise placed in a zone to obtain payment of drawback and subsequently removed for shipment to an insular possession of the U.S. be reported by the zone operator to the district director. Upon consideration, it has been decided not to add that requirement to Part 146. Section 191.13, Customs Regulations (19 CFR 191.13), provides that there is no authority to allow drawback on articles shipped to insular possessions. There is authority to allow drawback on articles placed in a zone in zone-restricted status. Subsequent shipment of such articles to an insular possession would be contrary to the Act since it would not be an exportation, destruction, or storage. The likelihood of such shipments is remote and since § 191.13 essentially covers the situation, there is no need to make allowance for it in § 146.44.

In connection with the deletion of § 146.14, § 146.43 is amended to specify that no permit will be required for the admission, handling, or transfer to Customs territory of domestic status merchandise except (1) when mixed or combined with merchandise of another zone status, and (2) when so ordered by the Commissioner in individual circumstances. The latter residual authority is retained

to allow Customs to properly control domestic status merchandise in unusual circumstances. The operator must still maintain proper records of domestic status merchandise under Subpart B, Part 146, even if no permit is required.

Finally, a new § 146.1 has been added. This section is a restatement of the statutory limitation on retail trade in a zone, found in § 15(d) of the Act (19 U.S.C. 81o(d)).

Changes are made throughout the regulations to conform them to the changes made by this document. Also, as a general point, whenever the word "days" appears in this revision, it means calendar days, unless "working days" is specified.

After careful analysis of all the comments received and upon further review of the matter, it has been determined advisable to adopt the proposed regulatory amendments with the various modifications as set forth above.

Executive Order 12291

It has been determined that these amendments are not a "major rule" within the criteria provided in § 1(b) of E.O. 12291, and therefore no regulatory impact analysis is required.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are applicable to this document. An initial regulatory analysis was prepared and included in the NPRM as Appendix C. A final regulatory flexibility analysis is attached to this document as an appendix.

Paperwork Reduction Act

The collection of information requirements contained in § 146.25 and the recordkeeping requirement contained in § 146.4, are subject to the provisions of the Paperwork Reduction Act (44 U.S.C. 3504(h)) and have been cleared by the Office of Management and Budget (OMB). Accordingly, Part 178, Customs Regulations (19 CFR Part 178), which lists the information collections contained in the regulations and the control numbers assigned by OMB, is being amended to include OMB control number 1515–0151.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

AMENDMENTS TO THE REGULATIONS

Chapter 1, Title 19, Code of Federal Regulations, is amended by revising Part 146 to read as follows:

PART 146—FOREIGN TRADE ZONES

Sec.

146.0 Scope.

SUBPART A—GENERAL PROVISIONS

146.1 Definitions.
146.2 District director as Board representative.
146.3 Customs supervision.
146.4 Operator responsibility and supervision.
146.5 Activation fee and annual fee.
146.6 Procedure for activation.
146.7 Zone changes.
146.8 Seals; authority of operator to break and affix.
146.9 Permission of operator.
146.10 Authority to examine merchandise.
146.11 Transportation of merchandise to a zone.
146.12 Use of zone by carrier.
146.13 Customs forms and procedures.
146.14 Retail trade within a zone.

SUBPART B—INVENTORY CONTROL AND RECORDKEEPING SYSTEM

146.21 General requirements.
146.22 Admission of merchandise to a zone.
146.23 Accountability for merchandise in a zone.
146.24 Transfer of merchandise from a zone.
146.25 Annual reconciliation.
146.26 System review.

SUBPART C—ADMISSION OF MERCHANDISE TO A ZONE

146.31 Admissibility of merchandise into a zone.
146.32 Application and permit for admission of merchandise.
146.33 Temporary deposit for manipulation.
146.34 Merchandise transiting a zone.
146.35 Temporary deposit in a zone; Incomplete documentation.
146.36 Examination of merchandise.
146.37 Operator admission responsibilities.
146.38 Certificate of arrival of merchandise.
146.39 Direct delivery procedures.
146.40 Operator responsibilities for direct delivery.

SUBPART D—STATUS OF MERCHANDISE IN A ZONE

146.41 Privileged foreign status.
146.42 Nonprivileged foreign status.
146.43 Domestic status.
146.44 Zone-restricted status.

SUBPART E—HANDLING OF MERCHANDISE IN A ZONE

146.51 Customs control of merchandise.
146.52 Manipulation, manufacture, exhibition, or destruction; Customs Form 216.
146.53 Shortages and overages.

SUBPART F—TRANSFER OF MERCHANDISE FROM A ZONE

146.61 Constructive transfer to Customs territory.
146.62 Entry.
146.63 Entry for consumption.
146.64 Entry for warehouse.
146.65 Classification, valuation, and liquidation.
146.66 Transfer of merchandise from one zone to another.
146.67 Transfer of merchandise for exportation.
146.68 Transfer for transportation or exportation; estimated production.
146.69 Supplies, equipment, and repair material for vessels or aircraft.
146.70 Transfer of zone-restricted merchandise into Customs territory.
146.71 Release and removal of merchandise from zone.

SUBPART G—PENALTIES; SUSPENSION; REVOCATION

146.81 Penalties.
146.82 Suspension.
146.83 Revocation of zone grant.

AUTHORITY: 19 U.S.C. 66, 81a–81u, 1202 (Gen. Hdnote 11), 1623, 1624, § 146.5 also issued under 31 U.S.C. 9701.

SOURCE: T.D. 86–16 unless otherwise noted.

§ 146.0 Scope.

Foreign trade zones are established under the Foreign Trade Zones Act and the general regulations and rules of procedure of the Foreign Trade Zones Board contained in 15 CFR Part 400. This Part 146 of the Customs Regulations governs the admission of merchandise into a foreign trade zone, manipulation, manufacture, or exhibition in a zone; exportation of the merchandise from a zone; and transfer of merchandise from a zone into Customs territory.

SUBPART A—GENERAL PROVISIONS

§ 146.1 Definitions.

(a) The following words, defined in § 1 of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a), are given the same meaning when used in this part, unless otherwise stated: "Board", "Grantee", and "Zones".

(b) The following are general definitions for the purpose of this part:

(1) *Act.* "Act" means the Foreign-Trade Zones Act of June 18, 1934, as amended (48 Stat. 998–1003; 19 U.S.C. 81a–u).

(2) *Activation.* "Activation" means approval by the grantee and district director for operations and for the admission and handling of merchandise in zone status.

(3) *Admit.* "Admit" means to bring merchandise into a zone with zone status.

(4) *Alteration.* "Alteration" means a change in the boundaries of an activated zone or subzone; activation of a separate site of an already-activated zone or subzone with the same operator at the same port; or the relocation of an already-activated site with the same operator.

(5) *Customs territory.* "Customs territory" is the territory of the U.S. in which the general tariff laws of the U.S. apply. "Customs territory of the United States" includes only the States, the District of Columbia, and Puerto Rico. (General Headnote 2, Tariff Schedules of the United States (19 U.S.C. 1202)).

(6) *Constructive transfer.* "Constructive transfer" is a legal fiction which permits acceptance of a Customs entry for merchandise in a zone before its physical transfer to the Customs territory.

(7) *Deactivation.* "Deactivation" means voluntary discontinuation of the activation of an entire zone or subzone by the grantee or operator. Discontinuance of the activated status of only a part of a zone site is an alteration.

(8) *Default.* "Default" means an action or omission that will result in a claim for duties, taxes, charges, or liquidated damages under the Foregn Trade Zone Operator Bond.

(9) *Merchandise.* "Merchandise" includes goods, wares and chattels of every description, except prohibited merchandise. Building materials, production equipment, and supplies for use in operation of a zone are not "merchandise" for the purpose of this part.

(10) *Domestic merchandise.* "Domestic merchandise" is merchandise which has been (1) produced in the U.S. and not exported therefrom, or (2) previously imported into Customs territory and properly released from Customs custody.

(11) *Foreign merchandise.* "Foreign merchandise" is imported merchandise which has not been properly released from Customs custody in Customs territory.

(12) *Conditionally admissible merchandise.* "Conditionally admissible merchandise" is merchandise which may be imported into the U.S. under certain conditions. Merchandise which is subject to permits or licenses, or which may be reconditioned to bring it into compliance with the laws administered by various Federal agencies, is an example of conditionally admissible merchandise.

(13) *Prohibited merchandise.* "Prohibited merchandise" is merchandise the importation of which is prohibited by law on grounds of public policy or morals, or any merchandise which is excluded from a zone by order of the Board. Books urging treason or insurrection against the U.S., obscene pictures, and lottery tickets are examples of prohibited merchandise.

(14) *Fungible merchandise.* "Fungible merchandise" means merchandise which for commercial purposes is identical and interchangeable in all situations.

(15) *Operator.* "Operator" is a corporation, partnership, or person that operates a zone or subzone under the terms of an agreement with the zone grantee. Where used in this part the term "operator" also applies to a "grantee" that operates its own zone.

(16) *Reactivation.* "Reactivation" means a resumption of the activated status of an entire area that was previously deactivated without any change in the operator or the area boundaries. If the boundaries are different, the action is an alteration. If the operator is different, it is an activation.

(17) *Subzone.* "Subzone" is a special-purpose zone established as part of a zone project for a limited purpose, that cannot be accommodated within an existing zone. The term "zone" also applies to a subzone, unless specified otherwise.

(18) *Transfer.* "Transfer" means to take merchandise with zone status from a zone for consumption, transportation, exportation, warehousing, cartage or lighterage, vessel supplies and equipment, admission to another zone, and like purposes.

(19) *Unique identifier.* "Unique identifier" means the numbers, letters, or combination of numbers and letters that identify merchandise admitted to a zone with zone status.

(20) *User.* "User" means a person or firm using a zone or subzone for storage, handling, or processing of merchandise.

(21) *Zone lot.* "Zone lot" means a collection of merchandise maintained under an inventory control method based on specific identification of merchandise admitted to a zone by lot.

(22) *Zone site.* "Zone site" means the physical location of a zone or subzone.

(23) *Zone status.* "Zone status" means the status of merchandise admitted to a zone, i.e., nonprivileged foreign, privileged foreign, zone restricted, or domestic.

§ 146.2 District director as Board representative.

The district director in whose district the zone is located shall be in charge of the zone as the representative of the Board.

§ 146.3 Customs supervision.

(a) *Assignment of Customs officers.* Customs officers will be assigned or detailed to a zone as necessary to maintain appropriate Customs supervision of merchandise and records pertaining thereto in the zone, and to protect the revenue.

(b) *Supervision.* Customs supervision over any zone or transaction provided for in this part will be in accordance with § 161.1 of this chapter. The district director may direct a Customs officer to Supervise any transaction or procedure at a zone. Supervision may be performed through a periodic audit of the operator's records, guantity count of goods in a zone inventory, spot check of selected transactions or procedures, or review of recordkeeping, security, or conditions of storage in a zone.

§ 146.4 Operator responsibility and supervision.

(a) *Supervision.* The operator shall supervise all admissions, transfers, removals, recordkeeping, manipulations, manufacturing, destruction, exhibition, physical and procedural security, and conditions of storage in the zone as required by law and regulations. Supervision by the operator shall be that which a prudent manager of a storage, manipulation, or manufacturing facility would be expected to exercise, and may take into account the degree of supervision exercised by the zone user having physical possession of zone merchandise.

(b) *Customs access.* The operator shall permit any Customs officer access to a zone.

(c) *Safekeeping of merchandise and records.* The operator responsible for safekeeping of merchandise and records concerning merchandise admitted to a zone. The operator, at its liability, may allow the zone importer or owner of the goods to store, safeguard, and otherwise maintain or handle the goods and the inventory records pertaining to them.

(d) *Records maintenance.* The operator shall (i) maintain the inventory control and recordkeeping system in accordance with the provisions of Subpart B, (ii) retain all records required in this Part and defined In § 162.1(a) of this chapter, pertaining to zone merchandise for 5 years after the merchandise is removed from the zone, and (iii) protect proprietary information in its custody from unauthorized disclosure. Records shall be readily available for Customs review at the zone.

(e) *Merchandise security.* The operator shall maintain the zone and establish procedures adequate to ensure the security of merchandise located in the zone in accordance with applicable Customs security standards and specifications.

(f) *Storage and handling.* The operator shall store and handle merchandise in a zone in a safe and sanitary manner to minimize damage to the merchandise, avoid hazard to persons, and meet local, state, and Federal requirements applicable to a specific kind of goods. All trash and waste will be promptly removed from a zone. Aisles will be established and maintained, and doors and entrances left unblocked for access by Customs officers and other persons in the performance of their official duties.

(g) *Guard service.* The operator is authorized to provide guards or contract for guard service to safeguard the merchandise and ensure the security of the zone. This authorization does not limit the authority of the district director to assign Customs guards to protect the revenue under section 4 of the Act (19 U.S.C. 81d).

(h) *Miscellaneous responsibilities.* The operator is responsible for complying with requirements for admission, manipulation, manufacture, exhibition, or destruction, shortage, or overage; inventory control and recordkeeping systems, transfer to Customs territory, and other requirements as specified in this part.

§ 146.5 Activation fee and annual fee.

The operator, or where there is no operator, the grantee, will be charged a nonrefundable fee to activate a zone or any portion of a zone, or to alter or relocate an activated portion of a zone, under the provisions of 31 U.S.C. 9701. The operator of an activated zone will be charged a nonrefundable annual fee for each activated zone as payment of the cost of the additional Customs service required under the Act as provided in 19 U.S.C. 81n and the regulations in this part. The operator or grantee shall pay the annual fee to the district director of the district in which the zone is located within 14 days after activation and within 14 days after the effective date of the published fee schedule for each year thereafter that the area remains activated. The fee schedule will be revised annually and published in the Federal Register and the CUSTOMS BULLETIN.

§ 146.6 Procedure for activation.

(a) *Application.* A zone operator, or where there is no operator, a grantee, shall make written application to the district director of the district in which the zone is located to obtain approval of activation of a zone or zone site. The area to be activated may be all or any portion of the zone approved by the Board. The application must include a description of all the zone sites covered by the application, any operation to be conducted therein, and a statement of the general character of the merchandise to be admitted.

(b) *Supporting documents.* The appliclation must be accompanied by the following:

(1) The application fee required by § 146.5;

(2) A blueprint of the area approved by the Board to be activated showing area measurements, including all openings and buildings; and all outlets, inlets, and pipelines to any tank for the storage of liquid or similar product, that portion of the blueprint certified to be correct by the operator of the tank;

(3) A gauge table, when appropriate, showing the capacity, in the appropriate unit, of any tank, certified to be correct by the operator of the tank;

(4) A procedures manual describing the Inventory control and recordkeeping system that will be used in the zone, certified by the operator or grantee to meet the requirements of Subpart B; and

(5) The written concurrence of the grantee, when the operator applies for activation, in the requested zone activation.

(c) *Inquiry by district director.* As a condition of approval of the application, the district director may order an inquiry by a Customs officer into:

(1) The qualifications, character, and experience of an operator and/or grantee and their principal officers; and

(2) The security, suitability, and fitness of the facility to receive merchandise in a zone status.

(d) *Decision of the district director.* The district director shall promptly notify the applicant in writing of his decision to approve or deny the application to activate the zone. If the application is denied, the notification will state the grounds for denial which need not be limited to those listed in § 146.82. The decision of the district director will be the final Customs administrative determination in the matter. On approval of the application, a Foreign Trade Zone Operator's Bond shall be executed on Customs Form 301, containing the bond conditions of § 113.73 of this chapter.

(e) *Activation.* Upon the district director's approval of the application and acceptance of the executed bond, the zone or zone site will be considered activated; and merchandise may be admitted to the zone. Execution of the bond by an operator does not lessen the liability of the grantee to comply with the Act and implementing regulations.

§ 146.7 Zone changes.

(a) *Alteration of an activated area.* An operator shall make written application to the district director for approval of an alteration of an activated area, including an alteration resulting from a zone boundary modification. The application must be accompanied by the fee required in § 146.5 and the supporting document requirements specified in § 146.6, as applicable. The district director may review the security, suitability, and fitness of the area, and shall reply to the applicant as provided for in § 146.6.

(b) *Deactivation or reactivation.* A grantee, or an operator with the concurrence of a grantee, shall make written application to the district director for deactivation of a zone site, indicating by layout

or blueprint the exact site to be deactivated. The district director shall not approve the application unless all merchandise in the site in zone status (other than domestic status) has been removed at the risk and expense of the operator. The district director may require an accounting of all merchandise in a zone as a condition of approving the deactivation. A zone may be reactivated using the above procedure if a sufficient bond is on file under § 146.6(d). No fee is required for deactivation or reactivation.

(c) *Suspenson of activated site.* When approval of an activated status has been suspended through the procedure in Subpart G, the district director may require all goods in that area in zone status (other than domestic status) to be transferred to another zone, a bonded warehouse, or other location where they may lawfully be stored, if the district director considers that transfer advisable to protect the revenue or administer any Federal law or regulation.

(d) *New bond.* The district director may require an operator to furnish, on 10 days notice, a new Foreign Trade Zone Operator's Bond on Customs Form 301. If the operator fails to furnish the new bond, no more merchandise will be received in the zone in zone status. Merchandise in zone status (other than domestic status) will be removed at the risk and expense of the operator. A new bond may be required if (i) the activated zone area is substantially altered; (ii) the character of merchandise admitted to the zone or operations performed in the zone are substantially changed; (iii) the existing bond lacks good and sufficient surety; or (iv) for any other reason that substantially affects the liability of the operator under the bond. Although a new bond may not be required, the operator shall obtain the consent of the surety to any material alteration in the boundaries of the zone.

(e) *New operator.* A grantee of an activated zone site shall make written application to the district director for approval of a new operator, submitting with the application a certification by the new operator that the inventory control and recordkeeping system meets the requirements of Subpart B, and a copy of the system procedures manual if different from the previous operator's manual. The district director may order an inquiry into the qualifications, character, and experience of the operator and its principal officers.

(f) The bond in § 146.6 shall be submitted by the operator before the operating agreement may become effective in respect to merchandise in zone status. The district director shall promptly notify the grantee, in writing, of the approval or disapproval of the application.

(g) *List of officers, employees, and other persons.* The district director may make a written demand upon the operator to submit, within 30 days after the date of the demand, a written list of the names, addresses, social security numbers, and dates and places of birth of officers and persons having a direct or indirect financial interest in the operator, and of persons employed in the carriage,

receipt or delivery of merchandise in zone status, whether employed by the zone operator or a zone user. If a list was previously furnished, the district director may make a written demand for the same informaton in respect to new persons employed in the carriage, receipt, or delivery of zone status merchandise within 10 days after such employment. The list need not include employees of common or contract carriers transporting goods to or from the zone.

§ 146.8 Seals, authority of operator to break and affix.

The district director may authorize an operator to break a Customs in-bond seal affixed under § 18.4 of this chapter, or under any Customs order or directive, on any vehicle or intermodal container containing merchandise approved for admission to the zone upon its arrival at the zone; or to affix a Customs in-bond seal to any vehicle or intermodal container of merchandise for which an entry, withdrawal, or other approval document has been obtained for movement in-bond from the zone. The authorized affixing or breaking of that seal will be considered to have been done under Customs supervision. The operator shall report to the district director, upon arrival of the vehicle or container at the zone, any seal found to be broken, missing, or improperly affixed, and hold the vehicle or container and its contents intact pending instructions from the district director. If the operator does not obtain the written concurrence of the carrier as to the condition of the seal or delivering conveyance, the district director shall deem the seal or delivering conveyance to be intact.

§ 146.9 Permission of operator.

An application for permission to admit merchandise into a zone, or to manipulate, manufacture, exhibit, or destroy merchandise in a zone must include the written concurrence of the operator, except where the regulations of this part provide for the making of application by the operator itself or where the operator files a separate specific or blanket application. The written concurrence of the operator in the removal of merchandise from a zone is not required because the merchandise is released by the district director to the operator for delivery from the zone, as provided in § 146.71(a).

§ 146.10 Authority to examine merchandise.

The district director may cause any merchandise to be examined before or at the time of admission to a zone, or at any time thereafter, if the examination is considered necessary to facilitate the proper administration of any law, regulation, or instruction which Customs is authorized to enforce.

§ 146.11 Transportation of merchandise to a zone.

(a) *From outside Customs territory.* Merchandise may be admitted directly to a zone from any place outside Customs territory.

(b) *Through Customs territory, foreign merchandise.* Foreign merchandise destined to a zone and transported in-bond through Customs territory will be subject to the laws and regulations applicable to other merchandise transported in-bond between two places in Customs territory.

(c) *From Customs territory, domestic merchandise.* Domestic merchandise may be admitted to a zone from Customs territory by any means of transportation which will not interfere with the orderly conduct of business in the zone.

(d) *From a bonded warehouse.* Merchandise may be withdrawn from a bonded warehouse under the procedure in § 144.37(g) of this chapter and transferred to a zone for admission in zone restricted status.

§ 146.12 Use of zone by carrier.

(a) *Primary use; lading and unlading.* The water area docking facilities, and any lading and unlading stations of a zone are intended primarily for the unlading of merchandise into the zone or the lading of merchandise for removal from the zone. Their use for other purposes may be terminated by Customs if found to endanger the revenue, or by the Board if found to impede the primary use of the zone.

(b) *Carrier in zone not exempt from law or regulations.* Nothing in the Act or the regulations in this part shall be construed as excepting any carrier entering, remaining in, or leaving a zone from the application of any other law or regulation.

§ 146.13 Customs forms and procedures.

Where a Customs form or other document is required in this part, the number of copies of the form or document required to be presented and their manner of distribution and processing shall be determined by the district director, except as otherwise specified in this part.

§ 146.14 Retail trade within a zone.

Retail trade is prohibited within a zone except as provided in 19 U.S.C. 81o(d). See also the regulations of the Board as contained in 15 CFR Part 400.

Subpart B—Inventory Control and Recordkeeping System

§ 146.21 General requirements.

(a) *Systems capability.* The operator shall maintain either manual or automated inventory control and recordkeeping systems or combination manual and automated systems capable of:

(1) Accounting for all merchandise, including domestic status merchandise, temporarily deposited, admitted, granted a zone status and/or status change, stored, exhibited, manipulated, manufactured, destroyed, transferred, and/or removed from a zone;

(2) Producing accurate and timely reports and documents as required by this part;

(3) Identifying shortages and overages of merchandise in a zone in sufficient detail to determine the quantity, description, tariff classification, zone status, and value of the missing or excess merchandise;

(4) Providing all the information necessary to make entry for merchandise being transferred to the Customs territory;

(5) Providing an audit trail to Customs forms from admission through manipulation, manufacture, destruction or transfer of merchandise from a zone either by zone lot or Customs authorized inventory method.

(b) *Procedures manual.*

(1) The operator shall provide the district director with an English language copy of its written inventory control and recordkeeping systems procedures manual in accordance with the requirements of this part.

(2) The operator shall keep current its procedures manual and shall submit to the district director any change at the time of its implementation.

(3) The operator may authorize a zone user to maintain its individual inventory control and recordkeeping system and procedures manual. The operator shall furnish a copy of the zone user's procedures manual, including any subsequent changes, to the district director. However, the operator will remain responsible to Customs and liable under its bond for supervision, defects in, or failures of a system.

(4) The operator's procedures manual and subsequent changes will be furnished to the district director for information purposes only. Customs receipt of a manual does not indicate approval or rejection of a system.

(c) *Liability of operator.* Upon zone activation approval the operator remains liable for complying with all inventory control and recordkeeping system requirements set forth in this part.

§ 146.22 Admission of merchandise to a zone.

(a) *Identification.* All merchandise will be recorded in a receiving report or document using a zone lot number or unique identifier. All merchandise, except domestic status merchandise for which no permit for admission is required under § 146.43, will be traceable to a Customs Form 214 and accompanying documentation.

(b) *Reconciliation.* Quantities received will be reconciled to a receiving report or document such as an invoice with any discrepancy reported to the district director as provided in §146.37.

(c) *Incomplete documentation.* Merchandise received without complete Customs documentation or which is unacceptable to the inventory control and recordkeeping system will be recorded in a suspense account or record until documentation is complete or the system is capable of accepting the information, at which time it

will be formally admitted to the zone under § 146.32 or 146.40. The receiving report or document will provide sufficient information to identify the merchandise and distinguish it from other merchandise. The suspense account or record will be completely documented for Customs review to explain the differences noted and corrections made.

(d) *Recordation.* Merchandise received will be accurately recorded in the inventory system records from the receiving report or document using the zone lot number or unique identifier for traceability. The inventory record will state the quantity and date admitted, cost or value where applicable, zone status, and description of the merchandise, including any part or stock number.

§ 146.23 Accountability for merchandise in a zone.

(a) *Identification of merchandise.*

(1) *General.* A zone lot number or unique identifier will be used to identify and trace merchandise.

(2) *Fungible merchansise.* Fungible merchandise may be identified by an inventory method authorized by Customs, which is consistently applied, such as First-In-First-Out (FIFO) and using an unique identifier.

(b) *Inventory records.* The inventory records will specify by zone lot number or unique identifier:

(1) Location of merchandise;

(2) Zone status;

(3) Cost or value, unless operator's or user's financial records maintain cost or value and the records are made available for Customs review;

(4) Beginning balance, cumulative receipts and removals, adjustments, and current balance on hand by date and quantity;

(5) Destruction of merchandise; and

(6) Scrap, waste, and by-products.

(c) *Physical inventory.* The operator shall take at least an annual physical inventory of all merchandise in the zone (unless continuous cycle counts are taken as part of an ongoing inventory control program) with prior notification of the date(s) given to Customs for any supervision of the inventory deemed necessary. The operator shall notify the district director of any discrepancies in accordance with §146.53.

§ 146.24 Transfer of merchandise from a zone.

(a) *Accountability.*

(1) All zone status merchandise transferred from a zone will be accurately recorded within the inventory control and recordkeeping system.

(2) The inventory control and recordkeeping system for merchandise transfers must have the capability to trace all transfers back to a zone admission under a Customs authorized inventory method.

(b) *Information.* The inventory control and recordkeeping system must be capable of providing all information necessary to make entry for transfer of merchandise from the zone.

§ 146.25 Annual reconciliation.

(a) *Report.* The operator shall prepare a reconciliation report within 90 days after the end of the zone/subzone year unless the district director authorizes an extension for reasonable cause. The operator shall retain that annual reconciliation report for a spot check or audit by Customs, and need not furnish it to Customs unless requested. There is no form specified for the preparation of the report.

(b) *Information required.* The report must contain a description of merchandise for each zone lot or unique identifier, zone status, quantity on hand at the beginning of the year, cumulative receipts and transfers (by unit), quantity on hand at the end of the year, and cumulative positive and negative adjustments (by unit) made during the year.

(c) *Certification.* The operator shall submit to the district director within 10 working days after the annual reconciliation report, a letter signed by the operator certifying that the annual reconciliation has been prepared, is available for Customs review, and is accurate. The certification letter must contain the name and street address of the operator, where the required records are available for Customs review; and the name, title, and telephone number of the person having custody of the records. Reporting of shortages and overages based on the annual reconciliation will be made in accordance with § 146.53. These reports must accompany the certification letter.

§ 146.26 System review.

The operator shall perform an annual internal review of the inventory control and recordkeeping system and shall report to the district director any deficiency discovered and corrective action taken, to ensure that the system meets the requirements of this part.

Subpart C—Admission of Merchandise to a Zone

§ 146.31 Admissibility of merchandise into a zone.

Merchandise of every description may be admitted into a zone unless prohibited by law. A distinction is made between prohibited and conditionally admissible merchandise.

(a) *Prohibited merchandise.* District directors shall not admit prohibited merchandise. If there is a question as to whether the merchandise may be prohibited, district directors may permit the temporary deposit of the merchandise in a zone pending a final determination of its status. Any prohibited merchandise which is found within a zone will be disposed of in the manner provided for in the laws and regulations applicable to that merchandise.

(b) *Conditionally admissible merchandise.* The admission of this merchandise into a zone is subject to the regulations of the Federal agency concerned.

§ 146.32 Application and permit for admission of merchandise.

(a) *Application on Customs Form 214 and permit.* Merchandise may be admitted into a zone only upon application on a uniquely and sequentially numbered Customs Form 214 ("Application for Foreign Trade Zone Admission and/or Status Designation") and the issuance of a permit by the district director. Exceptions to the Customs Form 214 requirement are for merchandise temporarily deposited (§ 146.33), transiting merchandise (§ 146.34), or domestic merchandise admitted without permit (§ 146.43). The applicant for admission shall present the application to the district director and shall include a statistical copy on Customs Form 214-A for transmittal to the Bureau of Census, unless the applicant has made arrangements for the direct transmittal of statistical information to that agency.

(b) *Supporting documents.*

(1) *Commercial documentation.* The applicant shall submit with the application two copies of an examination invoice meeting the requirements of Subpart F, Part 141, of this chapter, for any merchandise, other than that excepted in paragraph (a) of this section, to be admitted to a zone. The notation of tariff classification and value required by § 141.90 of this chapter need not be made, unless the merchandise is to be admitted in privileged status.

(2) *Evidence of right to make entry.* The applicant for admission shall submit with the application a document similar to that which would be required as evidence of the right to make entry for merchandise in Customs territory under § 141.11 or 141.12 of this chapter.

(3) *Release order.* Merchandise will not be authorized for delivery by Customs to a zone until a release order has been executed by the carrier which brought the merchandise to the port, unless the merchandise is released back to that same carrier for delivery to the zone (see § 141.11 of this chapter). When a release order is required, it will be made on any of the forms specified in § 141.111 of this chapter, or by the following statement attached to Customs Form 214:

Authority is hereby given to release the merchandise described in this application to _____

_____

Name of carrier _____

_____

Signature and title of carrier representative _____

_____

A blanket or qualified release order may be authorized for the transfer of merchandise to a zone as provided for in § 141.111 of this chapter.

(4) *Application to unlade.* For merchandise unladen in the zone directly from the importing carrier, the application on Customs Form 214 will be supported by an application to unlade on Customs Form 3171.

(5) *Other documentation.* The district director may require additional information or documentation as needed to conduct an examination of merchandise under Customs selective entry processing criteria, or to determine whether the merchandise is admissible to the zone.

(c) *Conditions for issuance of a permit.* The district director will issue a permit for admission of merchandise to a zone when:

(1) The application is properly executed and includes the zone status desired for the merchandise, as provided in Subpart D of this part;

(2) The operator's approval appears either on the application or in a separate specific or blanket approval;

(3) The merchandise is retained for examination at the place of unlading, the zone, or other location designated by the district director, except for merchandise for direct delivery to a zone under §§ 146.39 and 146.40. The merchandise may be examined as if it were to be entered for consumption or warehouse; and

(4) All requirements have been fulfilled.

(d) *Blanket application for admission of merchandise.* Merchandise may be admitted to a zone under blanket application upon presentation of a Customs Form 214 covering more than one shipment of merchandise. A blanket application for admission is for:

(1) Shipments which arrive under one transportation entry as described in § 141.55 of this chapter, or

(2) Shipments which are destined to the same zone applicant on a single business day, in which case the applicant shall:

(i) Present the examination invoices required by paragraph (b) of this section to the district director before the merchandise is admitted into the zone,

(ii) Have been approved for the direct transmittal of statistical trade information to the Bureau of Census under an agreement with that agency; and

(iii) Have examination invoices containing a unique identifier to trace the shipment to the manifest of the carrier that brought the merchandise to the port having jurisdiction over the zone, as well as to the inventory control and recordkeeping system of the operator as described in Subpart B.

§ 146.33 Temporary deposit for manipulation.

Imported merchandise for which an entry has been made and which has remained in continuous Customs custody may be brought temporarily to a zone for manipulation and return to Cus-

toms territory under Customs supervision, pursuant to § 562, Tariff Act of 1930, as amended (19 U.S.C. 1562), and § 19.11 of this chapter. That merchandise will not be considered within the purview of the Act but will be treated as though remaining in Customs territory. No zone form or procedure will be considered applicable, but the merchandise will remain subject to any requirements necessary for the enforcement of § 562 and other Customs laws while in the zone.

§ 146.34 Merchandise transiting a zone.

The following procedure is applicable when merchandise is to be unladen from any carrier in the zone for immediate transfer to Customs territory, or if it is to be transferred from Customs territory through the zone for immediate lading on any carrier in the zone:

(a) *Application.* Application for permission to lade or unlade will be filed with the district director on Customs Form 3171 prior to transfer of the merchandise into the zone.

(b) *Permit.* The district director shall permit the transfer unless he has reason to believe that the merchandise will not be moved promptly from the zone or will be made the subject of an application for admission in accordance with § 146.32(a).

(c) *Treatment of merchandise.* Upon the issuance of a permit to lade, or unlade, the merchandise will be treated as though the lading or unlading were in the Customs territory.

(d) *Delay in zone transit.* Merchandise delayed while transiting a zone must be made the subject of an application for admission in accordance with § 146.32, or it must be removed from the zone.

§ 146.35 Temporary deposit in a zone: Incomplete documentation.

(a) *General.* Temporary deposit of merchandise in a zone is allowed in circumstances where the information or documentation necessary to complete the Customs Form 214 is not available at the time of arrival of merchandise within the jurisdiction of the port. The merchandise will be subject to examination as provided in § 146.36.

(b) *Application.* An application for temporary deposit will be made to the district director on a properly signed and uniquely numbered Customs Form 214, annotated clearly "Temporary Deposit in a Zone".

(c) *Conditions.* Merchandise temporarily deposited under the provisions of this section has no zone status and is considered to be in the Customs territory. It will:

(1) Be physically segregated from all other zone merchandise;

(2) Be held under the bond and at the risk of the operator; and

(3) Be manipulated only to the extent necessary to obtain sufficient information about the merchandise to file the appropriate admission or entry documentation.

498-399 O - 86 - 4

(d) *Approval.* The district director shall approve the application for temporary deposit of merchandise in a zone if the provisions of paragraphs (b) and (c) are met.

(e) *Submission of Customs Form 214.* A complete and accurate Customs Form 214 will be submitted, as provided in § 146.32, within 5 working days plus any extension granted by the district director, or the merchandise shall be placed in general order.

§ 146.36 Examination of merchandise.

Except for direct delivery procedures provided for in § 146.39, all merchandise covered by a Customs Form 214 may be retained for Customs examination at the place of unlading, the zone, or another location, as designated by the district director. The district director may authorize release of the merchandise without examination, as provided in § 151.2 of this chapter. If a physical examination is conducted, the Customs officer shall note the results of the examination on the examination invoices.

§ 146.37 Operator admission responsibilities.

(a) *Maintenance admission documentation.* The operator shall maintain either:

(1) *Lot file.* The operator shall open and maintain a lot file containing a copy of the Customs Form 214, the examination invoice, and all other documentation necessary to account for the merchandise covered by each Customs Form 214. The lot file will be maintained in sequential order by using the unique number assigned to each Customs Form 214 as the file reference number; or

(2) *Authorized inventory method.* Where a Customs authorized inventory method other than a lot system (specific identification of merchandise) is used, e.g., First-In-First-Out (FIFO), no lot file is required but the operator shall maintain a file of all Customs Form's 214 in sequential order.

(b) *Examination invoice.* The operator shall give a copy of the examination invoice to the person making entry to transfer the merchandise from the zone upon request of that person or the district director.

(c) *Liability for merchandise.* The operator will be held liable under its bond for the receipt of merchandise admitted in the quantity and condition as described on the Customs Form 214, except as modified by a discrepancy report:

(1) Signed jointly by the operator and carrier on the Customs Form 214 or other approved form within 15 days after admission of the merchandise, and reported to the district director within 2 working days thereafter; or

(2) Submitted on Customs Form 5931 under the provisions of Subpart A, Part 158, of this chapter within 20 days after admission of the merchandise. The operator may file a Customs Form 5931 on behalf of the person who applied for admission of merchandise to the zone.

(d) *Supervision of merchandise.* The district director may authorize the receipt of zone status merchandise at a zone without physical supervision by a Customs officer (see section 146.3). In that case, the operator shall supervise the receipt of merchandise into the zone, report the receipt and condition of the merchandise, and mark packages with the unique Customs Form 214 number so that the merchandise can be traced to a particular Customs Form 214. Packages that are accounted for under a Customs-authorized inventory method other than specific indentification, need not be marked with a unique Customs Form 214 number but must be adequately identified so Customs can conduct an inventory count. The operator shall submit the Customs Form 214 to Customs at the location specified by the district director.

§ 146.38 Certificate of arrival of merchandise.

When a certificate prepared by Customs as to the arrival of any merchandise in a zone is required by a Federal agency, the district director shall issue the document certifying only that authorization to deliver the merchandise to a zone has been made. The operator shall issue a certificate of arrival of merchandise at a zone.

§ 146.39 Direct delivery procedures.

(a) *General.* This procedure is for delivery of merchandise to a zone without prior application and approval on Customs Form 214.

(b) *Application.* An operator, meeting the criteria of paragraph (c) of this section, shall file a written application with the district director at least 30 days before the special procedure is to become effective. The application will describe the merchandise to be handled or processed, and the kind of operation which it will undergo in the zone.

(c) *Criteria.* the district director shall approve the application if the following criteria are met:

(1) The merchandise is not restricted or of a type which requires Customs examination or documentation review before or upon its arrival at the zone;

(2) The merchandise to be admitted to the zone, and the operations to be conducted therein, are known well in advance, are predictable and stable over the long term, and are relatively fixed in variety by the nature of the business conducted at the site; and

(3) The operator is the owner or purchaser of the goods.

(d) *Application decision.* The district director shall promptly notify the operator, in writing, of Customs decision on the application. If the application is denied, the district director shall specify the reason for denial in his reply. The district director's decision will constitute the final Customs administrative determination concerning the application.

(e) *Revocation of approval.* The district director may revoke the approval given under this section if it becomes necessary for Cus-

toms routinely to examine the merchandise or documentation before or upon admission to the zone.

§ 146.40 Operator responsibilities for direct delivery.

(a) *Arrival of conveyance.* Upon arrival at a subzone or zone site of a conveyance containing foreign merchandise, the operator shall:

(1) Collect in-bond or cartage documentation from the carrier;

(2) Check the condition of any seal affixed to the conveyance, and if broken, missing or improperly affixed, notify the district director and receive instructions before unloading the merchandise;

(3) Check each incoming in-bond and cartage shipment to determine if the manifested quantity or the quantity on the cartage document agrees with the quantity actually received;

(4) Sign and date the in-bond or cartage documentation to accept responsibility for the merchandise under the Foreign Trade Zone Operator' Bond and to relieve the carrier of responsibility.

(5) Forward the in-bond or cartage documentation so as to reach the district director within 2 working days after the date of arrival of the conveyance at the subzone or zone site;

(6) Maintain a file of open in-bond manifests in chronological order of date of conveyance arrival to identify shipments that have arrived but the entire contents of which have not been admitted to the subzone or zone site; and

(7) Notify the district director, by annotation on the Customs Form 214, when the entire contents of a shipment have been admitted.

(b) *Admission of merchandise: alternative procedures.*

(1) *Cumulative Customs Form 214.* If the operator has an agreement with the Bureau of Census for direct transmittal of statistical information, he shall submit to the district director each business day a properly signed and uniquely numbered Customs Form 214 listing all merchandise except for domestic status merchandise admitted under § 146.43 recorded into the inventory control and recordkeeping system during the previous business day. The Customs Form 214 must contain a list of all in-bond (I.T.) numbers or the unique number of any cartage document, as well as the number of invoices for each I.T. or cartage document, pertaining to merchandise which has been entered into the system.

(2) *Individual Customs Form 214.* If a cumulative Customs Form 214 is not submitted as provided in paragraph (b)(1) of this section, the operator shall file with the district director each business day an individual Customs Form 214 and 214-A covering each shipment recorded into the inventory control and recordkeeping system during the previous business day. The forms shall be submitted within 10 days after the end of the month in which the merchandise was received in the zone, and no extension beyond that time will be approved by the district director.

(3) *General order.* Merchandise which is not admitted into a subzone or zone site as provided in this section within 5 working days after its arrival there may be sent to general order unless:

(i) The district director grants the operator's request for an extension of the 5 working day period; or

(ii) The importer of record files an appropriate Customs entry for the merchandise and removes it from the zone premises.

(4) *inventory control and recordkeeping system.* The operator shall establish and maintain a continuing input quality control program to ensure that information concerning merchandise in admission documents, verified or corrected by counts and checks, is accurately recorded in the inventory control and recordkeeping system. Quantities recorded in the system, after allowance by the district director for any discrepancies, will be the quantities of merchandise for which the operator shall be held liable under its bond for admission to the subzone or zone site. A discrepancy involving a within-case shortage (or overage) need not be reported on Customs Form 5931, if the operator is able to report that information in another manner so that the district director can determine whether there is liability for the discrepancy under the bond of any party to the importation.

Subpart D—Status of Merchandise in a Zone

§ 146.41 Privileged foreign status.

(a) *General.* Foreign merchandise which has not been manipulated or manufactured so as to effect a change in tariff classification will be given status as privileged foreign merchandise on proper application to the district director.

(b) *Application.* Each application for this status will be made on Customs Form 214 at the time of filing the application for admission of the merchandise into a zone or at any time thereafter before the merchandise has been manipulated or manufactured in the zone in a manner which has effected a change in tariff classification.

(c) *Supporting documentation.* Each applicant for this status shall submit to the district director, with the application, an invoice notated as provided for in § 141.90 of this chapter.

(d) *Determination of duties and taxes.* Upon receipt of the application and accompanying invoice, the district director may examine the merchandise to determine whether to approve the application. The merchandise will be subject to classification and valuation as provided in § 146.65.

(e) *Status as privileged foreign merchandise binding.* A status as privileged foreign merchandise cannot be abandoned and remains applicable to the merchandise even if changed in form by manipulation or manufacture, except in the case of recoverable waste (see § 146.42(b)), as long as the merchandise remains within the purview of the Act. However, privileged foreign merchandise may be export-

ed or withdrawn for supplies, equipment, or repair material of vessels or aircraft without the payment of taxes and duties, in accordance with §§ 146.67 and 146.69.

§ 146.42 Nonprivileged foreign status.

All of the following will have the status of nonprivileged foreign merchandise:

(a) *Foreign merchandise.* Foreign merchandise properly in a zone which does not have the status of privileged foreign merchandise or of zone-restricted merchandise;

(b) *Waste.* Waste recovered from any manipulation or manufacture of privileged foreign merchandise in a zone; and

(c) *Certain domestic merchandise.* Domestic merchandise in a zone, which by reason of noncompliance with the regulations in this part has lost its identity as domestic merchandise, will be treated as foreign merchandise. Any domestic merchandise will be considered to have lost its identity if the district director determines that it cannot be identified positively by a Customs officer as domestic merchandise on the basis of an examination of the articles or consideration of any proof that may be submitted promptly by a party-in-interest.

§ 146.43 Domestic status.

(a) *General.* Domestic status may be granted to merchandise:

(1) The growth, product, or manufacture of the U.S. on which all internal-revenue taxes, if applicable, have been paid;

(2) Previously imported and on which duty and tax has been paid; or

(3) Previously entered free of duty and tax.

(b) *Application.* No application or permit is required for the admission of domestic status merchandise, including domestic packing and repair material, to a zone, except upon order of the Commissioner of Customs. No application or permit is required for the manipulation, manufacture, exhibition, destruction, or transfer to Customs territory of domestic status merchandise, including packing and repair materials, except (1) when it is mixed or combined with merchandise in another zone status, or (2) upon order of the Commissioner of Customs. When the Commissioner orders a permit to be required for domestic status merchandise, he may also order the procedures, forms, and terms under which the permit will be received and processed.

(c) *Return of merchandise to Customs territory.* Upon compliance with the provisions of this section, any of the merchandise specified in paragraph (a) of this section, may subsequently be returned to Customs territory free of quotas, duty, or tax.

§ 146.44 Zone-restricted status.

(a) *General.* Merchandise taken into a zone for the sole purpose of exportation, destruction (except destruction of distilled spirits, wines, and fermented malt liquors), or storage will be given zone-

restricted status on proper application. That status may be requested at any time the merchandise is located in a zone, but cannot be abandoned once granted. Merchandise in zone-restricted status may not be removed to Customs territory for domestic consumption except where the Board determines the return to be in the public interest.

(b) *Application.* Application for zone-restricted status will be made on Customs Form 214.

(c) *Merchandise considered exported.*

(1) *For Customs purposes.* If the applicant desires a zone-restricted status in order that the merchandise may be considered exported for the purpose of any Customs law, all pertinent Customs requirements relating to an actual exportation shall be complied with as though the admission of the merchandise into the zone constituted a lading on an exporting carrier at a port of final exit from the U.S. Any declaration or form required for actual exportation will be modified to show the merchandise has been deposited in a zone in lieu of actual exportation, and a copy of the approved Customs Form 214 may be accepted in lieu of any proof of shipment required in cases of actual exportation.

(2) *For other purposes.* If the merchandise is to be considered exported for the purpose of any Federal law other than the Customs laws, the district director shall be satisifed that all pertinent laws, regulations, and rules administered by the Federal agency concerned have been complied with before the Customs Form 214 is approved.

(d) *Merchandise entered for warehousing transferred to a zone.* Merchandise entered for warehousing and transferred to a zone, other than temporarily for manipulation and return to Customs territory as provided for in § 146.33, will have the status of zone-restricted merchandise when admitted into the zone. The application on Customs Form 214 will state that zone-restricted status is desired for the merchandise.

Subpart E—Handling of Merchandise in a Zone

§ 146.51 Customs control of merchandise.

No merchandise, other than domestic status merchandise provided for in § 146.43, will be manipulated, manufactured, exhibited, destroyed, or transferred from a zone in any manner or for any purpose, except under Customs permit as provided for in this part. The district director may require segregation of any zone status merchandise whenever necessary to protect the revenue or properly administer U.S. laws or regulations.

§ 146.52 Manipulation, manufacture, exhibition or destruction; Customs Form 216.

(a) *Application.* Prior to any action, the operator shall file with the district director an application (or blanket application) on Cus-

toms Form 216 for permission to manipulate, manufacture, exhibit, or destroy merchandise in a zone. After Customs approves the application (or blanket application), the operator will retain in his recordkeeping system the approved application.

(b) *Approval.*

(1) The district director shall approve the application unless (i) the proposed operation would be in violation of law or regulation; (ii) the place designated for its performance is not suitable for preventing confusion of the identify or status of the merchandise, or for safeguarding the revenue; (iii) the district director is not satisfied that the destruction will be effective; or (iv) the Executive Secretary of the Board has not granted approval of a new manufacturing operation.

(2) The district director is authorized to approve a blanket application for a period of up to one year for a continuous or repetitive operation. The district director may disapprove or revoke approval of any application, or may require the operator to file an individual application.

(c) *Appeal of adverse ruling.* If an approved application is subsequently rescinded by the district director for any reason, the applicant or grantee may appeal the adverse ruling pursuant to the hearing provisions of § 146.82(b)(2). The rescission shall remain in effect pending the decision on the appeal.

(d) *Report results.*

(1) *Separate application.*—The operator shall report on Customs Form 216 the results of an approved manipulation, manufacture, exhibition, or certification of destruction (other than by a blanket application), unless the district director chooses physically to supervise the operation.

(2) *Blanket application.*—The operator shall maintain a record of an approved manipulation, manufacture, exhibition, or certification of destruction, in its inventory control and recordkeeping system so as to provide an accounting and audit trail of the merchandise through the approved operation.

(e) *Destruction.*

The district director may permit destruction to be done outside the zone, in whole or in part and at the risk and expense of the applicant, and under such conditions as are necessary to protect the revenue, if proper destruction cannot be accomplished within the zone. Any residue from the destruction within a zone, which is determined to be without commercial value, may be removed to Customs territory for disposal.

§ 146.53 Shortages and overages.

(a) *Report required.* The operator shall report, in writing, to the district director upon identification, as such, of any:

(1) Theft or suspected theft of merchandise;

(2) Merchandise not properly admitted to the zone; or

(3) Shortage of one percent (1%) or more of the quantity of merchandise in a lot or covered by a unique identifier, if the missing merchandise would have been subject to duties and taxes of $100 or more upon entry into the Customs territory. The operator shall record upon identification all shortages and overages, whether or not they are required to be reported to the district director at that time, in its inventory control and recordkeeping system. The operator shall record all shortages and overages as required in the annual reconciliation report under § 146.25.

(b) *Certain domestic merchandise.* Except in a case of theft or suspected theft, the operator need not file a report with the district director, or note in the annual reconciliation report, any shortage or overage concerning domestic status merchandise for which no permit is required.

(c) *Shortage.*

(1) *Operator responsibility.* The operator is responsible under its Foreign Trade Zone Operator's Bond for any loss of merchandise or for any merchandise which cannot be located or otherwise accounted for (except domestic status merchandise for which no permit is required), unless the district director is satisfied that the merchandise was:

(i) Never received in the zone;

(ii) Removed from the zone under proper permit;

(iii) Not removed from the zone; or

(iv) Lost or destroyed in the zone through fire or other casualty, evaporation, spillage, leakage, absorption, or similar cause, and did not enter the commerce of the U.S.

(2) *Liability for duty and taxes.* Upon demand of the district director, the operator shall make entry for and pay duties and taxes applicable to merchandise which is missing or otherwise not accounted for.

(d) *Overage.* The person with the right to make entry shall file, within 5 days after identification of an overage, an application for admission of the merchandise to the zone on Customs Form 214 or file a Customs entry for the merchandise. If a Customs Form 214 or a Customs entry is not timely filed, and the district director has not granted an extension of the time provided, the merchandise shall be sent to general order.

(e) *Damage.* The liability of the operator under its Foreign Trade Zone Operator's Bond may be adjusted for the loss of value resulting from damage to merchandise occurring in the zone. The operator shall segregate, mark, and otherwise secure damaged merchandise to preserve its identiy as damaged merchandise.

Subpart F—Transfer of Merchandise From a Zone

§ 146.61 Constructive transfer to Customs territory.

The district director shall accept receipt of any entry in proper form provided under this subpart, and the merchandise described

therein will be considered to have been constructively transferred to Customs territory at that time, even though the merchandise remains physically in the zone. If the entry is thereafter rejected or cancelled, the merchandise will be considered at that time to be constructively transferred back into the zone in its previous zone status.

§ 146.62 Entry.

(a) *General.* Entry for foreign merchandise which is to be transferred from a zone, or removed from a zone for exportation or transportation to another port, for consumption or warehouse, will be made on Customs Form 7512, Customs Form 3461, Customs Form 7501, or other applicable Customs forms. If entry is made on Customs Form 3461, the person making entry shall file an entry summary for all the merchandise covered by the Customs Form 3461 within 10 working days after the time of entry.

(b) *Documentation.* Customs Form 7501 or the entry summary will be accompanied by the entry documentation, including invoices, as provided in Parts 141 and 142 of this chapter. The person with the right to make entry shall submit any other supporting documents required by law or regulations that relate to the transferred merchandise and provide the information necessary to support the admissibility, the declared values, quantity, and classification of the merchandise. If the declared values are predicated on estimates or estimated costs, that information must be clearly stated in writing at the time an entry or entry summary is filed.

Customs Form 7512 for merchandise to be transferred to another port or zone or for exportation shall state that the merchandise covered is foreign trade zone merchandise; give the number of the zone from which the merchandise was transferred; state the status of the merchandise; and, if applicable, bear the notation or endorsement provided for in § 146.64(c), 146.66(b), or 146.70(c).

(c) *Waiver of supporting documents.* The district director may waive presentation of an invoice and supporting documentation required in paragraph (b) of this section with the entry or entry summary, if satisfied that presentation of those documents would be impractical, and the person making entry or the operator either files invoices and supporting documentation with the district director or maintains and makes those records available for examination by Customs.

§ 146.63 Entry for consumption.

(a) *Foreign merchandise.* Merchandise in foreign status or composed in part of merchandise in foreign status may be entered for consumption from a zone.

(b) *Zone-restricted merchandise.* Merchandise in a zone-restricted status may be entered for consumption only when the Board has ruled that merchandise can be entered for consumption.

(c) *Estimated production.*

(1) *Weekly entry.* When merchandise is manufactured or otherwise changed in a zone (exclusive of packing) to its physical condition as entered within 24 hours before physical transfer from the zone for consumption, the district director may allow the person making entry to file an entry on Customs Form 3461 for the estimated removals of merchandise during the calendar week. The Customs Form 3461 must be accompanied by a *pro forma* invoice or schedule showing the number of units of each type of merchandise to be removed during the week and their zone and dutiable values. Merchandise covered by an entry made under the provisions of this section will be considered to be entered and may be removed only when the district director has accepted the entry on Customs Form 3461. If the actual removals will exceed the estimate for the week, the person making entry shall file an additional Customs Form 3461 to cover the additional units before their removal from the zone. Notwithstanding that a weekly entry may be allowed, all merchandise will be dutiable as provided in § 146.65. When estimated removals exceed actual removals, the excess merchandise will not be considered to have been entered or constructively transferred to the Customs territory.

(2) *Individual transfers.* After acceptance of the weekly entry, individual transfers of merchandise covered by the entry may be made from the zone.

(d) *Textiles and textile products.* Subject to the existing statutory authority of the Board, textiles and textile products admitted into a zone, regardless of whether the merchandise has privileged or nonprivileged foreign status, which would have been subject to quota or visa or export license requirements in their condition at the time of importation (if entered for consumption rather than admitted to a zone), may not be subsequently transferred into the Customs territory for consumption if, during the time the merchandise is in the zone, there has been a change by manipulation, manufacture, or other means:

(1) In the country of origin of the merchandise as defined by § 12.130 of this chapter;

(2) To exempt from quota or visa or export license requirements other than a change brought about by statute, treaty, executive order or Presidential proclamation; or

(3) From one textile category to another textile category.

§ 146.64 Entry for warehouse.

(a) *Foreign merchandise.* Merchandise in privileged foreign status or composed in part of merchandise in privileged foreign status may not be entered for warehouse from a zone. Merchandise in nonprivileged foreign status containing no components in privileged foreign status may be entered for warehouse in the same or at a different port.

(b) *Zone-restricted merchandise.* Foreign merchandise in zone-restricted status may be entered for warehouse in the same or at a

different port only for storage pending exportation, unless the Board has approved another disposition.

(c) *Textiles and textile products.* Textiles and textile products which have been changed as provided for in § 146.63(d) may be entered for warehouse only if the entry is endorsed by the district director to show that the merchandise may not be withdrawn for consumption.

(d) *Time limit.* Merchandise may neither be placed nor remain in a Customs bonded warehouse after 5 years from the date of importation of the merchandise.

§ 146.65 Classified, valuation, and liquidation.

(a) *Classification.*

(1) *Privileged foreign merchandise.* Privileged foreign merchandise provided for in this section will be subject to tariff classification according to its character, condition and quantity, at the rate of duty and tax in force on the date of filing, in complete and proper form, the application for privileged status. Classification of merchandise subject to a tariff-rate import quota will be made only at the higher non-quota duty rate in effect on the date privileged foreign status was granted.

(2) *Nonprivileged foreign merchandise.* Nonprivileged foreign merchandise provided for in this section will be subject to tariff classification in accordance with its character, condition and quantity as constructively transferred to Customs territory at the time the entry or entry summary is filed with Customs.

(b) *Valuation.*

(1) *Total zone value.* The total zone value of merchandise provided for in this section will be determined in accordance with the principles of valuation contained in §§ 402 and 500 of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979 (19 U.S.C. 1401a, 1500). The total zone value shall be that price actually paid or payable to the zone seller in the transaction that caused the merchandise to be transferred from the zone. Where there is no price paid or payable, the total zone value shall be the cost of all materials and zone processing costs related to the merchandise transferred from the zone.

(2) *Dutiable value.* The dutiable value of merchandise provided for in this section shall be the price actually paid or payable for the merchandise in the transaction that caused the merchandise to be admitted into the zone less, if included, international shipment and insurance costs and U.S. inland freight costs. If there is no such price actually paid or payable, or no reasonable representation of that cost, the dutiable value may be determined by excluding from the zone value any included zone costs of processing or fabrication, general expenses and profit and the international shipment and insurances costs and U.S. inland freight costs related to the merchandise transferred from the zone. The dutiable value of recoverable waste or scrap provided for in § 146.42(b) will be the

price actually paid or payable to the zone seller in the transaction that caused the recoverable waste or scrap to be transferred from the zone.

(3) *Allowance.* An allowance in the dutiable value of zone merchandise may be made by the district director in accordance with the provisions of Subparts B and C of Part 158 of this chapter, for damage, deterioration, or casualty while the merchandise is in the zone.

(c) *Liquidation; extension to update cost data.* When the declared value of values of the merchandise are based on an estimate or estimates, the person making entry may request an extension of liquidation pending the presentation of updated or actual cost data. A request for an extension may be granted at the discretion of the district director.

§ 146.66 Transfer of merchandise from one zone to another.

(a) *At the same port.* A transfer of merchandise to another zone with a different operator at the same port (including a consolidated port) will be by a licensed cartman under an entry for immediate transportation on Customs Form 7512 or other appropriate form with a Customs Form 214 filed at the destination zone. A transfer of merchandise between zone sites at the same port having the same operator may be made under a permit on CF 6043 or under a local control system approved by the district director wherein any loss of merchandise between sites will be treated as if the loss occured in the zone.

(b) *At a different port.* A transfer of merchandise from a zone at one port of entry to a zone at another port will be by bonded carrier under an entry for immediate transportation on Customs Form 7512. All copies of the entry must bear a notation that the merchandise is being transferred to another zone designated by its number.

(c) *Forwarding of merchandise history; documentation.* When merchandise is transferred under the provisions of this section, the operator of the transferring zone shall provide the operator of the destination zone with the documented history of the merchandise being transferred.

(1) The following documentation must accompany merchandise maintained under a lot inventory control system:

(i) A copy of the original Customs Form(s) 214 with accompanying invoices for admission of the merchandise and all components thereof;

(ii) A copy of any Customs Form 214 filed subsequent to admission to change the status of the merchandise or its components; and

(iii) A copy of any Customs Form 216 to manipulate or manufacture the merchandise.

(2) The following documentation must accompany merchandise not under a lot system, and not manufactured in a zone:

(i) A copy of the original Customs Form(s) 214 with accompanying invoices for admission of the merchandise as attributed under the particular zone inventory method;

(ii) A copy of any Customs Form 214 filed subsequent to admission to change the status of the merchandise as attributed under the particular zone inventory method; and

(iii) A copy of any Customs Form 216 to manipulate the merchandise as attributed under the particular zone inventory method.

(3) If the documents specified in paragraph (c)(2) of this section are not presented, the operator of the transferring zone shall submit the following:

(i) A statement of the zone value, dutiable value, quantity, description, unique identifier, and zone status (showing any changes of status after admission and whether the merchandise was manipulated so as to change its tariff classification) of all the merchandise in the shipment covered by the transportation entry; and

(ii) A certification that the statement in paragraph (c)(3)(i) of this section, is true and that the information contained therein is contained in the inventory control and recordkeeping system of the transferring zone.

(4) The following documentation must accompany merchandise not under a lot system, but manufactured in a zone:

(i) A statement by the transferring zone operator of the zone value, dutiable value, quantity, description, unique identifier, and zone status of all the merchandise (and components thereof, where applicable) covered by the transportation entry. The statement will also show any change in zone status in the transferring zone and whether the merchandise has been manufactured or manipulated in the zone so as to change its tariff classification; and

(ii) A certification by the operator of the transferring zone that the statement in paragraph (c)(4)(i) of this section is true and the information therein is contained in the inventory control and recordkeeping system of the zone.

(5) The operator of the transferring zone shall transmit the historical documentation of the merchandise to the receiving zone within 10 working days after it has been delivered to the bonded carrier for transportation. The documentation will be referenced to the I.T. number covering the merchandise.

(d) *Arrival at destination zone.* Upon arrival of the merchandise at the destination zone, it will be admitted under the procedure provided for in § 146.32, except that no invoice or Customs examination will be required. When the historical documentation is received, the operator of the destination zone shall associate it with the Customs Form 214 for admission of the merchandise and incorporate that information into the zone inventory control and recordkeeping system.

§ 146.67 Transfer of merchandise for exportation.

(a) *Direct exportation.* Any merchandise in a zone may be exported directly therefrom (without transfer into Customs territory) upon compliance with the procedures of paragraph (b) of this section.

(b) *Immediate exportation.* Each transfer of merchandise to the Customs territory for exportation at the port where the zone is located, will be made under an entry for immediate exportation on Customs Form 7512. The person making entry shall furnish an export bond on Customs Form 301 containing the bond conditions provided for in § 113.62 of this chapter.

(c) *Transporation and exportation.* Each transfer of merchandise to the Customs territory for transportation to and exportation from a different port, will be made under an entry for transportation and exportation on Customs Form 7512. The bonded carrier will be responsible for exportation of the merchandise in accordance with § 18.26 of this chapter.

(d) *Textiles and textile products.* Textiles and textile products which have been changed as provided for in § 146.63(d) may be exported and returned to Customs territory for warehousing provided the entry for warehouse is endorsed by the district director to show that the merchandise may not be withdrawn for consumption.

(e) *Merchandise produced or manufactured in a zone and returned to Customs territory after exportation.* Merchandise produced or manufactured in a zone and exported without having been transferred to Customs territory other than for exportation or for transportation and exportation will be subject, on its return to Customs territory, to the duties and taxes applicable to like articles of wholly foreign origin, unless it is conclusively established that it was produced or manufactured exclusively with the use of domestic merchandise. The identity of the domestic merchandise must have been maintained in accordance with the provisions of this part, in which case that merchandise will be subject to the provisions of Schedule 8, Part 1, Tariff Schedules of the United States (19 U.S.C. 1202).

§ 146.68 Transfer for transportation or exportation; estimated production.

(a) *Weekly permit.* The district director may allow the person making entry for merchandise provided for in § 146.63(c) to file an application for a weekly permit to enter and release merchandise during a calendar week for exportation, transportation, or transportation and exportation. The application will be on Customs Form 7512 stating at the top the words "Application for Weekly Zone Permit," and will be filed with the district director. The application must be accompanied by a *pro forma* invoice or schedule like that required in § 146.63(c)(1). If actual transfers will exceed the estimate for the week, the person with the right to make entry shall

file a supplemental Customs Form 7512 to cover the additional merchandise to be transferred from the subzone or zone site. No merchandise covered by the weekly permit may be transferred from the zone before approval of the application by the district director.

(b) *Individual entries.* After approval of the application for a weekly permit by the district director, the pereson making entry will be authorized to execute individual Customs Forms 7512 for exportation, transportation, or transportation and exportation of the merchandise covered by permit. Upon transfer of the merchandise, the operator shall obtain a receipt from the carrier on Customs Form 7512 to ensure its assumption of liability under the carrier's or cartman's bond. Customs will consider the time of entry to be when the removing carrier signs the receipt for the merchandise. The operator shall give the bonded carrier a copy of the individual Customs Form 7512 and the destination copy (Customs Form 7512–C), as provided for in § 18.2(c) of this chapter. The operator also shall ensure that the district director receives a copy of the Customs Form 7512 and the origin copy (Customs Form 7512–C) by the end of the next working day after the carrier has receipted for the merchandise.

(c) *Statement of merchandise entered.* The person making entry for merchandise under an approved weekly permit shall file with the district director, by the close of business on the second working day of the week following the week designated on the permit, a statement of the merchandise entered under that permit. The statement must list each Customs Form 7512 by its unique I.T. number, and will provide a reconciliation of the quantities on the weekly permit with the manifested quantities on the individual Customs Forms 7512 submitted to Customs, as well as an explanation of any discrepancy.

§ 146.69 Supplies, equipment, and repair material for vessels or aircraft.

(a) *General.* Any merchandise which may be withdrawn duty and tax free in Customs territory under § 309 or § 317, Tariff Act of 1930, as amended (19 U.S.C. 1309, 1317), and under §§ 10.59 through 10.65 of this chapter, may similarly be transferred from a zone, regardless of its zone status, under those statutes and regulations. Each transfer from a zone for delivery to a qualified vessel or aircraft, will be made on Customs Form 7512 (see § 10.60 of this chapter). The person making entry shall furnish a bond on Customs Form 301 containing the bond conditions provided for in § 113.62 of this chapter.

(b) *Merchandise for delivery within zone.* Upon acceptance of the entry and bond, the district director shall release the merchandise to the operator for delivery to the qualified vessel or aircraft for lading in the zone.

(c) *Merchandise for delivery outside zone.* Upon acceptance of the entry and bond, the district director shall release the merchandise to the operator for delivery to the bonded cartmen, lighterman, or carrier, for transportation through the Customs territory to the qualified lading vessel or aircraft.

§ 146.70 Transfer of zone-restricted merchandise into Customs territory.

(a) *General.* Zone-restricted merchandise may be transferred to Customs territory only for entry for exportation, for entry for transportation and exportation, for warehousing pending exportation, for destruction (except destruction of distilled spirits, wines and fermented malt liquors), for transfer from one zone to another, or for delivery to a qualified vessel or aircraft or as ground equipment of a qualified aircraft under § 309 or 317, Tariff Act of 1930, as amended (19 U.S.C. 1309, 1317), unless the Board has ruled that the return of the merchandise to Customs territory for domestic consumption is in the public interest. With Board approval (See 15 CFR Part 400), that merchandise may be entered for consumption, for warehousing, for immediate transportation without appraisement, or under any other provision of the Customs laws, unless the Board has specified the form of entry to be made.

(b) *For consumption.* If the return of zone-restricted merchandise to Customs territory for consumption has been ruled by the Board to be in the public interest, the entry shall be endorsed by the district director to show the authority under which it was made, and that the merchandise is subject to the provisions of Schedule 8, Part 1, Tariff Schedules of the United States (19 U.S.C. 1202).

(c) *For warehousing.* Zone-restricted merchandise may be transferred from a zone to a Customs bonded warehouse for storage pending exportation. The Customs Form 7501 shall be endorsed by the district director to show that the merchandise may not be withdrawn for consumption. In the case of zone-restricted merchandise transported in bond to another port for warehousing and exportation, Customs Form 7512 shall be endorsed by the district director to show that the merchandise in foreign trade zone merchandise in zone-restricted status, which shall be entered for warehouse with proper endorsement on Customs Form 7501, and which may not be withdrawn for consumption. Zone-restricted merchandise transferred from a zone to a Customs bonded warehouse may not be manipulated, except for packing or unpacking incidental to exportation.

(d) *For other purposes.* Upon acceptance of an entry or withdrawal for zone-restricted merchandise for any purpose other than that described in a Board order, the entry shall be endorsed by the person making entry to show that actual exportation of the merchandise is required by the fourth proviso to § 3 of the Act, as amended, or the entry endorsed to require delivery to a qualified

vessel or aircraft, under § 309 or 317, Tariff Act of 1930, as amended (19 U.S.C. 1309, 1317).

§ 146.71 Release and removal of merchandise from zone.

(a) *General.* Except as provided for in § 146.43, no merchandise will be transferred from a zone without a Customs permit on the appropriate entry or withdrawal form or other document as required in this part. The district director may authorize transfer from a zone without physical supervision or examination by a Customs officer. Upon issuance of a permit, the district director will authorize delivery of the merchandise only to the operator, who then may release the merchandise to the importer or carrier.

(b) *Liability for discrepancy.* When a transfer is not physically supervised by a Customs officer, the operator will be relieved of responsibility only for the merchandise in a zone in the condition and quantity as shown on the entry, withdrawal, or other appropriate form. The operator will be relieved of responsibility only if it receives the signed receipt on the document of the importer or the carrier named in that document. The responsibility of the operator may be adjusted by any discrepancy report made jointly by the operator and the bonded cartman, lighterman, or carrier, or the importer, and signed by the above or an authorized representative within 15 days after transfer of the merchandise from the zone. Any adjustment must be noted on the permit copy of the entry, withdrawal, or other appropriate form or document. A copy of any joint report of discrepancy must be submitted to the district director within 10 working days of signing by the parties.

(c) *Time limit.* Except in the case of articles for use in a zone, merchandise for which a Customs permit for transfer to Customs territory has been issued must be physically removed from the zone within 5 working days of issuance of that permit. The district director, upon request of the operator, may extend that period for good cause. Merchandise awaiting removal within the required time limit will not be further manipulated or manufactured in the zone, but will be segregated or otherwise identified by the operator as merchandise that has been constructively transferred to Customs territory.

(d) *Retention or return of merchandise to zone for consumption.*

(1) The district director shall cancel any entry for consumption where (i) the merchandise is not removed from the zone within the period specified in paragraph (c) of this section, or (ii) the merchandise was removed from the zone but did not enter the commerce of the U.S. in Customs territory and was subsequently readmitted to a zone in domestic status. If the district director has reason to believe any new entry would be cancelled under the provisions of this subparagraph, he may reject the entry or demand a written stipulation, as a condition of entry acceptance, that the merchandise will not be returned to a zone in domestic status. Merchandise cov-

ered by an entry which has been cancelled under this subparagraph shall be restored to its last foreign status.

(2) A component of merchandise which has been entered, but not physically removed from a zone, shall be restored to its last zone status, provided the district director determines that the component was included in the entry through clerical error, mistake of fact, or other inadvertence not amounting to an error in the construction of the law. Such an error, including that in appraisement of any entry or liquidation due to the above circumstances, may be corrected pursuant to § 520(c)(1), Tariff Act of 1930, as amended (19 U.S.C. 1520(c)(1)), in accordance with the procedures described in Part 173 of this chapter. If the district director decides there has been no error, mistake, or inadvertence, or that the information was not timely provided, the component will be considered as an overage and subject to the provisions of § 146.53(d).

(3) When merchandise which has been entered for consumption is subsequently returned to a zone for a reason other than that specified in subparagraph (d)(1), it shall be admitted in domestic status.

Subpart G—Penalties; Suspension; Revocation

§ 146.81 Penalties.

(a) *Amount.* Upon violation of the Act, or any regulation issued under the Act, by the grantee, or any officer, agent, operator or employee thereof, the person responsible for or permitting the violation shall be subject to a fine of not more than $1,000. Each day during which a violation continues will constitute a separate offense. Liquidated damages, where applicable, will be imposed in addition to the fine (19 U.S.C. 81s).

(b) *Review.* All fines assessed by the district director under this section will be reviewed by the Director, Entry Procedures and Penalties Division, Headquarters, to determine whether further action against the grantee or operator, such as suspension or a recommendation for revocation of the grant, is warranted.

§ 146.82 Suspension.

(a) *For cause.* The district director may suspend for cause the activated status of a zone or zone site, or the privilege to admit, manufacture, manipulate, exhibit, destroy, transfer or remove merchandise at a zone or zone site for a period not to exceed 90 days. Upon order of the Board the suspension may be continued. If appropriate, the suspension may be limited to an individual user or users and not to the zone or zone site as a whole, or may be limited to a particular activity of an operator or user, such as suspension of the privilege to admit merchandise or the privilege to manufacture. An action to suspend will be taken in accordance with the procedure in paragraph (b) of this section if:

(1) The approval of the application to activate the zone was obtained through fraud or the misstatement of a material fact;

(2) The operator neglects or refuses to obey any proper order of a Customs officer or any Customs order, rule, or regulation relating to the operation or administration of a zone;

(3) The operator, or any officer of a corporation which has been granted the right to operate a zone, is convicted of or has committed an act that would constitute a felony, or would constitute a misdemeanor involving theft.

(4) The operator fails to furnish a current list of names, addresses, or other information as required by § 146.7;

(5) The operator does not provide a secure facility or properly safeguard merchandise within a zone;

(6) The operator fails to pay, within 30 days after the due date, all annual fees associated with the operation of a zone;

(7) The operator, or any officer, agent, or employee of the operator, discloses to an unauthorized person proprietary information contained on a Customs form or in the inventroy control and recordkeeping system; or

(8) The inventory control and recordkeeping system is impaired to the point where the identity of merchandise in zone status has been lost and cannot be reestablished without a suspension of zone operations.

(b) *Procedure.*

(1) *Notice.* The district director may, at any time, serve notice, writing, upon an operator to show cause why its right to continue operation of a zone should not be suspended or why an individual user or activities of an individual user should not be suspended, as provided for in paragraph (a) of this section. The notice will advise the operator of the grounds for the proposed action and will afford the operator an opportunity to respond, in writing, within 15 days after receipt of the notice. Thereafter, the district director shall consider the allegations and any response made by the operator and issue a decision, unless the operator requests a hearing in the matter.

(2) *Hearing.* If the operator requests a hearing, it will be held before a hearing officer designated by the Commissioner of Customs or his designee within 30 days following the operator's request. The operator may be represented by counsel at the hearing, and any evidence and testimony of witnesses in the proceeding, including substantiation of the allegations and the response thereto, will be presented. The right of cross-examination will be available to both parties. A stenographic record of the proceeding will be made and a copy will be delivered to the operator. At the conclusion of the hearing, the hearing officer shall transmit promptly all papers and the stenographic record of the hearing to the regional commissioner of the region in which the zone is located, together with a recommendation for final action.

(3) *Decision of regional commissioner.* Within 10 calendar days after delivery to the operator of a copy of the stenographic record of the hearing, the operator may submit to the regional commissioner in writing any additional views or arguments. The regional commissioner shall then render a written decision stating his reasons therefor. That decision will be served on the operator and will be considered the final Customs administrative action in the case.

(4) *Grantee.* If the grantee of the zone is not the operator, a copy of the notice to show cause will be served upon the grantee. The grantee, as a party-in-interest, may join the operator in any proceeding under this section.

§ 146.83 Revocation of zone grant.

(a) *Recommendation of district director.* The district director may at any time recommend to the Board that the privilege of establishing, operating, and maintaining a zone or subzone under Customs jurisdiction be revoked for willful and repeated violations of the Act (19 U.S.C. 81r). If the district director believes that a substantial question of law exists as to whether willful and repeated violations of the Act have occurred, that officer may request internal advice under the provisions of Part 177 of this chapter from the Director, Carriers, Drawback and Bonds Division, Headquarters. A recommendation to the Board that a zone or subzone grant be revoked does not preclude, and may be in addition to, any liquidated damages, penalty, or suspension for cause.

(b) *Decision of the Board.* The procedure for revocation of a grant, the decision of the Board, and appeal is covered by the provisions of the Act and Title 15, Chapter IV, Part 400, Code of Federal Regulations.

CONFORMING AMENDMENTS

PARTS 18, 24, 112, 113, 141, 144, 178, AND 191

To conform the Customs Regulations to the changes made by the revision of Part 146, Customs Regulations (19 CFR Part 146), Parts 18, 24, 112, 113, 141, 144, 178, and 191, Customs Regulations (19 CFR Parts 18, 24, 112, 113, 141, 144, 178, and 191) are amended in the following manner:

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

1. The authority citation for Part 18 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1551-1553, 1624.

2. Section 18.2 is amended in the following manner:

a. By revising the heading to paragraph (a)(1) to read "Merchandise other than from warehouse or foreign trade zone delivered to bonded carrier."

b. By removing the words "paragraph (a)(2)" in the first sentence of paragraph (a)(1) and inserting, in their place, the words "paragraphs (a)(2) and (a)(3) of this section."

c. By adding a new paragraph (a)(4) to read as follows:

§ 18.2 Receipt by carrier manifest.

(a) * * *

(4) *Merchandise delivered from foreign trade zone.* When merchandise is delivered from a foreign trade zone to a bonded carrier for transportation in bond, supervision of lading will be accomplished in accordance with the procedure set forth in § 146.71(a) of this chapter.

* * * * * * *

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The authority citation for Part 24 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624, 31 U.S.C. 9701.

2. Section 24.13 is amended by inserting in the first sentence of paragraphs (c) and (f), the words "a foreign trade zone operator," before the words "and bonded warehouse proprietor," respectively.

PART 112—CARRIERS, CARTMEN, AND LIGHTERMEN

1. The authority citation for Part 112 is revised to read as follows:

AUTHORITY: 19 U.S.C. 66, 1551, 1565, 1623, 1624.

2. All other statutory authority cited at the end of various sections in Part 112 is removed.

3. The last sentence of § 112.12(b)(3), is revised to read as follows:

§ 112.12 Application for authorization.

* * * * * * *

(b) *Special requirements.*

* * * * * * *

(3) *Private carriers.* * * * If the private carrier is the proprietor of one or more Customs bonded warehouses or bonded container stations, or the operator of a foreign trade zone, to which imported merchandise will be transported, he shall accompany the bond and copies of the bond by a statement showing the location of each warehouse, container station, or zone.

* * * * * * *

PART 113—CUSTOMS BONDS

1. The authority citation for Part 113 continues to read as follows:

AUTHORITY: 19 U.S.C. 66, 1623, 1624.

2. Section 113.73 is amended by revising paragraphs (a)(1) and (a)(2), and by adding paragraph (d), to read as follows:

§ 113.73 Foreign trade zone operator bond conditions.

* * * * * * *

(a) *Receipt, Handling, and Disposition of Merchandise.* The principal agrees to comply with:

(1) The law and Customs Regulations relating to the receipt, admission, status, handling, transfer, and removal of merchandise from the foreign trade zone or subzone, and

(2) The Customs Regulations concerning the maintenance of inventory control and recordkeeping systems covering merchandise in the foreign trade zone or subzone. If the principal defaults and the default involves merchandise other than domestic merchandise for which no permit for admission is required, the obligors (principal and surety) agree to pay liquidated damages equal to the value of the merchandise involved in the default, or three times the value of the merchandise involved in the default if the merchandise is restricted merchandise or alcoholic beverages, or such other amount as may be authorized by law or regulation. It is understood and agreed that whether the default involves merchandise is a determination made by Customs, that the amount to be collected under this condition shall be based upon the quantity and value of the merchandise as determined by Customs, and that value as used in these provisions means value as determined under 19 U.S.C. 1401a. If the principal defaults and the default does not involve merchandise, the obligors agree to pay liquidated damages of $1000 for each default, or such other amount as may be authorized by law or regulations.

(b) * * *

(c) * * *

(d) *Payment of Annual Fee.* The principal agrees to pay timely any annual fee or fees as provided in the Customs Regulations. If the principal defaults, the obligors agree to pay liquidated damages equal to the amount of the annual fee due but not paid and an amount equal to one percent of the annual fee for each of the first seven days the annual fee is in arrears, two percent of the annual fee for each of the succeeding seven days the annual fee is in arrears, and three percent of the annual fee for each day thereafter in which the annual fee is in arrears.

PART 141—ENTRY OF MERCHANDISE

1. The authority citation for Part 141 continues to read as follows:

AUTHORITY: 19 U.S.C. 66, 1448, 1484, 1624.

2. Section 141.111(d) is revised to read as follows:

§ 141.111 Carrier's release order.

* * * * * * *

(d) *Qualified release order.* In the case of merchandise which is entered for warehousing, for transportation in bond, for exportation, or is to be admitted to a foreign trade zone, the release order may be qualified as follows:

(1) "For transfer to the bonded warehouse designated in the warehouse entry," if the merchandise is entered for warehousing;

(2) "For transfer to the bonded carrier designated in the transportation entry," if the merchandise is entered for transportation in bond;

(3) "For transfer to the carrier designated in the export entry," if the merchandise is entered for exportation; or

(4) "For transfer to the foreign trade zone designated in Customs Form 214," if the merchandise is to be admitted to a foreign trade zone.

PART 144—WAREHOUSE AND REWAREHOUSE ENTRIES AND WITHDRAWALS

1. The authority citation for Part 144 is revised to read as follows:

AUTHORITY: 5 U.S.C. 301, 7 U.S.C. 1854, 19 U.S.C. 66, 1311, 1312, 1484, 1552, 1553, 1555, 1556, 1557, 1559, 1562, 1563, 1623, 1624, 1646(a), 26 U.S.C. 5214; Pub. L. 95-410; Pub. L. 95-176; Pub. L. 96-511.

2. All other statutory authority cited at the end of various sections in Part 144 is removed.

3. Section 144.36(g) is revised to read as follows:

§ 144.36 Withdrawal for transportation.

* * * * * * *

(g) *Procedure at destination.* Upon arrival at destination, the merchandise may be:

(1) Entered for rewarehouse in accordance with § 144.41;

(2) Entered for combined rewarehouse and withdrawal for consumption in accordance with § 144.42;

(3) Exported in accordance with paragraph (h) of this section;

(4) Forwarded to another port or returned to the port of origin in accordance with § 18.5 (c) or (d) of this chapter; or

(5) Admitted to a foreign trade zone in zone-restricted status as provided in Part 146 of this chapter.

§ 144.37 Withdrawal for exportation.

* * * * * * *

4. Section 144.37 is amended by adding a new paragraph (g), to read as follows:

* * * * * * *

(g) *Exportation at a foreign trade zone.* Merchandise may be withdrawn for exportation at a foreign trade zone in the same or at a different port. The merchandise will be considered exported upon admission to a zone in zone-restricted status, as provided in § 146.44(c) of this chapter.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 *et seq.*

2. Section 178.2 is amended by inserting the following in the appropriate numerical sequence according to the section number the colums indicated:

§ 178.2 Listing of OMB Control Numbers.

19 CFR Section	Description	OMB Control No.
146.6, 146.7	Procedures for activation of a foreign trade zone; procedures for zone changes, including alteration, deactivation and suspension.	1515-0151

PART 191—DRAWBACK

1. The authority citation for Part 191 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1313, 1624.

§§ 191.163-191.165 also issued under 19 U.S.C. 81c.

2. Section 191.162 is amended by removing reference to "§ 146.25," and inserting, in its place, reference to "§ 146.44."

3. Section 191.163 (c) and (d) are revised to read as follows:

§ 191.163 Articles manufactured or produced in the U.S.

* * * * * * *

(c) *Action of the district director on the notice of transfer.* The district director shall assign a number to each notice of transfer, return one copy to the transferor and forward another copy to the zone operator at the foreign trade zone.

(d) *Action of foreign trade zone operator.* After articles have been received in the zone, the zone operator at the zone shall certify on a copy of the notice of transfer the receipt of the articles (see

§ 191.164(d)(2)) and forward the notice to the transferor or the person designated by the transferor. The transferor shall verify that the notice has been certified before filing it with the drawback entry.

* * * * * * *

4. Paragraphs (b) and (c) of § 191.164 are revised to read as follows:

§ 191.164 Merchandise transferred from continuous Customs custody.

* * * * * * *

(b) *Drawback entry.* Before the transfer of merchandise from continuous Customs custody to a foreign trade zone, the importer or a person designated in writing by the importer for that purpose shall file with the district director a direct export entry on Customs Form 7512 in duplicate. The district director shall forward one copy of Customs Form 7512 to the zone operator at the zone.

(c) *Certification by zone operator.* After the merchandise has been received in the zone, the zone operator at the zone shall certify on the copy of Customs Form 7512 the receipt of the merchandise (see paragraph (d)(2) of this section) and forward the form to the transferor or the person designated by the transferor. After executing the certifications provided for in paragraph (d)(3) of this section, the transferor shall resubmit Customs Form 7512 to the district director in place of the bill of lading required by § 191.136.

* * * * * * *

5. Paragraphs (b) and (c) of § 191.165 are revised to read as follows:

§ 191.165 Same condition drawback merchandise and merchandise not conforming to sample or specifications or shipped without the consent of the consignee.

* * * * * * *

(d) *Drawback entry.* Before transfer of the merchandise to a foreign trade zone, the importer or a person designated in writing by the importer for that purpose shall file with the district director an entry on Customs Form 7539 in duplicate. The district director shall forward one copy of Customs Form 7539 to the zone operator at the zone.

(c) *Certification by zone operator.* After the merchandise has been received in the zone, the zone operator at the zone shall certify on the copy of Customs Form 7539 the receipt of the merchandise and forward the form to the transferor or the person designated by the transferor. After executing the certifications provided for in paragraph (d)(3) of this section, the transferor shall resubmit Customs

Form 7539 to the district director in place of the bill of lading required by § 191.136.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: December 10, 1985.
DAVID D. QUEEN,
Acting Assistant Secretary of the Treasury.

APPENDIX

FINAL REGULATORY FLEXIBILITY ANALYSIS ON PROPOSED CUSTOMS REGULATIONS AMENDMENTS RELATING TO FOREIGN TRADE ZONES

INTRODUCTION

The economic impact review below constitutes the Customs Service final regulatory flexibility analysis in compliance with the requirements of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 603). The Act requires that regulatory effects be analyzed so as to determine and quantify, if possible, the economic effects of proposals on small business operations. The Act's key concepts revolve around identifying "significant economic impacts on a substantial number of small entities." The initial analysis was modified as necessary into a final regulatory flexibility analysis upon receipt and review of public comments resulting from Federal Register publication of this rule as a notice of proposed rulemaking.

RATIONAL

The number of Foreign Trade Zones, complexity of operations and volume of trade passing through zones has increased significantly in recent years. From less than 20 zones in the early 1970's, activated zones and sub-zones reporting activity at the end of 1984 numbered 88 (57 general purpose zones and 31 subzones), with 83 other zones approved but not reporting activity (see table 1).

Meanwhile, Customs inspection and supervision of zone activity has changed little in practice. Secular reductions in agency resources have combined with unchanged practices to produce (1) operational hardships on zone grantees and users and (2) uncertain inspection and control of zone activity.

The proposed revisions to 19 CFR Parts 18, 24, 112, 141, 144, 146, and 191 (relating to Customs administration of foreign trade zones) is an administrative attempt to update zone supervision in accordance with current business practices.

OBJECTIVES

The proposal is intended to bring about three fundamental changes:

1. The method of accountability of merchandise admitted, stored, manipulated, exhibited, manufactured and removed from zones;

2. The method of enforcement of Customs laws through audits and spot checks instead of more costly physical presence of inspectional resources; and
3. The method of reimbursing Customs for its zone-related operational expenses.

Legal Basis for Proposal

This regulatory project is initiated under the authority of R.S. 251, as amended, Sections 1-21, 48 Stat. 998, 999, as amended, 1000, 1002, as amended, 1003, 77A Stat. 14, Section 624, 46 Stat. 759 (19 U.S.C. 66, 81a-81u, 1202 (General Headnote 11), 1924).

Estimated Number of Small Entities Affected

Tallies of zone activity in Customs regions indicated that approximately 1,500 users occupy space in zones and carry out the range of permitted manipulation manufacturing and storage activities. Of these, 600 operate on a full-time, year-round basis. The remaining 900 operate on a part-time basis. These estimates do not include users in foreign trade sub-zones. Sub-zone users tend to be large (oftentimes multinational) corporations and thus do not fit within the purview of the requirements of the Regulatory Flexibility Act which concentrate on small business concerns.

Economic Effects of Compliance With the Proposal

After review of the proposal's work plan, we have identified within the proposal the following seven procedural/administrative and fee-related changes likely to affect economic concerns of small business:

A. Procedural administrative changes:
1. Inventory control and record keeping system;
2. Operator's control over admission and removal of goods;
3. Elimination of customs forms 7502/7505/215.

B. Fee changes:
1. Elimination of present form of reimbursement to Customs;
2. Implementation of an annual fee covering audits and spot checks;
3. Zone activation an boundary alteration fee.

TABLE I.—NUMBER OF FOREIGN TRADE ZONES IN THE UNITED STATES [1]

	Approved	Reporting Activity	No Reported Activity
Total	171	88	83
General Purpose Zones	111	57	54
Sub-zones	60	31	29

[1] As of the end of FY 1984.

Source: Foreign Trades Zones Board, U.S. Department of Commerce and special reports from U.S. Customs Service Regions.

A. *Procedural/Administrative Changes*

—Inventory Control and Record Keeping System

An inventory control and record keeping system with Customs prescribed data will result from this proposal. A similar system (Alternative Inventory Control System) has been in effect since 1976 and currently operates at 7 general purpose zones. Data required for the new system will consist of standard business data currently collected and tabulated for small users by each zone's operator/grantee. We do not anticipate a significant net reporting burden on users or operators as a result of this segment of the proposal.

—Operators' Control Over Admission and Removal of Goods

Under present Customs supervision, a Customs officer must be present to clear admissions of merchandise to and removals of merchandise from a zone, thus limiting these transactions to the availability of a Customs officer. Under the present proposal, an operator will be able to admit and remove merchandise without a Customs officer being present, after receiving Customs approval. However, Customs approval for admission will require an invoice in support of the application for admission on CF 214 and that the merchandise be retained for Customs examination at the place of unlading, the zone, or other location designated by the district director. Upon admittance to a zone, textile goods subject to visa controls will require a CF 214 with an invoice annotated by a Customs officer. Withdrawal of those goods will require the visa, either the original if withdrawn in its original lot size or new visas if withdrawn in break bulk, partial quantities. Presentation of an invoice and merchandise examination prior to admission are not currently required and will represent an additional paperwork requirement and possible delay in the arrival of merchandise at the zone. Customs approval for removals will be simplified by a reduction in paperwork as outlined in the next section. In total, the additional admission requirements will be offset by the simplified removal procedure and the enhanced business flexibility derived from being able to admit or remove merchandise freely into and out of the zone after Customs approval has been received.

—Forms Reduction—Customs Forms 7501/7505/215

Under present practice, Customs forms 7501 and 214 are required to obtain privileged foreign status. Removal of privileged foreign status merchandise from a zone requires filing CF 7505 for consumption. CF 215 is required to remove all zone status merchandise, except merchandise in privileged status or wholly composed of merchandise in privileged status. The estimated number of forms filed in FY 1984 appear in Table 2 below.

Table 2

Form		
*7501	.....	15,000
7505	.....	20,000
215	.....	45,000

* The present CF 7501 requires data previously requested on the CF 7502.

Under a provision of this proposal, a request for privileged foreign status would require a CF 214 and invoice (as before) but would eliminate the CF 7501. Upon removal of privileged foreign status goods from a zone, the applicable entry form would replace the 7505 (no net gain or loss). Further, the CF 215 will be eliminated under this proposal. Current clerical, data base management and brokerage costs for an estimated 60,000 forms 7501/215 would be eliminated, giving small businesses a net gain on the order of $650,000 yearly from this procedural change.

—Mandatory Bonding

One of the major proposed changes in zone administration is to involve the operator/grantee in data keeping and reporting. A new mandatory bond at a minimum level of $50,000 would be required in another provision of the proposal, with the goal of encouraging operator/grantee accuracy in compliance with his new responsibilities. The new bond would cover non-compliance with these proposed regulations as well as losses of merchandise. In terms of practical effects of this provision on small businesses, we anticipate no net appreciable added burden or cost. Most activated zones currently have bonds which meet or exceed the proposed minimum level.

B. *Fee Changes*

—Elimination of Present Forms of Customs Reimbursement

Under present practices, operators/grantees reimburse Customs for inspectional services rendered at zones. In fiscal year 1984, payments to Customs totaled an estimated $1.7 million, of which $1.3 million pertain to operations at general purpose zones. Assuming operators charge users flat fees to recover these payments, then

each small user pays an average of $870 per year for these present Customs services. The proposed revisons would *eliminate* this $1.3 million present fee, substituting in its place (see below) tiered fees which would cover Customs costs in carrying out audits and spot checks.

A particular concern is underscored at this point, concerning the distribution of this $1.3 million benefit (eliminated Customs reimbursement). The 57 general purpose zones at the end of FY 1984 are widely distributed around the country. A small business interested in participating in a foreign trade zone generally finds itself limited to one and only one zone provider in its operating area. The offering of foreign trade zone services could thus be regarded as a monopolistic market condition. Significant regulatory requirements and administrative and application costs in seeking approval and setting up a zone essentially prevents access by (especially small) businesses. In essence, then, they must generally contract with the sole established zone operator in the geographic area.

In economic theory, the pricing practices of a good/service provided under monopolistic conditions are oriented towards extracting a maximum profit for the unique provider, and, in practice, the level of fees charged by some zone operators/grantees is a known concern of the Commerce Department's Foreign Trade Zone Board.

As stated above, average savings per user from elimination of Customs reimbursement is expected to approximate $870 per year. Based on actual trade zone market conditions, however, real actual savings to users may total well below the average $870/year. We expect that zone operator/grantees will pass through to small users only a portion (quite possible small) of the total $1.3 estimated benefit of this provision of the proposed regulation. In the public comments, no commenters (largely major general purpose and sub-zone operators) addressed this issue. We expect that in most cases operators will neglect to pass on savings to small users. The Foreign Trade Zone Board has authority to review fees and charges to users if those fees are challenged as unreasonable.

The fiscal year 1984-based fee schedule is tiered. The purpose of the annual fee is to recover Customs costs incurred in carrying out the audit-inspection supervision program. The annual fee to be charged each zone is a function of the degree of complexity in Customs auditing and inspection of zones. In order to account for those distinct operating conditions, each zone with fall into a distinct size/complexity tier, with a specific fee for each tier. In this way, small, less operationally complex zones will not subsidize large zones. The tiers are based on operational complexity as measured by the number of admissions and removals of foreign and zone restricted merchandise.

A zone will be classified as to its fee tier according to the following simple criteria if admissions/transfers of foreign and zone restricted merchandise:

(i) Are less than 300 per year, then TIER I ($1,400 per year fee);
(ii) Fall between 300 and 3,000 per year, then TIER II ($15,500 per year fee);
(iii) Are greater than 3,000 per year, then TIER III ($33,800 per year fee).

We expect general purpose zones to be largely skewed towards the TIER I level (see Table 3).

The annual fee is due and payable on the effective date of final Rule and on January 1 of each subsequent year. For existing zones the tier will be based on the number of admissions and transfers of foreign and zone restricted merchandise made during fiscal year ending September 30, 1984. Zones currently under a voluntary audit-inspection agreement need not pay an additional annual fee for calendar year 1985, nor will there be any refunds of fees paid. For subsequent years the tier will be based on the number of admissions and transfers of foreign and zone restricted merchandise made during the previous fiscal year ending September 30. Each zone operator is responsible for determining the appropriate tier. The operator's determination is subject to Customs verification. Operators of zones activated during a calendar year will be responsible for paying an annual fee based on tier I.

TABLE 3.—DISTRIBUTION OF FOREIGN TRADE ZONES BY ANNUAL FEE TIERS

	Tier I [1]	Tier II [2]	Tier III [3]	Small Business Users
Total	44	33	11	1,500
General Purpose Zones	30	18	8	1,300
Sub-zones	14	15	3	200

[1] $1,400 fee per year.
[2] $15,500 fee per year.
[3] $33,800 fee per year.

Under the present inspectional system Customs bills general purpose zone operators approximately $1.3 million annually for inspectional services. Zone operators recover this expense in their fee and rental/lease billings to zone users. As above, we estimate that the Customs component of these fees paid by zone users average $870 per year per user.

Under the proposed audit-inspection system with different fee tiers, Customs billings to general purpose operators will amount to approximately $591,000 per year, versus the estimated $1.3 million at present. The Customs component of small business users' payments to operators will average $450 per year per user, versus the

$870 per year per user at present. Future increases in the annual fee will reflect cost increases incurred by Customs in delivering audit and inspection services. These increases will consist largely of annual rises in labor costs. It is expected that labor costs, and thus annual fees charged zone operators, will rise by a moderate 2–4% per year.

Since sub-zone users are generally large companies, the effects of fees on them do not fall within the purview of the RFA and this analysis and thus will not be considered in this economic review. The burden on small business from this fee schedule (yielding $591,000/yr.) would be an average $450 per small user. Elimination of the current reimbursement method ($870 per small user annually), even under the caveats noted above, would more than cover these new audit-inspection approach fees.

—New Zone Activation and Boundary Alteration Fees

Under present procedures, zone applicants are not billed for necessary Customs preparatory work prior to a zone's activation or alteration. The proposed revisions contain a provision allowing Customs to recover its costs for such tasks, among others, as site surveys, background investigations, zone approval processing, inventory systems review and associated clerical costs. These fees would be applicable to zones which are activated, relocated or altered on or after the effective date of final rulemaking.

Prospective fees are currently estimated at the following:

(a) $1,021 for zone activation;

(b) $442 for zone relocation; and

(c) $442 for zone alterations.

Concerning effects on small businesses, we expect average added cost pass-through from this source to be insignificant.

Overlapping Rules

None identifiable.

Alternative Rules

None feasible. The *Status Quo* becomes more untenable as complex zone manufacturing operations increase in number, while Customs resources diminish.

Summary of Economic Effects

Based on present available data, the proposed revisions would appear to provide net yearly benefits to zone operators and users of $1.3 million, as summarized below:

Quantified Cost (−)/Benefits (+)

[In dollars]

Document Reduction	+650,000
Current Reimbursement Eliminated	+1,300,000
New Annual Fees for Audit Approach	−591,000
Total	+1,359,000

Non-Quantified Factors

	Added Costs	New Benefits	Neutral Effect
Admission of goods	X		
Removal of goods		X	
Inventory control and record keeping system.			X
Mandatory bonding			X

(T.D. 86-17)

Leaded Naphtha; Change of Tariff Classification

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Change of practice.

SUMMARY: Customs has determined that a uniform and established practice exists to classify certain imported leaded naphtha for tariff purposes as motor fuel. Because this petroleum product, as imported, is not chiefly used as motor fuel, it cannot be classified as such, nor can it be classified as naphtha in view of the added lead content. Accordingly, Customs believes the classification practice is clearly wrong. The most appropriate tariff provision for the classification of leaded naphtha is for mixtures not specifically provided for, i.e., mixtures that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil, or natural gas.

EFFECTIVE DATE: This change of practice will be effective as to merchandise entered for consumption, or withdrawn from warehouse for consumption, on or after May 8, 1986.

FOR FURTHER INFORMATION CONTACT: John G. Hurley, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. (202-566-8181).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In Treasury Decision 83-173, dated August 17, 1983, and published in the Customs Bulletin of September 7, 1983, new standards were established to aid Customs in classifying petroleum products which are chiefly used as motor fuels under the provision for motor fuel in item 475.25, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202). It was further stated in T.D. 83-173 that classification under item 475.25, TSUS, would be indicated if the imported petroleum product met the current American Society for Testing and Materials (ASTM) standards set out in D439 for automotive gasoline, D1655 for aviation turbine fuels, or D910 for aviation gasoline.

T.D. 83-173 revoked T.D. 66-23(13) dated Janaury 19, 1966, which set out critical properties for petroleum products chiefly used as motor fuels at that time. Although this guide was widely used both by Customs and importers for the classification of products claimed to be motor fuel, it had long been recognized that the standards set out in T.D. 66-23(13) were outmoded and required updating. Nonetheless, it should be noted that T.D. 66-23(13) itself stated that the critical properties listed were to be used only as a guide and that it was intended that to be classified as a motor fuel, a product should meet the requirements of Headnote 2(b), Part 10, Schedule 4, TSUS.

Despite this requirement, which has been recognized by the court in *United States* v. *Exxon Corp.*, 607 F.2d 985 (1979), C.A.D. 1233, Customs found that reliance has been placed on T.D. 66-23(13) to establish whether a particular petroleum importation was classified as motor fuel in item 475.25, TSUS. In view of the change in the critical properties of gasoline in the intervening years, as necessitated by the higher performance engines developed, the standards for automotive fuel as stated in T.D. 66-23(13) are no longer valid. Petroleum products which meet the criteria set out in T.D. 66-23(13) cannot be said to be chiefly used as motor fuel, as imported.

Customs has learned that petroleum products entered as motor fuel and which met the standards of T.D. 66-23(13) generally were not intended to be used as gasoline, as imported, but were used as blending stock; that is, they were products which were made into finished gasoline subsequent to importation. The gasoline blending industry imports hydrocarbon distillate mixtures, such as low octane, off specification motor gasoline, petroleum naphtha, leaded naphtha and similar products for the purpose of blending them into a final product which meets the requirements of modern gasoline engines.

A review of entries made over the past few years shows that, based on liquidations, an uniform and established practice exists to classify gasoline blendstock, particularly leaded naphtha, which

meets the criteria set out in T.D. 66-23(13), as motor fuel in item 475.25, TSUS.

On the basis of the above information, Customs determined that the established and uniform practice of classifying leaded naphtha, which met the criteria set out in T.D 66-23(13), as motor fuel in item 475.25 TSUS, is clearly wrong. Leaded naphtha cannot be classified as naphtha in item 475.35, TSUS, in view of the added lead content.

Accordingly, Customs published a notice in the Federal Register on February 27, 1985 (50 FR 7929), soliciting public comments on the proposed change of practice and stating the most appropriate provision for classification is that for mixtures not specially provided for, i.e., mixtures that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil, or natural gas, in item 432.10, TSUS. The current rate of duty for articles classified under item 432.10, TSUS, is 5 percent ad valorem, but not less than the highest rate applicable to any component material. The component material with the highest duty rate would be tetraethyl lead in item 429.70, TSUS, with a current duty rate of 9.8 percent ad valorem.

The notice stated that it pertained to certain leaded naphtha only and not to petroleum naphtha classifiable in item 475.35, TSUS, or catalytic naphtha containing by weight over 5 percent synthetically produced dutiable benzenoids, classifiable as a benzenoid mixture in item 407.16, TSUS.

Discussion of Comments

Of the 17 comments received in response to the notice, some believed that the practice to classify such blendstock as motor fuel in item 475.25, TSUS, was correct and others believed that it was wrong. Those who believed that the practice was wrong agreed with the Customs view that the various blendstock materials should be classified according to composition if they did not meet motor fuel standards. Leaded naphtha which failed to meet current commercial gasoline standards would be classifiable as a mixture in item 432.10, TSUS, dutiable at the rate for tetraethyl lead in item 429.70, TSUS, of 9.8 percent ad valorem. If the imported material contained over 5 percent dutiable benzenoids it would be classifiable as a benzenoid mixture in item 407.16, TSUS. Reformate and catalytic naphtha containing over 5 percent dutiable benzenoids (whether or not containing tetraethyl lead) would be classifiable as a benzenoid mixture in item 407.16, TSUS, dutiable at the rate for alkylbenzenes in item 402.36, TSUS, of 0.8 cent per pound plus 17.3 percent ad valorem.

Various arguments were made in opposition to any change in the classification of blendstock materials as motor fuel. One argument was that such products were "unfinished gasoline" not required to be a finished product; that they were dedicated to use as a motor

fuel. An example given was the Mexican product which was sold commercially in Mexico as a motor fuel and could be used, it was claimed, as a motor fuel in this country. However, even though it was acknowledged that it did not meet commercial U.S. standards, it was claimed such a petroleum product was of a "class or kind" that was chiefly used as motor fuel, as it contained the general physical characteristics of motor fuel.

Several court decisions were listed to support the position that the imported blendstock was of a class or kind of petroleum material to be classifed as motor fuel. Considerable reliance was placed on *Cities Service Oil Co.* v. *United States,* C.D. 994 (1946). There the court stated that an oil which did not meet the specifications for oil commonly and commercially used as fuel oil but was used as such after heating, was of a class or kind chiefly used for fuel. The court noted that while the oil product exceeded the highest viscosity rating of standard grades, the evidence was that large consumers of fuel oils use these high viscosity oils. If there is only one practical use for merchandise of this type, it seems obvious, stated the court, that it must be the chief use. In *California Oil Co.* v. *United States,* C.D. 1442 (1952), the court noted that a blending component used in gasoline but not suited for use as motor fuel was not chiefly used as motor fuel. An early Customs decision on this issue, T.D. 46069 (1932), ruled that a petroleum naphtha was taxable as a motor fuel only if in its condition as imported it was of a grade which was chiefly used in the U.S. as a motor fuel.

As pointed out in *United States* v. *Exxon Corporation, Chevron Oil Co.,* C.A.D. 1233 (1979), Congress added a definition of the term "motor fuel" to the tariff. Under Headnote 2(b), Part 10, Schedule 4, TSUS, a product, stated the court, must be chiefly used as a motor fuel to be classified as such. Because the product in issue was unsuitable for use as motor fuel, it could not be classifiable as such.

The basic argument against changing the practice is that a petroleum product which is used as a motor fuel after only a minor amount of processing is of the same "class or kind" and therefore should be classified as a motor fuel.

Customs is of the opinion that if item 475.25, TSUS, was an "eo nomine" provision, the claim that the imported gasoline blendstock is an unfinished gasoline would have some merit. However, motor fuel is defined by Headnote 2(b), Part 10, Schedule 4, TSUS, and this limits motor fuel to a petroleum product chiefly used or imported as a motor fuel. This qualification only permits finished gasoline to be classified as motor fuel. As blendstock is not a finished gasoline, it would not be classified in item 475.25, TSUS.

T.D. 66-23(13) listed critical properties for petroleum products used as motor fuel about 20 years ago. During the intervening years the standards have changed and the specifications published then are no longer applicable. The Research and Motor Octane

numbers for leaded gasoline, for example, gradually increased from the 1930's to the early 1960's and have generally levelled off since then—*e.g.*, the average Research Octane number in 1942 was about 77, while in the 1980's the average is about 93. The lead requirements for motor fuels have changed over the years and the distillation characteristics have varied within limits.

In *Amorient Petroleum Co.*, v. *United States*, Slip Op. 85–46 (1985), "the statutory definition of motor fuel contained in Schedule 4, Part 10, Headnote 2(b), determines what is or what is not a motor fuel," the court stated, adding that since the chief use of the petroleum product in issue was as a motor fuel, the fact that in one area it could not be so used, but had to be further blended before it could be used as a finished gasoline, did not change the classification. "The fact that plaintiff intended to, and later did, blend some of the imported petroleum derivatives with other materials is irrelevant if the chief use in the United States of the imported merchandise at the time of importation was a motor fuel." Thus, even though the petroleum derivative may not be a motor fuel in a particular area, if it is chiefly used as such in the rest of the country, its status in a particular locale is not determinative, as it is of a "class or kind" chiefly used as motor fuel.

As to the question of naphtha, it is urged that naphtha regardless of origin, since it is a blendstock, be considered a petroleum product for tariff purposes and classifiable in item 475.35, TSUS, as petroleum naphtha. Headnote 1, Part 10, Schedule 4, TSUS, made allowances for the benzenoid content only in motor fuels, fuel oils and lubricating oils and greases. No exception is made for naphtha. Therefore, a catalytic naphtha or reformate, with over a *de minimis* amount of dutiable benzenoids present, which is not chiefly used as motor fuel could only be classifiable as a benzenoid mixture and not a petroleum naphtha.

Change of Practice

After careful analysis of the comments and further review of the matter it is concluded on the basis of the entire record, that the practice of classifying leaded naphtha or any other type of gasoline blendstock as motor fuel is clearly wrong and should be changed. Under Headnote 2(b), Part 10, Schedule 4, TSUS, only those petroleum derivative products which are chiefly used as motor fuel as imported are classifiable as motor fuel in item 475.25, TSUS. Those petroleum products which are not chiefly used as motor fuel as imported but are considered blendstocks are classifiable according to composition. Leaded naphtha is classifiable as a mixture in item 432.10, TSUS, with the rate of duty for tetraethyl lead in item 429.70, TSUS; catalytic naphtha or reformate with over 5 percent dutiable benzenoids present is classifiable as a benzenoid mixture in item 407.16, TSUS, dutiable at the rate of alkylbenzenes in item 402.36, TSUS.

AUTHORITY

This change is being made under the authority of § 315(d), Tariff Act of 1930, as amended (19 U.S.C. 1315(d)), and § 177.10(c)(1), Customs Regulations (19 CFR 177.10(c)(1)).

19 CFR Part 178

(T.D. 86-18)

Customs Regulations Amendment to Listing of OMB Control Numbers

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to include the clearance number issued by the Office of Management and Budget (OMB), necessary for certain information collection requirements included in a recent interim amendment to the Customs air commerce regulations. The interim amendment stated that an application for clearance was submitted to OMB. That office has since approved the regulation an issued the clearance number which appears later in this document.

EFFECTIVE DATE: March 5, 1986.

FOR FURTHER INFORMATION CONTACT: Larry L. Burton, Regulations Control and Disclosure Law Divison, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Part 6, Customs Regulations (19 CFR Part 6), was amended on an interim basis by T.D. 86-12, published in the Federal Register on February 3, 1986 (51 FR 4161). The amendment created a new § 6.12a, Customs Regulations (19 CFR 6.12a), to enhance security in certain designated areas of international airports in the U.S. The major thrust of the regulation is to define a "Customs security area" which may only be entered by airport personnel wearing a Customs approved and issued identification strip or seal on an existing airport identification card. A strip or seal is issued only after an airport employer attests, in writing, that a background check has been conducted on an employee seeking access including, at a minimum, references and employment history necessary to verify employee representations regarding employment in the preceeding five years. Thus, the regulations place upon the employer the burden of conducting an investigation and making a written submission to Customs concerning that investigation.

The Paperwork Reduction Act of 1980 (Pub. L. 96-511, 94 Stat. 2812, 44 U.S.C. 3501 *et seq.*) established policies and procedures for controlling paperwork burdens imposed on the public by federal agencies. Pursuant to this Act, by a document published in the Federal Register on March 31, 1983 (48 FR 13666), the Office of Management and Budget (OMB) promulgated rules implementing the Act. The OMB rules are codified at 5 CFR Part 1320 *et seq.*

One aspect of OMB's oversight function is the review and approval of information collections. Generally, information collections include any requirement or request for persons to obtain, maintain, retain, report, or publicly disclose information. OMB analyzes such requests for three basic requirements. First, the collection of information must be necessary for proper performance of the agency functions. Second, the request for information or records must not duplicate information otherwise accessible to the agency. Third, the information must have practical utility.

When an information collection is approved by OMB, it is issued a control number. The control number provides a simple and effective way to inform the public that a particular information collection has been approved by OMB pursuant to the Paperwork Reduction Act.

In the February 3, 1986, interim regulation, Customs stated that the amendment was subject to the Paperwork Reduction Act, and that an application for approval was submitted to OMB. OMB was able to quickly review the information collection requirements included in T.D. 86-12, and has issued a control number. This document amends the Customs Regulations by including that control number in the list of previously issued numbers for Part 6, Customs Regulations (19 CFR Part 6), which appears in Part 178, Customs Regulations (19 CFR Part 178).

E.O. 12291, Regulatory Flexibility Act, Inapplicability of Public Notice Requirement

This document merely amends listing of the status of other already published regulations. Therefore, the requirements of E.O. 12291, the Regulatory Flexibility Act, and the notice and public comment requirements of the Administrative Procedure Act (5 U.S.C. 552) are not applicable.

U.S. Customs Service

Proposed Rulemaking

19 CFR Part 12

Proposed Customs Regulations Amendments Relating to Importation of Motor Vehicles and Boats by Employees of Public International Organizations

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: Currently, the members of the Secretariat of a public international organization are exempted from compliance with federal emission standards, motor vehicle safety standards, and boat safety standards when importing a motor vehicle, boat, or related piece of equipment into the U.S. More than 15,000 staff personnel of such organizations are eligible to make nonconforming importations and the State Department has determined that the number of exemptions has extended well beyond the intended limits of the program.

Along with the problem associated with the number of people making such nonconforming importations, continuation of the exemption program would allow for the continued unjustified introduction into the U.S. of motor vehicles and boats which injure the public health and pose an unnecessary risk to the public safety.

The State Department has informed Customs that the exemption is not required by international law and is no longer warranted. Therefore, this document proposes to remove the exemption available to public international organization employees. In the rare instance when some international agreement might require such a privilege being granted, or to accommodate special circumstances, the proposal allows the State Department to designate certain individuals who would be granted the privilege of making nonconforming importations.

The document invites written comments on the proposal for consideration before final regulations are prepared.

DATE: Comments must be received on or before April 8, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Room 2426,

U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: William Burns, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8651).

SUPPLEMENTARY INFORMATION:

BACKGROUND

The Customs Service, in the discharge of its duties, is often called upon to help enforce some 400 statutory and regulatory requirements on behalf of approximately 40 other Federal agencies. Three such instances are the cooperative efforts of Customs and the Environmental Protection Agency, the National Highway Traffic Safety Administration, and the Coast Guard, respectively, in enforcing regulations pertaining to the importation of motor vehicles, motor vehicle engines, boats, and related equipment. The specific regulations involved are § 12.73, Customs Regulations (19 CFR 12.73), concerning emission standards for imported motor vehicles and engines, § 12.80, Customs Regulations (19 CFR 12.80), concerning safety standards for imported motor vehicles, and § 12.85, Customs Regulations (19 CFR 12.85), concerning safety standards for imported boats.

In all three of these regulations, there are examples of certain types of importations which will be exempted from compliance with the applicable emission or safety standard. Common to all three is the exemption available to members of the Secretariat of a public international organization. The exemptions appear at §§ 12.73(b)(5)(iv), 12.80(b)(1)(vi), and 12.85(c)(5), Customs Regulations (19 CFR 12.73(b)(5)(iv), 12.80(b)(1)(vi), and 12.85(c)(5)). More precisely, the exemption is available to a member of the Secretariat of a public international organization, so designated pursuant to the International Organizations Immunities Act (22 U.S.C. 288), on assignment in the U.S. A list of these organizations is included in § 148.87, Customs Regulations (19 CFR 148.87).

The International Organizations Immunities Act (the IOIA) was passed in 1945 to bring some standardization to the conduct of affairs with public international organizations. The U.S. had been dealing directly with other governments for a very long time, and diplomatic law was fairly well established. However, the U.S. was dealing with other countries through the medium of public international organizations with increasing frequency at this time. The IOIA was the U.S. response to the need for formal methods of dealing with public international organizations. The law was passed with the thought in mind that public international organizations, and the employees thereof, should be granted privileges and immunities similar to, but less extensive, than the privileges and immunities granted to foreign governments and diplomats. This reflected

the fact that public international organizations were not foreign governments but were public organizations often carrying on work or research of a governmental nature.

The use of the IOIA in the three Customs Regulations mentioned above has expanded beyond the concept of the law as passed in 1945. It is not a necessary practice to grant employees of public international organizations the right to import nonconforming motor vehicles or boats for personal use. The IOIA was intended to extend privileges and immunities only to official acts of the organization and its employees.

The State Department has advised Customs that the current exemption program is not required by any international law and is no longer warranted. Currently, over 15,000 staff employees of public international organizations can import nonconforming motor vehicles, motor vehicle engines, boats, and related pieces of equipment for personal use. The State Department's Office of Foreign Missions has informed Customs that this number of exemptions has extended well beyond the intended limits of the program. Also contributing to the proposal to eliminate the exemption program is the unnecessary harm inflicted on the U.S. environment by these nonconforming imports and the unnecessary risk they pose to the public safety. Accordingly, §§ 12.73, 12.80, and 12.85 would be amended by removing the exemption available to employees of public international organizations.

To accommodate the rare instance in which a binding international commitment requires that such an exemption be granted, or special circumstances exist, it is proposed to add language to §§ 12.73, 12.80, and 12.85, permitting the State Department to designate individuals who are not foreign government diplomatic personnel, but who are otherwise entitled to import nonconforming motor vehicles, motor vehicle engines, boats or related equipment.

COMMENTS

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

REGULATORY FLEXIBILITY ACT

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that, if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject

to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

EXECUTIVE ORDER 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

DRAFTING INFORMATION

The principal author of this document was John Doyle, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

LIST OF SUBJECTS IN 19 CFR PART 12

Air pollution control, Marine safety, Motor vehicle pollution, Motor vehicle safety, Motor vehicles.

PROPOSED AMENDMENTS

It is proposed to amend Part 12, Customs Regulations (19 CFR Part 12), as set forth below.

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for Part 12 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624.

§ 12.73 also issued under 19 U.S.C. 1484, 42 U.S.C. 7522, 7601;
§ 12.85 also issued under 19 U.S.C. 1623, 46 U.S.C. 4302, 4306, 4310.
All other statutory authority remains unchanged.

2. It is proposed to revise § 12.73(b)(5)(iv) to read as follows:

§ 12.73 Federal motor vehicle air pollution control.

* * * * * * *

(b) * * *

(5) * * *

(iv) Such motor vehicle or motor vehicle engine is not covered by a certificate of conformity with Federal motor vehicle emission standards, and the importer or consignee is a member of the armed forces of a foreign country on assignment in the U.S., or is a member of the personnel of a foreign government on assignment in the U.S., or other individual who comes within the class of persons for whom free entry of motor vehicles has been authorized by the Department of State in accordance with general principles of international law, and that such vehicle or engine will not be sold in the U.S.; or

* * * * * * *

3. It is proposed to revise § 12.80(b)(1)(vi) to read as follows:

§ 12.80 Federal motor vehicle safety standards.

* * * * * * *

(b) * * *

(1) * * *

(vi) The importer or consignee is a member of the armed forces of a foreign country on assignment in the U.S., or a member of the personnel of a foreign government on assignment in the U.S., or other individual who is within the class of persons for whom free entry of vehicles has been authorized by the Department of State in accordance with general principles of international law, is importing the vehicle or equipment item for purposes other than resale; and a copy of his official orders, if any, is attached to the declaration (or, if a qualifying member of the personnel of a foreign government on assignment in the U.S., the name of the Embassy to which he is accredited is stated on the declaration).

Appealed from: U.S. International Trade Commission.

(Appeal No. 85-2166)

ON MOTION

ALLIED CORP., APPELLANT *v.* U.S. INTERNATIONAL TRADE COMMISSION, APPELLEE, NIPPON STEEL CORP. AND NIPPON STEEL U.S.A., INC., INTERVENORS, HITACHI METALS, LTD. AND HITACHI METALS INTERNATIONAL, LTD., INTERVENORS, VACUUMSCHMELZE GMBH, INTERVENOR

Before MARKEY, *Chief Judge*, FRIEDMAN and DAVIS, *Circuit Judges*.

ORDER

This is a joint motion of ITC and the intervenors (movants) for a decision on certain jurisdictional questions before review on the merits. Movants argue that the court is without jurisdiction and the appeal should be dismissed because it was filed out of time.

Allied filed its notice of appeal on February 13, 1985. The appeal is from a July 6, 1984 determination of the International Trade Commission (ITC) adopting the findings of an administrative law judge (ALJ) regarding the importation of certain amorphous metal alloys alleged to infringe three of Allied's patents. The ALJ determined that two of the patents were invalid, but that the third patent was valid and infringed by the imported articles.

On October 15, 1984, the ITC issued an order excluding those articles which infringed the one patent held valid and infringed. On December 17, 1984, the Presidential review period for that exclusion order expired. Because Allied prevailed in respect of that patent and the exclusion order, it could not appeal from that order. Similarly, if the President had disapproved the exclusion order, Allied would have had no basis for appeal, the President's action having rendered the ITC determination of no force or effect. *Duracell, Inc.* v. *U.S. International Trade Commission,* 718 F.2d 1578 (Fed. Cir. 1985).

The ITC argues that its July 6, 1984 order adopting the ALJ's determination constituted the final order from which Allied was required to appeal. The only determination by which Allied is aggrieved is that holding two of its patents invalid. That determination was final as of July 6, 1984, there being no provision for Presidential review, or for other administrative proceedings, following a determination that does not lead to an exclusion order.

Allied asserts that a § 337(c) proceeding is a single entity and that it was waiting for expiration of the Presidential review period. The argument is without merit. *Cf. Federal Trade Commission* v. *Minneapolis-Honeywell Regulator Co.,* 344 U.S. 206 (1952). Further, it is contrary to Allied's interests here. As above indicated, Allied was without an appeal from the determination that its one patent was valid and infringed, regardless of the result of Presidential review. The July 6, 1984 determination, on the other hand, meant that the goods challenged by Allied as infringements of its other two patents could continue to be imported. Allied has cited no reason for continuing to suffer importation of those goods for seven months, while awaiting an action of the President that could not possibly effect its right to appeal from the July 6, 1984 determination.[1]

[1] Intervenors whose products were subject to the exclusion order could not appeal the July 6, 1984 determination that the one patent was valid and infringed, the finality of that determination being dependent on Presidential action. If the President declined to disapprove the exclusion order, that order would then become final and subject to timely appeal by intervenors.

Allied's notice of appeal was filed more than 60 days after the July 6, 1984 determination of the ITC *and* more than 60 days after the November 11, 1984 reimposition by Congress of the 60-day limitation. Technical Amendments to the Federal Court Improvements Act of 1982, Pub. L. No. 98-620, § 413, 98 Stat. 3362 (1984) (the Act). Allied's appeal is thus untimely and must be dismissed.[2]

Accordingly, IT IS ORDERED THAT:

The joint motion for determination of whether this court has jurisdiction of the appeal is granted, the question is answered in the negative, and the appeal is dismissed.

Dated: January 21, 1986.

For the Court.

HOWARD T. MARKEY,
Chief Judge.

---

[2] In *Union Manufacturing Co., Inc.* v. *U.S. International Trade Commission*, Appeal No. 85-2473, this court held that the 60-day limitation of the Act should not be mechanically applied to causes of action arising prior to its effective date where, as in that case, an appellant had been actively pursuing its rights in other courts. However, as indicated in the text, Allied has demonstrated no basis on which its delay might be justified.

ZENITH RADIO CORP., INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, THE INDENPENDENT RADIONIC WORKERS OF AMERICA, ET AL., APPELLANTS *v.* UNITED STATES, ET AL., APPELLEES

(Decided February 10, 1986)

Before FRIEDMAN, RICH and NIES, *Circuit Judges*.

NIES, *Circuit Judge*.

The subject of this suit is a final determination of the United States Department of Commerce, International Trade Administration (ITA), under § 731 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1673 *et seq.* (1982), which assessed antidumping duties on certain television receiving sets, monochrome and color, imported from Japan.[1] Zenith and other parties to this action[2] challenged

[1] The Final Determination is reported at 46 Fed. Reg. 30163-67 (1981).

[2] Suits were filed by Zenith Radio Corporation and by the Committee to Preserve American Color Television (a/k/a COMPACT), and Imports Committee, Tube Division, Electronic Industries Association. Those suits were consolidated before the CIT, and additional parties have subsequently been added. In the present appeals, No. 85-2246 is by Zenith and No. 85-2286 is by International Brotherhood of Electrical Workers, Independent Radionic Workers of America, and International Union of Electronic, Electrical, Technical, Salaried and Machine Workers, AFL-CIO. Appellants will be collectively referred to as "Zenith."

ITA's determination by filing a civil action in the United States Court of International Trade (CIT), alleging that, because of computation errors, ITA's determinations of dumping margins for various Japanese manufacturers were significantly understated. The CIT granted the government's motion for summary judgement, thus upholding ITA's determination, relying in part on this court's opinion in *Smith Corona Group Consumer Products Division, SCM Corp.* v. *United States,* 713 F.2d 1568 (Fed. Cir. 1983), *cert. denied,* 104 S. Ct. 1274 (1984). This appeal is from the final judgment of the CIT, Watson, J., reported at 606 F. Supp. 695 (1985). We affirm.

OPINION

In this appeal, Zenith challenges two aspects of the CIT's decision: (1) the CIT's holding that the exporter's sales price (ESP) offset provision, 19 C.F.R. § 353.15(c) is lawful, and (2) the CIT's holding that the foreign market value may be adjusted by discounts and rebates which are not available to all purchasers at wholesale in the home market.

I

The validity of the ESP offset regulation was exhaustively considered by this court in *Smith Corona, supra.* There, the court addressed and rejected arguments comparable to those presently advanced by Zenith. In upholding the offset, this court stated:

> In view of the discretion accorded the Secretary under the statute to make adjustments to foreign market value, we conclude that the exporter's sales price offset, 19 C.F.R. § 353.15(c) is a proper and reasonable exercise of the Secretary's authority to administer the statute fairly. Thus, insofar as it is challenged here, 19 C.F.R. § 353.15(c) is valid.

Id. at 1579. Thus, the CIT properly upheld the ESP offset in light of this precedent. This panel has considered Zenith's attack on that aspect of the *Smith Corona* decision. However, even if the panel were not bound by its precedential effect, we would reach the same conclusion.[3] The decision of the CIT upholding the regulation is, therefore, affirmed.

II

Zenith next asserts that Judge Watson erred in allowing the FMV to be adjusted downward by discounts and rebates that were not offered to all purchasers at wholesale. Zenith argues that discounts and rebates are related to price, and, as a consequence, must meet the requirements of § 1677b(a)(1)(A) if they are to be used in calculating the foreign market value (FMV). Under that

[3] Recognizing that under the operating procedures of this court, a decision by a prior panel is binding precedent on another panel, Zenith suggested that this case be considered in banc. This opinion has been circulated to the entire court prior to issuance, and no judge endorsed the suggestion.

section, the FMV calculation begins with the price at which the goods are sold or offered for sale in the foreign market. Section 1677(14)(A) further specifies that a qualifying price must be one that was offered to *all purchasers*. Therefore, Zenith concludes, discounts and rebates can only enter the FMV calculation if they are available to all purchasers. The subject discounts and rebates admittedly were not offered to all. Although the CIT opined that Zenith's interpretation of the statute is a plausible one, if correctly rejected Zenith's argument, again, on the basis of this court's decision in *Smith Corona*. On that point, it was held that discounts and rebates were properly deductible from FMV as "differences in the circumstances of sale." *Smith Corona, supra*, at 1580. Under § 1677b(a)(4)(B), an adjustment arising from a difference in circumstances of sale does not depend on availability to all purchasers. *See* 606 F. Supp. at 701.

Unlike the "ESP offset" issue, which Zenith concedes was decided by the court in *Smith Corona*, Zenith argues that *Smith Corona* did not decide the "differences in circumstances of sale" issue, which, it says, was not briefed by the parties in that case. Even though the court in *Smith Corona* clearly upheld the making of adjustments for rebates on the FMV side of the equation, Zenith maintains that the parties in that case focused only on the issue of whether the rebates were "directly related" to the sales, and did not otherwise challenge their deductability. Judge Watson was correct, however, in ruling that the question *was* necessarily decided in *Smith Corona*. The result reached by the court is clear, and resolution of the threshold question of whether adjustments for rebates could be made under § 1677b(a)(4)(B) was a necessary predicate to the court's analysis of the "directly related" issue. Moreover, we note that Zenith Radio Corporation (one appellant here) filed a brief as *amicus curiae* in the *Smith Corona* appeal, in which Zenith argued that the discounts or rebates there involved could not give rise to difference in circumstances of sale adjustments.[4] In any event, the issues revolved by a court are defined by the facts in the case and the law applied; they are not necessarily limited to those briefed by the parties.

The questions presented in this appeal are controlled by this court's decision in *Smith Corona*. Because Judge Watson correctly interpreted and applied that precedent to the facts of the present case, we affirm.

AFFIRMED

---

[4] That Zenith argued the issue in the prior case is not controlling on our decision here. The authority cited by International Brotherhood of Electrical Workers strongly supports the proposition that the filing of an amicus brief is insufficient to bind a nonparty to the result of a proceeding. However, that principle simply has no application here, where *stare decisis*, not *res judicata*, is implicated. Zenith's amicus brief is noted simply as another indication that the issue was one which was present in *Smith Corona* and necessarily ruled on.

(Appeal No. 85-2271)

NORTH AMERICAN FOREIGN TRADING CORP., APPELLANT *v.* UNITED STATES, APPELLEE

James Caffentzis, Fitch, King & Caffentzis, of New York, New York, argued for appellant.

Joseph I. Liebman, Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Department of Justice, of Department of Justice, of New York, New York, argued for appellee. With him on the brief were *Richard K. Willard,* Acting Assistant Attorney General *David M. Cohen,* Director and *Jerry P. Wiskin.*

Appealed from: United States Court of International Trade.

Judge RESTANI.

(Appeal No. 85-2271)

NORTH AMERICAN FOREIGN TRADING CORP., APPELLANT *v.* UNITED STATES, APPELLEE

(Decided February 10, 1986)

Before BALDWIN, *Circuit Judge,* MILLER, *Senior Circuit Judge,* and NEWMAN, *Circuit Judge.*

NEWMAN, *Circuit Judge.*

This appeal is from the judgment of the United States Court of International Trade holding that certain imported LCD digital alarm and/or melody watches were properly classified under item 688.36 of the Tariff Schedules of the United States and not eligible for duty-free treatment under 19 U.S.C. § 2463(c)(1) (B) and (C). The decision is affirmed on the basis of the opinion of the Court of International Trade, *North American Foreign Trading Corp.* v. *United States,* 600 F. Supp. 226 (1984), *reh'g denied,* 607 F. Supp. 1471 (Ct. Int'l Trade 1985).

OPINION

This is not a case of retroactive imposition of duty, because the goods in question had not been finally liquidated. Executive Order 12371 by its terms applied only to watches that had not been liquidated prior to the Order. 47 Fed. Reg. 30449, 30450 (1982). No vested right to a particular classification or rate of duty or preference is acquired at the time of importation. *Norwegian Nitrogen Products Co.* v. *United States,* 288 U.S. 294, 318 (1932); *United States* v. *Yoshida International, Inc.,* 526 F.2d 560, 580 (CCPA 1975).

In the case before us, the watches were not eligible for the benefits of the Generalized System of Preferences (GSP) at the time of

their importation, in accordance with 19 U.S.C. § 2463(c)(1) (B) and (C). The Court of International Trade correctly held that the duty classification resulting from the decision in *United States* v. *Texas Instruments*, 673 F.2d 1375 (CCPA 1982), did not affect the GSP treatment of the watches, whether of mechanical or solid state movement. Any doubt in this regard was clarified by Executive Order 12371.

Decisions of the United States Court of International Trade

(Slip Op. 86-10)

ANSALDO COMPONENTI, S.P.A., PLAINTIFF *v.* UNITED STATES, DEFENDANT, WESTINGHOUSE ELECTRIC CORP., DEFENDANT-INTERVENOR

Court No. 84-9-01234

Before MORGAN FORD, *Senior Judge.*

PLAINTIFF'S MOTION FOR REVIEW OF ADMINISTRATIVE DETERMINATION UPON AN AGENCY RECORD; DEFENDANT'S CROSS-MOTION TO AFFIRM THE AGENCY DETERMINATION

[Judgment for defendant; case dismissed.]

(Decided January 17, 1986)

Coudert Brothers (Sherman E. Katz, Robert A. Lipstein, Deborah A. Lewis) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch *(Platte B. Moring, III); Gaylin Spoonis,* U.S. Department of Commerce; for the defendant.

Steptoe & Johnson (Richard O. Cunningham, W. George Grandison, Kevin J. Brosch and *Barbara A. Pollack)* for the defendant-intervenor.

FORD, *Senior Judge:* This action contests the final results of administrative review of an antidumping finding involving *Large Power Transformers from Italy* (49 Fed. Reg. 31313, August 6, 1984), conducted by the U.S. Department of Commerce, International Trade Administration (ITA), pursuant to section 751a of the Tariff Act of 1930, as amended, 19 U.S.C. § 1675(a). Before the Court is plaintiff's (Ansaldo) motion, under Rule 56.1, for Judgment Upon Agency Record. Defendant and intervenor (Westinghouse) oppose said motion and seek affirmance of the administrative review under challenge. Jurisdiction is pursuant to 19 U.S.C. § 1516a and 28 U.S.C. § 1581c.

A review of the extensive background of this matter is essential to its disposition and warranted under the circumstances presented in this case. In 1970, Westinghouse filed an antidumping complaint

with the Department of Treasury [1] alleging that large power transformers from six countries were being sold in the United States at less than fair value and that a U.S. industry was being injured by those sales. The class or kind of merchandise was defined as all large power transformers rated 10 MVA or above, classified under items 682.0755, 682.0765 and 682.0775 of the Tariff Schedules of the United States. After conducting an investigation, the Department of Treasury found that large power transformers from Italy were being sold at less than fair value and ordered antidumping duties assessed against such entries. 37 Fed. Reg. 11772 (June 14, 1972). Among the companies affected by the dumping order was ASGEN, an Italian manufacturer and corporate predecessor of plaintiff Ansaldo.

In the early 1970's the transformer manufacturing assets of ASGEN were merged into Italtrafo, S.p.A. On July 1, 1976, the Customs Service sent a letter to Italtrafo requesting specific information on all transformers shipped to the United States after October 22, 1971, and for all home market and third country transformers for which it had accepted orders during the time period covered by dates of purchase of the United States units. On April 1, 1977, Italtrafo reported it had concluded only one contract with a United States customer since 1972, a 1973 order placed by Bonneville Power Administration (BPA I), and stated that records on identical or similar units ordered by third countries or by domestic customers could not be located. As a result, the Customs Service requested that Italtrafo supply information to enable it to appraise BPA I on the basis of constructed value.

On March 12, 1979, the U.S. Embassy in Rome notified the Customs Service of two Italtrafo transformer sales in 1974 to an importer in Puerto Rico. The Customs Service proceeded to request all pertinent information from Italtrafo during the period covering the Puerto Rican sales. Concurrent with this inquiry, the Customs Service determined that, as other Italtrafo transformers had been sold in Italy and to third countries, constructed value would not be an appropriate basis for appraisal of the U.S. entries. On November 15, 1979, Italtrafo provided information on the two 1974 sales in Puerto Rico and three home market sales.

Following the transfer of authority for administering the antidumping laws from the Treasury Department, the Commerce Department, in March, 1980, initiated a section 751(a) review of Large Power Transformers from Italy. On August 13, 1980, Commerce sent Italtrafo an antidumping questionnaire covering the period September 1, 1977 through June 30, 1980. A reply was requested within thirty days, and Italtrafo was cautioned that any undue delays or lack of response could result in the agency's proceeding on the basis of best information available.

[1] Prior to the enactment of the Trade Agreements Act of 1979, the Department of Treasury had responsibility for the administration of U.S. antidumping duty laws.

On April 14, 1981, counsel for Italtrafo entered a notice of appearance in connection with the administrative review and informed Commerce that Italtrafo had become a division of Ansaldo, S.p.A. On May 19, 1981, more than nine months after the initial request for information by Commerce, counsel for Ansaldo submitted information concerning the 1973 BPA I sale and certain third country sales in 1973–74. No information or data on home market sales was contained in the submission. Ansaldo maintained it made no home market sales to unrelated purchasers within the meaning of 19 C.F.R. § 353.22(b) since all home market customers were related to Ansaldo through a complex chain of government ownership. Instead, Ansaldo argued the review should proceed on the basis of third country sales. A subsequent submission provided a list of Ansaldo's home market and third country customers for the 1972–74 period, but contained no price information and offered no explanation of the relationship between Ansaldo and its home market customers.

On July 1, 1981, Commerce requested information from Ansaldo for the period July 1, 1980 to May 31, 1981, including information on shipments entered before these dates if not previously supplied, and requested a response within thirty days. Three months later, on October 5, 1981, Ansaldo reported it had made no U.S. sales during the period covered by the questionnaire and provided no home market information.

Commerce published a notice of preliminary results of administrative review on April 13, 1982. This notice covered the period from May 2, 1974 through June 10, 1980. The notice stated the ITA was postponing appraisement pending receipt of additional information from Ansaldo. In written comments to the preliminary results, submitted on May 12, 1982, Ansaldo asserted that "the Department has had since June 9, 1981, a complete listing of *all* Ansaldo/Italtrafo sales of *all* markets, *home* and export, for the period of time the Department deemed relevant."

On June 17, 1982, Commerce requested information from Ansaldo for the period June 1, 1981 to May 31, 1982. Again, Commerce sought information on shipments entered before these dates if not furnished in a previous response. Similarly, the questionnaire requested a reply within 30 days and cautioned that undue delay or insufficient response could result in the agency's use of the best information available. On September 22, 1982, Ansaldo, as in the preceding review, reported no sales for the period covered by the questionnaire.

Ansaldo was notified, on September 15, 1982, that the ITA has not resolved the issue of whether home-market sales or third country sales would be used to determine foreign value. Ansaldo was requested to submit further data on home market sales, even if the sales were between related parties. In response, Ansaldo argued that all its home-market sales were to related parties. Ansaldo con-

tended the only comparable transformer sales were of units with a rating of 100 MVA or higher, and that all home market sales in this category were to related parties. Ansaldo did submit data for home-market sales for the 1972–74 period, but limited its submission to the category of sales it deemed comparable.

On February 25, 1983, Commerce advised Ansaldo its response had been inadequate insofar as it related to data on all transformers with a rating of 10 MVA or above. In addition Ansaldo should have provided sales information for the periods subsequent to 1974. Ansaldo, on March 11, 1983, submitted a list of home-market sales for the period 1975–79, but the listing did not include the price information necessary for Commerce to analyze price comparability. The ITA casehandler notified Ansaldo, on March, 1983, that its submission was deficient and Commerce was proceeding on the basis of best information available.

Twice thereafter, on April 8 and again on April 22, 1983, Commerce requested more detailed information on specific home-market sales from Ansaldo. A deadline of May 9, 1983 was extended to July 8, 1983. In the interim, Commerce announced it had established a procedure for selecting home-market units for comparison with units sold to the United States.

Ansaldo's reply to Commerce on July 7, 1983, stated, in part:

> As the information requested * * * cannot legally serve as a basis for the Department's administrative review, requiring that such information be developed by Ansaldo and provided to the Department would impose an unreasonable and unnecessary burden on the company.

Commerce continued to obtain information concerning U.S. imports of transformers sold by Ansaldo from both the Customs Service and Westinghouse. At the same time, Commerce commenced a large-scale study to refine its methodology for use in analyzing U.S. price and foreign market value in all the administrative reviews of large power transformers. The ITA wrote letters, received briefs, and conducted hearings involving all the parties in the transformer proceedings. After analysis of the information received, Commerce, on December 14, 1983, announced the methodology it would use for its determinations and initiated a revised preliminary review of transformers sold by Ansaldo.

By letter dated December 12, 1983, Commerce indicated to Ansaldo its intention to review the four Ansaldo/Italtrafo sales to the United States: BPA I, the two sales in Puerto Rico, and another sale to the Bonneville Power Administration in 1979, BPA II. The agency outlined the information it had received on the first three sales and noted it had received no information on the 1979 BPA II transformer sale. Specific information was requested for a number of Ansaldo home market sales deemed similar to the U.S. sales, and Ansaldo was invited to submit information on other sales it deemed comparable. The ITA had decided that sales between Ital-

trafo and its customers in the home market were sales between unrelated parties in light of the relationship between them. Ansaldo was asked to provide the requested information no later than December 30, 1983, and cautioned that:

> We will not accept partial submissions and failure to provide * * * complete information may result in our not using other information submitted.

On January 10, 1984, counsel for Ansaldo requested a two-month extension of time to prepare a response to the Commerce letter of December 12, 1983. The ITA reply to this request indicated the information was past due and that failure to submit the information by January 27, 1984, would result in Commerce using the best information otherwise available to complete the review.

The information sought from Ansaldo was not provided by the January 27, 1984 deedline. On March 9, 1984, Commerce supplied Ansaldo with an advance copy of the Federal Register notice to be published March 16, 1984. The notice stated:

> Italtrafo failed to provide an adequate response to requests for information. For this firm the Department used the best information available to determine the assessment and estimated antidumping duties cash deposit rates.

A disclosure conference was held on March 19, 1984, at the request of counsel for Ansaldo. At that meeting, the ITA explained the best information available was derived from three sources: (1) information obtained during the Treasury Department's fair value investigation; (2) information provided by the petitioner, Westinghouse; and (3) information supplied by the U.S. Customs Service.

Commerce scheduled a hearing on the revised preliminary results for May 8, 1984, again at Ansaldo's request. Prior to the hearing, Ansaldo submitted documents which, for the first time, provided the contract and specifications for the 1979 BPA II transformer sale. At the hearing Ansaldo accepted some of Commerce's margin calculations while objecting to others and requesting certain additional adjustments.

After considering Ansaldo's objections and comments, the ITA consulted a technical expert on the BPA II unit and the Italian home market unit selected for comparison on the best information available analysis. The technical expert confirmed that data obtained directly from the Bonneville Power Administration substantially corroborated the information submitted to Commerce by Westinghouse in its March 24, 1983 best information submission.

In the final results of administrative review of *Large Power Transformers from Italy,* 49 Fed. Reg. 31313 (August 6, 1984), the ITA declined to make several of the adjustments proposed by both Ansaldo and Westinghouse but submitted after publication of the revised preliminary results. Ultimately the U.S. Customs Service was instructed to assess dumping duties and require a cash deposit

of estimated antidumping duties, at the rate specified by Commerce,[2] on entries of large power transformers manufactured by Ansaldo. In defending its use of the best information available, the agency stated, at Comment 1:

> The statute and regulations provide for the use of best information otherwise available in the context of investigations and section 751 reviews. We must resort to use of best information otherwise available when a party refuses or is unable to supply the Department with adequate information in a timely manner. We agree with Italtrafo that the Department is not required to rely exclusively on information supplied by the petitioner; in fact, we did not rely solely on information provided by Westinghouse. Here, we used certain information provided by the Treasury Department during the fair value investigation in this case and other information provided by the petitioner and the Customs Service. We did not use new information submitted by Italtrafo after publication of the revised preliminary results. Our refusal to use Italtrafo's information is based on Italtrafo's failure to submit adequate information in a timely manner in this review. The fact that the Department's regulations do not specify absolute time limits for submission of information does not nullify the Department's authority to refuse to use selected new information submitted after publication of preliminary results of our review. Clearly the Department, which must make a determination on the administrative record, must, at some time prior to a final determination, establish a point at which information submitted by parties can no longer be considered for purposes of reaching that final determination. Otherwise, we could not fully and properly take into account all the information submitted, or ensure a reasonable opportunity to comment by all interested parties. Parties could effectively delay and frustrate the review process by repeated, untimely piecemeal submissions.
>
> Further, the Department must be able to use the best information otherwise available when a respondent chooses to provide only selected new information at a time so late in the review process that its consideration would cause serious delay and expense to the Department and interested parties. Despite repeated requests, Italtrafo did not furnish the requested information until one week before the hearing, and then furnished only selected new information to supplement the Department's best information.
>
> Accordingly, the Department has properly declined to take such information into account. Specifically, the Department has not considered new information submitted concerning physical characteristics of the transformers, testing, supply of oil, escalation payments, shipment dates, warranties, payment schedules, and packing expenses.

---

[2] Commerce determined the BPA I unit and the two units sold in Puerto Rico had been sold at less than fair value by a margin of 9 percent, and the BPA II unit had been sold at less that fair value by a margin of 92.47 percent.

It is from this determination and agency record that plaintiff presently moves for judgment under Rule 56.1.

Plaintiff has challenged the Commerce determination of the dumping margin with respect to the BPA II transformer sale covered by the third review period. Ansaldo attacks the final results of administrative review on four bases: (1) Commerce erred when it determined Ansaldo and its principal home-market customer (ENEL) were unrelated; (2) Commerce's calculation of foreign market value by reference to an Ansaldo sale to ENEL was erroneous as a matter of law and unsupported by substantial evidence on the record; (3) Commerce acted arbitrarily and capriciously, and not in accordance with law, when it rejected information submitted by Ansaldo after publication of the preliminary determination; and (4) the refusal of Commerce to verify the information submitted by Ansaldo was incorrect as a matter of law.[3]

Defendant and intervenor, Westinghouse, oppose plaintiff's motion on several grounds. Defendant maintains Ansaldo refused to produce information in a timely manner and the ITA thus properly refused to consider plaintiff's submissions after publication of the revised preliminary results. Consequently, defendant argues, the ITA acted in accordance with law in reaching its determination of final results on the basis of the best information available. Westinghouse augments defendant's position and argues further that home market sales to ENEL were properly used in determining the foreign market value for Ansaldo transformers.

As framed by plaintiff, the principal issue presented by this review is the question of whether related party sales in the home-market should be used in determining foreign market value in an administrative antidumping proceeding. While this premise is not determinative in the outcome of this case, its importance merits elucidation, if not resolution, in the present analysis.

Although certain conclusions can be drawn from the record of this proceeding, it is significant that, at this late date, the exact nature of the relationship between Ansaldo (and its predecessor, Italtrafo) and ENEL, Ansaldo's principal home-market customer, remains unclear. Ansaldo, formerly Italtrafo, is controlled by Finmeccanica, S.p.A., which in turn is held by the Institute for Industrial Reconstruction (IRI). IRI is owned by the Italian Government. ENEL, Italtrafo's major purchaser, is the state electric utility and is administered by the Italian Ministry of Industry.

During the course of the underlying review, plaintiff submitted statements which, if accepted as fact, outline a pattern of common ownership and control between Italtrafo and ENEL. Both companies were financially controlled, under various entities, by the Italian Government. There was no competitive bidding between Ansaldo and other home-market manufacturers for sales to ENEL.

[3] The "best information rule" is an explicit exception to the verification requirement. 19 U.S.C. § 1677e(a).

Future contracts were allocated, and prices were established, on a predetermined basis. Taken together, plaintiff's statements allege a related party relationship between Italtrafo and ENEL within the meaning of 19 CFR § 353.22(b) and section 771(13) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1677(13).

Under 19 CFR § 353.22(b), sales between related parties "ordinarily will not be used in the determination of foreign market value unless such sales are demonstrated to the satisfaction of the Secretary to be at prices comparable to those at which such or similar merchandise is sold to persons unrelated to the seller."

A dispute concerning whether to use related party home-market sales in determining foreign market value ordinarily arises in a different context. It is usually the domestic petitioner who objects to the use of such data in agency formulations. Related party home-market sales tend to be lower in price because related companies generally decrease prices to each other to the advantage of the principal entity. The present situation reflects the opposite scenario. Westinghouse seeks inclusion of the related party home-market sales data, alleging Ansaldo uses home-market sales at very high prices to subsidize exports to the United States at sharply lower prices. For its part, Ansaldo maintains its relationship with ENEL permitted Ansaldo to charge artificially high, nonmarket prices to ENEL in order to permit the government of Italy, through its various divisions and holdings, to implement national and regional social policies.[4]

The respective parties have advanced several arguments involving the use of related party home-market sales data in the antidumping schema. However, a definitive resolution of this issue need not be reached in the case at bar. Instead, the Court is compelled to resolve this matter on a more fundamental basis, the grounds for which are clearly evident upon review of the administrative record.

Under 19 U.S.C. § 1673, if the price for goods in the United States is less than the foreign market value of the goods, the difference between the two is the margin of dumping in the United States and antidumping duties must be paid to offset it. The determination of foreign market value begins with price in the producer's home market. 19 U.S.C. § 1677b(a)(1)(A). If home-market sales are inadequate for comparison, the foreign market value can be determined using either sales to third countries other than the United States (19 U.S.C. § 1677b(a)(1)(B)) or a non-price method known as constructed value, in which the value is determined from the costs of materials, the cost of production, general expenses and profit. 19 U.S.C. § 1677b(a)(2) and (e). *Zenith Corp.* v. *United States*, 9 CIT ——, Slip Op. 85–30 (March 13, 1985).

[4] For example, Ansaldo claims ENEL was willing to pay a premium for transformers manufactured in southern Italy in order to alleviate regional unemployment.

The U.S. Department of Commerce, specifically the ITA, is charged, under the Trade Agreements Act of 1979, with the administration of the antidumping laws. In conducting reviews under section 751(a), the ITA requests pertinent information from those who will be affected by the results of the review. In order to comply with the requirements of the statute, the ITA provides participants a specified period in which to provide the information requested. After this period expires, the ITA must refuse to consider untimely submitted information and instead rely on the best information available. *Atlantic Sugar, Ltd.* v. *United States,* 744 F.2d 1556 (1984); *UST, Inc.* v. *United States,* 9 CIT ——, Slip Op. 85-78 (July 31, 1985).

19 U.S.C. § 1677e(b) provides:

> (b) Determinations to be made on best information available. In making their determinations under this title [19 USCS § 1671 et seq.], the administering authority and the Commission shall, whenever a party or any other person refuses or is unable to produce information requested in a timely manner and in the form required, or otherwise significantly impedes an investigation, use the best information otherwise available.

Review of the administrative record reveals a consistent pattern of unresponsive, insufficient, and untimely submissions by Ansaldo to repeated attempts by Commerce to elicit information pertinent to the underlying reviews. Based on the evidence before the Court, Ansaldo's failure to furnish the information requested completely justified the Commerce Department's use of the best information available under 19 U.S.C. § 1677e(b). Accordingly, for the reasons set forth below, the Court finds for the defendant and affirms the results of the administrative review.

As previously noted, plaintiff has limited its challenge to the dumping margin determination pertaining to the 1979 BPA II transformer sale. Commerce first learned of the BPA II sale from Westinghouse in February of 1980. Thereafter, beginning on August 13, 1980, Commerce requested, on three separate occasions, information pertinent to the BPA II and any other sales during the relevant periods. In response to these requests, Ansaldo asserted it made no home-market sales to unrelated parties. Ansaldo did submit (untimely) information on the 1973 BPA I sale and certain third country sales in 1973-74. However, neither home-market sales data nor price information of any kind was provided in these submissions. Finally, on May 1, 1984, Ansaldo provided information intended to supplement Commerce's best information available determination on the BPA II sale. As the revised preliminary results of administrative review had already been published (March 16, 1984), Commerce rejected Ansaldo's submission as untimely and instead relied on the data accumulated on the basis of best information available.

The administrative record indicates Ansaldo was either conspicuously uncooperative with Commerce during the course of the underlying reviews or laboring under severe misconceptions as to the administrative procedure involved in the administration of U.S. antidumping law. Initially, the Court observes that neither the Treasury Department nor Commerce ever received a response from Ansaldo by the requested date. This fact, in and of itself, provides sufficient basis to sustain Commerce's use of the best information available. Section 751 reviews are conducted and must be completed within specific time-frames. The procedures involved in these reviews make it imperative the requested information be submitted within a period that allows Commerce sufficient time for adequate analysis and comment while still meeting statutory deadlines. As in the present case, when the information requested is not timely provided, Commerce has no choice but to proceed with its review and reach its determinations using the best information available. *UST, Inc.* (supra).

Of equal concern to the Court is plaintiff's propensity to draw conclusions of both factual and legal significance on matters properly within Commerce's domain. The administrative record discloses several instances in which Ansaldo chose not to submit the information requested because Ansaldo had concluded such information could not serve as a basis for Commerce's administrative review. It was Ansaldo that concluded all its home-market customers were related parties and thus refused to submit home-market sales data. It was Ansaldo that concluded the administrative review should proceed on the basis of third country sales. It was Ansaldo that concluded the only comparable transformer sales were of units with a rating of 100 MVA or higher when Commerce requested information on units with a rating of 10 MVA or higher. Finally, it was Ansaldo that concluded furnishing home-market and U.S. sales price data imposed an "unreasonable and unnecessary burden on the company." Such conclusions, reached unilaterally with no foundation in statute or administrative practice, are inherently flawed. It is Commerce, not the respondent, that determines what information is to be provided for an administrative review.

The net effect of Ansaldo's failure to submit the requested information, based on its own conclusory assertions, was to preclude Commerce's analysis and consideration of the merits of Ansaldo's arguments. Ansaldo provided no information upon which Commerce could have determined the U.S. price of the BPA II transformer. Similarly, the ITA had insufficient information to determine the foreign market value of BPA II, which necessarily begins with the price in the producer's home market. Although Ansaldo did provide third country sales data for the review period covering the BPA I sale and the two sales in Puerto Rico, the data submitted for the period covering the BPA II sale was inadequate, and

Commerce was unable to determine the foreign market value using third country sales methodology. Additionally, Ansaldo provided no independent evidence of the exact nature of its relationship with its home-market customers. In the event Commerce had accepted the argument that Ansaldo was "related" to its home-market customers, Ansaldo provided no home-market sales data which Commerce could have used in an evaluation of price comparability of sales to related and unrelated parties. These facts indicate a failure, on Ansaldo's part, "to produce information requested in a timely manner and in the form required", and under the circumstances Commerce's resort to the best information available was entirely justified. 19 U.S.C. § 1677e(b).

In so ruling, the Court seeks to encourage the cooperation of participants to the reviews conducted at the administrative level. The relationship between administrative participants and the agency involved ought not be adversarial in nature. This is particularly true where, as in this case, the role of the agency is administrative rather than quasi-judicial. Indeed, as the result in this case demonstrates, the information sought by the agency must be provided in order to assure its full consideration before both the agency and the reviewing court. The Court is aware that information sought in section 751 reviews may have a significance wholly independent from its proffered use, and respondents may be reluctant to share material they deem irrelevant to such reviews. However, the consequence of failing to provide adequate and timely information is to leave Commerce with no alternative but to proceed with its review relying upon the best information available. Simply stated, to ensure the agency's full consideration of their position and rights under the antidumping law, respondents must comply with procedural guidelines and thereby afford themselves the opportunity to respond and participate in the review in a meaningful manner.

Accordingly, the Court finds the Commerce determination to conduct the review using the best information available to be fully supported by substantial evidence on the record and otherwise in accordance with law. The final results of the administrative review involving *Large Power Transformers from Italy* (49 Fed Reg. 31313, August 6, 1984) are therefore affirmed, and this action is hereby dismissed. Judgment will be so entered.

(Slip Op. 86-11)

UNITED STATES, PLAINTIFF *v.* ROCKWELL INTERNATIONAL CORP., DEFENDANT

Court No. 82-12-01744

Before DICARLO, *Judge.*

Defendant moves for summary judgment on both charges in action alleging merchandise was entered (1) by means of material and false statement and (2) by means

of material omissions in negligent violation of 19 U.S.C. § 1592. Plaintiff cross-moves for summary judgment on charge alleging entries based upon material and false statement.

Defendant's motion for summary judgment on material omissions charge is precluded by the existence of a genuine issue of material fact. On the material and false statement charge, the Court holds that defendant filed a false statement and that the statement is material within the meaning of section 1592. A genuine issue of material fact precludes a finding on the question whether the material and false statement was filed as a result of negligence.

[Defendant's motion for summary judgment is denied. Plaintiff's cross-motion for summary judgment is granted in part.]

(Decided January 22, 1986)

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch, Civil Division, Department of Justice (*A. David Lafer*) for plaintiff.

Glad & Ferguson (Edward N. Glad) for defendant.

Memorandum Opinion and Order

DiCarlo, *Judge:* The United States brings this action against defendant Rockwell International Corporation (Rockwell) to recover a civil penalty for alleged negligent violations of section 592 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1592 (1982). The complaint alleges that 223 entries of nickel cadmium batteries imported from Mexico over a one year period were entered by means of material and false statement and by means of material omissions.

Rockwell moves under Rule 56 of the Rules of this Court for summary judgment on material and false statement and material omission charges. The government opposes Rockwell's motion and cross-moves for summary judgment on the material and false statement charge. Rockwell's motion is denied and plaintiff's motion is granted in part.

Uncontroverted Facts

The following facts are not in dispute:

Beginning in late 1977, Rockwell imported at Calexico, California, pin ball machine control boards assembled in Mexico, each containing a small nickel cadmium battery. The control boards were imported under item 807.00, Tariff Schedules of the United States (TSUS), as "[a]rticles assembled abroad in whole or in part of fabricated components, the product of the United States * * *." Item 807.00, TSUS, imposes a duty upon the full value of the imported article, less the cost or value of United States components. The entries listed in the complaint contained a total of 51,995 batteries, each having a dutiable value of $2.30.

The estimated duties deposited by Rockwell in connection with the control board entries were calculated on the basis of an estimated declaration of assembly costs filed by Rockwell with the United States Customs Service (Customs) on November 21, 1977. The estimated declaration listed the components of the control

boards and indicated whether they were United States or foreign origin.[1] The declaration listed the batteries as components of United States origin. The batteries had actually been manufactured in Mexico and sold to defendant by the General Electric Company.

Each battery was marked "assembled in Mexico." Rockwell never physically inspected the batteries prior to their exportation to Mexico for assembly into the control boards. Rockwell never received, or does not recall receiving, an executed origin of manufacturing declaration from General Electric.

The country of origin of the batteries was not made known to Customs until on or about March 27, 1979, when Rockwell filed a revised estimated declaration of assembly costs in which the batteries were shown to be of foreign origin.[2]

Discussion

The complaint alleges that the batteries were entered in violation of 19 U.S.C. § 1592(a)(1)(A)(i) by means of material and false statements on the estimated declaration of assembly costs and entry documents. The complaint also alleges that the batteries were entered by means of material omissions in violation of section 1592(a)(1)(A)(ii) on the grounds than the batteries were dutiable separately from the control boards and should have been listed on a separate line on the entry papers.

On its motion for summary judgment, Rockwell argues (1) the action is barred by the applicable statute of limitations because it was commenced more than five years after the filing of the estimated declaration of assembly costs on November 21, 1977, (2) the entry documents contain no false statements and the false statement contained in the declaration of estimated assembly costs is not material within the meaning of section 1592, (3) the entries were not made by means of material omissions since the control boards and batteries were entireties, and (4) the false statement was not filed as a result of negligence.

The government opposes Rockwell's motion of summary judgment on the material and false statement charge and the material omissions charge, and cross-moves for summary judgment on the material and false statement charge. On its cross-motion for summary judgment, the government argues (1) the timeliness of the action is governed by the entry dates, (2) Rockwell's motion for

[1] 19 C.F.R. § 10.24 (1977) provides that in connection with the entry of assembled articles claimed to be subject to exemption under item 807.00, TSUS, the assembler of the articles must file a declaration setting forth the components which are products of the United States. The declaration must be accompanied by an endorsement by the importer attesting to the correctness of the information provided on the declaration. *Id.* § 10.24(2). 19 C.F.R. § 10.24(g) states:

Responsibility of correctness. Subject to the civil and criminal sanctions provided by law for false or fraudulent entries, the importer has the ultimate responsibility for supplying all information needed by the Customs Service to process an entry, and for the completeness and truthfulness of such information. If certain information cannot be supplied by the assembler, it must be provided by the importer.

[2] Rockwell does not claim to have disclosed the circumstances of the alleged violations in accordance with the prior disclosure provisions of section 1592. *See* 19 U.S.C. § 1592(c)(4) (1982).

summary judgment on the material omissions charge is precluded by the existence of a genuine issue of material fact, (3) the entries were made by means of a false statement because the value of the batteries was listed as nondutiable in the estimated declaration of assembly costs, (4) the false statement is material, and (5) Rockwell was negligent in filing the material and false statment.

The timeliness of this action is governed by 19 U.S.C. § 1621 (1982), which in relevant part states:

> That in the case of an alleged violation of section 1592 of this title arising out of gross negligence or negligence, such suit or action shall not be instituted more than five years after the date the alleged violation was committed.

Under this section, the five year limitations period begins to run upon the commission of the alleged violation of section 1592. Section 1592 prohibits, *inter alia*, the entry of merchandise into the commerce of the United States by means of any document which is material and false. 19 U.S.C. § 1592(a)(1)(A). Therefore, the timeliness of the action is determined not be the date on which the estimated declaration of assembly costs was filed, but rather by the dates on which Rockwell entered the merchandise.

This action is timely since the entries which are the subject of the complaint occurred less than five years prior to commmencement of the action.

With respect to Rockwell's motion for summary judgment on the material omissions charge, both parties have submitted affidavits as to whether the batteries were soldered into the control boards. This question is material to whether the control boards and batteries were entireties, and the entireties issue is material to whether the batteries were negligently omitted from a separate line on the entry documents. Since the affidavits raise a genuine issue of material fact, Rockwell's motion for summary judgment on the material omissions charge is denied.

The Court next turns to the parties' cross-motions for summary judgment on the government's allegation that Rockwell, by negligence, entered the batteries by means of a material and false statement. Rockwell admits that it filed a document containing a false statement with Cutoms, saying: "The only false statement that appears in any paper filed with U.S. Customs is contained in the initial estimated declaration of dutiable costs filed with U.S. Customs by defendant on November 21, 1977, wherein the recharageable batteries were stated to be of U.S. origin when in fact these batteries were foreign." [3] Since estimated duties on the entries were calculated based upon the estimated declaration of assembly costs, and the estimated declaration listed the battery components as nondutiable, the batteries were entered by means of false statement.

---

[3] Defendant's Memorandum in Support of its Motion for Summary Judgment, at 1.

The Court now addresses whether genuine issues of material fact preclude resolution of the questions (1) whether the false statement was material, and (2) whether the false statement was negligently filed.

A question of materiality involves a legal issue to be decided by the Court. *See, e.g., Sinclair* v. *United States,* 279 U.S. 263, 298–99 (1929); *United States* v. *Ackerman,* 704 F.2d 1344, 1347, *reh'g denied,* 719 F.2d 1283 (5th Cir. 1983). "In determining whether a false statement is material, the test is whether it has a natural tendency to influence, or was capable of influencing, the decision of the tribunal in making a determination required to be made." *United States* v. *Krause,* 507 F.2d 113, 118 (5th Cir. 1975) (citing *Blake* v. *United States,* 323 F.2d 245, 246 (8th Cir. 1963); *Gonzales* v. *United States,* 286 F.2d 118, 122 (10th Cir. 1960)). The Court also notes that in 1984 Customs issued a definition of materiality under section 1592, which states in part: "A document, statement, act, or omission is material if it has the potential to alter the classification, appraisement, or admissibility of merchandise, or the liability for duty * * *." 19 C.F.R. App. B to Pt. 171 (1984).

In this case, the Court holds that the measurement of the materiality of the false statement is its potential impact upon Customs determination of the correct duty for the imported merchandise. *Cf. United States* v. *Taylor,* 574 F.2d 232, 235. *reh'g denied,* 576 F.2d 931 (5th Cir.), *cert. denied,* 439 U.S. 893 (1978). Under this standard, a statement is material which identifies components to be of United States origin and nondutiable, when in fact the components are foreign and had an aggregate dutiable value of over $119,000.

Rockwell argues its false statement is not material because the only purpose for listing country of origin data is to arrive at a sum that represents the estimated dutiable cost. The Court disagrees. While the dutiable values of components listed in estimated declarations may reasonably be expected to represent only estimations, *see* 19 C.F.R. § 10.21 (1977), the primary purpose of filing documentation in connection with foreign assembly operations is to ascertain which components are dutiable and which are not.[4] Although Rockwell argues that the false statement is not material because it overestimated its duties on the control boards, section 1592 is expressly applicable "[w]ithout regard to whether the United States is or may be deprived of all or a portion of any lawful duty thereby." 19 U.S.C. § 1592(a)(1).

The final issue is whether there exists a genuine issue of material fact on the question of negligence. 19 U.S.C. § 592(c) states in part:

> if the monetary penalty is based on negligence, the United States shall have the burden of proof to establish the act or omission constituting the violation, and the alleged violator

[4] *See* 19 C.F.R. § 10.24 (1977); *supra,* note 1.

> shall have the burden of proof that the act or omission did not occur as a result of negligence.

Since the act alleged to constitute a violation of section 1592 has been established, section 1592(c)(4) places upon Rockwell the burden of proving that the filing of the false statement did not occur as a result of negligence.

Rockwell contends that it was not negligent since it adopted reasonable procedures in order to comply with Customs requirements applicable to foreign assembly operations. Rockwell states that its internal regulations require the furnishing of country of origin certificates to suppliers so that accurate country of origin information can be received. Rockwell argues that in this case it did not receive country of origin certification, but since its supplier was located in the United States, it could reasonably assume that the batteries were of United States origin.

The Court does not comment on the merit of Rockwell's contentions, but finds that it has raised a genuine issue of material fact on the question of negligence.[5] "Summary judgment is appropriate only if there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law." *Albert* v. *Kevex Corp.*, 729 F.2d 757, 762, *reh'g granted,* 741 F.2d 396 (Fed. Cir. 1984). Summary judgment on the question of negligence is denied.

Conclusion

Rockwell's motion for summary judgment on the material omissions charge is precluded by the existence of a genuine issue of material fact.

On the material and false statement charge, Rockwell's motion for summary judgment is denied and the government's cross-motion for summary judgment is granted in part. The Court finds that Rockwell filed the false statement giving rise to the alleged violations, and holds that the false statement is material within the meaning of section 1592. Under Rule 56(e) of the Rules of this Court, the uncontroverted facts set forth in this opinion shall be deemed established with respect to the triable issue of negligence. A conference will be held within ten days to discuss the manner in which the action shall proceed. So ordered.

---

[5] The Court is aware of no case which defines negligence under section 1592. However, negligence has been defined in the context of another federal penalty statute as "lack of due care or failure to do what a reasonable and ordinarily prudent person would do under the circumstances." *Marcello* v. *Comm'r,* 380 F.2d 499, 506 (5th Cir. 1967) (penalty of negligence underpayment of taxes, § 6653(a) of the Internal Revenue Code of 1954, [current version at 26 U.S.C. § 6653(a) (1982)]), *cert. denied,* 389 U.S. 1044 (1968); *see Zmuda* v. *Comm'r,* 731 F.2d 1417, 1422, (9th Cir. 1984). In 1984, a definition of negligence under section 1592 was published in an appendix to the Customs Regulations. Customs definition states in part: "As a general rule, a violation is determined to be negligent if it results from the the offender's failure to exercise reasonable care and competence to ensure that a statement made is correct." 19 C.F.R. App. B to Pt. 171 (1984).

(Slip Op. 86-12)

WILLIAM D. BAILEY & FRANK WASSON, D/B/A BAILEY & WASSON TRADING CO., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 81-10-01437

Before RE, *Chief Judge.*

MEMORANDUM OPINION AND ORDER

Plaintiff contended that Rolex watches imported from Switzerland and Hong Kong were improperly appraised on the basis of export value, and should have been appraised on the basis of United States value.

Held: Plaintiff has not introduced evidence to show that the merchandise was improperly appraised, and, therefore, failed to rebut the presumption of correctness that attaches to the government's determination.

[Judgment for defendant.]

(Decided January 23, 1986)

John R. Heard, at the trial and on the brief, for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch (*Jerry P. Wiskin,* at the trial and on the brief), for the defendant.

RE, *Chief Judge:* The question presented in this case pertains to the proper valuation, for customs duty purposes, of certain Rolex watches and watch bracelets imported from Switzerland and Hong Kong. The watches are comprised of three components: the watch case, the watch movement, and the watch band or strap.

The Customs Service appraised the merchandise on the basis of export value, in accordance with section 402(b) of the Tariff Act of 1930, 19 U.S.C. § 1401a(b) (1976) (amended 1979). Plaintiff contends that export value was an improper basis of valuation, and that the imported merchandise should have been appraised on the basis of United States value, pursuant to 19 U.S.C. § 1401a(c). Plaintiff also contends that the valuation was based on an inappropriate allocation of value among the various components of the imported merchandise.

The Tariff Act defines export value as:

> the price, at the time of exportation to the United States of the merchandise undergoing appraisement, at which such or similar merchandise is freely sold or, in the absence of sales, offered for sale in the principal markets of the country of exportation, in the usual wholesale quantities and in the ordinary course of trade, for exportation to the United States, plus, when not included in such price, the cost of all containers and coverings of whatever nature and all other expenses incidental to placing the merchandise in condition, packed ready for shipment to the United States.

Tariff Act of 1930 § 402(b), 19 U.S.C. § 1401a(b) (1976) (amended 1979).

The portion of the Act which pertains to United States value provides that:

> For the purposes of this section, the United States value of imported merchandise shall be the price, at the time of exportation to the United States of the merchandise undergoing appraisement, at which such or similar merchandise is freely sold or, in the absence of sales, offered for sale in the principal market of the United States for domestic consumption, packed ready for delivery, in the usual wholesale quantities and in the ordinary course of trade, with allowances made for—
>
> (1) any commission usually paid or agreed to be paid, or the addition for profit and general expenses usually made, in connection with sales in such market of imported merchandise of the same class or kind as the merchandise undergoing appraisement;
>
> (2) the usual costs of transportation and in surance and other usual expenses incurred with respect to such or similar merchandise from the place of shipment to the place of delivery, not including any expenses provided for in subdivision (1) of this subsection; and
>
> (3) the ordinary customs duties and other Federal taxes currently payable on such or similar merchandise * * * for which vendors at wholesale in the United States are ordinarily liable.

Tariff Act of 1930 § 402(c), 19 U.S.C. § 1401a(c) (1976) (amended 1979).

Upon liquidation, the imported merchandise was appraised at the actual price by plaintiff. Plaintiff asserts that the United States value of the merchandise would be 39 percent of the United States retail price of the watches.

The question presented is whether, within the meaning of the pertinent statutory provisions, the proper basis for violation of the imported merchandise is export value, as determined by Customs, or United States value, as claimed by plaintiff.

After a careful examination of the evidence adduced at trial, the arguments of the parties, and the relevant case law, it is the determination of the Court that plaintiff has not overcome the presumption of correctness that attaches to the government's determination. *See* 28 U.S.C. § 2639(a)(1) (1982); *Diamax Hawaii, Ltd.* v. *United States*, 4 CIT 162, 165–66 (1982). Therefore, the valuation of the imported merchandise by the Customs Service is affirmed.

At trial, the Court heard the testimony of plaintiff's only witness, Mr. William D. Bailey, an owner of Bailey and Wasson Trading Company (Bailey & Wasson). Mr. Bailey testified that Bailey & Wasson imported Rolex watches from 1978 through 1981. Since Bailey & Wasson was not a licensed franchise dealer of Rolex watches, it could not purchase watches from Rolex's exclusive distributors. Consequently, Bailey & Wasson purchased the watches from businesses that had obtained them from an exclusive distribu-

tor. In turn, Bailey & Wasson would sell the watches to domestic retailers.

Mr. Bailey also testified that Customs' allocation of value to the watch case, movement, and band was incorrect. However, he was unable to suggest an alternative allocation, and stated that Bailey & Wasson relied on the allocations provided by the seller of the watches in Switzerland.

During the course of Mr. Bailey's testimony, plaintiff introduced five exhibits into evidence. Plaintiff's exhibits pertained to the importation of Rolex watches purchased from Bucherer Co., Ltd., of Lucerne, Switzerland, a licensed dealer of Rolex watches. One of plaintiff's exhibits consisted of an invoice for 10 watches sold by Bucherer to Bailey & Wasson. Mr. Bailey, on cross-examination, testified that the invoice provided by Bucherer did not reflect the actual price paid by Bailey & Wasson, but undervalued or understated the price actually paid for the watches. On cross-examination, Mr. Bailey also stated that Bailey & Wasson, during 1978 to 1980, resold imported watches to retail jewelers. In addition, he admitted that Bailey & Wasson was a substantial importer of watches from Hong Kong during the relevant period.

At trial, defendant introduced into evidence a copy of a request for admissions, which were deemed admitted pursuant to Rule 36 of the Rules of this Court. The admissions stated:

> 1. For each of the entries covering merchandise exportations from Hong Kong * * * the country of exportation for purposes of appraisement is Hong Kong rather than Switzerland.
> 2. At the time of exportation of the merchandise covered by the entries * * * such or similar merchandise was freely sold or offered for sale in Hong Kong for exportation to the United States.
> 3. Sales by Bucherer to Bailey & Wasson were sales to purchasers at the wholesale level.

In its post-trial brief, plaintiff devotes its entire arguments to its contention that it "encountered substantial difficulties in obtaining necessary factual information to support the exact amount of additional [duties it] paid." Hence, as an alternative to a judgment granting the relief sought, it requests post-trial discovery.

The defendant submits that plaintiff's request for post-trial discovery is without foundation in law and is improper. It also contends that plaintiff has failed to sustain its burden of proving that the appraisements were incorrect.

Plaintiff has not shown any basis for its request for post-trial discovery. In its brief, plaintiff states that "discovery was sought from the Government in this matter, without success," and that its request for documents under the Freedom of Information Act (FOIA) was denied by the Customs Service. Plaintiff's proper remedy to an objection to discovery is to move to compel pursuant to Rule 37(a) of the Rules of this Court. *See J.M. Cleminshaw & Co.* v. *City of*

Norwich, 93 F.R.D. 338, 345 n.2 (D. Conn. 1981). In its response to defendant's request for trial, plaintiff stated that it had not completed discovery, and that it would "promptly file a discovery motion." Plaintiff, however, chose not to move to compel discovery, nor did it challenge the denial of the FOIA request. Since plaintiff had ample time and opportunity before trial to develop its case, its request for post-trial discovery is denied.

Under the Tariff Act of 1930, export value is the preferred statutory basis for valuation of imported merchandise. 19 U.S.C. § 1401a(a)(1)–(4); *see, e.g., Magnesium Elektron Inc.* v. *United States*, 64 Cust. Ct. 728, 735, R.D. 11709 (1970). Moreover, it is well-established that in order to prove United States value plaintiff must first negate the existence of an export value for such or similar merchandise. *See Boyle & Co.* v. *United States*, 2 CIT 222, 225 (1981); *Glenside Steel Co.* v. *United States*, 71 Cust. Ct. 23, 32, C.D. 4466, 364 F. Supp. 1398 (1973), *aff'd*, 62 CCPA 1, C.A.D. 1133, 503 F.2d 563 (1978).

From the record, it appears that plaintiff's chief argument in attacking export value as the proper basis for valuation is that the merchandise could not be purchased directly from Rolex or its exclusive distributors, and, therefore, was not sold or offered for sale in the usual wholesale quantities. The cases, however, hold that, in certain instances, sales by wholesalers outside of the manufacturer's normal channels of distribution may be appropriate to determine the proper basis of value. *See, e.g., Maher-App & Co.* v. *United States*, 64 Cust. Ct. 598, 605–06, R.D. 11690 (1970); *Glanson Co.* v. *United States*, 31 Cust. Ct. 473, 475, A.R.D. 33 (1953); *see also United States* v. *H.W. Robinson & Co.*, 19 CCPA 274, 276, T.D. 45436 (1932). Thus, it is clear that merchandise may be offered for sale in the usual wholesale quantities by sellers other than the manufacturer or exclusive distributor of the manufacturer.

Plaintiff in this case argues that its purchases of the Rolex watches were retail purchases, and that the merchandise was not freely sold or offered for sale in the usual wholesale quantities. This argument, however, is without merit. Although plaintiff's witness sought to establish that the purchases were retail purchases, his testimony, on direct and cross-examination, shows clearly that the purchases by Bailey & Wasson were wholesale purchases. The record leaves no doubt that Bailey & Wasson purchased wholesale quantities of the watches, and, in turn, sold them to retail jewelers. The record also shows that plaintiff admitted that Bucherer's sales to Bailey & Wasson were sales "at the wholesale level." At trial, although plaintiff was given the opportunity, it was not able to refute this admission. Plaintiff's witness also stated that Bailey & Wasson was a "substantial importer" of watches from Hong Kong. Therefore, the Court finds that plaintiff purchased the imported watches in the usual wholesale quantities for exportation to the United States.

Although plaintiff is dissatisfied with the basis of appraisement of its merchandise, it has not introduced any evidence that would show that the merchandise was improperly appraised by the Customs Service. The record shows that the Rolex watches were purchased in the usual wholesale quantities for exportation to the United States, and that Bailey & Wasson resold the watches to retail jewelers. Therefore, it is the determination of the Court that plaintiff has not rebutted the presumption of correctness that attaches to the government's determination. Accordingly, the appraised values are affirmed, and the action is dismissed.

(Slip Op. 86–13)

NATIONAL JUICE PRODUCTS ASSOCIATION, ET AL., PLAINTIFFS *v.* UNITED STATES, ET AL., DEFENDANT

Court No. 85–11–01611

OPINION

(Decided January 30, 1986)

[Defendant's motion to dismiss denied. Plaintiffs' motion for preliminary injunction denied. Plaintiffs' motion for declaratory relief granted in part.]

Collier, Shannon, Rill & Scott (Lauren R. Howard, Paul C. Rosenthal, Michael R. Kershow), for plaintiffs.

Richard K. Willard, Assistant Attorney General, *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, *Barbara M. Epstein*, Civil Division, United States Department of Justice, for defendants.

RESTANI, *Judge:* This case involves a United States Customs Service (Customs) ruling that country-of-origin marking requirements apply to frozen concentrated orange juice and reconstituted orange juice that contain imported concentrated orange juice for manufacturing. 19 U.S.C. § 1304 (1982 & West Supp. 1985) (country-of-origin marking requirements); C.S.D. 85–47, 19 Cust. Bull. No. 39 at 21 (Sept. 4, 1985) (Ruling No. 728557). This ruling is being challenged by plaintiffs, the National Juice Products Association (NJPA) [1] and

origin. Officer Springer's opinion was based on a recent Customs determination that found country-of-origin marking requirements applicable to processed honey. C.S.D. 84–112, 18 Cust. Bull. 1106 (July 2, 1984). In his directive, Officer Springer advised Customs officers at the various ports to notify importers of manufacturing concentrate of this contemplated change in policy.

On April 22, 1985, plaintiffs requested that Customs issue a binding ruling, pursuant to 19 C.F.R. § 177.2 (1985), as to the applicability of the country-of-origin marking requirements of 19 U.S.C. § 1304 to frozen concentrated orange juice and reconstituted orange juice that contain imported manufacturing concentrate. On September 4, 1985, Customs issued a ruling in response to plaintiffs' April 22 request. C.S.D. 85–47, 19 Cust. Bull. No. 39 at 21. Customs held that imported manufacturing concentrate is not substantially transformed in the process that converts the manufacturing concentrate into frozen concentrated orange juice or reconstituted orange juice. Consequently, Customs held that the country-of-origin certification requirements of 19 C.F.R. § 134.25 (1985) apply to final repacked orange juice products that contain any foreign manufacturing concentrate entered for consumption or withdrawn from warehouse on or after January 1, 1986. Specifically, the importer must certify to Customs either that the retail package will be properly marked with the country of origin or that the importer will notify the repacker of the marking requirements. All retail packages of orange juice subject to the ruling must be marked with either the country of origin of the manufacturing concentrate or the phrase "This product contains foreign concentrate from ————————." If the product contains concentrate from more than one foreign country, the package must list all such countries. *Id.* at 28. Customs also noted that this decision overruled a 1979 ruling, C.S.D. 80–88, 14 Cust. Bull. 865 (Aug. 17, 1979) (Ruling No. 710823), which held that the reconstitution of orange juice is a substantial transformation of the frozen concentrate. C.S.D. 85–47, 19 Cust. Bull. No. 39 at 28.

In a letter dated October 21, 1985, the NJPA requested that Customs postpone the implementation date of the September 4 ruling until January 1, 1987. The NJPA based this request on the need of the domestic orange juice industry for additional time to secure packaging in compliance with Customs' ruling and to reduce existing packaging inventory. A similar request was made by the Florida Citrus Commission and the State of Florida Department of Citrus in a letter dated October 25, 1985. Customs subsequently extended the effective date of the marking ruling from January 1 to March 1, 1986. 19 Cust. Bull. No. 50 at 15 (Dec. 11, 1985).

Plaintiffs have moved for pre-importation review of the September 4 rulings, claiming that this court has jurisdiction over the matter pursuant to 28 U.S.C. § 1581(i)(4) (1982) or, in the alterna-

tive, 28 U.S.C. § 1581(h) (1982).[2] Defendant contends that the court lacks jurisdiction under either of those provisions.

Defendant argues that this case has been brought prematurely and should only be reviewable following protest proceedings under 19 U.S.C. §§ 1514 and 1515 (1982 & West Supp. 1985); *see* 28 U.S.C. § 1581(a) (1982) (Court of International Trade jurisdiction following protest and denial). The customary and generally preferred avenue of review is the traditional protest route. In this case, however, currently plaintiffs cannot pursue section 1581(a) review. C.S.D. 85-47 will not be in effect until March 1, 1986. Therefore, plaintiffs cannot import a shipment to test the ruling at this time. In addition, under certain circumstances a plaintiff need not complete the protest procedure before bringing a civil action. One of those circumstances is when the action falls within the jurisdiction of section 1581(h).[3]

The Court of Appeals for the Federal Circuit has defined the requirements for invoking this court's declaratory judgment jurisdiction: [4]

> (1) judicial review must be sought prior to importation to goods;
>
> (2) review must be sought of a ruling, a refusal to issue a ruling, or a refusal to change such ruling;
>
> (3) the ruling must relate to certain subject matter; and
>
> (4) it must be shown that irreparable harm will occur unless judicial review is obtained prior to importation.

American Air Parcel Forwarding Co. v. *United States,* 718 F.2d 1546, 1551-52 (Fed. Cir. 1983), *cert. denied,* 104 S. Ct. 1909 (1984) (cited in *718 Fifth Avenue Corp.* v. *United States,* 7 CIT ——, Slip Op. 84-39 at 3-4 (April 13, 1984)). Since defendant challenges jurisdiction under section 1581(h), plaintiffs have the burden of demonstrating that jurisdiction exists. *718 Fifth Avenue* at 3; *Lowa, Ltd.*

---

[2] As a preliminary matter, the court observes that § 1581(i) is the residual jurisdiction of this court. *United States* v. *Uniroyal, Inc.,* 69 CCPA 179, 182-83, 687 F.2d 467, 471-72 (1982); *Ass'n of Food Indus., Inc.* v. *von Raab,* 9 CIT ——, Slip Op. 85-128 at 4 (Dec. 17, 1985); *Vivitar Corp.* v. *United States,* 7 CIT ——, 585 F. Supp. 1419, 1424-25 (1984), *aff'd,* 761 F.2d 1552, 1559 (1985). As such, it may only be invoked when other available avenues of jurisdiction are "manifestly inadequate or necessary because of special circumstances to avoid extraordinary and unjustified delays caused by the exhaustion of administrative remedies." *Manufacture de Machines du Haut-Rhin* v. *von Raab,* 6 CIT ——, 569 F. Supp. 877, 882-83 (1983). *Accord American Ass'n of Exporters and Importers—Textile and Apparel Group* v. *United States,* 751 F.2d 1239, 1246 (Fed. Cir. 1985); *Uniroyal,* 69 CCPA at 187, 687 F.2d at 475 (Nies, J., concurring); *United States Cane Sugar Refiners' Ass'n* v. *Block,* 69 CCPA 172, 175 n.5, 683 F.2d 399, 402 n.5 (1982); *Vivitar,* 7 CIT at ——, 585 F. Supp. at 1425. Consequently, the two bases of jurisdiction asserted by plaintiffs must be addressed in reverse order from the priorities given them by plaintiffs. Section 1581(i) will only be a basis of jurisdiction if § 1581(h) is manifestly inadequate or otherwise entirely inappropriate.

[3] The legislative history of § 1581(h) outlines its relationship to § 1581(a):

> It is not the Committee's intent to permit judicial review prior to the completion of the import transaction in such a manner as to negate the traditional method of obtaining judicial review of import transactions. Such review, however, is exceptional and is authorized only when the requirements of subsection (h) are met.

H.R. Rep. No. 1235, 96th Cong., 2d Sess. 46, 47, *reprinted in* 1980 U.S. Code Cong., & Ad. News 3729, 3758.

[4] 28 U.S.C. § 1581(h) (1982) reads in relevant part:

> The Court of International Trade shall have exclusive jurisdiction of any civil action commenced to review, prior to the importation of the goods involved, a ruling issued by the Secretary of the Treasury . . . relating to * * * marking * * *, but only if the party commencing the action demonstrates to the court that he would be irreparably harmed unless given an opportunity to obtain judicial review prior to such importation.

v. *United States*, 5 CIT 81, 83, 561 F. Supp. 441, 443 (1983), *aff'd*, 724 F.2d 121 (Fed. Cir. 1984); *United States* v. *Biehl & Co.*, 3 CIT 158, 160, 539 F. Supp. 1218, 1220 (1982).

Defendant contends that plaintiffs fail to meet two of the requirements for section 1581(h) review. First, defendant contends that C.S.D. 85–47 is not the type of ruling that can be reviewed under section 1581(h). Second, defendant argues that plaintiffs have failed to demonstrate that they will be irreparably harmed if they cannot secure section 1581(h) review.

The essence of defendant's argument regarding the type of ruling appropriate for section 1581(h) review is that C.S.D. 85–47 is insufficiently specific to be the subject of pre-importation review. The legislative history defines "ruling" as "a determination by the Secretary of the Treasury as to the manner in which it will treat the contemplated transaction." H.R. Rep. No. 1235, 96th Cong., 2d Sess. 46, 47, *reprinted in* 1980 U.S. Code Cong. & Admin. News 3729, 3758. This court has interpreted "the legislative history as speaking to specific contemplated import transactions which contain identifiable merchandise and which will feel the impact with virtual certainty." *Pagoda Trading Co.* v. *United States*, 6 CIT ——, 577 F. Supp. 22, 24 (1983). Neither of the two cases cited by defendant in which jurisdiction was denied because the action involved an inappropriate ruling apply in this case. In *Pagoda Trading* the ruling involved was a "general interpretive ruling" that contained "guidelines 'set forth as an aid to Customs officers in classifying specific footwear constructed with foxing.' " *Pagoda Trading*, 6 CIT at ——, 577 F. Supp. at 23 (quoting 48 Fed. Reg. 22,910 (1983)). Likewise, in *American Air Parcel Forwarding Co.* v. *United States*, section 1581(h) could not be invoked because the ruling involved was an "internal advice" ruling. 5 CIT 8, 11, 557 F. Supp. 605, 608, *aff'd*, 718 F.2d 1546 (Fed. Cir. 1983).[5] Although not restricted to the facts of a single case, the ruling at issue is clearly distinguishable from internal advice and general interpretive rulings. *See Association of Food Industries, Inc. (Pistachio Group)* v. *von Raab*, 9 CIT ——, Slip Op. 85–128 at 3 (Dec. 17, 1985) (with regard to country-of-origin ruling pertaining to all imports of pistachio nuts, the court found the ruling "sufficiently related to a specific import transaction to obtain jurisidiction under [section 1581(h)]"). Customs based its ruling here on retail organge juice products that contain either 30 or 50 percent foreign manufacturing concentrate, and which have added ingredients for flavoring purposes. Plaintiffs represented these percentages of foreign concentrate to be standard in the industry, and plaintiffs clearly intend to produce products containing these percentages of foreign concentrate from the imported concen-

[5] In so finding, the *American Air Parcel* court relied on legislative history that expressly dealt with the subject. "In determining the scope of the definition of a 'ruling,' the Committee does not intend to include 'internal advice' or a request for 'further review,' both of which relate to completed import transactions." *American Air Parcel* at 608, quoting H.R. Rep. No. 1235, 96th Cong., 2d Sess. 46, *reprinted in* 1980 U.S. Code Cong. & Admin. News 3729, 3758.

trate referred to in the ruling. As to such products, plaintiffs will feel the impact of this ruling "with virtual certainty." Thus, although the ruling has interpretive aspects, it is adjudicative as to the products described and is sufficiently specific to be reviewed under section 1581(h).

In this case, plaintiffs' written request sought a binding ruling pursuant to 19 C.F.R. § 177.2 (1985) of the country-of-origin marking requirements to frozen concentrated orange juice and reconstituted orange juice that contain imported manufacturing concentrate. Defendant argues that the form of the ruling at issue was not that which was contemplated by section 1581(h). In response to plaintiffs' request, however, Customs issued a ruling that it considered final.[6] The court sees no reason to distinguish among various types of final, specific rulings in determining whether pre-importation review is proper. Thus, section 1581(h) review may be had of a ruling such as C.S.D. 85-47, provided the other requirements of section 1581(h) review are met.

The second requirement under dispute is whether plaintiffs will be irreparably harmed if they are unable to secure pre-importation review. The essence of "irreparable injury" is that it is harm that "cannot receive reasonable redress in a court of law." *Manufacture de Machines du Haut Rhin* v. *von Raab,* 6 CIT ——, 569 F. Supp. 877, 881-82 (1983) (quoting *Black's Law Dictionary* 706-07 (5th ed. 1979)). In making this determination, what is critical is not the magnitude of the injury, but rather its immediacy and the inadequacy of future corrective relief. *National Corn Growers Association* v. *Baker,* 9 CIT ——, Slip Op. 85-119 at 27 (Nov. 26, 1985) ("The possibility that adequate compensatory or other corrective relief will be available at a later date . . . weighs heavily against a claim of irreparable harm.") (quoting *Sampson* v. *Murray,* 415 U.S. 61, 90 (1975), quoting *Virginia Petroleum Jobbers Association* v. *FPC,* 259 F.2d 921, 925 (D.C. Cir. 1958)); *Hault-Rhin,* 6 CIT at ——, 569 F. Supp. at 381 (irreparable injury includes an injury "whether great or small"); *S.J. Stiles Associates* v. *Snyder,* 68 CCPA 27, 30, 646 F.2d 522, 525 (1981) (to demonstrate irreparable harm "[a] presently existing, actual threat must be shown"); *State of New York* v. *Nuclear Regulatory Commission,* 550 F.2d 745, 755 (2d Cir. 1977) (alleged threats of irreparable harm cannot be remote or speculative but must be actual and imminent). Plaintiffs have asserted several grounds in support of their claim of irreparable harm. These grounds must be analyzed to determine both their legal sufficien-

---

[6] On August 16, 1985, prior to the issuance of Customs' ruling, NJPA sent a letter to then-Assistant Secretary of the Treasury, John Walker, requesting that the Treasury Department review any ruling issued by Customs in response to the ruling request prior to the time that such ruling was finalized. A response, written by Commissioner of Customs William von Raab, stated:

> In view of the various competing interests in this case and the significant policy questions raised, this matter was under review at the highest levels of Customs before a final decision was reached. We do not believe that additional review by the Department is warranted.

This letter was dated September 11, 1985, a week after the issuance of Customs' decision. Thus, although plaintiffs requested a ruling from the Secretary of the Treasury, defendant declined to issue one. Refusal to issue a ruling is a basis for § 1581(h) jurisdiction.

cy [7] and whether plaintiffs have offered sufficient documentation to support the claims. *718 Fifth Avenue Corp.* v. *United States,* 7 CIT ——, Slip Op. 84-39 at 7 (Apr. 13, 1984) ("documentation is essential to establishing irreparable harm"); *Tropicana Products, Inc.* v. *United States,* 3 CIT 171, 174-76, *modified,* 3 CIT 240 (1982) (bare allegations, not supported by facts and figures, are insufficient).

Plaintiffs offer the following reasons to support their claim that they will suffer irreparable harm if they are unable to secure pre-importation review. First, plaintiffs maintain that their packaging suppliers will be unable to provide the necessary labels and cans by the current effective date of March 1, 1986, and that the unavailability of such packaging will result in the inability to fill orders placed by retail customers. In support of this proposition, plaintiffs offer affidavits of three packaging campany representatives. These affiants estimate that the transition to packaging complying with the new ruling would take a year to two and one-half years.

As plaintiffs have noted, under the country-of-origin marking statute, Customs is required to withhold delivery of imported merchandise until it is properly marked or until proper certifications are filed. 19 U.S.C. § 1304(g) (1982 & West Supp. 1985). Therefore, to the extent that plaintiffs cannot comply with Customs' ruling by March 1, 1986, they will be unable to use foreign manufacturing concentrate and will not be able to satisfy all of their customer's orders for retail orange juice products. This court has recognized that severe disruption of business operations can constitute irreparable injury under certain circumstances. *718 Fifth Avenue Corp.,* Slip Op. 84-39 at 7 ("Business disruption resulting from administrative delay could be sufficient to demonstrate irreparable harm.") (citing *American Air Parcel Forwarding Co.* v. *United States,* 1 CIT 293, 300, 515F. Supp. 47, 54 (1981)); *Lois Jeans & Jackets, U.S.A., Inc.* v. *United States,* 5 CIT 238, 242, 566 F. Supp. 1523, 1527 (1983) (potential costs required for altering plaintiff's production methods in the event that plaintiff was compelled to comply with Customs' ruling as a factor demonstrating irreparable harm). Plaintiffs have provided undisputed documentation of the possibility of significant disruption of their business operations that will result if they are required to comply with the ruling.

Plaintiffs' second argument is that they will be forced to discard millions of dollars worth of noncomplying labels that are currently in inventory. Plaintiffs have provided documentation that demonstrates that if they are unable to secure pre-importation review they will be required to either warehouse this inventory or destroy the labels. Either way, plaintiffs will be required to expend funds that will not be recoverable should they ultimately prevail on the

[7] A substantial number of the cases dealing with irreparable harm ahve involved preliminary injunctive relief. This court has stated, however, that "[t]he standard for proving irreparable harm [in the declaratory judgment context] is essentially identical to that used to determine irreparable injury in cases where injunctive relief is sought." *718 Fifth Avenue Corp.* v. *United States,* 7 CIT ——, Slip Op. 84-39 at 4 n.3 (Apr. 13, 1984).

merits. This factor also applies to plaintiffs' third argument that they will be forced to spend millions of dollars to redesign packaging to comply with Customs' ruling. Plaintiffs support this argument with affidavits from a sampling of processors, whose estimates of their costs for new labels and packaging, even under normal conditions, proved to be substantial. These costs, also, could not be recouped if the court were to rule in plaintiffs' favor.[8]

The final consideration is whether there exists a viable temporary measure for providing the country-of-origin information without forcing plaintiffs to incur these nonrecoupable costs. The availability of such alternatives can reduce the impact of the change in the labeling and substantially mitigate the damage. *Association of Food Industries, Inc. (Pistachio Group)* v. *von Raab*, 9 CIT ——, Slip Op. 85–128 (Dec. 17, 1985). In the pistachio case, this court held that the plaintiffs failed to demonstrate that they would suffer irreparable injury if unable to secure pre-importaton review. In doing so, the court stated that it was not "persuaded that the use of adhesive labels to add the country of origin is an unacceptable or impractical interim measure. This method would allow the use of current label inventories until they are depleted." *Id.* at 5. In the present case, none of the temporary measures suggested by defendant is a feasible alternative. The first alternative, the use of adhesive stickers, although a possible solution in the pistachio case, is not a feasible alternative in this case. In the summer of 1985, Citrus World attempted to apply foreign language stickers to frozen concentrated orange juice cans. These attempts were unsuccessful because the cans are sprayed with water to wash off excess juice and the stickers will not stick to a wet surface. Similarly, Coca-Cola Foods tried to place stickers with a special cash prize offer onto their reconstituted orange juice containers. These containers, too, had wet surfaces and the stickers would not adhere to them. The evidence also shows that even if the stickers would adhere to the containers there is no guarantee of accurate placement of the stickers on the containers. The random placement of the stickers, which are blown from machines, could obscure existing text. Some of this information, such as product identity, net weight, and distributor's address, is required by the Fair Packaging & Labelling Act, 21 U.S.C. § 343 (e), (f) (1982) and the Food, Drug & Cosmetic Act, 15 U.S.C. § 1453(a) (1982). Other information has im-

[8] Plaintiffs also contend that to the extent that they mark their retail packages with a designation of origin, they will be commercially disadvantaged by loss of consumer acceptance of these products. Injuries to reputation have been recognized as irreparable and not readily recompensed in the trademark context. *Coca-Cola Co.* v. *Gemini Rising, Inc.*, 346 F. Suppl 1183, 1189 (E.D.N.Y. 1972); *Cutler-Hammer, Inc.* v. *Universal Relay Corp.*, 285 F. Supp. 636, 639 (S.D.N.Y. 1968). In these cases, however, the professed injuries would be the result of either a play on words or mislabeling. In this case, the labeling would be accurate, although potentially neither desirable nor required by law. Furthermore, the evidence offered by plaintiffs on this point is not conclusive. The survey conducted by Fine, Travis & Associates on Florida's Seal of Approval found that in general consumers reacted negatively to suggestions that orange juice ingredients are imported. However, the survey sample consisted of only 30 consumers and a caveat in the report cautions that the findings "are not necessarily replicable nor do they indicate how widespread a particular response may be." This factor, then, cannot be used to support a claim of irreparable harm under these circumstances.

portant commercial significance, such as brand name and the universal product coding, which enables scanners to "read" the price. Additionally, Customs regulations require that the marking statement be in close proximity to the United States address. 19 C.F.R. § 134.22(c) (1985). In any case, even if adhesive stickers were physically possible to apply, plaintifffs could not recoup the significant costs of acquiring the equipment and stickers.

Another alternative suggested by defendant is to lithograph the country-of-origin marking on the "ends" of the cans. This solution is also unsatisfactory. Orange juice is packaged in a variety of containers, many of which are not cans and do not have "ends" to be lithographed. Additionally, plaintiffs' exhibits demonstrate that marking of the container ends may not satisfy Customs' requirement, noted above, that the country-of-origin statement be "in close proximity" to the United States address. 19 C.F.R. § 134.22(c) (1985). The distributor's clause is generally located on the label that encircles the can, not on its end.

Defendant also suggests that plaintiffs can stockpile manufacturing concentrate imported before March 1, 1986, so that the orange juice processors can avoid the requirements of the marking ruling until their inventory is depleted and new labels can be made. Plaintiffs counter with evidence indicating that such stockpiling could be more costly to the industry than revising its labels. Undisputed evidence indicates that in the past year the price of imported manufacturing concentrate has dropped sharply and that this trend is expected to continue in the upcoming months. Affiant Steven R. Michael, representative of Ohio Pure Foods, stated that the price of foreign manufacturing concentrate dropped by thirty percent since January 1985. If U.S. processors stockpiled large quantities of imported manufacturing concentrate and the price of the commodity continued to decline, plaintiffs would suffer a substantial financial loss.[9] Another problem with the stockpiling solution is the need for storage space to hold the concentrate. Many of the processors do not have sufficient space on their premises to permit long-term storage of large quantities of manufacturing concentrate. Although plaintiffs did not provide facts or figures as to the potential cost of such storage, it is reasonable to assume that such cost would be significant.

The final suggestion offered by defendant is that the U.S. orange juice processing industry could rely exclusively on the supply of domestic manufacturing concentrate to avoid the requirements of the marking ruling. The evidence indicates that this, too, is not a realistic alternative. In four out of the last five seasons, severe freezes have substantially diminished the availability of U.S. oranges and

[9] Lykes Pasco Packing Company illustrated this point by calculating the impact of the stockpiling suggestion had it been implemented for eight months during 1985. If Lykes Pasco purchased the concentrate directly from Brazil, it would have lost $3.5 million. If the concentrate had been purchased on the futures market, the company would have lost $6.5 million. Affidavit of Talmage G. Rice.

their by-products, including manufacturing concentrate. In his affidavit, Dan L. Gunther, director of economic research for the Florida Department of Citrus, anticipates that, as in past seasons, "U.S. orange juice demand [for this season] is expected to exceed domestic orange juice production." He also notes the necessity of mixing early-season domestic juice with late-season imported juice, because of the differences in seasons between the northern and southern hemisphere, to ensure product consistency. Given these factors, Mr. Gunther concludes that domestic processors "will not be able to use domestic manufacturing concentrate to meet total market needs during the season or even the market needs in the early part of the season." Affidavit of Dan L. Gunther. Defendant offers no evidence to refute this conclusion.

In sum, plaintiffs have demonstrated by clear and convincing evidence [10] that they will suffer irreparable injury if they cannot procure pre-importation review. The cumulative impact of the factors stated by plaintiff, specifically, the business disruption likely to occur because of the inability of the industry packagers to satisfy the simultaneous demand for new labels, the cost of discarding or storing noncomplying labels, and the cost of redesigning packaging, would be substantial and none of these expenses could be recouped should plaintiffs ultimately prevail on the merits. The impact of these injuries would not be alleviated by any of the alternatives suggested by defendants. This showing of irreparable harm allows the court to exercise jurisdiction under section 1581(h) and to provide, if appropriate, declaratory relief.

Because the court finds that the declaratory relief awarded under section 1581(h) is adequate in this case to address any harm to plaintiff, jurisdiction may not be invoked under section 1581(i). *See supra* note 2 and discussion, *infra*. Furthermore, injunctive relief may not be granted under section 1581(h).[11] Therefore, plaintiff's motion for injunctive relief is denied.

Having established that the court has jurisdiction to review the merits of the case, the court turns to the facts at hand. A full appreciation of the controversy at bar requires an understanding of the two-step process that transforms oranges into the final retail products. The retail products involved in this case are reconstituted orange juice [12] and frozen concentrated orange juice.

The first level of production involves reducing fresh oranges to manufacturing concentrate. The oranges are tested for solid content and then run through an extractor and transferred to an evaporator, where the juice is reduced to approximately fourteen percent of its original volume and cooled. During this process, the es-

---

[10] 28 U.S.C. § 2639(b) (1982) states: "In any civil action described in section 1581(h) of this title, the person commencing the action shall have the burden of making the demonstration required by such section by clear and convincing evidence."

[11] 28 U.S.C. § 2643(c)(4) (1982) provides: "In any civil action described in section 1581(h) of this title, the Court of International Trade may only order the appropriate declaratory relief."

[12] This product, orange juice in liquid form, is also called orange juice from concentrate.

sential oils and flavoring ingredients present in the juice also evaporate. The end result is a viscous substance with a brix level of approximately 65°.[13] Because the oils and flavoring ingredients are lost during this process, manufacturing concentrate lacks the characteristic flavor of oranges.

The second level of production involves blending this manufacturing concentrate with other ingredients (primarily water) to create an end product of either frozen concentrated orange juice or reconstituted orange juice. This process generally involves mixing the manufacturing concentrate with purified and dechlorinated water, orange essences, orange oil, and, in some cases, fresh juice. Once blended, the product is subjected to a variety of quality control and production tests. At this point, the frozen concentrated orange juice has a brix level of about 41.8°. It is then packaged in cans and frozen. Reconstituted orange juice has a brix level of 11.8°. It is pasteurized, retested, chilled, and packed in liquid form.

Section 304 of the Tariff Act of 1930, as amended, generally requires that every article of foreign origin that is imported into the United States be marked with its country of origin in such a manner that its ultimate purchaser will be aware of its country of origin. An ultimate purchaser is defined in Customs regulations as "the last person in the United States who will receive the article in the form in which it was imported." 19 C.F.R. § 134.1 (1985). Where a foreign article is subjected to manufacturing in the United States before reaching the consumer, the regulations provide some guidance as to when the manufacturer will be regarded as the ultimate purchaser. A manufacturer will be considered the ultimate purchaser *"if he subjects the imported article to a process which results in a substantial transformation of the article,* even though the process may not result in a new or different article." 19 C.F.R. § 134.1(d)(1) (1985) (emphasis added). On the other hand, if the manufacturing process is "merely a minor one which leaves the identity of the imported article intact," the consumer is regarded as the ultimate purchaser. *Id.* at § 134.1(d)(2). In the former case the product is not subject to the country of origin marking statutes; in the latter the country of origin must appear on the product.

The critical question in this case is whether the foreign manufacturing concentrate undergoes a "substantial transformation" in becoming frozen concentrated organce juice and reconstituted organge juice. Customs has recently promulgated 19 C.F.R. § 134.35 (1985), which defines "Articles substantially changed by manufacture" as follows:

> An article used in the United States in manufacture which results in an article having a name, character, or use differing from that of the imported article, will be within the principle

[13] Degree brix is a measurement of the percentage of the soluble solids (sugar) in a concentrate, as measured in air at 20° centigrade and adjusted for the acid correction of the solids. Thus, manufacturing concentrate with a brix value of 65° contains 65 pounds of fruit sugar solids in every 100 pounds of solution.

of the decision in the case of *United States* v. *Gibson-Thomsen Co., Inc.*, 27 C.C.P.A. 267 (C.A.D. 98). Under this principle, the manufacturer or processor in the United States who converts or combines the imported article into the different article will be considered the "ultimate purchaser" of the imported article within the contemplation of section 304(a), Tariff Act of 1930, as amended (19 U.S.C. 1304(a)), and the article shall be excepted from marking. The outermost containers of the imported articles shall be marked in accord with this part.[14]

The Customs' ruling at issue involved manfacturing concentrate processed from oranges grown in foreign countries. This manufacturing concentrate is then blended with domestic concentrate. Ratios of 50/50 or 30/70 (foreign/domestic) were represented to be "common." Customs ruled that for purposes of country of origin marking, the manufacturing concentrate is not "substantially transformed" after undergoing the further processing in the United States. Under Customs' ruling, retail packages of frozen concentrated orange juice and reconstituted orange juice must be marked to indicate that the products contain foreign concentrate.

This "name, character, or use" test was applied by Customs in finding that no substantial transformation occurs in the production of retail orange juice products from manufacturing concentrate. Customs' ruling must stand unless it is shown to be arbitrary, capricious or otherwise not in accordance with the law. 28 U.S.C. § 2640(d) (1982); 5 U.S.C. § 706(a)(2)(A) (1982).

In its ruling, Customs addressed each of the factors, name, character, and use, in turn. Plaintiffs argued that the name change

[14] In *Gibson-Thomsen*, the court indicated that substantial transformation occurs when an article acquires a "new name, character, *and* use." *Gibson-Thomsen*, 27 CCPA at 273 (emphasis added). This restrictive test was modified to require a "new name, character, *or* use." *Midwood Indus., Inc.* v. *United States*, 64 Cust. Ct. 499, 506, 313 F. Supp. 951, 959 (emphasis added), *appeal dismissed*, 57 CCPA 141 (1970). As modified, the test is similar to the tests for whether an article is a "manufacture or product" of a given country for drawback purposes and whether an article has been "[s]ubstantially transformed in [a] beneficiary developing country into a new and different article of commerce" for duty free treatment under the Generalized System of Preference (GSP). 19 C.F.R. § 10.177(a)(2) (1985). The drawback test states that for a manufacture to occur "[t]here must be a transformation; a new and different article must emerge, 'having a distinctive name, character, or use.'" *Anheuser-Busch Brewing Ass'n* v. *United States*, 207 U.S. 556, 562 (1908) (cited in *United States* v. *Patel*, 762 F.2d 784, 792 (9th Cir. 1985), quoted in *Belcrest Linens* v. *United States*, 741 F.2d 1368, 1371 (Fed. Cir. 1984)). *Accord, United States* v. *International Paint Co.*, 35 CCPA 87, 93, C.A.D. 376 (1948); *Ishimitsu* v. *United States*, 11 Ct. Cust. App. 186, 191, T.D. 38,963 (1921). Likewise, for a substantial transformation to occur for GSP purposes, an article must "emerge from a manufacturing process with a name, character, or use which differs from those of the original material subjected to the process." *Torrington Co.* v. *United States*, 764 F.2d 1563, 1568 (Fed. Cir. 1985) (citing *Texas Instruments* v. *United States*, 681 F.2d 778, 782 (CCPA 1982)). The policies underlying the different statutes are similar but not identical. The GSP statute "represents the United States' participation in a multinational effort to encourage industrialization in lesser developed countries through international trade." *Torrington Co.*, 764 F.2d at 1565. Whereas "[t]he theory underlying the granting of drawback * * * is and always has been that it would encourage the development in the United States of the making of articles for export, thus increasing our foreign commerce and aiding domestic industry and labor." *International Paint*, 35 CCPA at 90. In contrast, the primary purpose of the country-of-origin marking statute is to "mark the goods so that at the time of purchase the ultimate purchaser may, by knowing where the goods were produced, be able to buy or refuse to buy them, if such marking should influence his will." (Congress, of course, had in mind a consumer preference for American made goods.) *United States* v. *Friedlaender & Co.*, 27 CCPA 297, 302, C.A.D. 104 (1940) (quoted in *Globemaster, Inc.* v. *United States*, 68 Cust. Ct. 77, 79-80, 340 F. Supp. 975-76 (1972)). *Accord, United States* v. *American Sponge & Chamois Co.*, 16 Ct. Cust. App. 61, 65, T.D. 42,731 (1928) (quoting *Hobe Button Co.* v. *United States*, 12 Ct. Cust. App. 341, 344, T.D. 40,488 (1924)). Unlike the GSP and drawback statutes, the encouragement of the advancement of the industry of particular countries is one reason underlying the country-of-origin marking statute, not the only purpose. *American Sponge*, 16 Ct. Cust. App. at 65, *Hobe Button*, 12 Ct. Cust. App. at 344. Thus, although the language of the tests applied under the three statutes is similar, the results may differ where differences in statutory language and purpose are pertinent.

from "concentrated orange juice for manufacturing" to "frozen concentated orange juice" and "orange juice from concentrate" was significant to a finding of substantial transformation. The court agrees with Customs' conclusion that these names, derived from the FDA's standards of identity, "merely refer to the same product, orange juice, at different stages of production.[15] In any case, a change in the name of the product is the weakest evidence of a substantial transformation. *See Uniroyal, Inc.* v. *United States*, 3 CIT 220, 542 F. Supp. 1026 (1982), *aff'd*, 702 F.2d 1022 (Fed. Cir. 1983) (fact that this imported product was called an "upper" and final product called a "shoe" did not affect the court's finding of no substantial transformation), *United States* v. *International Paint Co.*, 35 CCPA 87, 93–94, C.A.D. 376 (1948) ("Under some circumstances a change in name would be wholly unimportant and equally so is a lack of change in name under circumstances such as [in this drawback case].").

Customs also found that the fact that the imported concentrate is sold to producers whereas the retail product is sold to consumers does not constitute a sufficient change in character and use to render the concentrate substantially transformed. Plaintiffs rely on the *Midwood* decision, in which this court's predecessor, the Customs Court, emphasized this transition from producers' goods to consumers' goods in finding that steel forgings are substantially transformed into flanges and fittings. *Midwood Industries, Inc.* v. *United States*, 64 Cust. Ct. 499, 507, 313 F. Supp. 951, 957, *appeal dismissed*, 57 CCPA 141 (1970). As noted by Customs, however, the significance of this producers' good-consumers' good transformation in marking cases is diminished in light of this court's recent decision in *Uniroyal, Inc.* v. *United States*, 3 CIT 220, 542 F. Supp. 1026 (1982), *aff'd*, 702 F.2d 1022 (Fed. Cir. 1983). In *Uniroyal*, the imported article was a leather shoe upper to which an outsole was attached in the United States. Although the upper is not a consumers' good in that it cannot be worn as a shoe, the court found that there was no substantial transformation. *Id.* at 227, 542 F. Supp. at 1031. Under recent precedents, the transition from producers' to consumers' goods is not determinative. Plaintiffs must demonstrate that the processing done in the United States substantially in-

[15] Plaintiffs make much of the fact that the imported and retail products at issue in this case have distinct standards of identity under Food and Drug Administration (FDA) regulations. Specifically, plaintiffs point out that the imported product is called "concentrated orange juice for manufacturing" and the retail products are known and labeled as "frozen concentrated orange juice" and "orange juice from concentrate." 21 C.F.R. §§ 146.145, 146.146, 146.153 (1985). This argument is not persuasive. First, Customs regulations and FDA regulations are promulgated under completely different statutes and hence one cannot be considered binding on the other. Second, the policies underlying the regulations are quite different and the interests of one would not be furthered by relying on the other. Specifically, the policy underlying the FDA standards of identity have been described by plaintiffs as chiefly designed to inform the consumer about ingredients in a product. Merrill & Collier, *"Like Mother Used to Make": An Analysis of FDA Food Standards of Identity*, 74 Colum. L. Rev. 561, 563 (1974). To policy underlying the country-of-origin marking statute, however, as noted in note 14, *supra*, is to facilitate consumer purchasing decisions and to protect American industry. The FDA standards of identity are intended to aid in identifying the contents of a product, not in identifying the origin of the product as a whole. The FDA standards are not binding on Customs in a determination of whether a substantial transformation has occurred.

creases the value of the product or transforms the import so that it is no longer the essence of the final product. *United States* v. *Murray*, 621 F.2d 1163, 1170 (1st Cir. 1980) (Chinese glue blended with other glues in Holland were not substantially transformed because although it was transformed from a processors' good to an end-users' good there was no evidence that the glue had increased in value);[16] *Uniroyal*, 3 CIT at 224 and 222, 542 F. Supp. at 1030 and 1028 (imported upper was "the very essence of the completed shoe", court also found the attachment of uppers to outsoles "significally less costly" than the process of manufacturing the upper).

Plaintiffs in the instant case offer evidence that they claim demonstrates that domestic manufacturing substantially increases the value of the product from the manufacturing concentrate stage to the retail product stage. Contrary to plaintiffs' claim, however, the evidence offered indicates that the manufacturing concentrate constitutes the majority of the value of the end products. In fact, according to plaintiffs' evidence, the values added to the products involved here by the addition and blending of the orange essences, orange oil, and water, and related production range from 6.68 to 7.57%. This increase in value may be significant with regard to other products, but here the sum of all of the activities contributing to the added value are relatively minor, much like the addition of the outsoles in *Uniroyal*. In fact, plaintiffs' evidence shows that the addition of the oils and essences, the primary basis for plaintiffs' claim that substantial transformation has occurred, contributes only 1.75 to 1.86% to the value of the end products.[17]

Plaintiffs also contend that the value of the closing costs (for example, packaging) should be independently considered because of the alleged role of the closing activities in preserving the retail product. (The closing costs add 11.81 to 12.35% to the value of the final products.) Plaintiffs, however, cite no support for this proposition and the court does not find persuasive the argument that such costs are a factor in determining whether an article has undergone substantial transformation. *Cf. Ishimitsu* v. *United States*, 11 Ct. Cust. App. 186, T.D. 38,963 (1921).[18]

It is unclear whether plaintiffs contend that the addition of water constitutes a substantial change.[19] The court believes it does

---

[16] In *Murray*, the First Circuit, in interpreting 19 C.F.R. § 134.1(b), held that

> the sub-term "substantial transformation" means a fundamental change in the form, appearance, nature, or character of an article which adds to the value of the article an amount or percentage which is significant in comparison with the value which the article had when exported from the country in which it was first manufactured, produced, or grown.

Murray, 621 F.2d at 1169.

[17] It is not clear whether the addition of fresh orange juice is essential to the production of any of the retail orange juice products involved in this case. In any case, plaintiffs claim an added value of approximately 1% for situations in which such juice is used. This minimal factor does not alter the result here.

[18] Plaintiff does not appear to argue that mere blending of foreign with domestic concentrate is a substantial transformation. Thus, the value of the domestic concentrate is not considered in this analysis.

[19] The court notes that in the Caribbean Basin Economic Recovery portion of the Caribbean Basin Initiative, Pub. L. 98-67, 96 Stat. 388 (1983), Congress has provided that a new and different article of commerce is not produced or manufactured in a beneficiary country by the "mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article." 19 U.S.C. § 2703(a)(2)(B) (1982 & Supp. 1983).

not, in and of itself, constitute such a change in the context of the products under discussion. The court, however, did consider the value added by the addition of water together with the oils, essences and the overall blending process. Considering the process as a whole, the court concludes that Customs could rationally determine that the major part of the end product, when measured by cost, value, or quantity, is manufacturing concentrate and that the processing in the United States is a minor manufacturing process.

The court also finds reasonable Customs' conclusion that the manufacturing concentrate "imparts the essential character to the juice and makes it orange juice." C.S.D. 85–47, 19 Cust. Bull. No. 39 at 26. Thus, as in *Uniroyal*, the imported product is "the very essence" of the retail product. *Uniroyal*, 3 CIT at 224, 542 F. Supp. at 1030. The retail product in this case is essentially the juice concentrate derived in substantial part from foreign grown, harvested, and processed oranges. The addition of water, orange essences, and oils to the concentrate, while making it suitable for retail sale, does not change the fundamental character of the product, it is still essentially the product of the juice of oranges. The court concludes that Customs' ruling that manufacturing juice concentrate is not substantially transformed when it is processed into retail orange juice products is not arbitrary or capricious, but is in accordance with applicable law.[20] The orange juice processors are not the ultimate purchasers of the imported product because consumers are the last purchasers to receive the product in essentially the form in which it is imported. In accordance with 19 U.S.C. § 1304, the retail packaging must bear an appropriate country-of-origin marking.

Having found that Customs' decision is not arbitrary and capricious and is thus substantively valid, the court must address the question of whether Customs was required to publish a notice in the Federal Register before publishing C.S.D. 85–47. Specifically, plaintiffs contend that such notice was required pursuant to Customs' regulation 19 C.F.R. § 177.10(c) (1985), which requires notice before publication of a ruling which has the effect of changing a practice or position of Customs.

The specific provision of this regulation that is the subject of dispute is section 177.10(c)(2).[21] As defendants have noted, section 177.10(c)(2) requires notice in the Federal Register if two conditions are met. First, the prospective ruling must have the effect of

---

[20] Plaintiffs also argue that Customs' ruling is arbitrary and capricious because in the ruling it stated that the certification requirements of the country of origin regulations will apply "[i]f the final repacked product of orange juice contains *any* foreign concentrate." C.S.D. 85–47, 19 Cust. Bull. No. 39 at 23 (emphasis added). Customs did not specifically refer to any blends besides those containing 30 and 50% foreign concentrate. In any case, the court considers the scope of the reviewable aspects of the ruling to be limited to retail orange juice products containing 30 or 50% foreign manufacturing concentrate. This decision does not address whether it would be appropriate to apply the country-of-origin marking statutes to products that contain any other percentage of imported manufacturing concentrate.

[21] 19 C.F.R. § 177.10(c)(2) (1985) reads, in pertinent part, as follows:

> Before the publication of a ruling which has the effect of changing a position of the Customs Service and which results in a restriction or prohibition, notice that the position (or prior ruling on which the position is based) is under review will be published in the Federal Register and interested parties given an opportunity to make written submissions with respect to the correctness of the contemplated change.

changing a Customs Service position. Second, the change must *result* in a restriction or prohibition.

The first question, then, is whether C.S.D. 85–47 constitutes a change of position. Defendant maintains that Customs had never taken an official position regarding the specific circumstances of this case, and that consequently they were relieved from the notice requirements. This argument fails because an examination of Customs' prior rulings in orange juice related situations clearly establishes its position that orange juice manufacturing concentrate is substantially transformed if it is completely reconstituted or is blended with orange oils, essences or fresh juice.

On several occasions Customs has been called upon to determine whether orange juice at one stage of production is substantially transformed, *i.e.*, undergoes a change in name, character, or use, in the manufacturing process leading to another stage of production. These cases have arisen in the drawback context as well as in the country-of-origin context. The drawback rulings are instructive because the definitions of "substantially transformed" in the country-of-origin context and "manufacture" in the drawback context are similar.[22]

In these rulings Customs had adopted a position that for imported orange juice manufacturing concentrate to be considered "manufactured" or "substantially transformed," a substance other than water or other manufacturing concentrate must be added. This position can be seen by contrasting a ruling in which Customs held that blending imported manufacturing concentrate with domestic manufacturing concentrate does not constitute manufacturing for drawback purposes with a ruling that blending imported manufacturing concentrate with orange peel oil does. C.S.D. 81–81, 15 Cust. Bull. 900, 901 (Sept. 4, 1979) (Ruling 210693) ("[T]he mere blending or commingling of one concentrate with another concentrate of the same kind and quality does not constitute a manufacturing process for drawback."); C.S.D. 83–90, 17 Cust. Bull. 921, 922 (March 29, 1983) (Ruling 215734) ("The blending of cold-pressed orange peel oil with a batch of concentrated orange juice for manufacturing to mask the 'cardboard off flavor' of the concentrate is a manufacture or production for drawback."). The critical factor in distinguishing these rulings is the introduction of the orange peel oil, a different substantive ingredient, into the concentrate. The significance of this distinction is demonstrated in dicta in the former ruling. After finding that the mere blending of concentrate does not consititute manufacturing, Customs offered two alternatives that would, in fact, satisfy the manufacturing requirement. First, Customs suggested that "[t]he addition by a blending process of essential oils and flavoring components to a concentrate that lacks them would be considered a manufacture or production for drawback." C.S.D.

[22] See note 14, *supra*, for a comparison of the country-of-origin "substantial transformation" test with the drawback "manufacturing" test and a comparison of the different policies underlying the statutes.

81-81, 15 Cust. Bull. at 901. Second, Customs noted that "[t]he use of fresh juice to cut back the degree brix of concentrated orange juice for manufacturing is another manufacturing process for drawback." *Id.*

Furthermore, in a country-of-origin ruling, Customs found that concentrate at 58° or 65° brix that is subsequently diluted with water to 42.5° brix, but not completely reconstituted is not substantially transformed. C.S.D. 80-230, 14 Cust. Bull. 1138, 1138 (Feb. 21, 1980) (Ruling 712184). In a similar ruling, Customs found that reducing the degree brix of a concentrate by the addition of water is not a manufacturing for drawback. C.S.D. 80-162, 14 Cust. Bull. 1002, 1003 (Nov. 27, 1979) (Ruling 211084). In the latter ruling Customs again offered alternatives that would reduce the degree brix and would change the character and use of the manufacturing concentrate. These suggestions were the use of the following:

1. Fresh orange juice;
2. Pasteurized orange juice;
3. Essential oils and flavoring components;
4. Essential oils, flavoring components and water;
5. Essential oils, flavoring components and other orange concentrate; and
6. A combination of any of the above.

Id. at 1004.

The most significant ruling involves the processing of frozen concentrate that is reconstituted in Canada. C.S.D. 80-88, 14 Cust. Bull. 865 (Aug. 17, 1979) (Ruling 710823). Although the ruling does not specify the degree brix of the concentrate that is reconstituted, the opinion clearly applies to manufacturing concentrate that is made into reconstituted orange juice.[23] In other words, the process that is the subject of C.S.D. 80-88 is apparently the same process that is occurring in this case—manufacturing concentrate becomes reconstituted orange juice with the addition of water and presumably orange essences or oils. In C.S.D. 80-88, however, Customs found that this process substantially transformed the manufacturing concentrate into reconstituted juice. C.S.D. 80-88, 14 Cust. Bull. at 866.[24] In C.S.D. 85-47, at issue here, Customs decided that this process failed to substantially transform the product. The latter ruling directly contradicts the former, and Customs noted this in C.S.D. 85-47 when it stated at the end of the ruling: "Customs Ruling No. 710823 [C.S.D. 80-88], dated August 17, 1979, which holds that reconstitution of orange juice is a substantial transformation of the frozen concentrate, is overruled." C.S.D. 85-47, 19 Cust. Bull. No. 39 at 28.[25]

---

[23] One of the end products at issue is reconstituted orange juice from concentrate.

[24] If there is a difference between the processes at issue, the Canadian ruling, C.S.D. 80-88, is a worse case for substantial transformation than the one at hand, because oils and essences are undisputedly added here.

[25] The court cannot agree with defendent's position that the fact that the processing involved in C.S.D. 80-88 is that of Brazilian and American manufacturing concentrate in Canada and the processing involved in C.S.D.

Continued

C.S.D. 85–47 constitutes a change in Customs' former position that the complete reconstitution of orange juice or the addition of orange oils, essences, or juice effects a substantial transformation of manufacturing concentrate. To this extent it satisfies the first requirement of section 177.10(c)(2), that is, a ruling that will effect a change in a position of Customs.

The second requirement for section 177.10(c)(2) notice is that the ending must *result* in a restriction or prohibition. Defendant argues that the ruling does not result in a "restriction" or "prohibition" within the meaning of the regulation. In support of this position, it notes that section 1581(h) lists "marking" and "restricted merchandise" as separate categories over which this court has pre-importation jurisdiction. Defendant claims that because these categories are distinct in section 1581(h), the term "restriction or prohibition" in section 177.10(c)(2) cannot be construed to include a change in country-of-origin status. The separate listing in section 1581(h) of marking and restricted merchandise, however, is not determinative. The listing merely provides examples of the types of cases that might appropriately be brought for pre-importation review. (For example, total prohibition is not mentioned.) The list is more exemplary than definitional and the court cannot accept its categorization as definitive with regard to the inclusion of changes in marking requirements as resulting in a restriction under section 177.10(c)(2).

Furthermore, the reference in section 177.10(c)(2) to "restrictions and prohibitions" must be looked at in the context of section 177.10. Section 177.10 deals generally with the publication of decisions. 19 C.F.R. § 177.10 (1985). The provisions are presumably intended to keep the public and interested parties abreast of critical decisions made by Customs. Within this scheme, the regulations acknowledge that a change in a Customs Service position which results in a change in the amount of duty owed or in a restriction or prohibition may have a significant impact on the importing or other business practices of an industry. In such a case, it is important to warn the industry that changes may be necessary and to give interested parties an opportunity to respond. These policy considerations are fully applicable to a change in country-of-origin marking requirements. For instance, in this case, the retail orange juice processors will be required to change their labeling or drastically reduce their importation of manufacturing concentrate to avoid disruption from the imposition of the marking requirements. The transition to either of these practices cannot be instantaneous. Therefore, the imported manufacturing concentrate ruling will result in a restriction in the sense that products will not be released by Customs when the certification requirements cannot be

85–47 is that of imported manufacturing concentrate in America makes any material difference. The basic question addressed in both rulings is whether, for marking purposes, manufacturing concentrate which is processed into retail orange juice products is substantially transformed.

met. Clearly the rationale underlying section 177.10(c)(2) provides a basis for concluding that the importers and other interested parties should be forewarned and given an opportunity to comment before Customs publishes a change in position that results in restricted importation of this product.

C.S.D. 85–47, then, is appropriately considered to be a ruling that changes a position of Customs and results in a restriction. Customs was in fact reviewing its position as to whether orange juice manufacturing concentrate is substantially transformed when completely reconstituted or blended with oils, essences, or juices. As a result, Customs was required to publish notice of these circumstances and to allow interested parties to submit written comments "with respect to the correctness of the contemplated change." 19 C.F.R. § 177.10(c)(2) (1985).[26]

Although defendant failed to publish the required notice of its change in position, this omission will only affect the ruling if it results in prejudice to the plaintiff. *Gilmore Steel Corp.* v. *United States*, 7 CIT ——, 585 F. Supp. 670, 679 (1984); *American Motorists Insurance Co.* v. *United States*, 5 CIT 33, 43 (1983); *Timken Co.* v. *Regan*, 4 CIT 174, 180, 552 F. Supp. 47, 52 (1982); *Woodrum* v. *Donovan*, 4 CIT 46, 52, 544 F. Supp. 202, 207 (1982). In this case a harmless error determination must be made as to each of two parts of the ruling. The first part pertains to whether manufacturing concentrate undergoes a substantial transformation in being processed into frozen or reconstituted orange juice. Plaintiffs are not prejudiced by the failure to publish notice as to this issue because, as is obvious, plaintiffs fully participated in the administrative process. Furthermore, comments from the public at large cannot change the essentially legally correct result.

The second part of the ruling, however, involves the appropriate effective date of the ruling. Customs regulations relating to the type of ruling at issue here state that "*[e]xcept as otherwise provided for in the ruling itself,* all rulings published under the provision of this part shall be applied immediately." 19 C.F.R. § 177.10(e)

---

[26] There is a dispute between the parties as to whether plaintiffs raised at the agency level the issue of publication of a change in position in the Federal Register and the possible effect this would have on plaintiffs' ability to raise the issue before the court. Under either scenario, however, plaintiffs' ability to raise the issue before the court has not been affected. If plaintiffs did suggest to defendant that notice of a change in position must be published in the Federal Register, then plaintiffs adequately exhausted their administrative remedies on this point. If plaintiffs did not make this suggestion, they still cannot be said to have waived the objection. Publication in the Federal Register is only required if Customs has decided to change its position. Although plaintiffs participated in discussions about whether a change in position was desirable, they did not know that Customs had decided to effect such a change before the new ruling was published in the Customs Bulletin. Once the ruling was published, there was no formal administrative procedure for challenging the failure to publish notice in the Federal Register. Prior to that time plaintiffs could not be certain that a ruling effecting a change in position would be published. *Cf. Lois Jeans & Jackets, U.S.A., Inc.* v. *United States*, 5 CIT 238, 243–44, 566 F. Supp. 1523, 1527–28 (1983) (plaintiff who received no notice (actual or constructive) of a change in ruling likely to succeed in raising § 177.10(c)(2) objection even though it learned of change before it was implemented). The fact that this notice provision involves a change in position affecting a wide variety of interests distinguishes this situation from the cases dealing with the effects of notice of an antidumping or countervailing duty investigation. *See, e.g., United States* v. *Elof Hansson, Inc.*, 296 F.2d 779, 48 CCPA 91 (1960), *cert. denied*, 368 U.S. 899 (1961) (antidumping); *Alberta Gas Chemicals, Inc.* v. *Blumenthal*, 82 Cust. Ct. 77, C.D. 4792 (1979) (antidumping) *Energetic Worsted Corp.* v. *United States*, 51 Cust. Ct. 55, C.D. 2413 (1963), *rev'd on different grounds*, 53 CCPA 36, C.A.D. 874 (1966) (countervailing duties).

(1985) (emphasis added). This caveat leaves to Customs' discretion the option to delay the effective date of a ruling.

In its initial ruling Customs chose an effective date of January 1, 1986, a four month lag time. C.S.D. 85-47, 19 Cust. Bull. No. 39 at 28. Customs offered no reasons for choosing this date. When Customs reconsidered and changed the effective date to March 1, 1986, it also failed to articulate the reasons underlying the change. 19 Cust. Bull. No. 50 at 15 (Dec. 11, 1985). Customs correctly recognized that this is a situation in which a lag time in the effective date is appropriate. Given the size of the industry and the limited services available to assist the industry in complying with the marking requirements, it would have been an abuse of discretion not to have delayed the effective date. From the record it is clear that Customs did not seek comments from all interested parties before reaching its decision. The problem with the original effective date chosen by Customs, as well as the subsequent amended effective date, is that there is nothing in the record or in the official statements by Customs that articulate what factors were considered in choosing the dates. " '[T]he failure of an administrative agency to articulate the reasons for a particular decision makes meaningful review of that decision impossible.' " *Public Media Center* v. *FCC*, 587 F.2d 1322, 1331-32 (D.C. Cir. 1978) (quoting *American Smelting & Refining Co.* v. *FPC*, 494 F.2d 925, 945, *cert. denied*, 419 U.S. 882 (1974)).

Defendant argues that it would be contrary to the statute to delay the effective date of the ruling and that Customs has nonreviewable discretion in this area. First, this is clearly an area in which there are no policy reasons for ignoring the usual rule that presumes judicial review of agency decisions. *See Abbott Laboratories* v. *Gardner*, 387 U.S. 136, 140-41 (1967). Second, the marking statute is not written in absolute terms. There are statutory exceptions for commercial impracticability. *See*, 19 U.S.C. § 1304(a)(3) (1982). This case does not fall within any of the listed exceptions, but Customs has properly interpreted Congressional intent in promulgating 19 C.F.R. § 177.10(e), which allows a delay in the effective date of rulings, including rulings in this area. Surely Congress did not intend grievous commercial injury to occur as a result of too precipitous implementation of changes in rulings under the marking law.

The court concludes that Customs must reconsider the effective date for C.S.D. 85-47 and must articulate reasons for its choice. In so doing, Customs must adhere to the notice and comment provisions of section 177.10(c)(2) and carefully consider all possible issues relating to a reasonable time to implement its new ruling concerning country-of-origin marking requirements.

This case is remanded to Customs for further action in accordance with this decision.

ERRATA

(Slip Op. 86-5)

NEC CORP., PLAINTIFF *v.* UNITED STATES, DEFENDANT

The above-noted slip opinion was originally published in CUSTOMS BULLETIN, Vol. 20, No. 6, dated February 12, 1986, starting on page 33. Delete the last paragraph on page 33 and the first two paragraphs on page 34. Replace with the following:

"The court initially notes that on December 4, 1985, prior to the filing of this motion, plaintiff filed a notice of appeal to the Federal Circuit of the November 19, 1985 judgment. Under Rule 4(a)(4) of the Federal Rules of Appellate Procedure as amended in 1979, the timely filing of a motion for new trail or to alter or amend the judgment pursuant to Rule 59 of the Federal Rules of Civil Procedure nullifies a previously filed notice of appeal, and the time for appeal runs from the district court's disposition of the motion. *See* Advisory Committee Note to 1979 Amendment to Fed. R. App. P. 4(a)(4); *Griggs* v. *Provident Consumer Discount Co.*, 459 U.S. 56, 59-61 (1982). Since Rule 59 of this court is patterned after Rule 59 of the Federal Rules of Civil Procedure, the court concludes that it has jurisdiction to dispose of the instant motion, the filing of which nullified the previously filed notice of appeal."

Guidelines for Release of Seized and Forfeited Property to State and Local Law Enforcement Agencies

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of guidelines for disposition of seized and forfeited property.

SUMMARY: This document sets forth the Customs policy regarding the disposition of seized and forfeited property. This action is necessary to implement those provisions of the Comprehensive Crime Control Act of 1984 and the Trade and Tariff Act of 1984 concerning the transfer of seized and forfeited property to state and local law enforcement agencies that assisted Customs in the seizure of forfeiture. This action is consistent with Customs efforts to enhance and promote cooperation with state and local law enforcement agencies.

EFFECTIVE DATE: February 25, 1986.

FOR FURTHER INFORMATION CONTACT: Stuart P. Seidel, Assistant Chief Counsel (Enforcement and Operations), Office of the Chief Counsel, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 ((202) 566-2482).

SUPPLEMENTARY INFORMATION:

Background

I. Statement of Policy.

Customs is authorized by various laws enforced or administered by the Customs Service to seize property for violations of the Customs, navigation and related laws. Pursuant to § 618, Tariff Act of 1930, as amended (19 U.S.C. 1618), any person with an interest in the seized property may petition for relief and the Secretary of the Treasury may mitigate or remit any fine, penalty or forfeiture incurred with respect to the violation. Property which is not released in response to a petition under 19 U.S.C. 1618 or other provisions of law may be disposed of in accordance with the provisions of § 616, Tariff Act of 1930 (19 U.S.C. 1616, 1616a), which was added to the United States Code by the Comprehensive Crime Control Act of 1984 (P.L. 98-473) and the Trade and Tariff Act of 1984 (P.L. 98-573). The guidelines contained in this document implement the asset forfeiture provisions of § 616.

Customs statutory authority regarding releasing seized and forfeited property to state and local agencies is nearly identical to that of the Department of Justice. Customs participated in the drafting of the Department of Justice guidelines which were published in the Federal Register on June 7, 1985 (50 FR 24052), and the following guidelines and procedures correspond to the Justice guidelines and procedures as closely as possible.

Section 616 directs the Secretary of the Treasury to "ensure the equitable transfer * * * of any forfeited property to the appropriate state or local law enforcement agency so as to reflect generally the contribution of any such agency participating directly in any of the acts which led to the seizure or forfeiture of such property."

This authority is consistent with Customs purpose of promoting cooperative law enforcement efforts. Custom intends to manage its asset forfeiture program in a manner designed to enhance this federal, state and local cooperation.

Customs is authorized to dispose of forfeited property by (1) retaining the property for official use; (2) transferring custody or ownership of the property to any federal, state or local agency pursuant to § 616 or (3) placing the forfeited cash or proceeds of sale of forfeited property in a special Customs forfeiture fund. A decision of the appropriate Customs official regarding placing the forfeited property into official use or transferring the property to another agency is not subject to judicial review.

Local Customs officials will inform state and local law enforcement agencies as to the procedures for requesting an equitable transfer of forfeited property, help facilitate the application for transfer of such property, and see that the spirit and letter of the forfeiture provisions of the Comprehensive Crime Control Act of 1984 and the Trade and Tariff Act of 1984 are implemented.

II. Definitions.

A. *"Commissioner"* means the Commissioner of Customs or his designee.

B. *"Local Customs official"* means the special agent in charge if the Customs officers participating in the seizure were assigned to the Office of Enforcement, or the district director if the Customs officers participating in the seizure were assigned to the Office of Inspection and Control. In rare cases, if the participating Customs officers are from offices which do not report to the special agent in charge or the district director, the term refers to the equivalent field office (if there is one) or the regional or Headquarters office which supervises the participating Customs officers. In cases of doubt, requests for equitable distribution may be submitted by other law enforcement agences directly to Customs Headquarters, but no action will be taken until the local Customs official has reviewed the request.

C. *"Regional Customs official"* means the Regional Commissioner of Customs or the individual designated by the Regional Commissioner (usually the Assistant Regional Commissioner (Enforcement)) to review requests for equitable distribution of seized property.

D. *"Appropriate Headquarters official"* means the Assistant Commissioner of Customs who supervises the Customs officers participating in the seizure. If the seizure involved Customs officers in dif-

ferent functional areas, the Assistant Commissioners for the concerned functional areas must jointly approve any transfer.

E. *"Property or assets"* means tangible property and cash.

F. *"Cash"* means currency, negotiable instruments and securities.

G. *"State and local agencies"* means law enforcement agencies of a state, the District of Columbia, Puerto Rico or any territory or possession of the U.S. or of any local government within the listed governments.

H. *"Appraised value"* means fair market value.

III. Transfer of Seized and Forfeited Property to State and Local Law Enforcement Agencies.

A. *Customs Service Seizures*

1. Commissioner's Authority for Equitable Transfer of Seized Property:

a. Section 616, Tariff Act of 1930, as amended, authorizes the Commissioner to transfer property seized by Customs officers to any other Federal agency, or to state or local law enforcement agencies that directly participated in the act which led to the seizure and forfeiture.

b. Tangible property not retained for official use by the federal seizing agency may be equitably transferred.

c. Where a participating law enforcement agency petitions for a share in the forfeited property, the Commissioner shall determine an equitable transfer of the property that generally reflects the relative contribution of the participating agencies.

2. Procedure for Determining Equitable Transfer:

a. Any state or local law enforcement agency that participates in the acts leading to a Customs seizure for forfeiture may file a request for an equitable transfer of the property.

b. The criteria for determining the equitable transfer of the property will be the same for all requests.

c. In all cases the final decision-making authority rests with the Commissioner.

3. Requests from Participating Law Enforcement Agencies:

a. Within 30 days following the seizure for forfeiture, the state or local agency shall submit a written request for an equitable transfer of the property subject to forfeiture to the local Customs official responsible for the Customs law enforcement effort resulting in the seizure for forfeiture.

b. If more than one local Customs office was involved in the law enforcement effort resulting in the seizure, the request should be forwarded by the local office receiving the request to the appropriate regional Customs official. If more than one region was involved, the request should be forwarded by the local office receiving the request through this regional office to the appropriate Customs Headquarters official.

c. The request must include the following information:

(1) Identification of the property against which the claim is made;

(2) Details regarding the requesting agency's participation, including the amount of money and manpower expended by the State or local agency in pursuing the case;

(3) A statement of the intended use for the property;

(4) A designation of the proper fiscal officer to whom cash or check disbursements can be made;

(5) A designation of the proper official to whom transfer documents should be delivered by the U.S.;

(6) A designation of the proper party to whom possession should be delivered;

(7) A statement indicating that the transfer is not prohibited under the applicable state or local law;

(8) In instances of a joint application by several state or local agencies, the relative share of each state or local agency;

(9) A statement that all fees and expenses necessary to effect transfer of title will be paid by or on behalf of the requesting agency not later than the time of transfer; and

(10) The extent to which transferred funds will be credited directly to the budget of the state or local agency involved, resulting in an increase of law enforcement resources for that state or local agency.

d. The requesting agency must certify that the information contained in items 3.c. (4) and (7) above is true and correct.

e. An information copy of the request for an equitable transfer will be forwarded by the local Customs official to the Fines, Penalties and Forfeitures Officer in the district office responsible for processing the forfeiture and a copy to the Seized Property Division in the Office of the Comptroller at Headquarters.

f. If a request for the property has been made, no report of seizure should be made by Customs to the General Services Administration.

4. Procedure for Processing Requests for Equitable Transfer:

a. In all cases, the local Customs official receiving the request will prepare a written report that will evaluate the degree of assistance provided by the requesting agency or agencies in the underlying law enforcement action resulting in the seizure for forfeiture. Where more than one local or regional office participated, the request should be expeditiously sent through the other Customs participants for their approval or comment.

b. The equitable share for a participating state or local agency should generally reflect the contribution of the agency participating directly in any of the acts which led to the seizure for forfeiture of the property including, but not limited to, the following factors:

(1) which agency initiated the case;

(2) which agency identified the asset;

(3) the amount of money and manpower expended by the state or local agency in pursuing the case;

(4) whether or not the state or local agency seized other assets during the course of the same investigation and whether such seizures were made pursuant to state or local law; and

(5) whether or not the state or local agency could have achieved forfeiture under state law, with favorable consideration given to a state or local agency which would have forfeited the asset(s) on its own but joined forces with the U.S. to make a more effective investigation.

c. In cases in which a state or local agency has filed a request for an equitable share of that property, the Commissioner may still decide to place property forfeited administratively or judicially into official use or transfer the property to any other federal agency.

(1) In making that decision, the following factors must be considered:

(a) the relative needs of the requesting law enforcement agency, Customs, and any other federal agency for the particular asset;

(b) the uniqueness of the asset and the likelihood of securing such an asset through other seizures in the near future;

(c) the relative significance of the requesting law enforcement agency's participation in the case, as well as all other factors pertinent to the determination of equitable distribution as set forth in item 4.b. above;

(d) the likelihood that the requesting agency will be eligible for an equitable share of property from additional seizures arising from the same investigation or from other seizures in the near future;

(e) the impact that a decision to place the property into official use might have on federal, state or local relations; and

(f) any extraordinary expenses associated with the seizure, including any informants awards which may be payable.

5. Decision-Making Authority for Determining Equitable Transfer:

a. Except as indicated in item 5.c. below, the equitable distribution of a forfeited asset with an appraised value of $250,000 or less will be determined by the appropriate Headquarters official.

(1) The local Customs official receiving a request shall forward his report and recommendation through the appropriate regional official to the appropriate Headquarters official.

(2) In making this decision, consideration will be given to the report and recommendation forwarded by the local Customs official, and a written ruling on the request will be issued by the appropriate Headquarters official through the appropriate regional official and the local Customs official to the requesting party.

(3) A copy of the written ruling will be forwarded to the district director having custody of the seized or forfeited asset and the

Seized Property Division in the Office of the Comptroller at Headquarters.

b. In the case of property valued at greater than $250,000, the evaluation and recommendation will be forwarded to the appropriate Headquarters official who will forward a final recommendation to the Commissioner. The Commissioner will determine the equitable distribution of those assets.

(1) In making this decision, the Commissioner will consider the reports and recommendations forwarded by the appropriate Headquarters official and, in the case of assets with an appraised value of $750,000 or greater, will consult with the Assistant Secretary of the Treasury (Enforcement and Operations). A written ruling on the request will be prepared by the Assistant Commissioner (Enforcement) and, after signature by the Commissioner, will be issued through the appropriate regional official and sent to the local Customs official for delivery to the requesting party.

(2) A copy of the written ruling will be forwarded to the district director having custody of the seized or forfeited asset and the Seized Property Division in the Office of the Comptroller at Headquarters.

c. The appropriate regional Customs official may make an equitable distribution of a forfeited conveyance with an appraised value of $25,000 or less if the participating Customs officers were assigned to his/her region.

(1) In making this decision, the regional Customs official will consider the reports and recommendations forwarded by the local Customs official and issue a decision through that official to the requesting party.

(2) A copy of the decision document will be forwarded to the district director having custody of the seized or forfeited asset and to the Seized Property Division in the Office of the Comptroller at Headquarters.

6. Proceeds Placed in the Customs Forfeiture Fund:

a. If the federal forfeiture action is not deferred, and the property is not placed into official use or transferred to a state or local agency, it will be sold and the proceeds of sale, after deducting expenses, etc., will be placed in the Customs Forfeiture Fund.

b. Forfeited cash will be placed in a suspense account pending deposit in the Customs Forfeiture Fund.

7. Disposition of Forfeited Property:

a. State or local agencies may share in seized and forfeited tangible property, and seized and forfeited cash. In the case of seized and forfeited cash, the equitable share of any state or local agency shall be determined after applying the criteria in items 4.b. and 4.c. above.

b. Any property that cannot be used for official Customs, federal, state or local purposes must be destroyed or sold or otherwise disposed of in accordance with law.

c. Where tangible property is transferred to qualifying state or local agencies, the Customs Forfeiture Fund and appropriated monies will not be used to pay liens or mortgages on the transferred property, to equip the property for law enforcement purposes, or to pay salaries.

d. The recipient state or local agency must pay the valid liens and mortgages on the forfeited tangible property prior to the transfer of such property.

e. The recipient state or local agency may be required to pay expenses pertaining directly to the seizure prior to the transfer of tangible property.

f. Prior to any interlocutory or immediate sale of property pending forfeiture, the district director having custody of the property must consult with any other involved local Customs official and the U.S. Attorney, Criminal Division section chief, or the Director of the Asset Forfeiture Office, Department of Justice, to determine the evidentiary status of the property and the status of any state or local law enforcement agency requests for equitable sharing.

g. All Customs officers will promptly notify the district director having custody of seized property of any facts affecting such seized property. Relevant facts would include bills, invoices, orders of mitigation and remission, orders of designation for official use, and appraisals. Based upon these and other factors, the district director's office should ensure the proper disposition of the property.

B. *Seizures involving the participation of other federal agencies*

1. Where a state or local agency requests equitable distribution of property which was seized through the participation of a federal agency other than Customs, the local Customs official shall send a copy of the request to the other agency for its review and recommendation.

2. Where a state or local agency requests equitable distribution of property which was seized as part of an OCDETF (Organized Crime/Drug Enforcement Task Force) or joint Customs/DOJ (Department of Justice) case, the request should be reviewed by the U.S. Attorney (or DOJ attorney-in-charge) and submitted to Customs Headquarters with their recommendations. If Customs Headquarters disagrees with the U.S. Attorney (or DOJ attorney-in-charge) recommendations, the matter shall be referred to the Assistant Secretary of the Treasury (Enforcement and Operations). If necessary, the Assistant Secretary and the appropriate Justice Department official shall review the recommendations and make the decision.

3. Where the only participating federal agency is an agency other than Customs (the Coast Guard, for example), and Customs is merely the custodian, the other agency shall review the request and make the recommendation to Customs Headquarters.

INAPPLICABILITY OF PUBLIC NOTICE AND DELAYED EFFECTIVE DATE PROVISIONS

This document provides guidelines concerning internal Customs procedures and is designed to promote efficient use of personnel, facilities, and resources and to promote cooperative law enforcement efforts. It has no effect on the general public. Accordingly, pursuant to 5 U.S.C. 553(b)(B) and (d)(3), notice and solicitation of comments is unnecessary and good cause is found for dispensing with a delayed effective date for adoption of the new guidelines.

DRAFTING INFORMATION

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

JOHN P. SIMPSON,
Acting Commissioner of Customs.

(T.D. 86-52)

Customs Regulations Amendments Concerning Convention on Cultural Property Implementation Act

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by adding provisions to implement the Convention on Cultural Property Implementation Act. The Convention addressed the problem of illicit importing and exporting of items of cultural property, that is, items of importance for archaeology, prehistory, history, literature, art, or science. These regulations are designed to prohibit illicit traffic in cultural property while allowing the exchange of natural treasures for legitimate scientific, educational, and cultural purposes. The regulations are effective for all importations of cultural property, and archaeological and ethnological material, subject to the Convention.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: Samuel Orandle, Entry Procedures and Penalties Division (202-

566-5765); Operational Aspects: Louis Alfano, Duty Assessment Division (202-566-8651); U.S. Customs, Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Beginning in the late 1960's, the U.S. began participating in negotiations, sponsored by the United Nations Educational, Scientific and Cultural Organization (UNESCO), addressing the problem of illicit international trade in cultural property. Cultural property was defined as property which, on religious or secular grounds, is specifically designated by a country as being important in the archaeology, prehistory, history, literature, art, or science of that country.

The value of cultural property, whether archaeological or ethnological in nature, is immeasurable. Such items often constitute the very essence of a society and convey important information concerning a people's origin, history, and traditional setting. The importance and popularity of such items regrettably makes them targets of theft, clandestine excavation of archaeological sites and accompanying illegal importing and exporting.

There has been growing concern in the U.S. regarding the need for protecting endangered cultural property. The appearance in the U.S. of stolen or illegally exported artifacts from other countries where there has been recent pillaging has, on occasion, strained our foreign and cultural relations. This situation, combined with the concerns of the museum, archaeological, and scholarly communities, was recognized by the President and Congress. Codes of ethics and professional standards were formally developed by these communities. It became apparent that it was in the national interest for the U.S. to join with other countries to control illegal trafficking of such articles in international commerce.

The U.S. joined international efforts and actively participated in negotiations resulting in the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Owernship of Cultural Property (823 U.N.T.S. 231 (1972)). U.S. acceptance of the 1970 UNESCO Convention was codified into U.S. law as the "Convention on Cultural Property Implementation Act" (Pub. L. 97-446, 96 Stat. 2329 at 2350). The spirit of the Convention was enacted into law to promote U.S. leadership in achieving greater international cooperation toward preserving cultural treasures that are of importance not only to the nations whence they originate, but also to greater international understanding of mankind's common heritage. In 1983 the U.S. became the first major art importing country to implement the 1970 Convention.

It was with these goals in mind that Customs issued interim regulations to carry out the policies of the Act. The interim regulations were published in the Federal Register as T.D. 85-107 on

June 25, 1985 (50 FR 26192), and took effect immediately. However, comments on the interim regulations were invited for consideration before final regulations were issued.

Analysis of Comments

One commenter conveyed strong support for the intent of the regulations while expressing a general concern for what he termed "weaknesses and ambiguities". However, the commenter stated the weakness was the result of the Convention and the implementing Act, and therefore, could not be corrected in the regulations. Customs does not believe the regulations are weak. However, we cannot address specifics since the commenter did not raise any specific points.

The remaining 4 commenters were more detailed in their submissions. Comments they raised and Customs replies are as follows.

Comment: The definition of "museum" in § 12.104(e) should be attributed to its source, the Museum Services Act (Pub. L. 94-462, 20 U.S.C. 968).

Reply: Customs agrees and has added the reference. Also, Customs is adopting a comment that clarifies the point that "recognized museum" under the Act is synonymous with "museum".

Comment: The regulations should clarify how the Secretary of the Treasury will select a museum or other institution to temporarily hold a seized article of archaeological or ethnological material, or article of seized cultural property. Also, the regulations should provide for reimbursement to a museum or institution holding such an article or piece of property if the object requires special care or more security than normal.

Reply: As written, § 12.104f contains reference to the two basic criteria the Secretary will use in determining which museum or institution, if any, will be given an article or material seized under these regulations, for temporary display. These factors are: the safety that will be provided the article or material, and the museum or institution's assurances, backed by a sufficient bond, that the article or material will be returned to the Secretary upon request. This decision is left to the Secretary's discretion and these regulations are not the proper forum for a listing of specifications concerning museums or institutions. The Secretary will consider such requests by museums or institutions on a case-by-case basis.

As to the comment requesting a regulation providing financial assistance to a museum or institution seeking to temporarily house a seized article or material, Customs is aware of no statutory authority requiring that such aid be made available. To the contrary, Customs believes such a provision is contraindicated by the Secretary's requirement of selecting a museum or institution that is financially able to assure the item's safe return.

Comment: Customs failure to prepare a regulatory impact statement is improper. The regulations will have the kind of impact which requires a regulatory impact statement.

Reply: Customs disagrees. These regulations will only have a minor impact on the general public. Persons who trade in archaeological and ethnological material, or in cultural property, will be more affected. Certain documentation or evidence will be required upon importation of articles or materials designated by agreements or emergency actions as coming under the protection of the Act. Customs would characterize this as a minor impact. Customs does not believe that these regulations will result in any significant economic costs, and no comments to the contrary were submitted.

Comment: Customs BACKGROUND statement in the interim regulations was unwarranted and improper. Although the text of the interim regulations correctly specifies which prohibitions pertain to which types of property, Customs BACKGROUND statement may lead to unnecessary confusion.

Reply: Customs agrees that the term, "cultural property", may have been used broadly in the BACKGROUND section of the interim regulations. We regret if any statements made may have appeared too strongly worded.

The intent of the BACKGROUND section was to convey the urgency of the problem the interim regulations were designed to address. We do not believe the wording was misleading or confusing to a degree requiring that these regulations be reissued with another opportunity to comment. In fact, the commenter raising these points also states the interim regulations themselves correctly set out the prohibitions pertaining to different types of articles or materials.

Comment: Portions of the interim regulations are inconsistent with the Act.

Reply: Customs agrees that there are some instances where the interim regulations diverged slightly from the Act. To correct this, the following changes have been made to the final regulations.

(1) In § 12.104(a)(1), the word, "and" is being added after paragraph (a)(1)(ii), and the phrase, "or in addition to paragraphs (a)(1)(i) and (ii) of this section" is being added after paragraph (a)(1)(iii).

(2) In § 12.104a(a), reference is made to articles of cultural property stolen from "such institution". The corrected phrase in the final regulations is "such museum, monument, or institution".

(3) In § 12.104a(b) in the interim regulations, a phrase was omitted. The proper wording of § 12.104a(b) as it appears in the final regulations is as follows: No archaeological or ethnological material designated pursuant to 19 U.S.C. 2604 and listed in § 12.104g, that is exported (whether or not such exportation is to the U.S.) from the State Party after the designation of such material under 19 U.S.C. 2604 may be imported into the U.S. unless the State Party

issues a certificate or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

(4) In § 12.104b, the introductory paragraph is changed to read, "The following is a list of State Parties and the date of entry into force for each State Party:". Also, Zambia is added in proper alphabetical order with a date of entry into force of September 21, 1985.

(5) In § 12.104c(a), the phrase, "is filed with the district director," is moved from the end of the paragraph to immediately after the word "Secretary".

(6) In § 12.104d, reference is made to the, "certificate or evidence". The corrected phrase in the final regulations is "certificate, documentation, or evidence".

(7) In § 12.104g, the word "Convention" is changed to "Convention on Cultural Property Implementation Act" to properly reflect the source of the protections provided items and categories of protected materials.

Comment: One commenter requested clarification of whether the documentation accompanying an importation of designated archaeological or ethnological material might also apply to importations of cultural property. The commenter, representing research libraries, was concerned over the burden a broad interpretation of these regulations would impose on research libraries obtaining rare manuscripts and incunabula from sources outside the U.S.

Reply: The documentation required for importations of designated archaeological and ethnological material does not apply to importations of rare manuscripts, incunabula, or other items of cultural property.

After consideration of all of the comments received in response to publication of the interim regulations, and further review of the matter, it has been determined to adopt the regulations in final form with the modifications previously discussed.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Pursuant to § 3 of the Regulatory Flexibility Act (Pub. L. 96-353, 5 U.S.C. 301 *et seq.*), it is hereby certified that the regulations set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

LIST OF SUBJECTS IN 19 CFR PARTS 12, 178

PART 12

Customs duties and inspection, Imports, Exports.

PART 178

Reporting and recordkeeping requirements, Paperwork requirements, Collections of information.

AMENDMENTS TO THE REGULATIONS

Parts 12 and 178, Customs Regulations (19 CFR Parts 12, 178), were amended on an interim basis by the publication of T.D. 85-107, in the Federal Register on June 25, 1985 (50 FR 26193). These parts are now amended in final in the following manner:

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for Part 12 continues to read as follows:

AUTHORITY: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624.

§ 12.104 et seq. also issued under 19 U.S.C. 2612.

2. Part 12 is further amended by adding a new unit titled, "Cultural Property", designated §§ 12.104-12.104i to read as follows:

CULTURAL PROPERTY

Sec.

12.104 Definitions.

12.104a Importations prohibited.

12.104b State Parties to the Convention.

12.104c Importations permitted.

12.104d Detention of articles; time in which to comply.

12.104e Seizure and forfeiture.

12.104f Temporary disposition of materials and articles.

12.104g Specific items or categories designated by agreements or emergency actions.

12.104h Exempt materials and articles.

12.104i Enforcement.

§ 12.104 Definitions.

For purposes of §§ 12.104 through 12.104i:

(a) The term, "archaeological or ethnological material of the State Party" to the 1970 UNESCO Convention means—

(1) Any object of archaeological interest. No object may be considered to be an object of archaeological interest unless such object—

(i) Is of cultural significance;

(ii) Is at least 250 years old; and

(iii) Was normally discovered as a result of scientific excavation, clandestine or accidental digging, or exploration on land or under water; or in addition to paragraphs (a)(1) (i) and (ii) of this section;

(iv) Meets such standards as are generally acceptable as archaeological such as, but not limited to, artifacts, buildings, parts of buildings, or decorative elements, without regard to whether the particular objects are discovered by exploration or excavation;

(2) Any object of ethnological interest. No object may be considered to be an object of ethnological interest unless such object—

(i) Is the product of a tribal or nonindustrial society, and

(ii) Is important to the cultural heritage of a people because of its distinctive characteristics, comparative rarity, or its contribution to the knowledge of the origins, development or history of that people;

(3) Any fragment or part of any object referred to in paragraph (a) (1) or (2) of this section which was first discovered within, and is subject to export control by the State Party.

(b) The term "Convention" means the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property adopted by the General Conference of the United Nations Educational, Scientific, and Cultural Organization at its sixteenth session (823 U.N.T.S. 231 (1972)).

(c) The term "cultural property" includes articles described in Article 1 (a) through (k) of the Convention, whether or not any such article is specifically designated by any State Party for the purposes of Article 1. Article 1 lists the following categories:

(1) Rare collections and specimens of fauna, flora, minerals and anatomy, and objects of palaeontological interest;

(2) Property relating to history, including the history of science and technology and military and social history, to the life of national leaders, thinkers, scientists and artists and to events of national importance;

(3) Products of archaeological excavations (including regular and clandestine) or of archaeological discoveries;

(4) Elements of artistic or historical monuments or archaeological sites which have been dismembered;

(5) Antiquities more than 100 years old, such as inscriptions, coins and engraved seals;

(6) Objects of ethnological interest;

(7) Property of artistic interest, such as:

(i) Pictures, paintings and drawings produced entirely by hand on any support and in any material (excluding industrial designs and manufactured articles decorated by hand);

(ii) Original works of statuary art and sculpture in any material;

(iii) Original engravings, prints and lithographs;

(iv) Original artistic assemblages and montages in any material;

(8) Rare manuscripts and incunabula, old books, documents and publications of special interest (historical, artistic, scientific, literary, etc.) singly or in collections;

150-146 O - 86 - 2

(9) Postage, revenue and similar stamps, singly or in collections;

(10) Archives, including sound, photographic and cinematographic archives;

(11) Articles of furniture more than 100 years old and old musical instruments.

(d) The term "designated archaeological or ethnological material" means any archaeological or ethnological material of the State Party which—

(1) Is—

(i) Covered by an agreement under 19 U.S.C. 2602 that enters into force with respect to the U.S., or

(ii) Subject to emergency action under 19 U.S.C. 2603 and

(2) Is listed by regulation under 19 U.S.C. 2604.

(e) The term "museum" means a public or private nonprofit agency or institution organized on a permanent basis for essentially educational or esthetic purposes, which, utilizing a professional staff, owns or utilizes tangible objects, cares for them, and exhibits them to the public on a regular basis (Museum Services Act; Pub. L. 94-462; 20 U.S.C. 968). For the purposes of these regulations, the term "recognized museum" under the Cultural Property Implementation Act shall be synonymous with "museum".

(f) The term "Secretary" means the Secretary of the Treasury or his delegate, the Commissioner of Customs.

(g) The term "State Party" means any nation which has ratified, accepted, or acceded to the 1970 UNESCO Convention.

(h) The term "United States" or "U.S.", includes the customs territory of the United States, the U.S. Virgin Islands and any territory or area the foreign relations for which the U.S. is responsible.

§ 12.104a Importations prohibited.

(a) No article of cultural property documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in any State Party which was stolen from such museum, monument, or institution after April 12, 1983, or after the date of entry into force of the Convention for the State Party, whichever date is later, may be imported into the U.S.

(b) No archaeological or ethnological material designated pursuant to 19 U.S.C. 2604 and listed in § 12.104g, that is exported (whether or not such exportation is to the U.S.) from the State Party after the designation of such material under 19 U.S.C. 2604 may be imported into the U.S. unless the State Party issues a certificate or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

§ 12.104b State parties to the convention.

(a) The following is a list of State Parties, and the date of entry into force for each State Party:

State Party	Date of entry into force
Algeria	Sept. 24, 1974.
Argentina	Apr. 11, 1973.
Bolivia	Jan. 4, 1977.
Brazil	May 16, 1973.
Bulgaria	Apr. 24, 1972.
Cameroon	Aug. 24, 1972.
Canada	June 28, 1978.
Central African Republic	May 1, 1972.
Cuba	Apr. 30, 1980.
Cyprus	Jan. 19, 1980.
Czechoslovakia	May 14, 1977.
Democratic Kampuchea	Dec. 26, 1972.
Democratic People's Republic of Korea	Aug. 13, 1983.
Dominican Republic	June 7, 1973.
Ecuador	Apr. 24, 1972.
Egypt	July 5, 1973.
El Salvador	May 20, 1978.
German Democratic Republic	Apr. 16, 1974.
Greece	Sept. 5, 1981.
Guatemala	Apr. 14, 1985.
Guinea	June 18, 1979.
Honduras	June 19, 1979.
Hungary	Jan. 23, 1979.
India	Apr. 24, 1977.
Iran	Apr. 27, 1975.
Iraq	May 12, 1973.
Italy	Jan. 2, 1979.
Jordan	June 15, 1974.
Kuwait	Sept. 22, 1972.
Mauritania	July 27, 1977.
Mauritius	May 27, 1978.
Mexico	Jan. 4, 1973.
Nepal	Sept. 23, 1976.
Nicaragua	July 19, 1977.
Niger	Jan. 16, 1973.
Nigeria	Apr. 24, 1972.
Oman	Sept. 2, 1978.
Pakistan	July 30, 1981.
Panama	Nov. 13, 1973.
Peru	Jan. 24, 1980.
Poland	Apr. 30, 1974.
Portugal	Mar. 9, 1986.
Qatar	July 20, 1977.
Republic of Korea	May 14, 1983.
Saudi Arabia	Dec. 8, 1976.

State Party	Date of entry into force
Senegal	Mar. 9, 1985.
Socialist People's Libyan Arab Jamahiriya	Apr. 9, 1973.
Spain	Apr. 10, 1986.
Sri Lanka	July 7, 1981.
Syrian Arab Republic	May 21, 1975.
Tunisia	June 10, 1975.
Turkey	July 21, 1981.
United Republic of Tanzania	Nov. 2, 1977.
United States of America	Dec. 2, 1983.
Uruguay	Nov. 9, 1977.
Yugoslavia	Jan. 3, 1973.
Zaire	Dec. 23, 1974.
Zambia	Sept. 21, 1985.

(b) Additions to and deletions from the list of State Parties will be accomplished by Federal Register notice, from time to time, as the necessity arises.

§ 12.104c Importations permitted.

Designated archaeological or ethnological material for which entry is sought into the U.S., will be permitted entry if at the time of making entry:

(a) A certificate, or other documentation, issued by the Government of the country of origin of such material in a form acceptable to the Secretary is filed with the district director, such form being, but not limited to, an affidavit, license, or permit from an appropriate, authorized State Party official under seal, certifying that such exportation was not in violation of the laws of that country, or

(b) Satisfactory evidence is presented to the district director that such designated material was exported from the State Party not less than 10 years before the date of such entry and that neither the person for whose account the material is imported (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than 1 year before that date of entry, or

(c) Satisfactory evidence is presented to the district director that such designated material was exported from the State Party on or before the date on which such material was designated under 19 U.S.C. 2604.

(d) The term "satisfactory evidence" means—

(1) For purposes of paragraph (b) of this section—

(i) One or more declarations under oath by the importer, or the person for whose account the material is imported, stating that, to the best of his knowledge—

(A) The material was exported from the State Party not less than 10 years before the date of entry into the U.S., and

(B) Neither such importer or person (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than 1 year before the date of entry of the material; and

(ii) A statement provided by the consignor, or person who sold the material to the importer, which states the date, or, if not known, his belief, that the material was exported from the State Party not less than 10 years before the date of entry into the U.S. and the reasons on which the statement is based; and

(2) For purposes of paragraph (c) of this section—

(i) One or more declarations under oath by the importer or the person for whose account the material is to be imported, stating that, to the best of his knowledge, the material was exported from the State Party on or before the date such material was designated under 19 U.S.C. 2604, and

(ii) A statement by the consignor or person who sold the material to the importer which states the date, or if not known, his belief, that the material was exported from the State Party on or before the date such material was designated under 19 U.S.C. 2604, and the reasons on which the statement is based.

(e) *Related persons.* For purposes of paragraphs (b) and (d) of this section, a person shall be treated as a related person to an importer, or to a person for whose account material is imported, if such person—

(1) Is a member of the same family as the importer or person of account, including, but not limited to, membership as a brother or sister (whether by whole or half blood), spouse, ancestor, or lineal descendant;

(2) Is a partner or associate with the importer or person of account in any partnership, association, or other venture; or

(3) Is a corporation or other legal entity in which the importer or person of account directly or indirectly owns, controls, or holds power to vote 20 percent or more of the outstanding voting stock or shares in the entity.

§ 12.104d Detention of articles; time in which to comply.

In the event an importer cannot produce the certificate, documentation, or evidence required in § 12.104c at the time of making entry, the district director shall take the designated archaeological or ethnological material into Customs custody and send it to a bonded warehouse or public store to be held at the risk and expense of the consignee until the certificate, documentation, or evidence is presented to such officer. The certificate, documentation, or evidence must be presented within 90 days after the date on which the material is taken into Customs custody, or such longer period as may be allowed by the district director for good cause shown.

§ 12.104e Seizure and forfeiture.

(a) Whenever any designated archaeological or ethnological material is imported into the U.S. in violation of 19 U.S.C. 2606, and the importer states in writing that he will not attempt to secure the certificate, documentation, or evidence required by § 12.104c, or such certificate, documentation, or evidence is not presented to the district director before the expiration of the time provided in § 12.104d, the material shall be seized and summarily forfeited to the U.S. in accordance with Part 162 of this chapter.

(1) Any designated archaeological or ethnological material which is forfeited to the U.S. shall, in accordance with the provisions of Title III of Pub. L. 97-446, 19 U.S.C. 2609(b):

(i) First be offered for return to the State Party;

(ii) if not returned to the State Party be returned to a claimant with respect to whom the designated material was forfeited if that claimant establishes—

(A) valid title to the material;

(B) that the claimant is a bona fide purchaser for value of the material; or

(iii) if not returned to the State Party under paragraph (a)(1)(i) of this section or to a claimant under paragraph (a)(1)(ii) of this section, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws. No return of material may be made under paragraph (a)(1) (i) or (ii) of this section unless the State Party or claimant, as the case may be, bears the expenses incurred incident to the return and delivery, and complies with such other requirements relating to the return as the Secretary shall prescribe.

(b) Whenever any stolen article of cultural property is imported into the U.S. in violation of 19 U.S.C. 2607, such cultural property shall be seized and forfeited to the U.S. in accordance with Part 162 of this chapter.

(1) Any stolen article of cultural property which is forfeited to the U.S. shall, in accordance with the provisions of Title III of Pub. L. 97-446, 2609(c):

(i) First be offered for return to the State Party in whose territory is situated the institution referred to in 19 U.S.C. 2607 and shall be returned if that State Party bears the expenses incident to such return and delivery and complies with such other requirements relating to the return as the Secretary prescribes; or

(ii) if not returned to such State Party, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

§ 12.104f Temporary disposition of materials and articles.

Pending a final determination as to whether any archaeological or ethnological material, or any article of cultural property, has been imported into the U.S. in violation of 19 U.S.C. 2606 or 19

U.S.C. 2607, the Secretary may permit such material or article to be retained at a museum or other cultural or scientific institution in the U.S. if he finds that sufficient safeguards will be taken by the museum or institution for the protection of such material or article; and sufficient bond is posted by the museum or institution to ensure its return to the Secretary.

§ 12.104g Specific items or categories designated by agreements or emergency actions.

(a) [Reserved]

(b) A list of specific items or categories designated by agreements or emergency actions as coming under the protection of the Convention on Cultural Property Implementation Act will from time to time, as the necessity arises, be published in the Federal Register by means of a general notice.

§ 12.104h Exempt materials and articles.

The provisions of these regulations shall not apply to—

(a) Any archaeological or ethnological material or any article of cultural property which is imported into the U.S. for temporary exhibition or display, if such material or article is rendered immune from seizure under judicial process by the U.S. Information Agency, Office of the General Counsel and Congressional Liaison, pursuant to the Act entitled "An Act to render immune from seizure under judicial process certain objects of cultural significance imported into the United States for temporary display or exhibition, and for other purposes", approved October 19, 1965 (22 U.S.C. 2459); or

(b) Any designated archaeological or ethnological material or any article of cultural property imported into the U.S. if such material or article—

(1) Has been held in the U.S. for a period of not less than 3 consecutive years by a recognized museum or religious or secular monument or similar institution, and was purchased by that institution for value, in good faith, and without notice that such material or article was imported in violation of these regulations, but only if—

(i) the acquisition of such material or article has been reported in a publication of such institution, any regularly published newspaper or periodical with a circulation of at least 50,000 or a periodical or exhibition catalog which is concerned with the type of article or materials sought to be exempted from these regulations,

(ii) such material or article has been exhibited to the public for a period or periods aggregating at least 1 year during such 3-year period, or

(iii) such article or material has been cataloged and the catalog material made available upon request to the public for at least 2 years during such 3-year period;

(2) If paragraph (b)(1) of this section does not apply, has been within the U.S. for a period of not less than 10 consecutive years and has been exhibited for not less than 5 years during such period in a recognized museum or religious or secular monument or similar institution in the U.S. open to the public;

(3) If paragraphs (b) (1) and (2) of this section do not apply, has been within the U.S. for a period of not less than 10 consecutive years and the State Party concerned has received or should have received during such period fair notice (through such adequate and accessible publication, or other means, as the Secretary or his designee shall prescribe) of its location within the U.S.; and

(4) If none of the preceding subparagraphs apply, has been within the U.S. for a period of not less than 20 consecutive years and the claimant establishes that it purchased the material or article for value without knowledge or reason to believe that it was imported in violation of law.

§ 12.104i Enforcement.

In the customs territory of the United States, and in the U.S. Virgin Islands, the provisions of these regulations shall be enforced by appropriate customs officers. In any other territory or area within the U.S., but not within such customs territory or the U.S. Virgin Islands, such provisions shall be enforced by such persons as may be designated by the President.

Part 178, Customs Regulations (19 CFR Part 178), was also amended by the interim regulations issued as T.D. 85-107. The Office of Management and Budget control number issued to these regulations remains the same and is retained in § 178.2.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 et seq.

§ 178.2

2. Section 178.2 is amended by inserting, in proper numerical order, the following entry:

19 CFR section	Description	OMB Control No.
12.104c 12.104e	Certificates and other documentation relating to the importation of items of cultural property.	1515-0147

ALFRED R. DE ANGELUS,
Acting Commissioner of Customs.

Approved: February 3, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

(T.D. 86-53)

Petitioner's Desire To Contest Decision Denying Domestic Interested Party Petition Concerning Reclassification of Operatic and Theatrical Costumes

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of petitioner's desire to contest decision on domestic interested party petition.

SUMMARY: This document advises the public of the desire of an interested party to contest Customs decision denying its petition requesting reclassification of certain imported operatic and theatrical costumes rented to U.S. opera and theater companies. The petitioner has advised Customs of its intention to file an action in the U.S. Court of International Trade.

DATE: February 25, 1986.

FOR FURTHER INFORMATION CONTACT: Harold Singer, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On November 23, 1984, a notice was published in the Federal Register (49 FR 46162) indicating that Customs had received a petition from a domestic interested party filed under § 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), requesting that imported operatic and theatrical costumes rented to U.S. opera and theater companies be classified as dutiable under the appropriate provisions of Schedule 3, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), for wearing apparel.

The costumes are imported for the use of certain opera and theater companies in the U.S. They are rented by the U.S. companies for the duration of a particular production, and then returned to the foreign exporter. They are currently classifiable under the provision for "regalia" in item 851.30, TSUS, and entitled to entry free of duty. This provision exempts from duty any articles imported for the use of any public library, any other public institution, or any nonprofit institution established for educational, scientific, literary, or philosophical purposes, or for the encouragement of the fine

arts. It is Customs opinion that opera and theater companies are such nonprofit institutions established to encourage the fine arts.

In support of its position that imported operatic and theatrical costumes are not classifiable as "regalia" under item 851.30, TSUS, the petitioner made the argument that past Customs rulings do not support the use of item 851.30, TSUS, for the duty-free importation of the costumes. The petitioner stated that these rulings apply under item 851.30, TSUS, specifically to situations in which: (1) The costumes are the property of the non-profit institution using them; (2) only a nominal admission fee to defray expenses will be charged; or (3) the performers using the costumes are not reimbursed for their services. The costumes, it was claimed, cannot therefore be used in any commercial activity. The petitioner contended that the costumes are the property of the foreign rental companies, not the opera and theater companies using them, that more than nominal admission fees to defray expenses are charged for opera and theater performances, that the opera and theater performers are often handsomely reimbursed for their services, and that the costumes are used in a commercial activity. Petitioner therefore concluded that the importation of the costumes under the duty-free provisions of item 851.30, TSUS, was a misapplication of that provision.

Six comments were received in response to the November 23, 1984, notice. Three of the commenters supported the current classification of opera and theater costumes as regalia. The arguments of the other commenters, including the petitioner's, challenging Customs current classification, are as follows:

(1) Operatic and theatrical costumes do not meet the plain and ordinary definition of "regalia";

(2) The term "regalia" is defined by Headnote 2, Part 4, Schedule 8, TSUS, as "only such insignia of rank or office, emblems or other articles as may be worn upon the person or borne in the hand during public exercises of the institution * * *" and commercial performances of operas and plays, albeit by a nonprofit organization, for which substantial admission charges are made, cannot be equated with "public exercises";

(3) The legislative history of item 851.30, TSUS, indicates that regalia is to symbolize a given organization as an institution and costumes rented out to different organizations do not symbolize any particular organization;

(4) Most imported costumes are used in profit-making theatrical productions for which performers receive enormous salaries and for which ticket prices are very expensive; and

(5) The requirement under item 851.30, TSUS, that regalia may be imported as the property of a nonprofit institution is not met where the costumes are rented.

DECISION ON PETITION AND NOTICE OF PETITIONER'S DESIRE TO CONTEST

After careful analysis of the comments received in response to the notice and further review of the matter, by letter dated November 6, 1985 (CLA-2 CO:R:CV:V, 553575 HS), the petitioner was informed through its counsel that Customs is of the opinion that the current classification is correct, and that the petition was therefore denied.

Item 851.30, TSUS, provides for the duty-free treatment of regalia imported for the use of "any library, any other public institution, or any nonprofit institution established for educational, scientific, literary or philosophical purposes, or for the encouragement of the fine arts. In reaching its decision affirming the classification of the costumes as regalia, Customs found the petitioner's and the other commenters' arguments challenging the current classification to be unpersuasive. First, it was noted that the definition of regalia in Headnote 2, Part 4, Schedule 8, TSUS, rather than the plain and ordinary definition, governs the use of the term in item 851.30, TSUS. That headnote specifically includes articles other than insignia or emblems and, according to the Tariff Classification Study of 1960, "almost any article which is worn upon the person or borne in hand during public exercises of the institution is regalia if it is not an article of furniture or fixtures, regular wearing apparel, or personal property of individuals." While some performances may require clothing that is indistinguishable from ordinary wearing apparel, it is clear that these types of costumes should not be treated as regalia as the headnote specifically excludes regular wearing apparel.

Second, it is clear to us that a nonprofit opera or theatrical company is a nonprofit institution for the encouragement of the fine arts and that performances of such organizations are "public exercises" of such institutions. If performances of such organizations are not "public exercises" of such organizations, we are at a loss at determining what would be considered a public exercise of these organizations. The regalia provision would have no meaning for nonprofit theatrical and opera companies if their performances were not considered public exercises.

Thirdly, the cost of tickets for a performance and payments made by opera companies to outstanding performers who further the nonprofit objectives of the institution are irrelevant to the question of whether an institution is engaged in commercial activity as long as the institution is nonprofit. We do emphasize, however, that for an opera or theatrical company to take advantage of the regalia provision, it must be shown that the institution is registered as a nonprofit organization under § 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)).

Fourthly, regarding the argument that the legislative history of item 851.30, TSUS, indicates that regalia is to symbolize a given or-

ganization as an institution, we could find no language in the legislative history that supports this assertion.

Finally, regarding the comment that regalia that is rented is not the property of the nonprofit institution, the requirement set forth in the TSUS entitling regalia to duty-free treatment is that the articles be imported for the use of the nonprofit institution. It is our view that rental use is sufficient and purchase is not necessary as long as the importer acquires the proprietary economic interest in the articles.

In response to Customs decision to deny the petition, on December 5, 1985, the petitioner filed notice of its desire to contest the decision in accordance with § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

Customs has reconsidered the matter in light of the petitioner's letter of notice of its desire to contest the November 6, 1985, decision. We remain of the opinion that the decision is correct. That decision will stand in the absence of a contrary judgment rendered by the U.S. Court of International Trade or the U.S. Court of Appeals for the Federal Circuit.

AUTHORITY

This notice is published under the authority of § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR § 175.24).

(T.D. 86-54)

Customs Regulations Amendment Adding Norway to List of Countries Whose Pleasure Vessels are Entitled To Be Issued U.S. Cruising Licenses

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by adding Norway to the list of countries whose pleasure vessels may be issued U.S. cruising licenses. Customs has been informed that yachts used and employed exclusively as pleasure vessels belonging to any resident of the U.S. are allowed to arrive at and depart from Norwegian ports and cruise in the waters of Norway without being subjected to formal entry and clearance procedures. Therefore, Customs is extending reciprocal privileges to pleasure vessels belonging to any resident of Norway.

EFFECTIVE DATE: These privileges became effective for Norway on December 18, 1985.

FOR FURTHER INFORMATION CONTACT: John Mathis, Carriers, Drawback and Bonds Division (202-566-5706), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4.94(a), Customs Regulations (19 CFR 4.94(a)), provides that U.S. vessels documented as yachts, used exclusively for pleasure, not engaged in any trade, and not violating the customs or navigation laws of the U.S. may proceed from port to port in the U.S. or to foreign ports without entering and clearing, as long as they have not visited hovering vessels.

Generally, foreign-flag yachts entering the U.S. are required to comply with the laws applicable for foreign vessels arriving at, departing from, and proceeding between ports of the U.S. However, as provided in § 4.94(b), Customs Regulations (19 CFR 4.94(b)), pleasure vessels from certain countries may be issued cruising licenses which exempt them from formal entry and clearance procedures (e.g., filing manifests, obtaining permits to proceed and paying entry and clearance fees) at all but the first port of entry in the U.S. Yachts or pleasure vessels not carrying passengers or merchandise in trade are exempt from paying tonnage tax and light money in any case pursuant to § 4.21(b)(5), Customs Regulations (19 CFR 4.21(b)(5)). Cruising licenses are available to pleasure vessels of countries which extend reciprocal privileges to U.S. pleasure vessels. A list of these countries is set forth in § 4.94(b).

By diplomatic note dated November 29, 1985, the Norwegian Royal Ministry of Foreign Affairs informed the American Embassy in Olso, Norway, that the Government of Norway permits yachts used and employed exclusively as pleasure vessels and belonging to any resident of the U.S., to arrive at and depart from ports of Norway and cruise the waters of Norway without entering and clearing Norwegian Customs, and without the payment of any charges for entering or clearing, dues, duty per ton, tonnage taxes,

or charges for cruising licenses. The embassy conveyed this information to the Department of State, which in turn informed Customs Headquarters by a letter dated December 13, 1985. The Carriers, Drawback and Bonds Division of Customs is of the opinion that satisfactory evidence has been furnished to establish the reciprocity required in § 4.94(b). Therefore, on January 14, 1986, the Director of that division determined that, effective retroactively to December 18, 1985, Norway should be added to the list of countries set forth in § 4.94(b).

By virtue of the authority vested in the President by § 5 of the Act of May 28, 1908, 35 Stat. 425, as amended (46 U.S.C. 104), the President has delegated the authority to issue these cruising licenses to the Secretary of the Treasury by E.O. 10289, September 17, 1951. By Treasury Department Order 165–25, the Secretary of the Treasury delegated authority to the Commissioner of Customs to prescribe regulations relating to § 4.94(b) and other sections of the Customs Regulations relating to lists of countries entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated authority to amend this section to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office of Regulations and Rulings, who then redelegated it to the Director, Regulations Control and Disclosure Law Division.

FINDING

On the basis of the information received from the Government of Norway and the Department of State, as described above, it has been determined that the U.S. is in possession of satisfactory evidence regarding the passage of U.S. pleasure vessels through the ports and waters of Norway without their being subjected to formal entry and clearance procedures. Therefore, Norway is added to the list of countries whose pleasure vessels may be issued U.S. cruising licenses.

INAPPLICABILITY OF PUBLIC NOTICE AND DELAYED EFFECTIVE DATE REQUIREMENTS

Because this amendment merely implements a statutory requirement and involves a matter in which the majority of the public is not particularly interested, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary. Further, for the same reasons good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553(d)(1).

THE REGULATORY FLEXIBILITY ACT

This document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). That Act does not apply to any regulation such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), or any other statute.

EXECUTIVE ORDER 12291

This amendment does not meet the criteria for a major regulation as defined in § 1(b) of E.O. 12291. Accordingly, a major impact analysis is not required.

DRAFTING INFORMATION

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

LIST OF SUBJECTS IN 19 CFR PART 4

Customs inspection and duties, Imports, Vessels, Yachts.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The authority citation for Part 4 continues to read as follows:

AUTHORITY: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103.

§ 4.94 also issued under 19 U.S.C. 1433, 1434, 1435, 1441; 46 U.S.C. 91, 104, 313, 314.

4.94 [Amended]

2. Section 4.94(b), Customs Regulations (19 CFR 4.94(b)), is amended by inserting, in appropriate alphabetical order, the word, "Norway", to the list of countries whose yachts or pleasure vessels may be issued U.S. cruising licenses.

Date: February 20, 1986.

U.S. Customs Service

Customs Service Decisions

DEPARTMENT OF THE TREASURY,
OFFICE OF THE COMMISSIONER OF CUSTOMS,
Washington, DC.

The following are decisions of the United States Customs Service which are of sufficient interest or importance to warrant publication in the CUSTOMS BULLETIN.

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

(C.S.D. 86-6)

This ruling holds that a foreign trade zone grantee or operator is not, in normal circumstances, responsible under 19 U.S.C. 81n for prospective charges for additional Customs services which involve a departed zone tenant and removed zone merchandise.

January 31, 1983

Re: Decision on Application for Further Review of Protest Nos. 4105-2-000001 and 4105-1-000003

DEAR SIR: The above captioned protests and applications for further review were filed against demands for payment of certain charges for Customs supervision at the Toledo Foreign-Trade Zone, billed on a total of 11 invoices dated from July 21, 1981, through December 22, 1981. Our decision follows:

Issue: The basic issue raised is whether charges for additional Customs services required at a foreign-trade zone (FTZ) are chargeable to the operator of the FTZ when those services are performed outside of the precincts and limits of the FTZ.

Facts: The Protestants are the grantee of an FTZ and the former operator of the FTZ. The bills, or more accurately, portions of bills protested, relate to services provided by Customs with respect to a tenant of the FTZ but which were performed subsequent to termination of the tenant's tenancy at the FTZ and apparently subse-

150-146 O - 86 - 3

quent to the time protestant FTZ operator stopped operating the FTZ and was succeeded by another firm as operator.

The sequence of events, as set out by the Protestants, is as follows. For a period of years ending in October 1980, a company was a tenant in a FTZ, and maintained a sizable inventory of merchandise in the FTZ. The Protestant former operator of the FTZ was the operator of the FTZ during the tenancy of that company.

At some time in or prior to March 1978, it is stated, Customs officers apparently became concerned with the integrity of the inventory of the above company's merchandise at the FTZ and began an investigation, the nature and scope of which is unknown to the Protestants. The method of investigation included comparison of inventory records of the company's merchandise "lots" with subsequent inventories of the same "lots." As a result of the investigation, Customs commenced to issue a series of claims for liquidated damages for duty due on merchandise said to have been found missing from each lot. These claims were addressed to Protestant FTZ grantee, and although not so stated, apparently were against the grantee's foreign-trade zone bond.

The FTZ bond is voluntarily tendered and is conditioned upon the removal of FTZ guards for other than the FTZ's normal business hours and guarantees the payment of all duties and taxes on such merchandise as may be removed from the FTZ without a proper Customs permit or otherwise be missing from the FTZ.

The claims were forwarded by the grantee to the operator and by the operator to the tenant company. The tenant company has contested the claims, taking the position that none of its merchandise was in fact missing.

In any event, investigation of the tenant by Customs is said to have resulted in a substantial increase in Customs charges for services at the FTZ, which were periodically billed to the grantee. During the tenure of the tenant at the FTZ, these charges were paid to Customs by the FTZ operator, who was in turn reimbursed by the tenant for that portion of the charges attributable to the tenant. The amount of the charge to the tenant was based upon rate and hour information furnished to the FTZ operator by Customs.

In October of 1980, the tenant discontinued its operation in the FTZ and removed its goods from the FTZ. It appears that prior to its departure from the FTZ, the tenant asked Customs to take all necessary steps to expedite the removal of their inventory from the FTZ. It further appears that in order to expedite the removal of the merchandise from the FTZ, Customs agreed that, when feasible, the paperwork necessary to accomplish the lot reconciliation typically performed at the time of constructive transfer would be performed after the removal of the merchandise, and therefore after departure of the tenant from the FTZ.

It is at this point in the sequence of events that the facts fail us. The Protestants deny ever making any such agreement with Customs and that Customs has been unresponsive to its inquiries concerning with whom Customs did make the agreement. Customs, on the other hand, has acknowledged that there is no record of the agreement but submits that all parties at the time, including the Protestants, were aware that extensive inventory discrepancies existed with the tenant's merchandise.

Following the tenant's departure and removal of its goods from the FTZ, Customs continued to issue demands for liquidated damages for goods of the former tenant said to be missing from the FTZ and to bill the FTZ operator for zone services which included substantial sums in respect to the former tenant's affairs. These billings are said to commence with an invoice dated May 19, 1981, although the first invoice which is the subject of these protests is dated July 21, 1981.

In the meantime, the Protestant former FTZ operator had terminated its operations at the FTZ and began succeeded by another firm as FTZ operator; it continues, however, to be responsible to the FTZ grantee for Customs charges arising out of the tenant's tenure.

Initially, Protestants attempted to handle the Customs charges for zone services attributed to the tenant by paying Customs and seeking reimbursement from the former tenant. However, the former tenant refused to pay, claiming the charges were not proper.

All charges billed have been paid and Protestants now claim a refund of $15,070.71, said to be that portion of the charges for zone Customs services attributable to the former tenant after that tenant's departure from the FTZ. However, the charges, the subject of the protests, appear to total $12,639.87.

Law and analysis: In our opinion, the question to be decided is one of fact, not of law. Protestants claim that Customs' concurrence in removal of the tenant's goods was obtained without their knowledge or permission. Section 146.5, Customs Regulations (19 CFR 146.5), requires the written concurrence of the grantee (or its delegate) to remove merchandise from a zone except where there is provision for the making of applications by the grantee itself or where the grantee is permitted to file specific or blanket approvals.

We find no evidence in the file of the written concurrence or blanket approval of the grantee for the removal of the goods from the zone. Neither do we find any evidence in the file that Protestants explicitly or implicitly agreed to the cost of Customs zone services performed subsequent to removal of the merchandise and departure of the tenant from the zone, although certainly the Protestant zone operator, at least, knew or should have known that the merchandise was being removed from the zone and tacitly concurred in that removal.

Nevertheless, we cannot interpret that tacit approval to constitute an unwritten agreement on the part of the Protestants to be responsible for any prospective charges involving a departed tenant and removed merchandise.

This is not to say, of course, that Protestants could not have agreed to be responsible for such charges, nor that under different circumstances the charges protested would not be proper.

Indeed, although in view of the result we have arrived at we do not believe it necessary to consider Protestant's arguments on the propriety of the charges, we would note that nothing in the statutory provisions on foreign-trade zones limits the scope of the "additional Customs services required" to on-site service. Customs has broad discretion to determine what service is required to carry out its statutory mandate, and is statutorily authorized to be reimbursed for the cost of such service by the grantee of the zone. Thus, if Customs officers are performing functions relating to protection of the revenue or to admission of foreign merchandise into Customs territory or any other function required under the statutory provisions on foreign-trade zones, Customs has authority to assess zone grantees for the cost of those services.

Holding: For the foregoing reasons, you are instructed to allow Protest Nos. 4105-2-000001 and 4105-1-000003 in the amount attributable to charges for Customs services incurred in connection with the departed zone tenant subsequent to its departure from the zone. As it is not necessary to the result, we do not rule on the propriety of the disputed charges.

(C.S.D. 86-7)

This ruling holds, pursuant to 19 U.S.C. 1563(a) and 19 CFR 158.21, that merchandise in a foreign trade zone which is destroyed beyond recovery by act of God, explosion, or fire is not subject to the assessment of U.S. Customs duties as liability for duties only arises upon transfer to Customs territory.

October 17, 1983
FOR-1-CO:R:CD:D
216240 L

Issue: If, through an act of God, explosion, or major conflagration, merchandise being held in a foreign-trade zone (FTZ) were destroyed, would the destroyed material be subject to the assessment of U.S. Customs duties?

Facts: In the specific case high value merchandise carrying a relatively high rate of duty is admitted to a FTZ for subsequent removal. It is stored in a building constructed of steel framing, masonry walls to eight feet with steel siding to twenty-two feet. The building is fully sprinklered with an automatic alarm system connected directly to the fire department. Despite this, the possibility exists that an act of God, explosion, or major fire could occur.

It is suggested that should this happen, and as a result merchandise is damaged beyond recovery that, subject to inspection by Customs, the material would be declared destroyed and no duty assessed. Further, that if there is recoverable waste it would be taxed relevant to its condition when entered for consumption. A number of reasons are advanced to support this suggestion.

Law and analysis: Section 3 of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81c), provides in part that:

> Foreign * * * merchandise of every description * * * may, without being subject to the Customs laws of the United States * * * be brought into a zone * * * but when foreign merchandise is * * * sent from a zone into Customs territory of the United States it shall be subject to the laws and regulations of the United States affecting imported merchandise.

General Headnote 1 of the Tariff Schedules of the United States provides that:

> All articles imported into the Customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general headnote 3.

Foreign merchandise in a FTZ is imported into the United States but is not in the Customs territory of the United States. Such merchandise is not subject to duty until it is brought into the Customs territory. The voluntary Bond of Foreign-Trade Zone Operators guarantees the payment of all duties and taxes on merchandise removed from a FTZ without a proper Customs permit or which is otherwise missing from the zone, but would not be exercised where merchandise was destroyed in a FTZ by an act of God, explosion, or fire so long as the merchandise destroyed could be suitably accounted for. Accordingly, while Customs inspection may be necessary to establish that merchandise in a FTZ was in fact destroyed, duty cannot be assessed on merchandise in a FTZ.

We believe it pertinent at this point to emphasize that "destroyed" is interpreted to mean destruction as an article of commerce. If articles are destroyed to such an extent that they are valuable in commerce only as scrap they are still articles in commerce and cannot be said to have been destroyed. A diminution in value is not sufficient. The article, to be destroyed, must have no value. This can present a difficult problem as some commodities cannot be economically destroyed and some other commodities cannot actually be destroyed within the judicial definition because they easily can be reclaimed. For example, some metal scrap easily can be reclaimed from a landfill by use of a crane and magnet.

Recoverable waste resulting from an act of God, etc., and attributable to merchandise in nonprivileged foreign status or which may be commingled with domestic merchandise which has lost its identity pursuant to 19 CFR 146.23(c), if entered for consumption, would be classifiable and subject to duty in its condition at time of

removal from the FTZ. With respect to such merchandise in privileged foreign status, 19 CFR 146.21(d) provides that status as privileged foreign merchandise and the consequent determination of duties cannot be abandoned. We note that an act of God can be defined as an occurrence that is due entirely to the forces of nature and that could not reasonably have been prevented. The explosion or fire mentioned is also considered to be a fortuitous occurrence. As such, we do not consider the damage or destruction of privileged foreign merchandise in a FTZ by such an occurrence to be a manufacture or manipulation resulting in recoverable waste within the meaning of 19 CFR 146.21(d) and 19 CFR 146.48(a)(3).

Where nonprivileged or privileged foreign merchandise that has been constructively transferred is destroyed by an act of God, etc., before physical removal from the FTZ the merchandise shall be considered to be in Customs territory, 19 CFR 146.47(c). As such, relief may be available pursuant to 19 U.S.C. 1563(a) and 19 CFR 158.21 *et seq.* Note, however, *Camilo E. Rosello, Inc.* v. *United States,* C.D. 3935 (1969), holding that merchandise that has been released is not in Customs custody and that no refund of duties may be allowed under 19 U.S.C. 1563(a). See also 19 CFR 146.47(f) and 19 CFR 142.19 concerning release of merchandise. Constructively transferred merchandise that has not been released may be restored to zone status pursuant to 19 CFR 146.47 (d) or (e).

Holding: Merchandise in a FTZ destroyed by an act of God, explosion, or fire is not subject to the assessment of U.S. Customs duties as liability for duties only arises upon transfer to Customs territory. Recoverable waste attributable to nonprivileged foreign merchandise, if entered for consumption, would be dutiable in its condition at the time of its removal from the FTZ. Recoverable waste attributable to privileged foreign merchandise, if sent into Customs territory, would be dutiable as determined at the time the privilege was requested.

(C.S.D. 86-8)

This ruling holds that imported merchandise entered for warehouse and thereafter withdrawn from warehouse and exported is not eligible for drawback under the substitution provision of the same condition drawback law, 19 U.S.C. 1313(j)(3).

Oct 24, 1985
DAR-1-09-CO:R:DC:D
218032 RB

Issue: Is imported merchandise which is entered for warehouse eligible for drawback under the substitution provision of the same condition drawback law, 19 U.S.C. 1313(j)(3), if it is thereafter withdrawn from warehouse and exported?

Law and analysis: The express provisions relating to drawback under 19 U.S.C. 1313 fundamentally do not apply to imported mer-

chandise until "after its release from the custody of the Government," (19 U.S.C. 1558 (a) and (a)(1)); 19 CFR 191.132(a); H. Rept. 7, 71st Cong., 161 (1929); S. Rept. 999, 96th Cong., 23 (1980); also see *Atlas Fibers Co.* v. *United States*, 30 Cust. Ct. 247, 254–255, C.D. 1528, aff'd 42 C.C.P.A. 65, C.A.D. 572). It is also acknowledged in this regard that same condition drawback, subsection (j), "would apply to (imported) articles entered, or drawback from warehouse, for consumption" (S. Rept. 999, supra).

In contrast to section 1313, 19 U.S.C. 1557(a) provides, in a general sense, for drawback, under certain conditions, on imported merchandise which has "remained continuously in bonded warehouse or otherwise in the custody and under the control of customs officers."

Imported merchandise entered for warehouse, and in the custody and under the control of Customs, does not, therefore, fall within the scope of section 1313, including, specifically, the provisions for same condition drawback under subsection (j).

Parenthetically, even if same condition drawback were applicable herein, the necessity that the claimant have "possession" of the substituted merchandise under section 1313(j)(3) would not be met while the merchandise remains in the warehouse subject to the control of the Government. In a recent ruling to be published in the Customs Bulletin (file DRA-1-09-CO:R:DC:D 218100, dated August 16, 1985), it is held that possession under section 1313(j)(3) "means *complete* control over the articles or merchandise on premises or locations where the possessor can put the articles or merchandise to any use chosen" (emphasis added).

Holding: Imported merchandise entered for warehouse is not eligible for drawback under the substitution provision of the same condition drawback law, 19 U.S.C. 1313(j)(3), if it is thereafter withdrawn from warehouse and exported.

(C.S.D. 86-9)

This ruling holds that 15 U.S.C. 70b(i) (Textile Fiber Products Information Act), does not grant authority to U.S. Customs officers to seize or otherwise detain shipments of mail order catalogues or promotional materials for textile fiber products which fail to meet fair advertising standards as set forth in this law.

October 24, 1985
RES-3 CO:R:E:E
728062 SO

MR. PHILIP METZGER,
Assistant Area Director, Commercial Operations, New York Seaport, U.S. Customs Service, 6 World Trade Center, Room 423, New York, New York 10048

DEAR MR. METZGER: In your memo of November 28, 1984, you asked for advice regarding the responsibility, if any, imposed on Customs officers by a recent amendment to Section 4 of the Textile Fiber Products Identification Act (15 U.S.C. 70b). Pursuant to this amendment, textile fiber product advertising in any mail order catalog or in mail order promotional material shall be considered to be false or deceptive, unless the product description clearly states that the textile fiber product is processed or manufactured in the United States, or imported, or both. Particularly, you asked if Customs officers would be responsible for examining imported mail order catalogs and promotional material to determine if there are any textile fiber products advertised therein which are falsely described. You also asked if any action should be taken against shipments of such printed matter found to contain false or deceptive advertising, as now defined.

We are of the opinion that the amendment to Section 4 of the Textile Fiber Products Identification Act referred to above does not impose a legal obligation on Customs officers to review shipments of mail order catalogs or promotional material specifically to discover violations of this type. The law (15 U.S.C. 70b(i)), in our opinion, does not grant authority to Customs officers to seize or otherwise detain shipments of mail order catalogs or promotional material which fail to meet the standards of fair advertising set forth in the law. If, however, a violation is discovered by a Customs officer in the normal course of his/her duties, it would be prudent to warn the importer that penalties may be assessed by the Federal Trade Commission if the catalogs are distributed with the "false advertising" in place.

(C.S.D. 86-10)

This ruling holds that a certain woman's woven fabric dress and an accompanying substantial fabric tie-belt are separately classifiable in accordance with Headnote 3, Part 6, Schedule 3, Tariff Schedules of the United States.

February 12, 1986
CLA-2:CO:R:CV:G
077496 PR

This ruling concerns the tariff status of a certain dress.

Facts: The submitted sample is a woman's blue dress, stated to be a product of China, made from a woven fabric that is labelled to be 55 percent cotton and 45 percent man-made fibers. It has a stand collar; and 8-snap front opening that extends from the neckline to the elasticized waist; front and rear yokes that taper downward in a V-fashion and which are edged with burgundy-colored piping, the visible portion of which is less than ¼ inch wide; less than elbow-length sleeves with two-button cuffs, and similar burgundy-colored piping inserted in the cuff seam; two belt thread loops, one at each side seam; two inserted pockets, one at each side seam just below the waist; and a large box-pleat in front that extends from the elasticized waist to the hem. The fabric from the body of the garment is slightly gathered where it meets the yokes, imparting a shirred effect.

Accompanying the dress is a tie-belt that consists of three sections. The two outer or tie portions are burgundy woven fabric strips, each approximately ⅜ inch wide and 29 inches long. The center portion, which is burgundy on one side and blue on the other, is approximately 25 inches long and 2½ inches wide; the corners are rounded; and the burgundy side has four decorative-appearing, but otherwise nonfunctional, tucks that extend its length.

We assume both the dress and the tie-belt are in chief value of cotton.

Issue: Two principal issues are presented by the subject garment and belt—(1) is either ornamented for tariff purposes; and (2) are the belt and dress classifiable as a single entity or are they separately classifiable?

Law and analysis: Headnote 3, Schedule 3, Tariff Schedules of the United States Annotated (TSUSA), lists the type of features that constitute ornamentation. One of the features listed is tucking. Therefore, the belt is ornamented with the four rows of decorative nonfunctional tucking. The dress is not ornamented for tariff purposes since neither the gathered appearance at the yoke seams nor the expandable box pleat are mentioned in Headnote 3. Furthermore, Customs has consistently held that, because of the existence of a practice, piping, the visible portion of which is less than ¼ inch in width, inserted in the entire length of a seam, does not constitute ornamentation.

The Customs Service, in the past, has stated that there existed an established and uniform practice to classify fabric coordinated belts as entireties with the garments they accompanied, submerging the identity of those belts into the garments. However, subsequent to the practice finding and issuance of a number of rulings following the practice, Congress enacted Headnote 3 to Part 6, Schedule 3, TSUSA, which provides as follows:

> (a) Except as provided in (b) of this headnote, each garment is to be separately classified under the appropriate tariff item,

even if two or more garments are imported together and designed to be sold together at retail.

(b) The provisions of paragraph (a) of this headnote shall not apply to—

(i) suits,

(ii) pajamas and other nightwear,

(iii) playsuits, washsuits, and similar apparel,

(iv) judo, karate, and other oriental martial arts uniforms,

(v) swimwear, and

(vi) infant's sets designed for children who are not over 2 years of age.

In a ruling dated November 6, 1985, file 077013, Customs held that the comparatively recent enactment by Congress of Headnote 3, Part 6, Schedule 3, TSUSA, had, in effect, nullified past rulings and practices which were in conflict with that headnote. That ruling also interpreted Headnote 3 and concluded that the words "garment" and "garments" were intended to include accessories, such as neckwear, belts, and scarfs.

We have contracted the drafters of Headnote 3, who confirmed that Headnote 3 was intended to eliminate the entireties rule as it was being applied to belts and neckwear, in particular. However, it was not intended that all belt-like articles fall within the purview of the headnote. Only substantial belts or belt-like articles are meant to be affected by the application of Headnote 3. In this regard, we conclude that, generally, all belts with nontextile attachments for closures are substantial. Tie-type belts that are no more than mere string ties made from the same fabric as their accompanying garments are not substantial and are considered to be part of those garments. In this instance, the tie-belt accompanying the subject dress is a substantial belt and is, therefore, separately classifiable from the dress.

Holding: In accordance with the principles expressed above, the subject dress is classifiable under the provision for other women's dresses, of cotton, not ornamented and not knit, in item 384.4925, TSUSA, with duty at the 1986 rate of 12.8 percent ad valorem. This garment falls within textile and apparel category 336. The subject tie-belt is classifiable under the provision for other women's ornamented cotton apparel, not knit, in item 384.0996, TSUSA, with duty at the rate of 20 percent ad valorem. The applicable textile and apparel category designation is 359.

However, since we understand that most textile belts imported with articles of apparel are not invoiced separately and do not, when subject to visa, import license, or quota restriction requirements, have the necessary accompanying documentation, an importer of such merchandise may, for merchandise entered, or withdrawn from warehouse, for a period of ninety (90) days from the date of the publication of this ruling in the Customs Bulletin, continue to enter such merchandise as entireties, under one textile

and apparel category. Upon the expiration of that ninety (90) day period, all merchandise subject to this ruling will be classified in accordance with the principles set out above.

General Notice

AGENCY: U.S. Customs Service, Department of Treasury.

ACTION: Draft notice; *The Aviation Groups, Inc.* v. *United States,* Slip Op. 85–82, Court No. 82–2–00248.

The United States Court of International Trade, by order dated November 13, 1985, vacated its opinion and order in Slip Op. 85–82, dated August 7, 1985, and dismissed said case. The order of vacation and dismissal has not been published, and the purpose of this notice is to advise all interested parties that the state of the law, with regard to item 800.00, Tariff Schedules of the United States, (19 U.S.C. 1202), and used aircraft, remains as it was prior to August 7, 1985.

HARVEY B. FOX,
Director,
Classification and Value Division.

Proposed Rulemaking

19 CFR Parts 141 and 171

Proposed Customs Regulations Amendments Relating to Liens

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: The Tariff Act of 1930 authorizes Customs officers to refuse to permit delivery of certain merchandise when notified in writing of the existence of a lien for freight, charges or contribution in general average until proof has been produced that the lien has been satisfied or discharged. The Trade and Traiff Act of 1984 amended the Tariff Act of 1930 to allow licensed customs brokers to file a lien for freight, charges or contribution in general average to the same extent that a carrier may file such a lien. This document proposes to amend the Customs Regulations to implement the statutory provisions.

DATES: Comments must be received on or before April 28, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Jerry Laderberg, Entry, Licensing, and Restricted Merchandise Branch, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229; 202-566-5765.

SUPPLEMENTARY INFORMATION:

Background

Section 564, Tariff Act of 1930, as amended (19 U.S.C. 1564), provides that whenever a Customs officer is notified in writing of the existence of a lien for freight, charges, or contribution in general average upon any imported merchandise sent to the appraiser's store for examination, entered for warehouse or taken possession of by him, he will refuse to permit delivery thereof from the public

store or bonded warehouse until proof is produced that the lien has been satisfied or discharged.

For purposes of § 564, § 141.112(a)(1), Customs Regulations (19 CFR 141.112(a)(1)), defines "freight" to mean the carrier's charge for the transportation of the goods from the place of shipment in the foreign country to the final destination in the U.S. "Charges" are defined in § 141.112(a)(2), Customs Regulations (19 CFR 141.112(a)(2)), to mean the charges due to or assumed by the claimant of the lien which are incident to the shipment and forwarding of the goods to the destination in the U.S., but does not include the purchase price, whether advanced or to be collected, nor other claims not connected with the transportation of the goods. Section 141.112(a)(3), Customs Regulations (19 CFR 141.112(a)(3)), defines "general average" as the liability to contribution of the owners of a cargo which arises when a sacrifice of a part of the cargo has been made for the preservation of the residue or when money is expended to preserve the whole. A lien for contribution in general average only arises from actions impelled by necessity.

A customs broker is a person licensed by Customs under the provisions of § 641, Tariff Act of 1930, as amended (19 U.S.C. 1641) and Part 111, Customs Regulations (19 CFR Part 111), to transact Customs business on behalf of importers and other persons. Section 212(b)(7), Trade and Tariff Act of 1984, Pub. L. 98-573, amended § 564 by adding a sentence to that provision which states that the section will apply to licensed customs brokers who otherwise possess a lien for the purposes stated in § 564 upon merchandise under the statutes or common law, or by order of any court of competent jurisdiction, of any state. By virtue of this provision Congress has authorized customs brokers possessing a lien for freight, charges or contribution in general average upon merchandise held by Customs to file that lien with the proper Customs officer so that the merchandise will not be released from Customs until the lien is satisfied or discharged.

Prior to the passage of the Trade and Tariff Act, § 564 had been limited to liens filed by carriers or their agents. By amending § 564, Congress specifically provided that brokers may file liens with Customs for the purposes stated in the law. Because brokers now stand in the same position as carriers with respect to filing liens, it is proposed to add a definition of the word "claimant" to § 141.112(a). It is proposed to define "claimant" in a new § 141.112(a)(4) as a carrier, customs broker or the successors or assigns of either. In addition, it is proposed to amend § 141.112(a)(1), which defines "freight", by removing the reference to the "carrier's charge" and substituting, in its place, the word "charges" without any reference to whose charges they might be. It is further proposed to amend § 141.112(b), relating to notice of lien, and § 141.112(d), relating to merchandise entered for immediate transportation, to remove the reference to the carrier signing the notice

of lien and filing the notice of lien and substitute a reference to the claimant.

Finally, it is proposed to correct certain clerical errors in § 171.44, Customs Regulations (19 CFR 171.44), relating to satisfaction of liens on forfeited property authorized for official use. Section 171.44 refers to the "satisfaction of liens for freight charges and contributions in general average." It is proposed to place a comma between the words "freight" and "charges" to reflect the statutory language and eliminate any confusion or limitation on the type of charges covered. It is further proposed to remove the "s" from the word "contributions."

COMMENTS

Before adopting this proposal, consideration will be given to any written comments (preferably in triplicate) that are submitted timely to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

EXECUTIVE ORDER 12291

This document does not meet the criteria for a "major rule" as defined in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

REGULATORY FLEXIBILITY ACT

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that, if adopted, the proposed regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, the proposed regulation is not subject to the regulatory analysis requirement of 5 U.S.C. 603 and 604.

DRAFTING INFORMATION

The principal author of this document was John E. Elkins, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

LIST OF SUBJECTS IN 19 CFR PARTS 141 AND 171

Brokers, Customs duties and inspection, Imports, Liens.

PROPOSED AMENDMENTS TO THE REGULATIONS

It is proposed to amend Parts 141 and 171, Customs Regulations (19 CFR Parts 141, 171), as set forth below.

PROPOSED AMENDMENTS

PART 141—ENTRY OF MERCHANDISE

1. It is proposed that the general authority citation for Part 141 continue to read as set forth below:

AUTHORITY: 19 U.S.C. 66, 1448, 1484, 1624.

2. It is proposed to amend § 141.112(a)(1) by removing the words "carrier's charge" and inserting, in their place, the word "charges".

3. It is proposed to further amend § 141.112(a) by adding a new paragraph (4) to read as follows:

§ 141.112 Liens for freight, charges, or contribution in general average.

(a) * * *

(4) *Claimant.* "Claimant" means a carrier, customs broker or the successors or assigns of either.

4. It is proposed to amend §§ 141.112 (b) and (d) by removing the word "carrier" and, in each instance, inserting, in its place, the word "claimant".

PART 171—FINES, PENALTIES, AND FORFEITURES

1. It is proposed that the general authority citation for Part 171 continue to read as set forth below:

AUTHORITY: 19 U.S.C. 66, 1592, 1618, 1624.

2. It is proposed to amend § 171.44 by placing a comma after the word "freight" in the second sentence of the paragraph and by removing the letter "s" from the word "contributions".

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: February 3, 1986.

FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

BINGHAM & TAYLOR, DIVISION VIRGINIA INDUSTRIES, INC., ET AL., PLAINTIFFS *v.* UNITED STATES, DEFENDANT

Court No. 85-07-00909

Before CARMAN, *Judge.*

MEMORANDUM OPINION

[Appeal from International Trade Commission's preliminary negative injury determination remanded.]

(Decided February 14, 1986)

Collier, Shannon, Rill & Scott (*Paul C. Rosenthal and Kathleen T. Weaver*) for the plaintiffs.

Lyn M. Schlitt, General Counsel, *Michael P. Mabile*, Assistant General Counsel, and *John C. Kingery*, United States International Trade Commission, for the defendant.

CARMAN, *Judge:* In this countervailing duty action plaintiffs contest the preliminary determination of the United States International Trade Commission (Commission) that there is no reasonable indication the domestic light iron construction castings industry is materially injured or threatened with material injury by reason of subsidized imports from Brazil. *Iron Construction Castings from Brazil, Canada, India, and the People's Republic of China*, 50 Fed. Reg. 27,498 (1985). Defendant opposes plaintiffs' Rule 56.1 motion for judgment upon the agency record, contending that the Commission's preliminary determination is not arbitrary, capricious, nor an abuse of discretion, and is in accordance with law. *See* 19 U.S.C. § 1516a(b)(1)(A) (1982) (standard of review). For the reasons that follow, the Court remands this action to the Commission for redetermination.

BACKGROUND

This controversy arises out of five simultaneously initiated investigations involving iron construction castings. Four of the investigations are antidumping investigations in which the Commission

found that there is a reasonable indication that the domestic industry is materially injured or threatened with material injury by reason of sales at less than fair value of light and heavy construction castings imported from Brazil, Canada, India and the People's Republic of China. Plaintiffs in this case challenge the Commission's preliminary determination in the fifth investigation, which is a countervailing duty investigation of iron construction castings from Brazil. The Commission's determination in the countervailing duty investigation, published in the same notice as the determinations for the antidumping investigations, was that a domestic industry is materially injured by Brazilian imports of heavy iron construction castings, while there is no reasonable indication that a domestic industry is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of Brazilian light iron construction castings. *See* 50 Fed. Reg. 27,498.

In reaching its preliminary affirmative injury determinations in the antidumping investigations, the Commission cumulated the impact of the imports from the four countries on the domestic industry. In reaching the preliminary determination in the countervailing duty investigation, however, the Commission refused to cumulate the impact of imports subject to the antidumping investigations with the impact of imports subject to the Brazilian countervailing duty investigation. *See Iron Construction Castings from Brazil, Canada, India, and the People's Republic of China*, U.S.I.T.C. Public. 1720, at 12, Investigation No. 701-TA-249 (Preliminary) (June 1985).

OPINION

The primary issue is whether section 612(a)(2) of the Trade and Tariff Act of 1984 (the 1984 Act), Pub. L. No. 98-573, 98 Stat. 3033 (to be codified at 19 U.S.C. § 1677(7)(C)(iv)), requires the Commission to cumulatively assess the volume and effect of imports of like products subject to both antidumping and countervailing duty investigations. Section 612(a)(2) of the 1984 Act amended section 771(7)(C) of the Tariff Act of 1930 by adding *inter alia* the following:

> (iv) Cumulation.—For purposes of clauses (i) [volume] and (ii) [price], the Commission shall cumulatively assess the volume and effect of imports from two or more countries of like products subject to investigation if such imports compete with each other and with like products of the domestic industry in the United States market.

19 U.S.C.A. § 1677(7)(C)(iv) (West Supp. 1985).

Plaintiffs contend that the subsection (iv) cumulation provision quite broadly "requires the Commission to cumulate when two criteria are satisfied: (1) Imports of like products are subject to inves-

tigation, and (2) imports compete with one another and with the domestic like product." Plaintiffs' Brief at 13. Plaintiffs' position is that there is no additional requirement that the cumulated imports be subject to the same type of investigation and, therefore, subsection (iv) requires the "cross-cumulation" of the volume and effect of imports subject to both antidumping and countervailing duty investigations.[1]

Defendant contends that as the 1984 Act provision for cumulation is entirely silent concerning cross-cumulation, initial statutory directives imposing countervailing and antidumping duties continue to control.[2] In countervailing duty cases, for instance, defendant claims that 19 U.S.C. § 1671(a) applies, which reads:

> (a) General Rule.—If—
> (1) the administering authority determines that—
> (A) a country under the Agreement, or
> (B) a person who is a citizen or national of such a country, or a corporation, association, or other organization organized in such a country, is providing, directly or indirectly, a subsidy with respect to the manufacture, production, or exportation of a class or kind of merchandise imported into the United States, and
> (2) the Commission determines that—
> (A) an industry in the United States—
> (i) is materially injured, or
> (ii) is threatened with material injury, or
> (B) the establishment of an industry in the United States is materially retarded,
> *by reason of imports of that merchandise,*
>
> then there shall be imposed upon such merchandise a countervailing duty, in addition to any other duty imposed, equal to the amount of the net subsidy.

19 U.S.C. § 1671(a) (1982) (emphasis added). Essentially, defendant's argument is that section 1671(a) restricts the Commission's injury investigation in countervailing duty cases to the injury "by reason of imports of that merchandise" investigated with respect to the provision of a subsidy. By the same reasoning, defendant argues that in antidumping duty investigations 19 U.S.C. § 1673 restricts the Commission's injury investigation to the injury "by reason of that merchandise" investigated with respect to sales in the United States at less than fair value.

The Court finds that section 1677(7)(C)(iv), without exception, requires the cumulation of imports from two or more countries of like products "subject to investigation" that compete with one an-

[1] The term "cross-cumulation" as used in this opinion refers to the aggregation of less than fair value (dumped) and subsidized imports from two or more countries for purposes of volume and price analysis.

[2] The Commission cited the respective provisions for *final* determinations, 19 U.S.C. §§ 1671d (countervailing duty investigations) and 1673d (antidumping duty investigations), as its basis for refusing to cross-cumulate. *See* U.S.I.T.C. Public. 1720, at 12–13. Defendant in its briefs focused on 19 U.S.C. §§ 1671(a) and 1673, though, apparently because this action is a challenge to a *preliminary* determination.

other and with the domestic like product, regardless of whether the investigations relate to dumping, subsidies, or both.

Although an agency's interpretation of a statute it is charged with enforcing is entitled to deference if it is reasonable and not in conflict with congressional intent, *see Asahi Chemical Industry Co.* v. *United States*, 4 CIT 120, 123-25, 548 F. Supp. 1261, 1264-65 (1982), the court will not defer to an interpretation that is contrary to the express language of the statute, its purpose, and congressional intent. *See Board of Governors of the Federal Reserve System* v. *Dimension Financial Corp.*, No. 84-1274, slip. op. at 6 (U.S. Jan. 22, 1986); *Rose* v. *Lundy*, 455 U.S. 509, 517 (1982); *Southeastern Community College* v. *Davis*, 442 U.S. 397, 411 (1979). The Court is constrained to conclude in the instant case that the Commission's refusal to cumulate is indeed contrary to the statute, its purpose, and legislative intent.

The legislative history of the 1984 Act does not explicitly address the issue of cross-cumulation. The House Ways and Means Committee, however, provided the following explication of the new cumulation provision:

> *Reasons for change*
>
> The purpose of mandating cumulation under appropriate circumstances is to eliminate inconsistencies in Commission practice and to ensure that the injury test adequately addresses simultaneous unfair imports from different countries. Most Commissioners have applied cumulation under certain circumstances but have articulated a variety of differing criteria and conditions. However, cumulation is not required by statute. In addition, a few Commissioners have imposed conditions which do not seem justified to the Committee.
>
> The Committee believes that the practice of cumulation is based on the sound principle of preventing material injury which comes about *by virtue of several simultaneous unfair acts or practices.* The Committee amended the criteria to permit cumulation of imports from various countries that each account individually for a very small percentage of total market penetration, but when combined may cause material injury. The requirement in the bill as introduced that imports from each country have a "contributing effect" in causing material injury would have precluded cumulation in cases where the impact of imports from each source treated individually is minimal but the combined impact is injurious. The Committee does intend, however, that the marketing of imports that are cumulated be reasonably coincident. Of course, imports of like products from countries not subject to investigation would not be included in the cumulation.

H.R. Rep. No. 725, 98th Cong., 2d Sess. 37, *reprinted in* 1984 U.S. Code Cong. & Admin. News 5127, 5164 (emphasis added).

In keeping with the foregoing views, Congress broadly required cumulation of the injurious effects of "simultaneous unfair acts or

practices" if certain conditions are met. Congress's rejection of the concept of "contributing effect" underscores its intent that cumulation be broadly applied, even where the impact of unfairly traded imports from one source may be minimal, "but the combined impact is injurious." There is no doubt that the combined impact from both dumped and subsidized imports may be injurious. Further, there is no suggestion in the language of the 1984 statute or in its legislative history that the Commission separately consider the injurious effects of one type of unfair practice from those of another type of unfair practice.[3] The effects of injury from different types of unfair trade practices upon the domestic industry are identical—it makes no difference to a domestic light construction castings producer whether it loses sales because foreign castings are dumped or because they are subsidized. As the Commission's own General Counsel correctly observed, "[t]he rationale for aggregating import data rests upon the combined effects of unfairly traded imports in contributing to injury to the domestic industry involved. The considerations are not different in countervailing duty investigations than they are in antidumping investigations." Memorandum from General Counsel to the Commission, GC-G-05, at 12-13 (Jan. 7, 1983) (quoting GC-F-186).

It is further noteworthy that when Congress considered the amendment of section 1677(7)(C) it was apprised of the question of cumulating imports of the same product in separate countervailing duty and antidumping duty investigations:

> The law now permits the International Trade Commission to combine or "cumulate" imports from different countries when making injury determinations in antidumping and countervailing duty investigations. Cumulation makes sense; death by one or one hundred blows is equally fatal. The ITC, however, has been hesitant to cumulate imports at all and extremely reluctant to do so in preliminary injury investigations. *There also has been some question about cumulation of imports of the same product in separate countervailing duty and antidumping cases.* We believe that it would be helpful to amend the statute to require cumulation in certain circumstances. Such an amendment would help to ensure that domestic industries are not denied relief because of an unwise exercise of discretion by the Commission.

Options to Improve the Trade Remedy Laws: Hearings Before the Subcomm. on Trade of the Comm. on Ways and Means, 98th Cong., 1st Sess. 197, 203 (1983) (statement of Adolph J. Lena) (emphasis added). Significantly, Congress did not make any exclusion or ex-

[3] The legislative history of the Trade Agreements Act of 1979 also emphasizes congressional focus on the impact to domestic industries from unfair trade practices. There too Congress viewed subsidies and dumping as "two of the most pernicious practices which distort international trade to the disadvantage of United States commerce." S. Rep. No. 249, 96th Cong., 1st Sess. 37, *reprinted in* 1979 U.S. Code Cong. & Admin. News 381, 423.

ception for cross-cumulation in the 1984 statute, but rather elected to mandate cumulation in broad terms.[4]

Defendant points out, however, that Congress intended the Trade Agreements Act of 1979 to implement two important, but separate, multilateral agreements—the Subsidies and the Antidumping Codes, that is, the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade, and the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. *See* S. Rep. No. 249, at 37. Moreover, Congress added material injury requirements respectively to the countervailing duty and antidumping duty statutes. Defendant thus contends that the enactment of United States obligations under the separate Codes with separate injury tests bars the cross-cumulation of injury from imports subject to separate countervailing duty and antidumping duty investigations. Defendant appears especially impressed that the injury test in subsidy cases applies only to countries that have signed the Subsidies Code, while all importers receive the benefit of an injury determination in antidumping investigations. *Compare* 19 U.S.C. §§ 1303 and 1671(b) (imposition of countervailing duties) *with* 19 U.S.C. § 1673 (imposition of antidumping duties); *see also* S. Rep. No. 249, at 61.

Nevertheless, the definition of material injury, the respective indicia of injurious impact, and the causal nexus between the injury and the unfairly traded imports are identical for subsidy and dumping investigations and are outlined in a common statutory provision—19 U.S.C. § 1677(7). The 1984 Act added to this statute subsection (C)(iv), which broadly states that "the Commission shall cumulatively assess the volume and effect of imports from two or more countries of like products subject to investigation if such imports compete with each other and with like products of the domestic industry."

While mere placement of the cumulation directive in a statutory provision applicable to both antidumping and countervailing duty cases does not in and of itself suggest or require aggregation of dumped and subsidized imports, the language of subsection (C)(iv)

---

[4] Prior to the 1984 Act, the Commission had found the cumulation methodology appropriate in certain investigations under the Antidumping Act of 1921 and the Trade Agreements Act of 1979. *See, e.g., Portland Gray Cement from Portugal*, T.C. Public. 37, Investigation No. AA1921-22, (1961); *Pig Iron from East Germany, Czechoslovakia, Romania, and the U.S.S.R.*, T.C. Public. 265, Investigation Nos. AA1921-52-55, (1968); *Aminoacetic Acid (Glycine) from France*, T.C. Public. 313, Investigation Nos. AA1921-61, (1970); *Certain Carbon Steel Products from Belgium, The Federal Republic of Germany, France, Italy, Luxembourg, The Netherlands, and The United Kingdom*, U.S.I.T.C. Public. 1064, Investigation Nos. 731-TA-18-24 (Preliminary) (1980). The Commission had not, however, *cross-cumulated* prior to the 1984 Act. U.S.I.T.C. Public. 1720, at 12.

Cumulation was first judicially approved in *City Lumber Co. v. United States*, 64 Cust. Ct. 826, A.R.D. 269, 311 F. Supp. 340 (1970), *aff'd*, 59 CCPA 89, C.A.D. 1045, 457 F.2d 991 (1972). Still, Congress explicitly recognized in 1974 that cumulation was not required "as a matter of law," but could be applied by the Commission on a case by case basis. S. Rep. No. 1298, 93d Cong., 2d Sess. 180 (1974). It was only after a long period of administrative discretion in applying cumulation that Congress finally made the methodology mandatory in the 1984 Act.

For a rendition of the legislative process leading to the enactment of section 1677(7)(C)(iv) and the refusal of the House conferees to yield on the stringent cumulation requirement, as they had done in agreeing to agency discretion respecting other provisions, see Bello & Holmer, *The Trade and Tariff Act of 1984: Principal Antidumping and Countervailing Duty Provisions*, 19 Int'l Law. 639, 661 & nn. 74-78 (1985).

requires the cumulation of products "subject to investigation." There is absolutely no indication that cumulation is to be limited to products subject only to antidumping duty investigations or to products subject only to countervailing duty investigations. Again, "[t]he primary concern of the law is with the effect on domestic industry." *American Grape Growers Alliance for Fair Trade* v. *United States*, 9 CIT——, 615 F. Supp. 603, 606, *appeal docketed*, No. 85-2717 (Fed. Cir. Aug. 28, 1985) (cumulation required where like products compete with each other only to the same degree as with like products of domestic industry under pre-1984 Act law). In light of Congress's expressed concern with the combined effects of all unfairly traded imports upon domestic industries, the Court must inexorably conclude that section 1677(7)(C)(iv) is intended to require the cumulation of all competing like products subject to investigation, whether the investigations cover dumped or subsidized imports, or both.

The Court is mindful of the policy of encouraging countries to sign the Subsidies Code, *see* S. Rep. No. 249, at 44-45, which underlays the requirement of an injury determination in subsidy investigations. Although countries "under the Agreement" providing subsidies leading to only *de minimis* injury may be penalized because of dumped merchandise over which they have no control, the concern is no different in multiple subsidy investigations where each country has no control over subsidization by other countries, and where cumulation is concededly mandatory. In enacting countervailing and antidumping duty laws, Congress balanced many interests. But with the 1984 cumulation provision, Congress clearly tipped the scale in favor of the domestic industry and against any country engaging in unfair trade practices.

Defendant contends that the application of cross-cumulation would lead to anomalous results, referring to various distinctions between the antidumping and countervailing duty provisions respecting certain special findings and considerations in injury investigations. *Compare* 19 U.S.C. § 1671d(b)(4) *with* 19 U.S.C. § 1673d(b)4 (additional findings required upon an affirmative finding of critical circumstances); *see also* 19 U.S.C. § 1677(7) (E) and (F)(i) (consideration of nature of subsidy in determination of threat of material injury). Cumulation, however, is required only for the purpose of evaluating volume and price effects under 19 U.S.C. § 1677(7)(C) (i) and (ii). Plainly, cross-cumulation does not preclude the Commission from properly making certain findings or considering information as required by these other statutory provisions.

Defendant's argument, based on a literal reading of statutory provisions *other* than the cumulation provision (i.e., 19 U.S.C. §§ 1671(a), 1671d(b), 1673 and 1673d(b)), stems from a perceived requirement of a causal nexus between dumped or subsidized imports, not a combination of both, and the injury to the domestic in-

dustry.[5] A literal reading of these provisions, however, would equally prohibit the cumulation of imports subject to two or more investigations of the same unfair trade practice. If 19 U.S.C. §§ 1671d(b) and 1673d(b), for example, were read to mean that the Commission's final determination must be of injury "by reason of imports of the merchandise" found by the International Trade Administration to be subsidized (or dumped), it would follow that cumulation of the injurious effects of imports covered by separate investigations would always be prohibited because the Commission must limit its causal nexus analysis to the merchandise which is subject to the particular dumping or subsidy investigation. To the extent that the other statutory provisions cited by defendant are *in pari materia* with the cumulation provision, they must be harmonized with the clear congressional purpose in broadly mandating cumulation. *See United States* v. *Invicta Seeland, Inc.*, 25 CCPA 300, 305–06, T.D. 49397 (1938).

Defendant has not pointed to one policy reason why the cumulative injurious effects of imports in multiple subsidy investigations or multiple dumping investigations should be treated differently from the cumulative injurious effects of imports in concurrent subsidy and dumping investigations. Defendant's interpretation of the law in essence urges this Court to tolerate an obvious loophole in the cumulation directive for no apparent justification. As discussed, congressional intent to protect domestic industry from the compounded effects of unfairly traded imports from two or more countries requires no more than that the injury be caused by imports of competing like products from countries under investigation.[6]

The criteria that the Commission is required to consider in subsections (C) (i) and (ii) applies to both preliminary and final determinations. *See* 19 U.S.C. § 1677(7)(B). The Court accordingly holds that the Commission's refusal in its preliminary determination to cumulate the volume and effect of imports of the merchandise subject to both the countervailing and antidumping duty investigations is not in accordance with law. This case must therefore be remanded to the International Trade Commission for further consideration and redetermination consistent with this opinion.

Plaintiffs also challenge the Commission's interpretation and application of the "reasonable indication" standard of 19 U.S.C. § 1673(b)(a) (1982) in making its preliminary determination, citing *American Lamb Co.* v. *United States*, 9 CIT ——, 611 F. Supp. 979,

---

[5] The extent of the relevant cause of injury is itself a highly controversial issue and not settled in the law. *See generally*, Victor, *Injury Determinations by the International Trade Commission in Antidumping and CVD Proceedings* in the Trade Agreements Act of 1979—Four Years Later 117, 147–54 (1983).

[6] An additional requirement for cumulation, clear from the legislative history, is that the marketing of unfairly traded imports be "reasonably coincident." H.R. Rept. No. 725, at 37; *see also* Price, *The Trade and Tariff Act of 1984: An Analytical Overview*, 19 Int'l Law. 321, 335 (1985) (predicating cumulation on three conditions); *cf. Certain Carbon Steel Products from Austria, Poland, Romania, Sweden and Venezuela*, U.S.I.T.C. Public. 1642, at 48–50, Investigation Nos. 701-TA-225-234 and 731-TA-213-217, 219, 221-26, and 228-35 (Preliminary) (1985) (views of Vice Chairman Liebeler) (cumulation limited to imports from countries that are *currently* the subject of an investigation). This issue is not before the Court in the present case since the countervailing duty investigation exactly paralleled the antidumping investigations.

appeal docketed, No. 86-560 (Fed. Cir. Oct. 21, 1985); *Jeannete Sheet Glass Corp.* v. *United States,* 9 CIT ——, 607 F. Supp. 123, *appeal docketed,* No. 86-519 (Fed. Cir. October 4, 1985); *Republic Steel Corp.* v. *United States,* 8 CIT 29, 591 F. Supp. 640 (1984), *reh'g* denied, 9 CIT ——, Slip. Op. 85-27 (March 11, 1985). As it may ultimately be unnecessary to reach the issue of "reasonable indication" in this case, the Court reserves decision on this question at this time.

ARMSTRONG RUBBER CO., ET AL., PLAINTIFFS *v.* UNITED STATES, DEFENDANT

Court No. 84-10-01444

Before WATSON, *Judge.*

MEMORANDUM AND ORDER

[Motion for an order of contempt denied.]

(Decided February 14, 1986)

Frederick L. Ikenson for the plaintiffs.
Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, (*J. Kevin Horgan,* Attorney) for defendant.

WATSON, *Judge:* Plaintiffs have moved the court to hold certain officials of the Commerce Department in contempt of court for refusing to resume an investigation of whether or not radial ply tires from the Republic of Korea were being sold here at less than fair value.

This refusal followed a judgment in which the court reversed a determination by the International Trade Commission (ITC), which determination had the effect of terminating the administrative investigation of those tires.

The ITC had determined that there was no reasonable indication of injury from imports of tires from the Republic of Korea. This court found that the ITC had applied an erroneous legal standard and remanded the matter for the issuance of a determination in accordance with the court decision. *Armstrong Rubber Co., et al.* v. *United States,* 9 CIT —— Slip Op. 85-85 (August 8, 1985).

In a later opinion in the same case the court denied defendants' motion for a stay pending appeal. (Slip Op. 85-109, October 18, 1985)

On these facts, the court will not exercise its contempt power against officials of the Department of Commerce. Although it was within the contemplation of the court that the judgment it was issuing would lead to the resumption of the investigation by the Department of Commerce, the court did not say so specifically. While

it is true that the opinion denying the motion for a stay speaks of the strong public interest in the "uninterrupted progress of these investigations" it did not direct the continuation explicity.

It is also true that the opinion denying the stay refers to the opinion in *American Grape Growers Alliance, et al.* v. *United States,* 9 CIT ——, (Slip Op. 85-104 October 7, 1985), in which the court's expectation that such judgments create the necessity of a resumption of the investigation by the Department of Commerce is even more pronounced.

Nevertheless, even though it may be said that the court expected its judgments with respect to erroneous ITC determinations (determinations which had the effect of terminating investigations) to lead inexorably to the continuation of the investigations by the Commerce Department, it did not include a direction to that effect in its judgment.

An excuse for inaction which would be a minor technicality in other areas in which courts are called upon to judge the consequences of action or inaction, must be given more importance in the area of contempt. It is a settled safeguard, as it should be, that the awesome power of contempt is not to be used unless the party said to be in contempt has been given a clear direction by the court. *International Longshorement's Association* v. *Philadelphia Marine Trade Association,* 389 U.S. 64, 76 (1967). In fairness, it must be said that the judgment in this action did not give the Commerce Department a plain direction to resume the investigation.

Since making this motion for contempt, plaintiff has commenced a separate action to compel the Department of Commerce to resume the investigation. The substance of the dispute regarding the inaction of the Department of Commerce will be reached in the new action.

For the reasons given above, plaintiffs' motion to hold officials of the Department of Commerce in contempt of court is denied.

(Slip Op. 86-16)

PHILIPP BROTHERS, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 84-4-00528

OPINION

[Remanded.]

(Decided February 14, 1986)

Donohue and Donohue (*James A. Geraghty* and *Margaret R. Polito*) for plaintiff.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, *Elizabeth C. Seastrum,* (*Andrea E. Migdal* of Counsel), Civil Division, United States Department of Justice, for defendant.

RESTANI, *Judge:* This matter is before the court on plaintiff's challenge of the final determination in a section 751 annual review of a countervailing duty (CVD) order. Tariff Act of 1930, as amended, 19 U.S.C. § 1675 (1982 & West Supp. 1985); 49 Fed. Reg. 9,923 (1984). On April 4, 1980, the International Trade Administration (ITA) of the United States Department of Commerce published a CVD order, pursuant to 19 U.S.C. § 1303 (1982), on pig iron from Brazil.[1] 45 Fed. Reg. 23,045 (1980). The excessive remission of Brazil's value-added Industrial Products Tax (IPI) was among the subsidies found to be provided by the government of Brazil for exports of Brazilian pig iron. Prior to issuance of the CVD order by ITA, however, the Brazilian government announced that this excess credit would be eliminated as of December 12, 1979, and the subsidy determination was reduced accordingly. Consistent with the conclusion of the Treasury Department, ITA's estimated duties for the eight largest exporters were calculated on a company-specific, rather than average, basis reflecting the varying benefits received by each of the companies from the subsidies. In both its first and second annual reviews, however, ITA switched from its company-specific CVD assessment to an average assessment, which thereby required each pig iron exporter to pay countervailing duties at the same rate. In addition, in its second annual review, ITA announced that it had learned that although the Brazilian government had begun to impose a tax to offset the IPI export credit premium, collection of that tax had been delayed. ITA concluded that the delay in collection conferred a benefit akin to an interest free loan to Brazilian pig iron exporters. ITA calculated the *ad valorem* benefit of the delay in collection of the offset tax and increased the aggregate countervailing duty rate accordingly in its second annual review, covering entries made during 1980.

Only plaintiff's challenge of ITA's second annual review is before the court. Plaintiff alleges that the decision to assess countervailing duties on an average basis rather than a company-specific basis was unlawful. In addition, plaintiff asserts that ITA's second annual review was untimely and therefore contrary to law. Further, plaintiff claims that adjustment of the CVD rate due to the lag in collection of the IPI export credit premium offset tax constituted the imposition of a CVD without first establishing that such delay is in fact a subsidy. Finally, plaintiff contends that even if this delay in tax collection constitutes a subsidy, ITA's calculation of the IPI export credit subsidy based on credits earned rather than received, required it to similarly consider the date of offset tax assessment rather than collection.

---

[1] The CVD investigation was initially conducted by the United States Department of Treasury as the administering authority under 19 U.S.C. § 1303, prior to enactment of the Trade Agreements Act of 1979. After issuance of the final affirmative determination by Treasury, the Trade Agreements Act of 1979 became effective and authority to issue CVD orders was transferred from Treasury to Commerce. Subsequent proceedings were governed by the transition rules of the Trade Agreements Act of 1979. Public L. No. 96-39, § 102, 93 Stat. 144.

I. *Participation in Comment Period as Jurisdictional Prerequisite*

Defendant raises the same jurisdictional defense, failure to exhaust administrative remedies, to plaintiff's first two claims. Specifically, defendant maintains that plaintiff was required to participate in the comment period following the issuance of the section 751 preliminary review before seeking judicial relief. Under section 751, as it read during the period in question, ITA was required to conduct annual reviews of each CVD order.[2] Accordingly, the agency published its notice of "Preliminary Results of Administrative Review" concerning Brazilian pig iron. 48 Fed. Reg. 54,091 (1983). This notice invited interested parties to comment on the preliminary results. *Id.* Written comments could be submitted within thirty days of the date of publication of the notice (November 30, 1983). Parties could also "request disclosure and/or a hearing" within ten days of publication. *Id.* at 54,093. The first question confronting the court is whether plaintiff was required to submit comments or request a hearing before raising issues in this court that could have been raised before the agency.

"The general rule is that 'administrative exhaustion of remedies is required before a litigant will be allowed to raise a claim via a civil action.' " *Allen* v. *Regan*, 9 CIT ——, Slip Op. 85-126 at 6 (Dec. 10, 1985) (quoting *Rhone Poulenc, S.A.* v. *United States*, 7 CIT 133, 583 F. Supp. 607, 609 (1984), citing *United States* v. *L.A. Tucker Truck Lines, Inc.*, 344 U.S. 33, 37 (1952)). Procedures governing section 751 reviews are set out in 19 C.F.R. § 355.41 (1983), promulgated by the Secretary of the Treasury. Section 355.41(d) specifically lists the various procedures that ITA set forth in its preliminary order. Thus, to have exhausted its administrative remedies, plaintiff should have either requested a hearing or offered written comments on the proposed changes. Under normal circumstances, only then would it be able to raise those issues at the judicial level. *L.A. Tucker Truck Lines*, 344 U.S. at 37 ("as a general rule * * * courts should not topple over administrative decisions unless the administrative body not only had erred, but has erred against objection made at the time appropriate under its practice"); *Unemployment Compensation Commission* v. *Aragon*, 329 U.S. 143, 155 (1946) ("[a] reviewing court usurps the agency's function when it sets aside the administrative determination upon a ground not theretofore pre-

---

[2] 19 U.S.C. § 1675(a) reads as follows:

Administrative review of determinations

(a) Periodic review of amount of duty.—

(1) In general.—At least once during each 12-month period beginning on the anniversary of the date of publication of a countervailing duty order * * * the administering authority, [if a request for such a review has been received and] after publication of notice of such review in the Federal Register, shall—

(A) review and determine the amount of any net subsidy,

(B) review, and determine (in accordance with paragraph (2)), the amount of any antidumping duty, and

(C) review the current status of, and compliance with, any agreement by reason of which an investigation was suspended, and review the amount of any net subsidy or margin of sales at less than fair value involved in the agreement,

and shall publish the results of such review, together with notice of any duty to be assessed, estimated duty to be deposited, or investigation to be resumed in the Federal Register.

(Bracketed material was added by amendment in 1984.)

sented"); *Meglio* v. *Merit Systems Protection Board*, 758 F.2d 1576, 1577-78 (Fed. Cir. 1984) (failure to raise claim before administrative body constitutes effective waiver of right to contest).

A plaintiff's failure to exhaust its administrative remedies is not always fatal to its case, however. This court is not required by statute to consider full exhaustion of administrative remedies a jurisdictional prerequisite to an action contesting the final determination of an annual review of a countervailing duty order. Instead, in this situation, the court "shall, *where appropriate*, require the exhaustion of administrative remedies." 28 U.S.C. § 2637(d) (1982) (emphasis added). *See Rhone Poulenc*, 7 CIT at 136, 583 F. Supp. at 611 (exhaustion required "where appropriate" if plaintiff satisfies prerequisite of participation under 19 U.S.C. § 1516a(a)(2)).[3]

With regard to the average versus company-specific CVD rates issue, plaintiff contends that it should be excused from the requirement of raising the issue at the administrative level because the law, as interpreted by this court just after publication of the preliminary section 751 review, prohibited ITA from retroactively assessing countervailing duties. The day after the section 751 preliminary review was published, this court issued its decision in *Ambassador Division of Florsheim Shoe Co.* v. *United States*, 6 CIT 278, 577 F. Supp. 1016 (1983), *rev'd*, 748 F.2d 1560 (Fed. Cir. 1984). In *Florsheim*, this court interpreted section 751 and held that ITA could not, pursuant to a periodic review, suspend liquidation of entries and impose a retroactive assessment of countervailing duties. Plaintiff's position is that it was entitled to rely on the expectation that Commerce would act in accordance with this court's decision in *Florsheim*. Pursuant to *Florsheim* (prior to reversal), Commerce could not have switched from the lower company-specific rates to the higher average assessment because to do so would be the retroactive assessment of countervailing duties which was barred by *Florsheim*. Defendant contended at oral argument that although *Florsheim* was arguably favorable to plaintiff, the case did not specifically address the company-specific versus average issue and was, therefore, distinguishable from plaintiff's case. Plaintiff was, according to defendant, obliged to bring to ITA's attention the applicability of that decision to plaintiff's case and, presumably, to raise any additional objections to the assessment of CVDs on an average basis.

The court cannot agree with defendant's argument. It is true that *Florsheim* did not specifically address the company-specific versus average issue. The holding of that case, however, invalidating the suspension of liquidation and retroactive assessment of countervailing duties pursuant to a section 751 review, clearly would have controlled the case at bar had it not been reversed subsequently. Although the *Florsheim* decision was not final, in the

[3] There is no dispute that plaintiff "participated" in the proceedings below.

sense that time for appeal had not run, it was sufficiently final to constitute applicable precedent. *See Rhone Poulenc* 7 CIT at 137, 583 F. Supp. at 612 (an appealed decision remains valuable precedent until reversed). In the final results of the section 751 review in question, ITA did not deny the applicability of the lower court decision in *Florsheim*. Rather, ITA responded to a comment of the Brazilian government noting the applicability of *Florsheim* by stating, "[t]he Department [of Commerce] has appealed the *Florsheim* decision. The Department believes that its practice of retroactive collection [of CVDs] is correct and will continue to operate on that belief pending the outcome of the appeal." 49 Fed. Reg. at 9,924. Thus, this is a situation in which ITA refused to apply the clearly applicable precedent and not one in which a party failed to argue for adherence to possibly distinguishable case law.[4] Even in such a situation, plaintiff might have the burden of presenting alternative arguments to ITA prior to raising those arguments to this court, but further aggravating factors exist. Plaintiff's argument to this court challenging the legality of ITA's switch to a company-specific assessment of CVDs is based on facts available only in the confidential administrative record. The deadline for seeking access to the confidential administrative record had passed by the time plaintiff received notice of the deadline.[5] Nonetheless, absent the situation created by ITA's disregard of the lower court opinion in *Florsheim*, which plaintiff had no reason to anticipate, plaintiff would not be relieved of the obligation to seek additional time to obtain access to the confidential administrative record, which it needed to make presentation of alternative arguments possible. Separately, neither of these factors necessarily tips the scale against requiring exhaustion of administrative remedies, but the result is clear if they are weighed together. The court considers it inappropriate to require plaintiff, under the doctrine of exhaustion of administrative remedies, to argue to ITA for adherence to clearly applicable precedent, to anticipate disregard of the precedent and to then raise alternative arguments to the agency, the basis for which plaintiff could not know. Thus, plaintiff is not barred by a failure to exhaust its administrative remedies and its claim that ITA's switch to an assessment of CVDs on an average, rather than company-specific, basis is properly before this court. The court must, therefore, determine whether this decision of ITA in the sec-

---

[4] It should be noted that India, the country under investigation in *Florsheim*, was not a signatory to the GATT Subsidies Code while Brazil is an "agreement country." The procedures governing CVD determinations are more favorable to agreement countries, *see* 19 U.S.C. § 1671(a) (1982 & West Supp. 1985) (requiring material injury determination for agreement countries as prerequisite to imposition of CVDs), however, and thus it would not make sense to say that the lower court ruling in *Florsheim* was distinguishable on this basis.

[5] The "preliminary results" of the section 751 review were published in the federal register on November 30, 1983, 48 Fed. Reg. 54,091 (1985), and the deadline for requesting confidential information was stated therein to be just 5 days later, December 5, 1983. Generally, notice by publication in the federal register is appropriate for all purposes, *see, e.g.*, 19 C.F.R. § 355.28(a)(4) (1983), but here the section 751 annual review was already months late at the time these preliminary results were published. *See* 19 U.S.C. § 1675 (1982 & West Supp. 1985). Under these circumstances, ITA appropriately undertook to notify the parties directly. This notification was sent to plaintiff by letter dated December 6, 1983, by which time the December 5, 1983, deadline for requesting confidential information had already passed.

tion 751 review that is before this court is supported by substantial evidence on the record and is otherwise in accordance with law. 19 U.S.C. § 1516a(b)(1)(B) (1982).

II. *Company-Specific Versus Average CVD Assessment*

As noted, although ITA calculated estimated CVDs on a company-specific basis in its CVD order, it then switched to an average assessment in the section 751 reviews. Plaintiff contends that ITA's failure to explain its departure from the company-specific deposit rates necessarily determines that ITA's decision was unlawful. Defendant responds that although ITA is required, in conducting preliminary and final countervailing duty determinations, to state any material differences in the benefits received by separate enterprises, 19 C.F.R. §§ 355.28(a)(3) and 355.33(f) (1983), no such requirement exists for section 751 reviews.[6] In addition, defendant claims that, even if company-specific assessments might be required in particular instances, the decision to use an average assessment in the case at bar was imminently reasonable because of the lack of material differences in the benefits received by various companies. Finally, defendant argues that to require company-specific assessments in section 751 reviews would impose an unfair burden on ITA.

To begin, the fact that 19 C.F.R. §§ 355.28(a)(3) and 355.33(f) may be inapplicable by their terms to the form of final published results of section 751 reviews does not enable ITA to disregard these regulations in conducting such reviews. Sections 355.28(a)(3) and 355.33(f) unquestionably require company-specific benefits to be stated in preliminary and final determinations made prior to a section 751 review if companies receive materially different benefits. It cannot have been intended that ITA, once having made such a finding, simply ignore any material differences in benefits received in conducting a section 751 review. In conducting such a review, ITA is specifically required to publish "a revised Countervailing Duty Order, including any revised bases for the assessment of duties on the merchandise." 19 C.F.R. § 355.41(d) (1983). The switch from company-specific deposit rates to an average assessment of CVDs falls within this requirement. Although the fact that an average assessment would be used was stated in both the preliminary and final results of the section 751 review, there is no indication on the record of ITA's justification for this change to an average as-

[6] 19 C.F.R. § 355.28 contains guidelines governing the issuance of preliminary determinations. Subsection (a)(3) provides that "[i]f separate enterprises have received materially different benefits, suchy differences shall also be estimated and stated." 19 C.F.R. § 355.28(a)(3) (1983).

Similarly, 19 C.F.R. § 355.33(f) contains guidelines governing the issuance of final determinations. Subsection (f) specifies that "[i]f separate enterprises have received materially different benefits, such differences shall be estimated and stated." 19 C.F.R. § 355.33(f) (1983).

Although the term "stated" is not defined, the logical inference would be that company-specific deposits rates are to be used where such material differences are found. *See* Final Affirmative Countervailing Duty Determination and Countervailing Duty Order, *Portland Hydraulic Cement and Cement Clinker From Mexico*, 48 Fed. Reg. 43,063, 43,068 and 69 (1983) (citing § 355.33(f) and imposing company-specific deposit rates where material differences were found to exist.

sessment. Whether or not ITA's initial use of company-specific CVD deposit rates was based on a finding of "material" differences in benefits received, ITA evidently concluded that the differences were sufficiently large to warrant company-specific deposit rates.[7] To then ignore such differences in the section 751 review without explanation on the record (*e.g.*, of an unavailability of the requisite data or of a discovery that such differences, in fact, do not exist) results, as here, in a determination made contrary to law.[8] " '[T]he failure of an administrative agency to articulate the reasons for a particular decision makes meaningful review of that decision impossible.' "[9] *SCM Corp.* v. *United States*, 84 Cust. Ct. 227, 233, C.R.D. 80-2 (1980) (quoting *Public Media Center* v. *FCC*, 587 F.2d 1322, 1331-32 (D.C. Cir. 1978), quoting *American Smelting & Refining Co.* v. *FPC*, 494 F.2d 925, 945 (D.C. Cir.), *cert. denied*, 419 U.S. 882 (1974)).

III. *Deemed Liquidation*

Plaintiff's second claim is that the merchandise at issue should be liquidated by operation of law at the rate specified by plaintiff when it was entered because Customs failed to complete the annual review within the statutory deadline of twelve months. Plaintiff's argument is as follows: An entry of merchandise not liquidated within one year from the entry of such merchandise is deemed liquidated at the rate of duty, value, quantity, and amount of duties specified by the importer at the time of entry unless the Secretary extends the time for liquidation. 19 U.S.C. § 1504(a) (1982 & West Supp. 1985). One of the situations in which extension is allowed is when liquidation is suspended as required by statute. 19 U.S.C. § 1504(b)(2) (1982 & West Supp. 1985). Plaintiff argues that although liquidation in this case was originally suspended for the

---

[7] It should be noted that regulations proposed by ITA would clarify the magnitude of differences in subsidies among companies that would mandate company-specific CVD deposit rates following final affirmative determinations and company-specific CVD assessments in § 751 reviews. Proposed regulations 19 C.F.R. §§ 355.22(d) (2) and (3) state that in conducting a section 751 review,

> (2) If the Secretary decides that an individual (including government-owned) producer or exporter received a significantly different net subsidy during the period, the Secretary will state in the final results an individual rate for that person, and that rate will be the basis for the assessment of countervailing duties and, except as provided in paragraph (c)(7)(iii) of this section, the cash deposit of estimated countervailing duties for that person.
>
> (3) A significant differential is a difference of the greater of at least 10 percentage points, or 25 percent, from the weighted-average net subsidy calculated on a country-wide basis.

50 Fed. Reg. 24,207, 24,226 (1985).

Proposed regulation 19 C.F.R. § 355.20(d)(3) contains the same definition of a "significant differential" in the context of final CVD determinations. 50 Fed. Reg. at 24,225. This definition of a "significant differential" would apparently have mandated company-specific deposit rates and CVD assessments here for certain companies in the final CVD determination and the § 751 review respectively. Although obviously not dispositive here, this fact is instructive as to the significance of the differences in benefits received in the case at bar, particularly in light of ITA's stated purpose, in proposing this definition, of decreasing instances in which company-specific CVD rates would be required. *Id.* at 24,211-12.

[8] From the administrative record it is evident that ITA, in conducting the 1981 § 751 review, compiled company-specific data for 1981 for the eight largest exporters to the United States of Brazilian pig iron. Thus, it cannot be argued that ITA lacked the relevant company-specific data for these companies.

[9] The parties did not brief an issue which relates to the change in duties assessed, that is ITA's inclusion in the average CVD assessment of the "subsidy" received by Cimetal. The alleged subsidy received by Cimetal was apparently based largely on its bankruptcy during 1981 and its consequent failure to repay government loans. The size of this alleged subsidy apparently skewed the average assessment. The court makes no determination as to the reasonableness of ITA's apparent conclusion that the failure to repay government loans due to bankruptcy is, in fact, a countervailable subsidy.

periodic review, *Ambassador Division of Florsheim Shoe* v. *United States,* 748 F.2d 1560, 1563 (Fed. Cir. 1984), the suspension automatically terminated at the end of the twelve-month period allowed for the review. Once a suspension terminates, an entry is liquidated within ninety days. 19 U.S.C. § 1504(d) (1982 & West Supp. 1985). Plaintiff contends that pursuant to this scheme, the merchandise was liquidated on July 4, 1983.

In several other contexts courts have recognized that statutory time periods are directory, as opposed to mandatory, when no restraint is affirmatively imposed on the doing of the act after the time specified and no adverse consequences are imposed for the delay. *Usery* v. *Whitin Machine Works, Inc.,* 554 F.2d 498, 501 (1st Cir. 1977) (Secretary of Labor's decision on petition for trade adjustment assistance); *Fort Worth National Corp.* v. *Federal Savings & Loan Insurance Corp.,* 469 F.2d 47, 58 (5th Cir. 1972) (Federal Savings and Loan Insurance Corp. decision on application for acquisition of institution insured by the Corp.); *Katunich* v. *Donovan,* 8 CIT 156, 594 F. Supp. 744, 748–50 (1984) (same program as *Usery*); *Alberta Gas Chemicals, Inc.* v. *United States,* 1 CIT 312, 315–16, 515 F. Supp. 780, 785 (1981) (Treasury determination regarding dumping complaint);[10] *Diamond Match Co.* v. *United States,* 44 Cust. Ct. 67, 74–75, 181 F. Supp. 952, 959 (1960) (notification by Customs collector of filing of protest), *aff'd,* 49 CCPA 52, C.A.D. 796 (1962). As discussed above, the statute in question in this case does not purport to restrain ITA from acting after the twelve-month period has passed. The more problematic issue is whether the statute imposes the adverse consequence for the delay, which plaintiff seeks to have imposed on ITA. The Court of Appeals for the Federal Circuit has noted "that both § 1504 and the provisions respecting countervailing duties, such as § 1675(a), were enacted as in *pari materia,* both being amendments to * * * the Tariff Act of 1930, and therefore a legislative intent to have them work harmoniously together, and for neither to frustrate the other * * * is very much to be inferred." *Florsheim,* 748 F.2d at 1565 (discussing 19 U.S.C. §§ 1504 and 1675(a)). Although these two provisions are to be read in tandem, and the suspension is to be implied, there is nothing in the statute or legislative history that compels the conclusion that the implied suspension automatically terminates at the close of the twelve-month period specified in section 751. Thus, in this situation, the court is unable to conclude that the statute imposes a penalty of deemed liquidation for the delay. Although ITA's failure to comply with the statutory time limit is not condoned by this court, this failure to act in a timely manner did not deprive ITA of jurisdiction to complete the section 751 review.[11]

[10] "Although the legislative history cited by plaintiff shows clearly that Congress desired the expeditious handling of [these cases,] 'there is nothing in the statute which in any way suggests that the time limitation was designed to be jurisdictional.'" *Alberta Gas,* 1 CIT at 316, 515 F. Supp. at 785 (quoting *Usery,* 554 F.2d at 501).

[11] In view of the fact that the court finds that defendant acted in accordance with law as to this claim, the court believes that discussion of the numerous issues relating to exhaustion of administrative remedies is unnecessary as to the deemed liquidation issue.

IV. *Lag in Collection of Offset Tax*

Plaintiff alleges that ITA's treatment of the lag time in collection of the IPI export credit offset tax is not supported by substantial evidence and is not in accordance with law. Plaintiff contends that the benefit conferred due to the lag time between Brazil's assessment and collection of the tax is not a countervailable subsidy. In the alternative, plaintiff claims that even if this is a countervailable subsidy, ITA was not justified in imposing a CVD for this gap in collection. The CVD assessment on the IPI export credit program was based on the time at which credits were earned rather than received. To be consistent with the assessment of CVDs based on credits earned rather than received, plaintiff argues that the impact of the offset tax should be determined from the date the taxes were assessed rather than collected. Defendant offers two alternative arguments to counter plaintiff's contentions here.

Defendant first argues that plaintiff is barred from a judicial challenge to the assessment of CVDs based on export credits earned rather than credits received because plaintiff failed to raise this issue at the administrative level. ITA did not take account of this lag in offset tax collection, however, until its final decision concerning the section 751 review under consideration. Therefore, insofar as plaintiff argues for consistency in ITA's assessment of CVDs, there was no opportunity to raise the issue at the administrative level. Thus, even if the *Florsheim* decision, and other events discussed previously, had not intervened, plaintiff would not be barred from raising this issue before the court.

In the alternative, defendant asserts that its treatment of the lag in tax collection was within ITA's statutorily prescribed discretion under 19 U.S.C. § 1677(6)(C) (1982) to calculate an allowance for taxes imposed by the foreign government to offset a subsidy.[12] Thus, defendant characterizes the treatment of the lag in tax collection *not* as the imposition of a distinct CVD but rather an adjustment in the allowance for the offset tax. In enacting this provision, Congress stated that "[i]n determining the amount of offsets which are permitted, it is expected that the administrative authority will only offset amounts which are *definitively established by reliable, verified evidence.*" S. Rep. No. 249, 96th Cong., 1st Sess. at 86, *reprinted in* 1979 U.S. Code Cong. Ad. News 381, 472 (emphasis added). Defendant argues that the use of the word "may" in section 1677(6)(C) places within ITA's sole discretion the decision of whether to allow an offset in calculating the net subsidy.[13] The govern-

---

[12] 19 U.S.C. § 1677 (1982) reads in pertinent part as follows:

(6) Net subsidy.—For the purpose of determining the net subsidy, the administering authority *may* subtract for the gross subsidy the amount of—

. . . . . .

(C) export taxes, duties, or other charges levied on the export of merchandise to the United States specifically intended to offset the subsidy received.

(emphasis added).

[13] To be consistent with the GATT Subsidies Code, CVDs can be imposed only to the extent "necessary to eliminate the amount of the subsidy." General Agreement on Tariff and Trade: Interpretation and Application

Continued

ment seems to argue that the manner of the calculation of the offset is, therefore, nonreviewable. The court doubts that that is truly the intent of Congress here. ITA undoubtedly has discretion in deciding whether to allow an offset, but discretion as to its manner of calculation is not unlimited. As stated by the Supreme Court, judicial review is precluded only "in those rare instances where 'statutes are drawn in such broad terms that in a given case there is no law to apply.'" *Citizens to Preserve Overton Park* v. *Volpe*, 401 U.S. 402, 410 (1971) (quoting S. Rep. No. 752, 79th Cong., 1st Sess. 26 (1945) (legislative history of APA)). This court has recognized that "judicial review of final agency action is not precluded unless there is persuasive reason to believe that this was the intention of Congress." *Maple Leaf Fish Co.* v. *United States*, 5 CIT 275, 278, 566 F. Supp. 899, 902 (1983) (citing *Overton Park, supra; Data Processing Service* v. *Camp*, 397 U.S. 150, 156–57 (1970); *Abbott Laboratories* v. *Gardner*, 387 U.S. 136, 140 (1967) (Judicial review under APA allowed absent "persuasive reason to believe" Congress intended otherwise)).[14] In the area of international trade, agency and executive determinations have generally been found to be nonreviewable, or reviewable only for procedural irregularities, only in areas where there truly is no law to apply such as the "multifaceted judgmental decision to settle a claim," *Montgomery Ward & Co.* v. *Zenith Radio Corp.*, 673 F.2d 1254, 1262 (Fed. Cir. 1982) (Secretary of Commerce's settlement agreement in antidumping matter), and in those areas fraught with foreign affairs considerations. *See, Florsheim Shoe Co.* v. *United States*, 744 F.2d 787, 793 (Fed. Cir. 1984) (decision regarding duty-free treatment under Generalized System of Preferences is "intimately involved with foreign affairs"); *Sacilor, Acieries Et Laminoirs De Lorraine* v. *United States*, 9 CIT ——, 613 F. Supp. 364, 369–70 (1985) (allowance of additional imports under "short supply" exception is within realm of foreign affairs), *appeal docketed*, No. 85–2706 (Fed. Cir. Aug. 26, 1985). The decision in question, the manner in which an offset is calculated by ITA, falls within neither of these categories and, in fact, Congress not only specifically provided for judicial review in this area, but also gave guidance as to the type of evidence that would support an offset. The court concludes that there is "law to apply" to the manner in which ITA calculates an offset under this section and, as such, if an offset has been allowed it must be calculated in a way that does not amount to an abuse of whatever discretion is al-

---

of Articles VI, XVI and XXIII, Apr. 12, 1979, part I, article 4, 31 U.S.T. 513, 524, T.I.A.S. No. 9619. Although inconsistent statutory provisions will prevail over GATT, Congress has stated that the Trade Agreements Act of 1979 was intended to be GATT consistent. *See* S. Rep. No. 249 at 1, 1979 U.S. Code Cong. & Ad. News at 387. Arguably, if there is an offset, duties are not necessary to eliminate the subsidy. Based on the arguments presented in this case, the court is not prepared to conclude that ITA is free to totally ignore offsets clearly evidenced by reliable information. This issue need not be resolved here because it is apparent in this case that, thus far, ITA has taken the offset into account in some manner.

[14] These limited exceptions to judicial review correspond (in reverse order) to the limitations on judicial review found in § 701(a) of the APA. 5 U.S.C. § 701(a) (1982). According to this provision, judicial review is allowed "except to the extent that (1) statutes preclude judicial review; or (2) agency action is committed to agency discretion by law." *Id.*; *see Heckler* v. *Chaney*, 105 S. Ct. 1649, 1654–55 (1985).

lowed. *See Montgomery Ward*, 69 CCPA at 107, 673 F.2d at *1261* ("If an action is discretionary but there is law from which a court may determine that the exercise of discretion is arbitrary or capricious, or not in accordance with law, the decision itself may be reviewed on that limited basis.")

ITA initially allowed an offset in this case because it believed that an export tax, which nullified the IPI export credit subsidy, had been assessed on June 26, 1981, by the Brazilian government. Prior to issuance of its "final review" in the second section 751 review, however, ITA discovered that the Brazilian government did not begin to collect the offsetting export tax until December 31, 1982. ITA concluded that "the lag in collection was *equivalent to an interest free loan* in the amount of the tax owed rolled over monthly until the tax was actually paid." 49 Fed. Reg. at 9,925 (emphasis added). The "loan" was deemed to have been made on the date on which the tax was due, which under current practice, was determined to be forty-five days after the end of the month in which the shipment earning premium occurred. ITA calculated the *ad valorem* benefit of this delay to be .95 percent, using the monthly Banco de Brasil rate for discounts of accounts receivable of 4.97 percent. *Id.* Plaintiff asserts that what ITA did here was to impose a CVD based on the lag in tax collection without first establishing that such lag constitutes a countervailable subsidy. At oral argument, defendant claimed, to the contrary, that its reference to the lag in collection as an "interest free loan" was merely by way of analogy and that ITA was, in fact, adjusting the offset allowed under 19 U.S.C. § 1677(6)(C) to reflect the fact that the offset tax imposed was not collected immediately rather than recognizing another form of subsidy. The administrative record provides no guidance as to whether ITA did in fact treat the lag in tax collection as a separate countervailable subsidy or whether ITA simply adjusted the offset allowed under section 1677(6)(C). Inasmuch as this matter is remanded for a related purpose, and inasmuch as plaintiff had no opportunity to comment on this late-arising issue, the court deems it appropriate for ITA to review this aspect of its order as well. It appears to the court that if ITA treats the lag in tax collection as an interest free loan justifying imposition of a CVD, it must first be established that such lag is in fact a countervailable subsidy within the meaning of the statute. *Compare, e.g., Carlisle Tire and Rubber Co.* v. *United States*, 5 CIT 229, 564 F. Supp 834 (1983) and *Cabot Corp.* v. *United States*, 9 CIT——, 620 F. Supp. 722 (1985) (limits of countervailable subsidies based on general availability). In the alternative, if ITA treats the alleged .95 percent *ad valorem* benefit of the delay between imposition and collection of the offset tax as an adjustment to the CVD offset allowed under section 1677(6)(C), ITA should address the arguments raised by plaintiff concerning its methodology.

V. *Conclusion*

For the above reasons the court concludes that the second annual review was not conducted in accordance with law. This matter is remanded to ITA for further action consistent with this opinion.

Customhouse Broker License—Suspension

Suspension of Customhouse Broker's License No. 5932

Effective upon publication date of this notice, pursuant to section 641, Tariff Act of 1930, as amended (19 U.S.C. 1641), and Part 111 of the Customs Regulations, as amended (19 CFR Part 111), the individual customhouse broker's license no. 5932 issued to Paul V. McCormack, for the Customs District of New York, New York is hereby suspended for a period of not less than four years. Pursuant to a negotiated settlement between the U.S. Customs Service and Paul V. McCormack, after the four year period has expired, Mr. McCormack may apply for reissuance of customhouse broker's license no. 5932.

Date: February 27, 1986.

Entry of Merchandise Imported From Countries Imposing Export Restrictions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of policy.

SUMMARY: In recent years, importers of merchandise from countries which impose minimum price requirements to obtain quota or permission to export have been importing such merchandise using documents procured from the government of the country of origin by means of fraud or false statements. The documents in question are usually "visaed invoices" (an invoice stamped with or otherwise recording export approval by an appropriate authority of the gov-

ernment of the country of origin), where the export approval was based on false (inflated or deflated) merchandise values supplied by the exporter and set forth on the invoice. The acceptance of these documents by Customs is inconsistent with the requirement, under the law and regulations, that the invoice set forth the purchase price of the merchandise, and is precluded by the regulations, which call for the rejection of any documents which appear, or are known, to be erroneous. Customs will adhere to the law and regulations.

EFFECTIVE DATE: The policy will become effective with respect to all merchandise entered or withdrawn from warehouse for consumption on or after May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Bruce Shulman, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In recent years, certain importers of merchandise from countries which impose export restrictions on such merchandise (an export quota, for example) have gained export approval from the government of the country of origin by means which result in the presentation to Customs, upon the entry of the merchandise into the U.S., of documents—usually "visaed invoices"—which contain false statements. A "visaed invoice" is an invoice which is stamped with or otherwise signifies the export approval of the appropriate government authority in the country of origin but, in the situations in question, such approval is premised on false (inflated or deflated) merchandise values set forth in the invoice by the exporter.

For example, the exporter and the U.S. importer may agree on a unit price of $10 for merchandise which the government of the country of origin will not approve for export to the U.S. at a unit price of less than $20. To obtain export approval, therefore, the exporter prepares an invoice setting forth a unit price of $20 for the merchandise; the appropriate authority of the government of the country of origin, based on the invoice information, stamps the invoice or otherwise signifies its approval for the export of the merchandise to the U.S. This document is required to be presented to Customs upon the entry of the merchandise into the U.S. and becomes a part of the entry package.

In many instances, the importer—for duty purposes—will allege the existence of a lower selling price than that recorded on the invoice, offering other evidence of the actual selling price, including (1) a second invoice prepared by the exporter showing the actual selling price, and evidence of payment by the importer of the latter price; (2) evidence of receipt of a refund from the exporter in an amount of the difference between the invoice price and the actual

agreed-upon selling price; or (3) evidence that the "overpayment" to the exporter per the inflated invoice price has been used to create an artificially low price for other goods shipped to the importer (other merchandise not subject to the same export restrictions). Although many importers have revealed the actual purchase details to Customs (in order to avoid any overpayment of duty, to avoid a possible penalty assessment for presenting Customs with a document known to contain false information, or for other reasons), others may not have done so—electing instead to pay the additional duty and to accept the risk of penalties in an effort to facilitate the processing of the entry by Customs.

Section 484(a), Tariff Act of 1930, as amended (19 U.S.C. 1484(a)), requires that importers file with Customs documentation which, among other things, allows Customs "to assess properly the duties on the merchandise, [and] collect accurate statistics with respect to the merchandise * * *." Clearly, an invoice which sets forth a false purchase price does not satisfy this requirement. Equally clearly, such an invoice fails the requirement imposed by 19 U.S.C. 1481(a)(5), that each invoice of imported merchandise set forth "[t]he purchase price of each item * * *." These requirements are confirmed in the corresponding implementing regulations (*e.g.*, Sections 141.81, 141.83 and 141.86, Customs Regulations, 19 CFR 141.81, 141.83, and 141.86). Sections 141.61(e)(4) and 141.64, Customs Regulations (19 CFR 141.61(e)(4) and 141.64), provide that Customs shall not accept entry and entry summary documentation which clearly appears, or is known by Customs, to be erroneous.

ACTION

On or after the effective date of this document, any differences or inconsistencies in the information contained in documents presented to Customs in connection with the importation of merchandise shall be considered as an indication that one or more of such documents contains false or erroneous information. In such circumstances, the entry documentation will not be accepted by Customs but will instead be returned to the importer for correction.

In situations where the visaed invoice or document presented to Customs (and necessary for the entry of the merchandise) contains erroneous value or price information, such invoice or document can only be corrected by the presentation to Customs of a new, corrected invoice or document stamped with the visa of the government of the country of origin. Customs will not accept pro forma invoices in any case involving apparent differences in price or value information in the documents required to be submitted to Customs and which involve the production of a document which is required to contain a foreign country's visa.

Customs will fully investigate any suspected attempts to circumvent the foregoing policy, including unusual resales and the submission of other entry documentation corroborating the value or

price information set forth in a visa document and otherwise suspected to be false. In appropriate circumstances, Customs will initiate actions under the civil and criminal penalty statutes it administers, including but not limited to 19 U.S.C. 1592, 18 U.S.C. 542, and 18 U.S.C. 1001.

PREVIOUS CUSTOMS RULINGS

To the extent that any ruling previously issued by Customs including those discussing whether a transaction value exists in situations similar to those described above, may have indicated that entry documentation containing inconsistencies or differences in price or value information would be accepted by Customs (either because the ruling failed to address the acceptability of such documentation or otherwise), those rulings are hereby amended and modified to conform with the policy hereinabove set forth.

WILLIAM VON RAAB,
Commissioner of Customs.

Dated: February 20, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

19 CFR Part 12

(T.D. 86-57)

Customs Regulations Amendment Relating to Textiles and Textile Products

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations relating to the importation of textiles and textile products into the U.S. Due to recent changes in the Tariff Schedules of the United States resulting from Presidential Proclamation 5365, dated August 30, 1985, effectuating the U.S.-Israel Free Trade Area agreement, certain general headnotes upon which portions of the Customs Regulations are predicated no longer exist. Accordingly, this document revises the Customs Regulations to reflect those changes.

EFFECTIVE DATE: March 11, 1986.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: Phil Robins, Classification and Value Division (202-566-8181); Operational Aspects: Bill Marchi, Duty Assessment Division (202-566-2957); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

BACKGROUND

By T.D. 85-38, published in the Federal Register on March 5, 1985 (50 FR 8710), § 12.130, Customs Regulations (19 CFR 12.130), was amended to provide specific regulatory authority mandating that "country of origin" rules be applied in determining whether textiles or textile products are subject to any of the multilateral or bilateral textile agreements negotiated by the U.S. pursuant to § 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Section 12.130(a), Customs Regulations, now states that textiles or textile products subject to § 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854), include merchandise subject to General Headnotes 3(g)(iii)(C)(1), 3(g)(iii)(C)(2), and 3(g)(iii)(E) of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202). In addition, § 12.130(f), Customs Regulations, states that all importations of textiles and textile products covered by General Headnotes 3(g)(iii)(C)(2) or 3(g)(iii)(E), TSUS, shall be accompanied by the appropriate declaration(s) of the manufacturer, producer, exporter or importer of the textiles or textile products.

Pursuant to the U.S.-Israel Free Trade Area (FTA) agreement, which became effective September 1, 1985, certain changes were made to the TSUS; including the deletion of General Headnotes 3(g)(iii)(C)(1), 3(g)(iii)(C)(2), and 3(g)(iii)(E).

The FTA agreement is a program providing for free or reduced rates of duty for merchandise from Israel to stimulate trade between Israel and the U.S. This program was authorized by §§ 401-405 of the Trade and Tariff Act of 1984 (Pub. L. 98-573) and implemented by the U.S.-Israel Free Trade Area Implementation Act of 1985 (19 U.S.C. 2112 note) and Presidential Proclamation 5365 of August 30, 1985, published in the Federal Register on September 5, 1985 (50 FR 36220). On January 1, 1985, all currently eligible reduced rate importations from Israel will be accorded duty-free treatment.

The deletion of the above mentioned general headnotes from the TSUS necessitates their deletion from § 12.130. These are nonsubstantive changes which will merely conform the Customs Regulations to the TSUS.

EXECUTIVE ORDER 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

REGULATORY FLEXIBILITY ACT

Because no notice of proposed rulemaking is required for this final rule, the provisions of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601, *et seq.*), do not apply.

INAPPLICABILITY OF PUBLIC NOTICE AND DELAYED EFFECTIVE DATE PROVISIONS

Inasmuch as this amendment merely conforms the Customs Regulations to the TSUS, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary and pursuant to 5 U.S.C. 553(d)(3), a delayed effective date is not required.

DRAFTING INFORMATION

The principal author of the document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other Customs offices participated in its development.

LIST OF SUBJECTS IN 19 CFR PART 12

Customs duties and inspection, Imports, Textile products and apparel.

AMENDMENT TO THE REGULATIONS

Part 12, Customs Regulations (19 CFR Part 12), is amended as set forth below.

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The general authority citation for Part 12 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624. All other statutory authority cited at the end of various sections in Part 12 remains the same.

2. Paragraph (a) and the introductory text of paragraph (f) of § 12.130 are revised to read as follows:

§ 12.130 Textiles and textile products country of origin.

(a) *General.* Textiles or textile products subject to § 204, Agricultural Act of 1956, as amended (7 U.S.C. 1854), include merchandise which is classifiable under the provisions contained in Schedule 3, Subpart 6D of Schedule 6, Part 1 of Schedule 7, and Subparts 4A, 5D, 5E, 7B, 12C, and 13B of Schedule 7 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202); provided that such merchandise:

(1) is in chief value of cotton, wool, or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement, or any combination thereof; or

(2) contains 50 percent or more by weight of cotton or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement; or

(3) contains 17 percent or more by weight of wool; or

(4) if in chief value of textile fibers or textile materials, contains a blend of cotton, wool, or man-made fibers, or any textile fibers subject to the terms of any textile trade agreement, or any combination thereof, which fibers, in the aggregate amount to 50 percent or more by weight of all component fibers.

* * * * * * *

(f) *Declaration of manufacturer, producer, exporter, or importer of textiles and textile products.* All importations of textiles and textile products subject to § 204, Agricultural Act of 1956, as amended, shall be accompanied by the appropriate declaration(s) set forth in paragraph (f)(1) or (f)(2) of this section. Textiles or textile products subject to § 204 include that merchandise described in § 12.130(a). All importations of textiles and textile products not subject to § 204 shall be accompanied by the declaration set forth in paragraph (f)(3) of this section. The declaration(s) shall be filed with the entry. The declaration(s) may be prepared by the manufacturer, producer, exporter or importer of the textiles and textile products. If multiple manufacturers, producers, or exporters are involved, a separate declaration prepared by each may be filed. A separate declaration may be filed for each invoice which is presented with the entry. The determination of country of origin, other than as set forth in paragraph (g) of this section, will be based upon information contained in the declaration(s). The declaration(s) shall not be treated as a missing document for which a bond may be filed. Entry will be denied unless accompanied by a properly executed declaration(s).

U.S. Customs Service

General Notice

Request for Comments Regarding Effective Date for Country-of-Origin Marking Requirement on Orange Juice Containers

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Solicitation of public comments and notice of public hearing.

SUMMARY: Customs is soliciting the views of the public regarding an implementation date for a requirement that labels on frozen concentrated and reconstituted orange juice products which contain imported concentrate be marked to show the foreign country-of-origin of the products. The requirement for marking the products was recently upheld by the Court of International Trade, but Customs was directed by the Court to seek comments from all interested parties before reaching a decision on an effective date for the requirement.

DATE: Comments (preferably in triplicate) must be received on or before April 10, 1986.

ADDRESS: Comments may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8237).

FOR FURTHER INFORMATION CONTACT: Lorrie Rodbart, Entry Procedures and Penalties Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

SUPPLEMENTARY INFORMATION:

Background

Customs is requesting the views of the public in regard to the earliest practicable implementation date for a requirement that containers of orange juice in frozen concentrated or reconstituted forms, which contain imported concentrate, must be labeled to comply with the country-of-origin marking requirements of § 304, Tariff Act of 1930, as amended (19 U.S.C. 1304).

In response to a formal request, Customs published a ruling dated September 4, 1985, in the CUSTOMS BULLETIN of September 25, 1985 (C.S.D. 85–47, 19 Cust. Bull. No. 39 at 21), stating that retail packages of orange juice containing imported concentrate must be marked. The rationale for that decision is discussed in detail in the cited decision. That ruling was to be implemented for affected products entered for consumption or withdrawn from warehouse on or after January 1, 1986.

That implementation date was extended to March 1, 1986, by a notice published in the December 11, 1985, CUSTOMS BULLETIN (19 Cust. Bull. No. 50). The extension decision took into account the ruling's perceived economic impact on the manufacturing public, as well as the right of ultimate purchasers of affected juice products to be fully informed about the origin of those products. The March 1, 1986, date was nearly 6 months after the initial ruling had been issued, and was considered reasonable.

In a recent case brought by the National Juice Products Association, *et al.* challenging C.S.D. 85–47, *National Juice Products Association* v. *United States*, —— CIT ——, Slip Op. 86–13 (January 30, 1986), the Court of International Trade held that C.S.D. 85–47 was substantively valid. The Court, however, remanded the case to Customs for reconsideration of the effective date. The Court directed Customs to adhere to the notice and comment provisions of § 177.10(c)(2), Customs Regulations (19 CFR 177.10(c)(2)), and to carefully consider all possible issues relating to a reasonable time to implement the new ruling.

Accordingly, Customs is soliciting comments related to the implementation date. Of particular interest is any information concerning the time it generally takes suppliers to provide new or changed labels and cans to the packagers of orange juice products, as well as the quantity of labels and printed retail containers usually kept in inventory. We also seek information as to whether the industry has already taken steps to procure new labels which satisfy the requirements of C.S.D. 85–47.

PUBLIC HEARING

A public hearing will be held on this matter on March 28, 1986, commencing at 9:30 a.m. in Room 3428, Customs Service Headquarters.

COMMENTS

Before making a determination on this matter, Customs will consider any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), between 9 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, Room 2426, U.S.

Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this document was Larry L. Burton, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

WILLIAM VON RAAB,
Commissioner of Customs.

U.S. Court of Appeals for the Federal Circuit

(Appeal No. 86-560)

AMERICAN LAMB CO., ET AL., APPELLEES *v.* UNITED STATES, APPELLANT, AND NEW ZEALAND MEAT PRODUCTS BOARD, ET AL., INTERVENORS

Catherine R. Field, Office of the General Counsel, U.S. International Trade Commission, of Washington, D.C., argued for appellant. With her on the brief were *William E. Perry*, *Lyn M. Schlitt*, General Counsel and *Michael P. Mabile*, Assistant General Counsel.

Edward J. Farrell, Bronz & Farrell, of Washington, D.C., argued for intervenors, New Zealand Meat Products Board, et al.

Robert T. Wray, Robert Wray Associates, of Washington, D.C., argued for appellee.

N. David Palmeter, *David P. Houlihan* and *Alan H. Price*, Mudge Rose Guthrie Alexander & Ferdon, of Washington, D.C., were on the brief for Amicus Curiae Crystal International Corp., et al. *Victor T. Fuzak* and *Craig M. Indyke*, Hodgson, Russ, Andrews, Woods & Goodyear, of Buffalo, New York, of counsel.

Thomas B. Wilner, *Sukhan Kim and Kimberly Till*, Arnold & Porter, of Washington, D.C., were on the brief for Amicus Curiae Hankook Tire Mfg. Co., et al.

Italo H. Ablondi, *F. David Foster*, *Sturgis M. Sobin* and *Pamela A. McCarthy*, Ablondi & Foster, P.C., of Washington, D.C., were on the brief for Amicus Curiae Taiwan Electrical Appliance Manufacturers Association.

Ronald N. Isroff and *Morton L. Stone*, Ulmer, Berne, Laronge, Glickman & Curtis, of Cleveland, Ohio, were on the brief for Amicus Curiae Glaverbel S.A.

Appealed from: U.S. Court of International Trade.

Judge DICARLO.

(Appeal No. 86-560)

AMERICAN LAMB CO., ET AL., APPELLEES *v.* UNITED STATES, APPELLANT, AND NEW ZEALAND MEAT PRODUCTS BOARD, ET AL., INTERVENORS

(Decided February 28, 1986)

Before MARKEY, *Chief Judge*, BALDWIN, and NIES, *Circuit Judges*.

MARKEY, *Chief Judge*.

Interlocutory appeal from an order of the United States Court of International Trade, 611 F. Supp. 979 (Ct. Int'l Trade 1985), ordering the U.S. International Trade Commission (ITC) to reconsider a

preliminary determination issued in an antidumping duty investigation under section 733(a) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1673b(a) (1982). The court certified its order for immediate appeal. We remand with instructions to vacate the order.

BACKGROUND

On April 18, 1984, three domestic lamb producers, American Lamb Co., Denver Lamb Co., and Iowa Lamb Corp. (Denver Lamb), filed petitions with the ITC and the International Trade Administration of the U.S. Department of Commerce (ITA), alleging that imports of lamb meat from New Zealand are being subsidized and then sold in the United States at less than fair value (LTFV). Accordingly, ITC instituted preliminary countervailing and antidumping investigations under sections 703(a) and 733(a), respectively, of the Tariff Act of 1930, as amended, 19 U.S.C. §§ 1671b(a) and 1673b(a), to determine whether there is a reasonable indication that an industry in the United States is being materially injured, or is being threatened with material injury, or whether there is a reasonable indication that the establishment of an industry in the United States is being materially retarded, by reason of imports of such merchandise.

Notice of the initiation of ITC's investigation, and of a public conference to be held in connection with the investigation, was posted in the Office of ITC's Secretary and was published in the Federal Register on April 25, 1984. 49 Fed. Reg. 17,828 (1984). The conference was held on May 10, and all persons so requesting were permitted to appear in person or by counsel.

Denver Lamb presented the evidence disclosed in its petitions (declining production of live lambs, decreased prices, and increasing lamb and sheep slaughter). During its preliminary investigation, ITC also received information from the United States Department of Agriculture, packers and producers of lamb meat, academic and trade association researchers, and from intervenors New Zealand Meat Producers Board, Meat Export Development Company, and New Zealand Lamb Company.

Having weighed all the evidence, ITC determined on May 25, 1984 (by a 4-2 vote) that there is no reasonable indication that the domestic lamb industry is being materially injured, or being threatened with material injury, or that the establishment of an industry in the United States is being materially retarded, by reason of the importation of lamb meat from New Zealand. *Lamb Meat from New Zealand*, Investigations Nos. 701-TA-214 (Preliminary), and 731-TA-188 (Preliminary), U.S.I.T.C. Pub. No. 1534 (1984). Those determinations were published in the Federal Register. 49 Fed. Reg. 24,458 (June 13, 1984).

Denver Lamb sought review in the Court of International Trade of those negative preliminary determinations pursuant to 19 U.S.C. § 1516a(a)(1)(A)(iii), arguing that the action should be remanded be-

cause the ITC weighed conflicting evidence in making its determinations and because the weighing of conflicting evidence was contrary to the decisions of the court in *Republic Steel Corp.* v. *United States*, 591 F. Supp. 640 (1984), *reh'g denied*, 16 Cust. B. & Dec., No. 14, at 55 (Ct. Int'l Trade 1985), and *Jeannette Sheet Glass Corp.* v. *United States*, 607 F. Supp. 123 (Ct. Int'l Trade 1985).

ITC conceded that if those decisions are followed, the action should be remanded, but argued that the cases should not be followed because 19 U.S.C. § 1673b(a) authorizes ITC to weigh conflicting evidence in a preliminary investigation.

The court dismissed as moot the challenge to ITC's negative preliminary determination resulting from the countervailing duty investigation, No. 701-TA-214 (Preliminary), because, effective April 1, 1985, the Office of the U.S. Trade Representative terminated New Zealand "as a country" under Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (GATT Subsidies Code). 50 Fed. Reg. 13,111 (April 2, 1985). Thus, New Zealand was no longer entitled to an injury test in countervailing duty investigations.[1] 611 F. Supp. at 980 n.1; *see* 19 U.S.C. § 1671, as amended by Trade and Tariff Act of 1984, Pub. L. No. 98-573, § 602(a), 98 Stat. 3024.[2]

Concerning the challenge to the antidumping duty determination, the court wrote:

> Defendant's arguments have been rejected three times within the year by two judges of this Court with broad experience in this complex area of the law. Under these circumstances, *stare decisis* counsels the Court to follow the prior decisions. Defendant should address its arguments to our appellate court.

611 F. Supp. at 981. The court remanded the action, in light of *Republic Steel* and *Jeannette Sheet Glass*, instructing ITC to reconsider the antidumping determination.

On July 19, 1985, the court certified its order allowing ITC to appeal to this court pursuant to 28 U.S.C. § 1292(d)(1). The trial court granted ITC's motion to stay proceedings until this court denied, or rendered a decision in, the appeal.

On October 15, 1985, this court granted ITC's petition to accept the interlocutory appeal. Briefs were filed by the parties, intervenors, and *amici*,[3] and oral argument was presented.

---

[1] Denver Lamb filed a new countervailing duty petition with the ITA on March 26, 1985. *Lamb Meat from New Zealand: Initiation of Countervailing Duty Investigation*, 50 Fed. Reg. 15,949 (April 23, 1985). That matter is not before us.

[2] Because the preliminary determination at issue here is that under the antidumping laws and not that under the countervailing duty laws, this opinion deals with 19 U.S.C. § 1673b(a) and not with § 1671b(a). Because, however, the question before us deals with preliminary determinations of material injury or threat thereof, and because both sets of laws require those determinations and employ the phrase "reasonable indication", what is said here may be seen as applicable to preliminary determinations of injury under both sets of laws.

[3] Crystal International Corporation and Flachglas, A.G.; Taiwan Electrical Appliance Manufacturers Association; Glaverbel S.A.; Jeannette Sheet Glass Corp.; and Hankook Tire Manufacturing Co., Ltd., Hankook Tire American Corp., Kumho and Co., Inc., Kumho U.S.A., Inc., Hyosung Corp., and Hyosung America, Inc.

ISSUE

Whether ITC's weighing of all evidence in applying the "reasonable indication" standard of 19 U.S.C. § 1673b(a) in a preliminary investigation is permissible.

OPINION

I. Introduction[4]

The important question before this court involves a statute so fundamental to the application of the United States antidumping laws that an introductory listing of implementing procedures appears appropriate. *See generally* Horlick, *Summary of Procedures Under the United States Antidumping and Countervailing Duty Laws*, 58 St. John's L. Rev. 828 (1984).

Normally, as in this case, proceedings are initiated when petitions are filed by interested parties on the same day with the ITC and ITA, § 1673a(b)(2), though ITA may self-initiate an investigation, 19 U.S.C. § 1673a(a); *see* 19 C.F.R. § 353.35 (1985).

A normal antidumping duty proceeding involves five stages:

(1) The ITA decides within twenty days of receiving a petition whether to initiate an investigation. 19 U.S.C. § 1673a(c); *see* 19 C.F.R. § 353.37(a) (1985). An investigation will be initiated if the petition alleges the necessary elements for imposition of a duty and is accompanied by information "reasonably available to the petitioner supporting the allegations." 19 U.S.C. § 1673a(c). ITA's self-initiated investigations are based on "information available to it." 19 U.S.C. § 1673a(a); *see United States* v. *Roses, Inc.*, 706 F.2d 1563, 1566 (Fed. Cir. 1983). If ITA finds a petition insufficient an investigation is not initiated, 19 U.S.C. § 1673a(c)(3), and any investigation initiated by ITC is terminated. 19 U.S.C. § 1673b(a).

(2) If ITA has not found the petition insufficient, ITC must preliminarily determine within 45 days of the filing of the petition "whether there is a reasonable indication" that a domestic industry is being materially injured or threatened with material injury. 19 U.S.C. § 1673b(a). ITC bases its preliminary determination on questionnaires sent to importers and domestic interests, public conferences, post conference briefs, and exhibits. If that determination be in the negative, ITC terminates the investigation. *Id.; see* 19 C.F.R. § 207.18.

(3) If ITC finds a reasonable indication of injury, ITA must preliminarily determine, within 160 days of the petition filing date (subject to extension of up to 210 days, 19 U.S.C. § 1673b(c)(1)), whether there is a "reasonable basis to believe or suspect" that the

---

[4] Several appeals docketed in this court have been stayed pending the outcome of this appeal. *Jeannette Sheet Glass, supra*, Nos. 85-2455/2554/2555/2589, 86-519/609/700 (Fed. Cir. June 7—Nov. 29, 1985); *American Grape Growers Alliance For Fair Trade* v. *United States*, 615 F. Supp. 603 (Ct. Int'l Trade), No. 85-2717 (Fed. Cir. Aug. 18, 1985); *Armstrong Rubber Co.* v. *United States*, 614 F. Supp. 1252 (Ct. Int'l Trade), No. 85-2707 (Fed. Cir. Aug. 26, 1985). In addition, several cases pending in the Court of International Trade will be directly affected by resolution of the question on appeal.

merchandise is being sold, or is likely to be sold, at LTFV. 19 U.S.C. § 1673b(b)(1); *see* 19 C.F.R. § 353.39. An affirmative preliminary LTFV determination results in suspension of liquidation of duties and in posting of bonds for the merchandise. 19 U.S.C. § 1673b(d)(1)–(2). A negative preliminary determination prevents imposition of those provisional remedies but does not terminate the investigation.

(4) Within 75 days of its preliminary determination (subject to extension of up to 135 days, 19 U.S.C. § 1673d(a)(2)), ITA makes a final determination respecting the sale of merchandise at LTFV. 19 U.S.C. § 1673d(a)(1). If that final determination is in the negative, the investigation is terminated. 19 U.S.C. § 1673d(c)(2).

(5) If ITA's final LTFV determination is in the affirmative, ITC makes its final determination of material injury. 19 U.S.C. § 1673d(b)(1).[5] That determination is based on technical and economic testimony given at a trial-like hearing. If ITC finally determines that no injury exists, the investigation is terminated. If ITC determines that injury exists, ITA issues an antidumping duty order. 19 U.S.C. § 1673d(c)(2).

Judicial review in the Court of International Trade is available of any negative preliminary determination (stages 1–3), 19 U.S.C. § 1516a(a)(1), and of any final determination (stages 4 and 5). 19 U.S.C. § 1516a(a)(2).

II. Court of International Trade Decisions

In making preliminary determinations of injury, and in applying the "reasonable indication" standard, ITC has been weighing conflicting evidence. It has, since its very first investigation under the 1974 Act, been determining that there is no "reasonable indication" of material injury or threat when: (1) There is clear and convincing evidence of the absence of such reasonable indication; and (2) the record shows it extremely unlikely that evidence of a "reasonable indication" would be developed in a final investigation. *Butadiene Acrylonitrile Rubber from Japan*, Inq. No. AA1921-Inq.-1, U.S.I.T.C. Pub. No. 727, at 5 (1975). It applied the same criteria in subsequent proceedings. *See, e.g., Low-Fuming Brazing Copper Wire and Rod from France, New Zealand and South Africa*, Inv. Nos. 701-TA-237 and 731-TA-247 (Preliminary), U.S.I.T.C. Pub. No. 1673 (1985); *Uncoated Free Sheet Offset Paper from Canada*, Inq. No. AA1921-Inq.-10, U.S.I.T.C. Pub. No. 869 (1978). It was that administrative procedure that was rejected by the court in *Republic Steel* and *Jeannette Sheet Glass*.

In *Republic Steel*, the court remanded to the ITC two determinations in countervailing duty investigations because ITC weighed

[5] If ITA's preliminary determination is in the affirmative, ITC's final determination must be made within 120 days of that ITA determination or within 45 days of ITA's final determination, whichever is later. 19 U.S.C. § 1673d(b)(2). If ITA's preliminary determination is negative, ITC's final determination must be made within 75 days of any affirmative final determination of ITA. 19 U.S.C. § 1673d(b)(3).

conflicting evidence in making a negative preliminary determination. The court wrote:

> The low threshold of the ITC's determination of whether there is a reasonable indication of injury is the unavoidable and logical consequence of the completely different nature of the two stages of the ITC's involvement in these proceedings. *The object of these determinations should have been simply to find whether there were any facts which raised the possibility of injury. The resolution or interpretation of conflicting facts should have been reserved for a possible final injury determination.*
>
> The fundamental point which the Court emphasizes is that the standard claimed by the ITC for its preliminary determination of reasonable indication of injury, is actually the proper standard for a final determination. If applied at this early stage it would create a serious imbalance in the operation of the law.

591 F. Supp. at 650 (emphasis in original).

The court in *Republic Steel* denied ITC's motion for reconsideration and reaffirmed its rule that "the weighing of conflicting evidence by the ITC cannot be done at the threshold without entirely distorting the operation of the law and impeding the legislative intention that investigations be commenced on the basis of possibilities." 16 Cust. B. & Dec., No. 14, at 56. The court continued:

> Even if the ITC is held to a standard which required them to have "clear and convincing" evidence that there is no possibility of injury, the operation of the law is being distorted.
>
> The right to a full investigation was not intended to depend on anything more than a reasonable showing by a petitioner from matters fairly within its capacity to know. It was not intended to depend on a pre-investigation of conflicting evidence.

Id. The court then gave its own set of guidelines as to when ITC could terminate the investigation at the preliminary stage:

> If the petition does not contain the evidence of injury which could reasonably be expected to be within petitioner's knowledge, or is false, or is in conflict on essential points with matters of public record, or does not state injury as a matter of law even if its contents are taken as true, then the ITC may properly conclude that there is no reasonable indication of injury and no need for further investigation.

Id.

Because a negative preliminary determination is overturned by the Court of International Trade only if found to have been "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law," 19 U.S.C. § 1516a(b)(1)(A), the court felt that if ITC weighed the evidence, its decision could never be reversed. 19 Cust. B. & Dec., No. 14, at 56. The court found it difficult to conceive that

Congress wanted ITC to have "an absolute veto power on the commencement of countervailing and antidumping investigations." *Id.*

In *Republic Steel,* ITC had considered whether injury was reasonably indicated by importations from individual countries. The court held that ITC must in a preliminary investigation consider the cumulative or combined effect of all competitive, subsidized, or allegedly subsidized importations of a particular product from all involved countries. The court held that its requirement for cumulation did not conflict with the requirement that importations from a particular country be the cause of injury, because that question could be determined in the final determination. 591 F. Supp. at 645. The court said those "potentially contradictory demands are reconciled by operating at different stages of the investigation." *Id.* at 646. The court thus distinguished ITC's preliminary and final determinations on the basis of the court's own requirement that importations be cumulated in the former and particularized in the latter, leading it to create the "possibility" standard.

The court gave these reasons for its focus on a "possibility" of injury:

> (1) The statute calls for a "reasonable indication" thus suggesting "only the barest clues or signs [are] needed to justify further inquiry." 591 F. Supp. at 646.
>
> (2) In discussing the reasonable indication standard, "the House Committee on Ways and Means stated that a reasonable indication will exist in 'each case in which the facts reasonably indicate that an industry in the United States could *possibly* be suffering material injury * * *.'" *Id.* (quoting House Rep. No. 317, 96th Cong., 1st Sess. 52 (1979)).
>
> (3) The Senate Committee on Finance noted that the ITC preliminary determination, together with the sufficiency determination of ITA, implemented the United States' obligations under GATT Subsidies Code. That legislative history "indicates that the ITC decision is primarily *part of the decision as to whether an investigation should be initiated,*" and thus "should display the same spirit of receptiveness to the initiation of investigations as the ITA sufficiency determination." 591 F. Supp. at 647 (emphasis in original).
>
> (4) The "limited purpose" of the preliminary injury determination is to "weed out those cases which were clearly without merit and which could not possibly deserve further investigation." *Id.*
>
> (5) ITC's preliminary determination is in the "midst of the receptive standard of the *preceding* determination and the relaxed standard of the *following* determination." *Id.* at 648 (emphasis in original). Therefore, "it is reasonable to view the first ITC determination as designed only to eliminate those matters in which there is nothing whatsoever deserving investigation." *Id.*

In *Jeannette Sheet Glass*, the court applied the *Republic Steel* rationale in antidumping investigations and remanded the action to ITC. The court wrote:

> Here, the Commission's preliminary injury determinations did not address the question of whether there is sufficient information in the record to raise the *possibility* of injury, but rather sought to definitively resolve the issues by weighing the conflicting evidence. Put another way, the Commission's "preliminary" determination, in effect, constituted a final determination predicated solely upon data submitted in the forty-five day period permitted at the preliminary stage.

607 F. Supp. at 129 (emphasis added). On at least two other occasions, the court adopted the analysis outlined in *Republic Steel* and remanded cases to ITC. *Armstrong Rubber Co.* v. *United States*, 614 F. Supp. 1252 (Ct. Int'l Trade 1985); *American Grape Growers Alliance* v. *United States*, 615 F. Supp. 603 (Ct. Int'l Trade 1985).

The court's concern is directed to ITC's consideration of any evidence that would negate the allegations or information in a petition. The court's interpretation would thus require an affirmative preliminary determination, and (assuming an ITA preliminary LTFV determination) a subsequent full investigation, whenever information accompanying a petition raises the mere "possibility" of material injury, regardless of any contrary evidence. The difficulty is two-fold: (1) The statutory standard, as the court recognized, is "reasonable indication", not "possibility"; and (2) the court's order that ITC must not weigh the evidence in conducting a preliminary injury investigation is not in accord with the intent of Congress.

III. Standard of Review

A reviewing court must accord substantial weight to an agency's interpretation of a statute it administers. *Zenith Radio Corp.* v. *United States*, 437 U.S. 443, 450–51 (1978); *Udall* v. *Tallman*, 380 U.S. 1, 85 (1964). Though a court may reject an agency interpretation that contravenes clearly discernible legislative intent, its role when that intent is not contravened is to determine whether the agency's interpretation is "sufficiently reasonable". *Federal Election Committee* v. *Democratic Senatorial Campaign Committee*, 454 U.S. 27, 39 (1981); *see Melamine Chemicals, Inc.* v. *United States*, 732 F.2d 924, 928 (Fed. Cir. 1984). The agency's interpretation need not be the only reasonable construction or the one the court would adopt had the question initially arisen in a judicial proceeding. *Chevron, U.S.A. Inc.*, v. *National Resources Defense Council*, 467 U.S. 837, 843 n.11, 104 S. Ct. 2778, 2782 n.11 (1984); *see Consumer Products Division, SCM Corp.* v. *Silver Reed America, Inc.*, 753 F.2d 1033, 1039 (Fed. Cir. 1985).

Applying those guidelines, we reject the court's imposition of the mere possibility standard. One writing on a clean slate might find the court's reasoning fully acceptable, but a "court does not simply

impose its own construction on the statute, as would be necessary in the absence of an administrative interpretation." *Chevron, U.S.A., supra,* 467 U.S. at 843, 104 S. Ct. at 2782.

Since the enactment of the 1974 Act, ITC has consistently viewed the statutory "reasonable indication" standard as one requiring that it issue a negative determination, as above indicated, only when (1) the record as a whole contains clear and convincing evidence that there is no material injury or threat of such injury; and (2) no likelihood exists that contrary evidence will arise in a final investigation. That view, involving a process of weighing the evidence but under guidelines requiring clear and convincing evidence of "*no* reasonable indication", and no likelihood of later contrary evidence, provides fully adequate protection against unwarranted terminations. Indeed, those guidelines weight the scales in favor of affirmative and against negative determinations. Under the appropriate standard of judicial review, ITC's longstanding practice must be viewed as permissible within the statutory framework.

IV. "Reasonable Indication" v. "Mere Possibility"

We are unable to join the court in its view that the statutory phrase "reasonable indication" means the same as a mere "possibility", or that it suggests "only the barest clues or signs needed to justify further inquiry." The statute calls for a reasonable indication of injury, not a reasonable indication of need for further inquiry. Moreover, ITC's use of "extremely unlikely" in considering need for further inquiry would appear to meet the court's concern for premature dismissal of that need.

The single sentence quoted by the court from the House Report cannot serve to substitute "possibility" for "reasonable indication" in the statute. Though the word "possibly" appears in that sentence, it follows the words "facts reasonably indicate", implying the need to determine facts and the exercise of reason.

Nor do we find in the statute a requirement for grouping ITC's preliminary determination with ITA's sufficiency determination. The statute establishes the five stages above described, each independent of the others and each with its distinct focus and purpose. Moreover, such grouping would not convert "reasonable indication" to "possibility" or require ITC to look only at the petition and its accompanying information. This court has determined that, when ITA determines the sufficiency of the petition, "Congress intended the *application of agency expertise,* not only to examine the petition and supporting data for internal inconsistencies, but also to evaluate it in light of a wide body of other information, to the end that, so far as possible, the commencement of unwarranted investigations should be avoided." *United States* v. *Roses Inc., supra,* 706 F.2d at 1569 (emphasis supplied).

ITC would not be able to fulfill what the court described as the "limited purpose" of weeding out "those cases which were clearly

without merit" if it must proceed to a final determination whenever it finds a mere "possibility" of injury in the petition and accompanying information. Virtually every petitioner can be expected to submit allegations and information sufficient to show *some* "possibility" of injury.

V. Congressional Intent

ITC's weighing of evidence in complying with § 1673b(a) is in full accord with the intent of Congress.

We begin with the best source of congressional intent, the statute:

> Except in the case of a petition dismissed by the administering authority under section 1673a(c)(3) of this title, the Commission, within 45 days after the date on which a petition is filed under section 1673a(b) of this title or on which it receives notice from the administering authority of an investigation commenced under section 1673a(a) of this title, shall make a determination, *based upon the best information available to it at the time of the determination, of whether there is a reasonable indication* that—
>
> (1) an industry in the United States—
>
> (A) is materially injured, or
>
> (B) is threatened with material injury, or
>
> (2) the establishment of an industry in the United States is materially retarded,
>
> by reason of imports of the merchandise which is the subject of the investigation by the administering authority. If that determination is negative, the investigation shall be terminated.

19 U.S.C. § 1673b(a) (emphasis supplied).

The legislative history supports the statutory statement that ITC should use "the best information available" in applying the "reasonable indication" standard. Congress introduced that standard when it added § 201(c)(2) to the Antidumping Act of 1921, Ch. 14, § 201, 42 Stat. 9, 11 (1921), in the Trade Act of 1974, Pub. L. No. 93-618, § 321(a)(2), 88 Stat. 1978, 2043-44 (1974) (1974 Act). When Congress repealed the Antidumping Act of 1921 in the Trade Agreements Act of 1979, Pub. L. No. 96-39, § 106(a), 93 Stat. 144, 193 (1979) (1979 Act), it adopted the "reasonable indication" standard for countervailing and antidumping preliminary determinations. 19 U.S.C. §§ 1671b(a), 1673b(a). Congress intended that the Commission apply the standard "in essentially the same manner" as it applied the standard under the 1974 Act. S. Rep. No. 249, 96th Cong., 1st Sess. 66, *reprinted in* 1979 U.S. Code Cong. & Ad. News 449, 452.

The purpose of a preliminary injury determination is to "eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade." S. Rep. No. 1298, 93rd Cong., 2d Sess. 171, *reprinted in* 1974 U.S. Code Cong. & Ad. News, 7186, 7308. When the procedure was adopted in the 1979 Act, the

law became "more clearly consistent with the international agreement which permits the imposition of provisional measures, that is, suspension of liquidation and the posting of a cash deposit, bond or other security on each entry subject to the suspension, only after an affirmative preliminary determination has been made that there are sales at less than fair value and that sufficient evidence of material injury has been presented." H.R. Rep. No. 317, 96th Cong., 1st Sess. 60–61 (1979).

In *Budd Co. Railway Division* v. *United States*, 507 F. Supp. 997, 1000 (Ct. Int'l Trade 1980), the court correctly noted that in requiring that ITC's preliminary determination be based on the "best information available to it," *see* 19 U.S.C. §1677e(b); 19 C.F.R. §207.17, "Congress has prescribed a thorough investigation by the Commission prior to the making of its preliminary determination." The same view is expressed in the House Report:

> The time limit provided in the bill for an ITC preliminary determination, although longer than that under present law, is still quite brief. It is therefore intended that the ITC will investigate the allegations in the petition *in as thorough a manner as possible using the information available within that time period, and will provide interested parties a reasonable opportunity to present their views.* Such opportunity does not ncessarily include a hearing such as that required prior to a final determination.

H.R. Rep. No. 317, *supra*, at 61 (emphasis supplied); *see also* S. Rep. No. 249, *supra*, at 66, *reprinted in* 1979 U.S. Code & Cong. & Ad. News, at 452.

In *Budd Co.*, the court noted that the Congressional mandate to conduct a thorough investigation based upon the best information available

> does not limit "the best information available" to that furnished by the petitioner or by any party-in-interest to the proceedings. The term "available" as used in the statute must be construed in accordance with its common meaning. In so doing, it is clear that all information that is "accessible or may be obtained," from whatever its source may be, must be reasonably sought by the Commission. It is only in this manner that the Commission can comply with the intended congressional mandate to conduct a "thorough investigation."

507 F. Supp. at 1003–04 (footnote omitted). The court in *Budd Co.* also indicated that the "affirmative obligation and duty of the Commission to conduct a 'thorough investigation' is not relieved" by a petition accompanied by information reasonably available to the petitioner supporting the allegations in the petition. *Id.* at 1001. Clearly, ITC cannot conduct a "thorough investigation" if it is permitted to review only such evidence as might support a petition.

Although a hearing is not required in a preliminary determination proceeding, ITC often includes, as it did here, a public confer-

ence "at which interested parties may present their views without the opportunity for cross-examination." *Budd Co. Railway Division, supra,* 507 F. Supp. at 1001; *see* Horlick, *supra,* 58 St. John's L. Rev. at 829–30. If ITC were precluded from all weighing of evidence, i.e., if it were required to disregard all evidence tending to disprove the allegations in a petition, there would be neither reason nor incentive for parties other than petitioners to present their views.

A series of factors—Congress' requirement that ITC conduct a thorough investigation, using the best information available to it, Congress' expectation of opportunity for interested parties to present their views, and Congress' provision of the "reasonable indication" standard for use in investigations initiated in response to a petition and in ITC's self-initiated investigations—all militate against a view that Congress intended ITC to disregard evidence that clearly and convincingly refutes the allegations in a petition. Stated another way, the notion that allegations in a petition found unsupportable because of overwhelming contradictory evidence should nonetheless result in a full investigation and potential imposition of provisional remedies is directly contrary to Congress' intent, as above indicated, of eliminating "unnecessary and costly investigations" and the "impediment to trade" that would reside in an unwarranted imposition of provisional remedies. Considering and weighing, under ITC's guidelines, all evidence gathered within the 45 days available for conducting a preliminary investigation, on the other hand, effectuates that legislative intent.

VI. Judicial Reviewability

Lastly, it should be remembered that ITC's negative preliminary determinations are reviewable in the Court of International Trade. 19 U.S.C. § 1516a(a)(1)(A)(iii). Whether the court might find it more difficult to overturn a negative preliminary determination when ITC had weighed conflicting evidence cannot be a factor in evaluating the premissibility of ITC's method of determining the presence or absence of a "reasonable indication" of injury or threat of injury. If ITC's negative determination, however reached, was "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law", 19 U.S.C. § 1516a(b)(1)(A), the court should overturn it. If ITC's negative determination cannot be held defective on any of those grounds, the court should not overturn it.

Indeed, that Congress intended application of a narrow judicial review standard is made clear in its assertion that "traditional administrative law principles" be applied when reviewing preliminary determinations in which it "has entrusted the decision-making authority in a specialized, complex economic situation to [ITA and ITC]. Thus, review * * * would be to ascertain whether there was a rational basis in fact for the determination * * * ."

S. Rep. No. 249, *supra*, at 252, *reprinted in* 1979 U.S. Code Cong. & Ad. News at 638.

Conclusion

ITC's method of proceeding in applying the statutory reasonable indication standard does not contravene but accords with clearly discernible legislative intent and is sufficiently reasonable. To the extent that *Republic Steel* and its progeny suggest otherwise, those decisions cannot stand. Accordingly the case is remanded to the Court of International Trade with instructions to vacate the certified order.

Opinion and Order

Maletz, *Senior Judge:* In 1982, the International Trade Administration (ITA) of the Department of Commerce issued a final determination revoking a dumping finding on tapered roller bearings and component parts (TRBs) made in Japan by NTN Toyo Bearing Company (NTN) and distributed by NTN's subsidiary, NTN Bearing Corporation of America (NBCA). Plaintiff, The Timken Company (Timken), an American manufacturer of TRBs, commenced the present action challenging the ITA determination. Upon the government's motion, unopposed by Timken, the court, over intervenor NBCA's opposition, remanded several issues for further consideration by the ITA. The ITA's recalculation upon remand revealed only *de minimis* dumping margins. Presently before the court are two motions by Timken pursuant to rule 56.1 of this court seeking reversal of the agency revocation decision and remand for further proceedings. The government for its part agrees that partial remand is appropriate; NBCA, on the other hand, seeks affirmance of the ITA revocation determination. For the reasons set forth below, the court again remands this action to the ITA for (1) collection and review of data up to the date of its tentative determination; (2) collection and review of additional home market sales data for the period of time already reviewed by the ITA, and for reassessment of proper TRB model comparisons; (3) review of the accuracy of all pertinent NTN production costs; (4) correction of all errors that may have occurred below; and (5) recalculation of dumping margins and rescission of the partial revocation of the dumping finding, if warranted.

I. *Background*

The dumping finding in question had been published by the United States Treasury Department on August 18, 1976. 41 Fed. Reg. 34,974. On November 14, 1979, Treasury published a notice of a tentative determination to modify or revoke the finding. 44 Fed. Reg. 65,690. That tentative determination was largely based upon

information supplied to the Customs Service to the effect that there had been no sales at less than fair value between April 1, 1974 and March 31, 1978 of TRBs manufactured by NTN and sold by NBCA. *See id.* However, before Treasury had an opportunity to make a final determination regarding modification or revocation of the dumping finding, administration of the antidumping law was transferred from the Secretary of the Treasury to the Secretary of Commerce. Reorg. Plan No. 3 of 1979, § 5(a)(1)(C), 44 Fed. Reg. 69,273, *reprinted in* 19 U.S.C. at 963-64 (1982), *and in* 93 Stat. 1381, effective January 2, 1980, as provided by § 1-107(a) of Exec. Order No. 12,188, 45 Fed. Reg. 989, 993 (1980), *reprinted in* 19 U.S.C. at 968 (1982). Additionally, the Trade Agreements Act of 1979, which became effective on January 1, 1980, repealed the Antidumping Act of 1921 and replaced it with a new antidumping law. Trade Agreements Act of 1979, Pub. L. No. 96-39, tit. 1, § 106(a), 93 Stat. 144, 193.

Following transfer of administration of Commerce, the ITA conducted reviews of outstanding dumping findings pursuant to the annual review requirement of the Trade Agreements Act of 1979. *See* 19 U.S.C. § 1675 (1982), *amended by* 19 U.S.C.A. § 1675 (West Supp. 1985). During review of the Treasury dumping finding on TRBs from Japan, the ITA reviewed production and sale of TRBs by NTN and NBCA for the period April 1, 1978 through November 14, 1979. On February 27, 1981, the ITA published a notice of preliminary results of administrative review and tentative determination to revoke in part the dumping finding, 46 Fed. Reg. 14,371, and on June 15, 1982, it published a final determination revoking the outstanding dumping finding insofar as it pertained to TRBs produced and sold by NTN and NBCA, 47 Fed. Reg. 25,757. Timken challenged this final determination by commencing the present action on June 25, 1982.

In the course of this action, the government itself moved to remand the case to the ITA for recalculation of dumping margins. In support of this motion, which was agreed to by Timken and opposed by NBCA, the government advised the court that the ITA had taken the position that its method of calculating dumping margins had not been in accordance with its normal practice and was probably not in accordance with the applicable law and regulations. The court granted the motion for remand. *Timken Co.* v. *United States*, 7 CIT —, Slip Op. 84-63 (June 5, 1984). Thereafter, the government and Timken stipulated as to an order of remand, which was entered on June 26, 1984. Among other things, that order directed the ITA to recalculate dumping margins (1) using actual selling prices to the United States, (2) deducting an amount for United States import duties based on actual United States price, (3) weight-averaging home market prices on a monthly basis, and (4) using currency conversion factors applicable specifically to the date of exportation of the imported merchandise.

On February 5, 1985, the ITA submitted to the court the final results of its recalculation, which included a finding that the weighted-average dumping margin was 0.33%. Since the ITA considered this recomputed dumping margin to be *de minimis*, it did not rescind its partial revocation of the dumping finding.

Now before the court are two motions by Timken for partial judgment on the agency record. Timken's first motion requests that the case be remanded so that the ITA may (1) obtain from NTN a complete listing of its home market sales of TRBs during the period under investigation; (2) itself select from among NTN's home market sales the most appropriate "similar" merchandise for comparison with TRBs exported to the United States; (3) investigate and verify NTN's production cost figures for the period prior to March 21, 1978; (4) investigate and verify NTN's claimed adjustments for differences in merchandise; and (5) reject any partial submissions by NTN in response to investigation of the areas just identified and instead use the best information otherwise available.

Timken's second motion for partial judgment on the agency record alleges that the ITA erred in (1) revoking the antidumping duty order on the basis of an analysis of only a 19-month rather that a two-year period; (2) failing to deduct from exporter's sales price (ESP) an amount for reasonable profits; (3) adjusting foreign market value for certain advertising expenses and inland freight costs; (4) failing to investigate issues raised in a market-research report submitted by Timken; (5) deducting indirect selling expenses from foreign market value ("ESP offset"); (6) making deductions for differences in circumstances of sale in alleged contravention of a statutory requirement that there be a casual relationship between claimed differences in circumstances of sale and differences in value; and (7) failing to deduct from ESP selling expenses properly allocable to United States sales. Given these allegations of error, Timken seeks, in its second motion, a remand for recalculation of dumping margins, and reversal of the ITA's revocation of the dumping finding.

Supplementing its two motions for partial judgment, Timken has failed a brief arguing that the action should be remanded to the ITA on the additional ground that further review is required in light of the recent decision of the Court of Appeals for the Federal Circuit in *Freeport Minerals Co.* v. *United States*, 776 F.2d 1029 (Fed. Cir. 1985).

The government disputes a number of the claims made by Timken, but agrees that the action should be remanded to the ITA a second time so that the agency may (1) determine NTN prices for all TRBs sold in the home market during the relevant time period; (2) consider whether the proper TRB models were compared; (3) review the accuracy of all pertinent NTN production costs; (4) decide whether adjustments of foreign market value for advertising expenses and inland freight costs were justified; and (5) recalculate

dumping margins and rescind the partial revocation of the dumping finding, if appropriate.

NBCA opposes Timken's and the ITA's request for remand, contending, among other things, that the methods used by the ITA were lawful and that the final revocation determination was based on substantial evidence.

II. *Res Judicata*

NBCA also contends that a remand for reconsideration of the ITA determination is barred by the doctrine of administrative res judicata. The court does not agree. As the court noted in its decision ordering the first remand in this action, the law is clear that a remand is appropriate where an agency followed an improper method in making a determination or where there is a defect in the agency's findings. *See Timken Co.* v. *United States,* 7 CIT 2 ——, Slip Op. 84-63 (June 5, 1984); *Ford Motor Co.* v. *NLRB,* 305 U.S. 364, 372-76 (1939). It is true that res judicata principles may apply to administrative proceedings. *See United States* v. *Utah Construction & Mining Co.,* 384 U.S. 394, 421-22 (1966). However, administrative agency orders do not have the force and effect of law unless they have been "unequivocally affirmed by a court of law." *MGPC, Inc.* v. *Department of Energy,* 763 F.2d 422, 429 (Temp. Emer. Ct. App.), *cert. denied,* —— U.S. ——, 106 S. Ct. 76 (1985); *see Taunton Municipal Lighting Plant* v. *Department of Energy,* 669 F.2d 710, 715 (Temp. Emer. Ct. App. 1982). Prior to such affirmation, "[a]n agency, like a court, can undo what is wrongfully done by virtue of its order," *United Gas Improvement Co.* v. *Callery Properties, Inc.,* 382 U.S. 223, 229 (1965) (Federal Power Commission could order payment of refunds of excess monies collected under FPC order that had not become final and that had been overturned by a reviewing court); *Iowa Power & Light Co.* v. *United States,* 712 F.2d 1292, 1296-97 (8th Cir. 1983), *cert. denied,* 466 U.S. 949 (1984). Therefore, the ITA may reconsider its determinations when error taints the proceedings. *Melamine Chemicals, Inc.* v. *United States,* 8 CIT ——, ——, 592 F. Supp. 1338, 1339-40 (1984).

III. *Agency Failure to Collect Necessary Data*

A. *The Impact of Freeport Minerals*

Timken requests that this action be remanded for further review in light of the recent decision in *Freeport Minerals Co.* v. *United States,* 776 F.2d 1029 (Fed. Cir. 1985). Both the government and NBCA oppose that request.[1]

[1] The issue of the applicability of the decision in *Freeport Minerals* to this action was not raised in Timken's complaint, which predated the decisions of this court and of the appellate court in that case. However, the parties have fully briefed the issue, and court finds that the issue has been considered with the implied consent of all parties. Consequently, amendment of the complaint is not required. U.S. Ct. Int'l Trade rule 15(c) (issues not raised by the pleadings that are tried by the express or implied consent of the parties shall be treated in all respects as if they had been raised in the pleadings); *cf. id.* rule 15(a) (leave to amend the pleadings shall be freely given when justice so requires).

In *Freeport Minerals*, the court found that the ITA had abused its discretion in refusing a domestic party's request for collection of data for a period of time extending up to the date of the agency's tentative determination to revoke an antidumping order. The facts of *Freeport Minerals* and of this action are similar in many respects. In both cases the ITA inherited an action from the Treasury Department after Treasury had issued a tentative determination revoking an antidumping order, and then conducted a further review pursuant to the annual review requirement of section 751 of the Tariff Act of 1930, *as amended by* the Trade Agreements Act of 1979, 19 U.S.C. § 1675 (1982), *amended by* 19 U.S.C.A. § 1675 (West Supp. 1985). Also in both cases, over a year had elapsed between the end of the period that was actually reviewed by the ITA and the date of the ITA's own tentative determination to revoke. Thus, in the present case, the ITA reviewed data only for a period extending to the time of *Treasury's* tentative determination, November 14, 1979. Despite this, the ITA's own tentative determination was not issued until February 27, 1981, approximately 16 months later, 46 Fed. Reg. 14,371; and its final determination was not issued until June 15, 1982, approximately two and one-half years after the end of the period that the ITA had reviewed, 47 Fed. Reg. 25,757. In contradistinction to the facts of *Freeport Minerals*, however, the domestic party in this action, Timken, did not request that the ITA obtain and review data updated to the time of the agency's tentative determination, although Timken now requests a remand for such review. Two questions are therefore before the court: (1) whether, under the reasoning of *Freeport Minerals*, the ITA abused its discretion in failing to review data updated to the time of its own tentative determination notwithstanding the absence of a request by a domestic party that it obtain such data, and (2) if so, whether the court should nonetheless decline to remand on the basis of *Freeport Minerals*, in view of Timken's failure to raise the issue below.

The Court of Appeals in *Freeport Minerals* held specifically that the ITA's refusal to comply with a domestic party's request for information updated to the time of the agency's preliminary determination placed an impermissible burden of proof upon the domestic party "contrary to the policies underlying the applicable statute and regulations," *id.* at 1033, and thus constituted an abuse of discretion. *Id.* at 1033–34. The ITA's failure here to obtain data updated to the time of its preliminary determination similarly constituted an abuse of discretion, despite the absence of a request for such data. That failure was equally contrary to the policies underlying the statutory and regulatory directives relied upon in *Freeport Minerals*.

The grant of discretionary authority to an agency "implies that the exercise of discretion be predicated upon a judgment anchored in the language and spirit of the relevant statutes and regula-

tions." *Id.* at 1032. As stated in *Freeport Minerals,* the legislative history indicates a congressional intent that the administering agency, in reviews conducted under the 1979 Trade Agreements Act, "*always* use the most up-to-date information available." *Id.* (emphasis added); H.R. Rep. No. 317, 96th Cong., 1st Sess. 77 (1979) (H.R. Rep. No. 317).

The burden of ensuring such up-to-date review should not rest upon a domestic party. Antidumping proceedings are investigatory, not adjudicatory. H.R. Rep. No. 317 at 77; *see Sacilor, Acieries et Laminoirs de Lorraine* v. *United States,* 3 CIT 191, 195, 542 F. Supp. 1020, 1025 (1982). The responsibility for making findings pursuant to section 1675 rests upon the ITA. *Freeport Minerals,* 776 F. 2d at 1032. Thus, a request by a domestic party is not a precondition of the ITA's obligation to obtain updated information.

The government notes, though, that section 1675 was amended in October 1984, and that reviews under that section are now mandated only if a *request* for review has been received by the ITA. 19 U.S.C. § 1675(a)(1) (1982), *as amended,* 19 U.S.C.A. § 1675(a)(1) (West Supp. 1985). The purpose of the amendment was to reduce the burden on the ITA "of automatically reviewing every outstanding order even though circumstances do not warrant it or parties to the case are satisfied with the existing order." H.R. Rep. No. 725, 98th Cong., 2d Sess. 22-23 (1984). However, that amendment was enacted several years after the ITA preliminary determination in this action. Whether the ITA abused its discretion is a determination that must be made not in light of the amendment, but in light of the law existing at the time of the alleged abuse. In sum, the court holds that the ITA abused its discretion in reaching a determination based on stale data.

1. Exhaustion—Freeport Minerals

Given the ITA's abuse of discretion in relying on stale data, the question remains as to whether the court should remand for further review in light of *Freeport Minerals* despite Timken's failure to exhaust its administrative remedies on this issue. "[A]s a general rule * * * courts should not topple over administrative decisions unless the administrative body not only has erred but has erred against objection made at the time appropriate under its practice." *United States* v. *L.A. Tucker Truck Lines, Inc.,* 344 U.S. 33, 37 (1952). However, unless exhaustion of administrative remedies is mandated by statute, application of the exhaustion doctrine is within the discretion of the court. *SEC* v. *G.C. George Securities, Inc.,* 637 F.2d 685, 688 n.4 (9th Cir. 1981); *Association of National Advertisers, Inc.* v. *FTC,* 627 F.2d 1151, 1157 (D.C. Cir. 1979) (jurisprudential considerations such as the exhaustion doctrine do not bear on whether court has jurisdiction but only on whether it

should exercise that jurisdiction), *cert. denied,* 447 U.S. 921 (1980).[2] Like most other judicial doctrines, the doctrine of exhaustion is subject to numerous exceptions. *McKart* v. *United States,* 395 U.S. 185, 193 (1969); *see Reid* v. *Engen,* 765 F.2d 1457, 1460–61 (9th Cir. 1985). The doctrine "should not be applied where the obvious result would be a plain miscarriage of justice." *Hormel* v. *Helvering,* 312 U.S. 552, 558 (1941).

Among the exceptional cases are "those in which there have been judicial interpretations of existing law after decision below and pending appeal—interpretations which if applied might have materially altered the result." *Id.* at 558–59 (footnote omitted); *see Philipp Brothers, Inc.* v. *United States,* 10 CIT ——, ——, Slip Op. 86–16, at 5–9 (Feb. 14, 1986); *Rhone Poulenc, S.A.* v. *United States,* 7 CIT ——, ——, 583 F. Supp. 607, 610 (1984). This is such a case. The interpretation of existing law set forth in *Freeport Minerals,* if applied in this action, could have a substantial impact upon the ITA's determination, since it would require review of data for an additional 16 months. Moreover, certain of the policies underlying the doctrine of exhaustion are not applicable to the present issue. For one thing, the question of what time period should have been reviewed by the ITA is one of law rather than one requiring analysis of a factual record; consequently, the court, in addressing the issue, does not usurp the factfinding function of the agency. *See Railroad Yardmasters of America* v. *Harris,* 721 F.2d 1332, 1337–39 (D.C. Cir. 1983) (appellate court would consider issue not raised before National Mediation Board or before district court where the substantive issue was one of law, did not require further factual development, and had been fully briefed). Furthermore, because the issue is one of law and because the decision in *Freeport Minerals* postdated the proceeding below, there is no danger that Timken intentionally refrained from raising this issue administratively in order to obtain some advantage by review on a sparse record. Timken has arguably been taken by surprise by the *Freeport Minerals* decision; remand is called for so that its interests may be protected by the review appropriate under the law. Accordingly, upon remand the ITA shall obtain and review data for a period terminating with the date of its preliminary determination.[3]

---

[2] The relevant statute provides only that the Court of International Trade shall "where appropriate" require exhaustion of administrative remedies, and so does not create a jurisdictional bar to review of issues not raised below. 28 U.S.C. § 2637(d) (1982); *see Rhone Poulenc, S.A.* v. *United States,* 7 CIT ——, ——, 583 F. Supp. 607, 611 (1984).

[3] Timken has contended that the ITA also erred in reviewing data from only April 1978 to November 1979, a period of less than two years. In this connection, an agency regulation provides that an application for revocation of an antidumping order will "[o]rdinarily * * * be considered only if there have been no sales at less than fair value *for at least a two-year period* following the date of publication * * * of an Antidumping Duty Finding * * * ." 19 C.F.R. § 353.54(b) (1985) (emphasis added). In view of the court's determination that this action should be remanded for collection of additional data pursuant to *Freeport Minerals,* the issue of whether the ITA was obliged to review data for a two year period becomes moot since such a period will of necessity be reviewed upon remand.

B. *Failure to Collect Data for Period Already Reviewed*

Both the government and Timken ask this court for a remand to permit the ITA to obtain additional home market data for the period already reviewed; to investigate and verify cost of production data already on the record; and to reassess appropriate TRM model comparisons. NBCA argues against remand.

In its initial proceeding, the ITA reviewed data for the period from April 1, 1978 through November 14, 1979 to determine if there had been sales at less than fair value in that period. *See* 47 Fed. Reg. 25,757. During its review, the ITA used home market sales data that had been provided by NTN in response to Treasury Department questionnaires. Those questionnaires had requested not data on all home market sales of TRBs, but rather only data on sales of TRBs identical or "similar" to those sold for export to the United States. Thus, *NTN* made the initial determination of what constituted identical or similar TRB models, and provided home market data only as to those models. Also, NTN set forth the basis for its selection of similar models: the inside diameter, outside diameter, and width of the TRBs. The ITA accepted NTN's model comparisons and did not question the basis of the comparisons presented.

During the proceeding before the ITA followed the initial remand by the court, Timken for the first time contested the appropriateness of NTN's assertions as to what constituted "similar" TRB models. It presented a specific analysis of TRB parameters, and argued that performance parameters as well as geometric parameters were relevant for proper model selection. The ITA believed that Timken had raised substantial questions as to the appropriateness of model comparisons. It concluded, however, that the limited nature of the remand prevented it from requesting additional data from NTN, and found it could not address these model comparison questions in the absence of complete home market sales data. Also because of the absence of complete data, the ITA was not able to address other contentions made by Timken on remand as to the appropriateness of NTN's home market sales data selection although it believed that Timken's contentions cast doubt on the reliability of the sales information reported by NTN.

The data used by the ITA was not only incomplete in that it did not reflect home market sales of all TRB models, it was also incomplete in that it did not cover the entire time period that the agency should have reviewed under then existing law. Only on remand did the ITA realize that because there had been delays between the dates of export of TRBs and the dates of their resale in the United States, it should in the original proceeding have reviewed home market sales not only for the period beginning April 1, 1978, but also home market sales for an earlier period. Assuming for example that a TRB sold in the United States on April 1 had been exported to the United States four months earlier, the United States price of that TRB should have been compared with the value of an

identical or similar TRB sold in the home market four months earlier. *See* 19 C.F.R. § 153.2(a) (1979); *cf.* 19 U.S.C. § 1677b(a)(1) (1982), *amended by* 19 U.S.C.A. § 1677b(a)(1) (West Supp. 1985). In order to remedy its failure in the original proceeding to collect home market sales data for the earlier period, the ITA on the remand *added* to the administrative record home market sales data for the period from September 27, 1977 to March 20, 1978. That added data had earlier been provided to the Treasury Department in connection with its review. However, Treasury had not verified the data and the ITA did not verify it either, viewing verification procedures as outside the scope of the remand.

The ITA also added to the record on remand data on production costs for the same period, September 27, 1977 to March 20, 1978, that had also been provided to Treasury in connection with its review, but that had never been verified. Timken questioned the reliability of the added data, but, again, although the ITA believed that Timken had raised significant questions, it did not verify the data. It did, however, use the data on remand both to calculate appropriate adjustments for differences in merchandise and to address new contentions by Timken that NTN had sold TRBs in the home market at less than the cost of production.[4]

The government now cites the incompleteness and lack of verification of the data used below, and the related issue of the appropriateness of model comparisons, as the basis for its request that the case be remanded a second time to permit the ITA to determine, among other things, (1) NTN prices for all TRBs sold in the home market during the relevant period, (2) whether the proper TRB models were compared, and (3) the accuracy of all pertinent NTN production costs. Timken concurs in this request for remand; NBCA opposes.

1. Necessity of Complete Home Market Data

The ITA abused its discretion in failing to collect the data necessary to ascertain the appropriateness of NTN's selection of similar TRB models. The issue of what constitutes proper model comparisons and the related issue of home market data selection go to the heart of the ITA's determination, concerning as they do the identity of the merchandise the ITA compared for the purpose of determining dumping margins. The basic task of the ITA in an action such as this is to compare the price of merchandise exported to the United States to the value of "such or similar merchandise" sold in the foreign market. *See* Antidumping Act of 1921, § 205(a), 19 U.S.C. § 164 (1976) (foreign market value is, among other things, the price at the time of exportation of merchandise to the United States at which "such or similar merchandise" is sold in the for-

[4] The ITA found that in fact NTN had in various periods sold TRBs in the home market at less than the cost of production. *See* 19 C.F.R. § 153.5 (1979); 19 C.F.R. § 353.7 (1985). This suggests the importance to the ITA's determination of the data added on remand, and hence the importance of verification.

eign market), *repealed by* the Trade Agreements Act of 1979, Pub. L. No. 96-39, tit. 1, § 106, 93 Stat. 144, 193.[5] Where identical merchandise was not sold in both the foreign market and in the United States, a determination as to which foreign market merchandise is "similar" to merchandise sold in the United States may be of great importance in a determination of whether there are dumping margins.

The statute defining "such or similar merchandise" sets forth three categories, or definitions, each of which describes increasingly dissimilar merchandise; the ITA must select merchandise from the first applicable category. Thus, pursuant to this statute, the ITA must select merchandise *identical* to that sold in the United States if it is available, 19 U.S.C. § 170a(3)(A) (1976); if that is not available, the ITA must select merchandise *like* the merchandise under consideration in materials and use, and approximately equal in value to the merchandise sold in the United States, *id.* § 170a(3)(B); only if that is not available may the ITA select merchandise of the *same general class or kind* as the merchandise sold in the United States, and like that merchandise in its use, if the ITA determines that such merchandise may reasonably be used for comparison, *id.* § 170a(3)(C).

The statute does not make explicit whether, if two or more products fall within the definition of a given subsection of the statute, the ITA must determine which of those products is *most* similar to merchandise sold in the United States. However, such a requirement is implicit in the statutory scheme. The arrangement of definitions in the statute is such that the requirement that the ITA choose merchandise within the first applicable definition amounts to a requirement that it choose the most similar merchandise—at least insofar as the broad statutory definitions of "such or similar merchandise" are concerned. The spirit if not the letter of this requirement obligates the agency to also ascertain what constitutes the most similar merchandise from within a given definition. Thus, in *B.A. McKenzie & Co.* v. *United States,* 42 Cust. Ct. 718, 724, A.R.D. 103 (1959), *aff'd,* 47 CCPA 143, C.A.D. 748 (1960), the court observed that if values can be found both for "such" and for "similar" merchandise, the law requires that the value of "such" merchandise should be adopted because it more nearly represents the value of the merchandise under appraisement. Accordingly, the court held that, for the same reason, if values can be found only for items of "similar" merchandise, the value of the item *most* similar to that under appraisement should be adopted. Moreover, an inter-

[5] Although the Antidumping Act of 1921, ch. 14, tit. II, 42 Stat. 11, was repealed by the Trade Agreements Act of 1979, which became effective on January 1, 1980, the substantive provisions of the 1921 Act apply to unliquidated entries made prior to 1980. Moreover, the substance of the antidumping law under the 1979 Act is in large part identical to the law under the 1921 Act. *See* H.R. Rep. No. 317, 96th Cong., 1st Sess. 48, 59 (1979) (relatively little change is made by the 1979 Act in the substantive provisions of the antidumping law). Hereinafter, references to sections of the Antidumping Act of 1921 will merely cite to the volume of the United States Code in which they formerly appeared.

pretation of the statute requiring selection of the *most* similar merchandise is most likely to ensure that the ITA "makes the fair value comparison on a fair basis—comparing apples with apples," *Smith-Corona Group* v. *United States*, 713 F.2d 1568, 1578 (Fed. Cir. 1983), *cert. denied*, 465 U.S. 1022 (1984).

The second definition set forth in the statute defines "such or similar merchandise" as:

> Merchandise (i) produced in the same country and by the same person as the merchandise under consideration, (ii) like the merchandise under consideration in component material or materials and in the purposes for which used, and (iii) approximately equal in commercial value to the merchandise under consideration.

19 U.S.C. § 170a(3)(B) (1976). As described above, NTN provided to the ITA data on only that merchandise that NTN had *itself* determined to be identical or similar to merchandise sold in the United States. NTN asserts that this selected data established that the TRB models it was characterizing as "similiar" met each of the requirements of similarity set forth in the statutory definition quoted above, and contends that the ITA therefore acted reasonably and upon substantial evidence in determining that those models were "similar" within the meaning of the statute.

The court assumes, without deciding, that the administrative record during the initial proceeding in this action contained substantial evidence supporting NTN's assertion that the merchandise it proposed as "similar" fell within the statutory definition. It does not follow, however, that there was substantial evidence that the proposed merchandise was the *most* similar merchandise of all the TRB models sold by NTN in the home market, including TRBs as to which no data had been provided. Moreover, even an ITA determination that is supported by substantial evidence may be overturned if it is otherwise not in accordance with law. 19 U.S.C. § 1516a(b)(1)(B) (1982); *see Chapman* v. *Donovan*, 9 CIT ——, ——, Slip Op. 85-113, at 4 (Oct. 25, 1985) (in addition to the requirements of substantial evidence there is the further requirement that rulings be in accordance with statute and that there be a showing of reasoned analysis); *cf. Trans-American Van Service, Inc.* v. *United States*, 421 F. Supp. 308, 316 (N.D. Tex. 1976) (an agency's finding may reflect arbitrary and capricious action even though supported by substantial evidence). In certain cases, an agency's failure to collect pertinent data or to consider a relevant aspect of an issue, constitutes an abuse of discretion. *Kelly* v. *Secretary of United States Department of Labor*, 9 CIT ——, ——, Slip Op. 85-132, at 7-8 (Dec. 30, 1985) (failure of OTAA, in determining eligibility of employees for trade adjustment assistance, to collect or consider data from company that accounted for the largest decline in order for the product in question meant that the agency's methodology was not accordance with law); *Rutherford* v. *United States*, 438 F. Supp.

1287, 1291 (W.D. Okla. 1977) (to act without collecting the necessary facts is an abuse of discretion), *aff'd*, 582 F.2d 1234 (10th Cir. 1978), *rev'd on other grounds*, 442 U.S. 544 (1979); *Motor Vehicle Manufacturers Association of the United States, Inc.* v. *State Farm Mutual Automobile Insurance Co.*, 463 U.S. 29, 43 (1983) (abuse of discretion for agency to fail to examine relevant data); *cf. Natural Resources Defense Council, Inc.* v. *NRC*, 547 F.2d 633, 646 (D.C. Cir. 1976) (agency may abuse its discretion by a decision that the record will not sustain in the sense that it raises fundamental questions for which the agency has adduced no reasoned answers), *rev'd on other grounds sub nom. Vermont Yankee Nuclear Power Corp.* v. *Natural Resources Defense Council, Inc.*, 435 U.S. 519 (1978).

By failing to collect home market sales data on TRB models other than those characterized by NTN as similar or identical, the ITA abdicated to NTN its statutory responsibility for determining what TRB models produced by NTN were the *most* similar to models sold in the United States. As the ITA now acknowledges, it cannot, using the selected data available to it, determine whether there exist home market TRB models that would have been more appropriate for purposes of comparison that were the models selected by NTN.

It is of particular importance that the administering agency itself make the required determination of what constitutes most similar merchandise, rather than delegating that responsibility to an interested party, considering that the issue may be a complex one on which reasonable minds could differ. For example, of two potentially "similar" foreign market products, one product could be most similar to merchandise sold in the United States in its use, while the other might be more similar in its materials. It is the administering agency rather than an interested party that should make the determination as to what "similar" characteristics are of the most significance. Additionally, it is hard to imagine that a foreign manufacturer, given the option of selecting what constitutes similar merchandise, and assuming that there exists more than one product from which such a choice can be made, would not make the choice of merchandise most advantageous to itself.[6]

If, for example, there were two foreign market products that could be considered "similar" but which differed in value, a foreign manufacturer would have an incentive to select as "similar" the product that was of lower value, as such selection could result in lower margins. Congress could not have intended that an interested party be accorded so much control over a determination of such importance. Indeed, by accepting a foreign manufacturer's assertions as to what constitutes most similar merchandise without ob-

[6] The court is in no way indicating that NTN has acted in bad faith in its production of data. NTN was asked to provide information only on those models that NTN determined were identical or similar; the court concludes not that NTN erred in producing incomplete home market sales data, but rather that the ITA erred as a matter of law in not requesting complete data where that data was necessary.

taining the complete data needed to determine the appropriateness of those assertions, the ITA in this action violated the spirit of the statutory requirement that it verify the data relied upon in proceedings involving revocation of antidumping orders. *See Al Tech Specialty Steel Corp.* v. *United States*, 745 F.2d 632, 634 (Fed. Cir. 1984); 19 U.S.C. § 1677e(a) (1982), *as amended*, Pub. L. No. 98-573, tit. VI, § 618, 98 Stat. 3037 (1984), *reprinted in* 19 U.S.C.A. § 1675e(a) (West Supp. 1985); H.R. Rep. No. 725, 98th Cong., 2d Sess. 42-43 (1984) (the Committee on Ways and Means believes it is essential that whenever the ITA revokes an antidumping duty order, the interests of domestic industry be protected by full verification of the information relied upon in making that determination). What is more, the failure to collect complete data deprived Timken of information essential to the assertion of its rights. *See Freeport Minerals*, 776 F.2d at 1033 (Congress intended that the ITA provide the maximum availability of information to an interested party because access to information is imperative for offensive assertion of its rights).

NBCA contends, however, that the government, by its present request for a remand to permit the ITA to obtain complete home market data and to reassess model comparisons, is attempting to apply a new policy not in effect at the time of the ITA's original determination. *See American Trucking Associations, Inc.* v. *Frisco Transportation Co.*, 358 U.S. 133, 146 (1958) (agency power to correct ministerial errors may not be used as guise for changing previous decisions because the wisdom of those decisions appears doubtful in light of changing policies); *Upjohn Co.* v. *Pennsylvania Railroad*, 381 F.2d 4, 5 (6th Cir. 1967) (agency may not apply new policy retroactively to a proceeding concluded three years previously). The ITA apparently has a current practice of obtaining complete home market sales data and itself determining what constitutes most similar merchandise. *See generally Bicycle Speedometers From Japan; Final Results of Administrative Review of Antidumping Finding*, 47 Fed. Reg. 28,978, 28,980 (1982); *Stainless Clad Steel Plate From Japan: Preliminary Determination of Sales at Less Than Fair Value and Suspension of Liquidation*, 47 Fed. Reg. 12,200 (1982). But here, the government, in seeking remand on this issue, is not attempting to substitute use of a current ITA policy for use of an earlier, reasonable policy. Rather, the method *originally* used in this action by the ITA to fulfill its statutory obligation to determine the value of merchandise most similar to that sold in the United States—*i.e.*, collection of data so incomplete that the ITA could not in fact determine what constituted most similar merchandise—was unreasonable and an abuse of discretion.

The ITA also abused its discretion by failing in the initial proceeding to obtain *any* data for a substantial period of time relevant to its determination, *i.e.*, the data from September 1977 to March 1978. *See supra* pp. 19-20. The government has presented no expla-

nation for the ITA's failure to collect that data, which was necessary for the performance of significant statutorily mandated calculations. Nor was that error sufficiently remedied on remand, for while the ITA did on remand add the necessary data to the record, that data was never verified.

These errors in data collection and model selection go to the heart of the ITA's determination. In addition, the government acknowledges a number of other errors in the proceedings below. For example, it agrees with Timken that there is a lack of evidence on the administrative record to support the ITA's determinations regarding adjustments to foreign market value for advertising and inland freight expenses, and regarding certain deductions from ESP for administrative salaries and warehouse expenses.[7] Moreover, the first remand resulted from the government's and ITA's assertion that the ITA had failed to adhere to statutory requirements and to its own precedent regarding the methodology used in a number of other significant calculations. As the government itself suggests, the nature and number of the errors that marred the proceedings below call into question the very integrity of the ITA's determination.

The errors committed below—and particularly those in data and model selection, as well as the ITA's error under *Freeport Minerals*—cannot be remedied by addressing each in isolation. For these errors affect the entirety of the data base thus far used by the ITA. The vice of a poor data base is that it taints even good methodology. Thus, even if the ITA used appropriate methodology below, its computations were necessarily flawed, if the data base was fundamentally inadequate. A remand order that fails to direct a review of *all* ITA calculations will therefore risk a final determination containing error and internal inconsistency. Hence, a remand for all purposes is appropriate. *See Tenneco Oil Co.* v. *Department of Energy*, 475 F. Supp. 299, 309 (D. Del. 1979) (court would consider a claim not raised below where to do otherwise would create the anomaly of requiring the reviewing court, or the administrative agency on remand, to apply an arguably erroneous standard in deciding those claims that had been properly raised); *cf. Ford Motor Co.* v. *NLRB*, 305 U.S. 364, 372 (1939) (circuit court acted properly in remanding action to NLRB for reconsideration of entire case).

---

[7] With regard to advertising, the ITA deducted certain advertising costs as representing differences in circumstances of sale, yet the administrative record reveals evidence of only corporate image or of general product line advertising rather than of advertising directly related to the TRB sales under consideration or attributable to later sales of those TRBs by a purchaser. This was contrary to agency regulation. *See* 19 C.F.R. §153.10 (1979); 19 C.F.R. §353.15 (1981); *Carlisle Tire & Rubber Co.* v. *United States*, 3 CIT 163, 167–68 (1982); *Brother Industries, Ltd.* v. *United States*, 3 CIT 125, 151, 540 F. Supp. 1341, 1365 (1982), *aff'd sub nom. Smith-Corona Group* v. *United States*, 713 F.2d 1568 (Fed. Cir. 1983), *cert. denied*, 465 U.S. 1022 (1984). Regarding inland freight costs, the ITA now states that certain freight costs for the transportation of TRBs from a manufacturing plant to a distribution center were improperly allowed as costs of differences in circumstances of sale because those costs represented a general overhead expense rather than an expense directly related to the sales under consideration. *See* 19 C.F.R. §153.10(a) (1979); 19 C.F.R. §353.15(a) (1985).

2. Exhaustion—Incomplete Data

A remand is appropriate even though Timken, in the initial proceeding before the ITA, failed to raise a number of the contentions raised in this action, including those involving the ITA's failure to obtain complete data and to determine what constituted most similar merchandise. As discussed above, application of the doctrine of exhaustion of administrative remedies is within the discretion of the court. "Whenever a question concerning administrative, or judicial, reconsideration arises, two opposing policies immediately demand recognition: the desirability of finality, on the one hand, and the public interest in reaching what, ultimately, appears to be the right result on the other." *CAB* v. *Delta Air Lines, Inc.*, 367 U.S. 316, 321 (1961) (footnote omitted); *cf.* 4 K. Davis, Administrative Law Treatise § 26:2, at 420–21 (2d ed. 1983) (courts should consider the merits in deciding exhaustion issues and should acknowledge that they do so); *see also Hormel* v. *Helvering*, 312 U.S. at 558 (Court stated that implication of an earlier case was that unexhausted issue would have been remanded had the newly raised issue been of sufficient merit).

The gravity of the errors in this action, when considered with the fact that the government itself is requesting a remand and representing that the ITA's errors call into question the integrity of its determination, suggests that in this action, "the public interest in reaching what ultimately appears to be the right result" outweighs the desirability of finality. Then too, since the government itself is asking for a remand despite Timken's failure to exhaust its remedies, the significance of one of the policies underlying the exhaustion doctrine, namely, that a court should not usurp an agency's function by considering issues the agency has not first considered, is of reduced significance. *See McKart* v. *United States*, 395 U.S. 185, 195 (1969) (notions of administrative autonomy require that the agency be given a chance to discover and correct its own errors). *Cf. Mathews* v. *Eldridge*, 424 U.S. 319, 326–28 (1976) (Secretary of HEW may waive exhaustion requirement regarding the necessity of a final administrative decision).

Also relevant is the ITA's explanation that its errors in data collection and model selection arose from the transitional nature of this case, which was inherited from the Treasury Department. These errors thus resulted from a violation of a significant public policy, namely, that the ITA should provide the same quality of review in all cases, regardless of whether it handled the cases from their inception. *See Freeport Minerals*, 776 F.2d at 1033–34; *Board of Public Instruction* v. *Finch*, 414 F.2d 1068, 1073 (5th Cir. 1969) (court would disregard failure to exhaust remedies where, *inter alia*, agency action was contrary to a public policy extending beyond the rights of the individual litigants).

A number of the policy considerations underlying the exhaustion doctrine are pertinent here, including the consideration of fairness to litigants and the fact that litigants should not be encouraged to

delay raising claims. *See McKart* v. *United States,* 395 U.S. at 195 (one reason for exhaustion doctrine is that frequent and deliberate flouting of administrative processes could weaken the effectiveness of an agency by encouraging people to ignore its administrative procedures). The court is also aware that NTN and NBCA may incur substantial cost and inconvenience as a result of a second remand. It is also aware that Timken could and should have raised its concerns as to the completeness of home market sales data and as to model similarity during the original proceeding before the ITA. Despite these concerns, however, the court, for the reasons set forth above, finds on balance that the interests of justice require a remand.

IV. *Legal Issues Raised Below*

During this action, Timken has raised two legal issues that it also raised below, first, the issue of whether the statute governing calculation of exporter's sales price (ESP) requires a deduction of a subsidiary's profit, and, second, the issue of the type of evidence needed to establish a relationship between cost and value, in the context of calculations concerning differences in circumstances of sale. These issues are addressed below.

A. *Deduction of Profit From ESP*

Timken contends that in calculating the exporter's sales price of TRBs produced by NTN and sold by NBCA in the United States, the ITA should have deducted any profits earned by NBCA.

Under the Antidumping Act of 1921, the United States price of imported merchandise must be compared with the foreign market value of identical or similar merchandise to determine whether there were sales in the United States at less than fair value. When imported merchandise is initially sold to an *unrelated* purchaser in the United States, "purchase price"—the price paid by the purchaser minus various deductions specified by statute—is used as the United States price. Antidumping Act of 1921, § 203, 19 U.S.C. § 162 (1976). However, when, as in this case, the merchandise is first sold to a *related* purchaser in the United States, *e.g.,* to a subsidiary of the exporter, "exporter's sales price" is used as the United States price. ESP is the price at which the merchandise is subsequently sold by the related party in an arm's length transaction, minus deductions specified in section 204 of the 1921 Act. 19 U.S.C. § 163 (1976).

One of the deductions from ESP required by section 204 is "the amount of the *commissions,* if any, for selling in the United States the particular merchandise under consideration" (emphasis added). The ITA in this action interpreted the word "commissions" literally, taking the position that "[t]here is no statutory provision for a deduction from the ESP of a U.S. subsidiary's profit." 47 Fed. Reg. at 25,758. It therefore deducted from ESP commissions paid out by

NBCA to its selling agents, but refused to deduct *profits* earned by NBCA on resale of the imported merchandise. Timken claims that this error, contending that the term "commissions," as understood when the 1921 Act became law, encompasses a subsidiary's profits.

1. Standard of Review

The interpretation of a statute by the agency entrusted with its administration is entitled to weight, especially where that interpretation represents longstanding administrative practice. *See Zenith Radio Corp.* v. *United States,* 437 U.S. 443, 450 (1978); *Ambassador Division of Florsheim Shoe* v. *United States,* 748 F.2d 1560, 1563 (Fed. Cir. 1984); *Smith-Corona Group* v. *United States,* 713 F.2d 1568, 1576-77, 1579 (Fed. Cir. 1983), *cert. denied,* 465 U.S. 1022 (1984); *Carlisle Tire & Rubber Co.* v. *United States,* 5 CIT 229, 232, 564 F. Supp. 834, 837 (1983). An agency's interpretation of a statute it administers need only be reasonable; there is no requirement that it be the only possible interpretation. *Asahi Chemical Industry Co.* v. *United States,* 4 CIT 120, 123, 548 F. Supp. 1261, 1264 (1982); *see Train* v. *Natural Resources Defense Council, Inc.,* 421 U.S. 60, 75. 87 (1975); *Unemployment Compensation Commission* v. *Aragon,* 329 U.S. 143, 153-54 (1946).

Moreover, if the language of a statute is clear and unambiguous, that language must ordinarily be regarded as conclusive, absent clearly expressed legislative intent to the contrary. *See Bread Political Action Committee* v. *Federal Election Commission,* 455 U.S. 577, 580 (1982); *Board of Governors of Federal Reserve System* v. *Dimension Financial Corp.,* —— U.S. ——, ——, 54 U.S.L.W. 4101, 4103, 4105 (1986) (courts must give effect to the unambiguously expressed intent of Congress; application of the "broad purposes" of legislation at the expense of specific provisions ignores the complexity of the problems Congress is called upon to address). Courts may in rare cases override the literal terms of a statute where application of those terms would lead to an absurd result. *Crooks* v. *Harrelson,* 282 U.S. 55, 59-60 (1930).

Against this background, the court finds, for the reasons that follow, that the ITA's interpretation of the word "commissions" to mean only commissions—and not profits—represents longstanding administrative practice; that the meaning of the term "commissions" is clear; that there is no basis in legislative history or in the terminology in use at the time of passage of the Antidumping Act for disregarding that meaning; and that adherence to the clear meaning of the word "commissions" does not create an absurd result. The ITA's interpretation is therefore upheld.

2. Agency Interpretation

During oral argument, the government indicated to the court that the ITA's interpretation of the word "commissions" represents longstanding administrative practice. Timken has not brought to the court's attention any decisions to the contrary. Beyond that,

various documents suggest that the ITA's position indeed represents a longterm practice with its inception in the Treasury Department, the previous administering agency.

Specifically, two bills have in the past been introduced that would, among other things, have modified section 204 to require deduction of "the amount of commissions *and profits*" from ESP. S. 1726, 90th Cong., 1st Sess., § 3 (1967) (bill introduced by Sen. Hartke); S. 3606, 87th Cong., 2d Sess., § 3(b) (1962) (bill introduced by Sen. Humphrey) (emphasis added). It would appear that these attempts to add a deduction for profits were made because the administering agency was in fact *not* deducting profits from ESP.

Additionally, a 1979 report by the Comptroller General indicates that section 204 has been understood literally. U.S. General Accounting Office, *U.S. Administration of the Antidumping Act of 1921; Report to the Congress of the United States by the Comptroller General of the United States,* ID-79-15, at 24-27 (Mar. 15, 1979). Although the report does not directly address the issue here raised, a sample ESP calculation contained in the report is illuminating. ESP as calculated in the report includes the profits made by a United States affiliate; deducted from that ESP are selling expenses, transportation and duties—but *not* the affiliate's profit. *Id.* This sample calculation ostensibly represented Treasury Department practice. *See also* Hemmedinger & Barringer, *The Defense of Antidumping and Countervailing Duty Investigations Under the Trade Agreements Act of 1979,* 6 N.C.J. Int'l L. & Com. Reg. 427, 433-34 (1981) (for the foreign manufacturer, ESP "often is a more favorable basis of calculating fair value because, unlike purchase price, the profit of the U.S. importer is included in the net adjusted price, resulting in a higher United States price").

In light of the ITA's representation to this court and considering the above cited materials, the court finds that the ITA's interpretation of the word "commissions" in section 204 represents longstanding practice.

3. Language of the Statute

The literal language of section 204, calling for the deduction of "the amount of the commissions, if any, for selling in the United States the particular merchandise under consideration," on its face clearly calls for the deduction of commissions, and just as clearly does not call for the deduction of profits. There is no basis in common language usage for a claim that the profit earned by a subsidiary or other related party upon the sale of goods originally purchased from a parent company constitutes a "commission" to that party. A commission is commonly understood to be an allowance or percentage given to an agent for transacting business for another. *See* Funk & Wagnalls New Standard Dictionary of the English Language 537 (I. Funk ed. 1942); 1 J. Bouvier, Law Dictionary and Concise Encyclopedia 548 (F. Rawle 3d rev. 1914). "Profit," by contrast, is the excess of a selling price over an original cost. *See*

Funk and Wagnalls New Standard Dictionary of the English Language 1979 (I. Funk ed. 1942); 3 J. Bouvier, Law Dictionary and Concise Encyclopedia 2737 (F. Rawale 3d rev. 1914).

Timken argues, however, that at the time of passage of the 1921 Act, the word "commission" was a Customs Service term of art denoting generally *any* profit accruing to a related importer as a consequence of the sale of imported goods. In the case of an agent selling on consignment, that profit, according to Timken, generally would accrue in the form of a commission (in the usual sense of that word), but in cases involving other related parties, that benefit might accrue in the form of profit upon sale of the goods in the United States. Under this reading of "commissions," the ITA should deduct from ESP not only commissions *paid* by a United States subsidiary to its selling agents, but also "commissions" *earned* by a United States subsidiary in the form of profits from a resale of imported merchandise.

In support of this argument regarding Customs Service use of the term "commissions," Timken relies primarily upon colloquy before the Senate Finance Committee in 1921 between Senator McCumber and a special agent for the Customs Service, George Davis. In that colloquy, Mr. Davis explained the methodology used in arriving at ESP under the bill that became the 1921 Act. On two occasions, he seemed to identify "commission" with "profit."

> *Mr. Davis* * * *. For instance, there is an agent in this country who sells merchandise in Kansas City for dollars and cents, including duty, ocean freight, the expense of getting it from New York to Kansas City, *and the agent's commission, or his profit.* This order is transmitted to the foreign manufacturer. He knows the merchandise is going to Kansas City. It may come forward on a consigned invoice, consigned to the agent himself, and the Government does not know anything about the sales price to Kansas City. Such price is the foreign exporter's sales price and that should be distinguished from the open purchase price paid by the bona fide American importer who buys direct from the manufacturer. There might be dumping in either instance, but the two prices should be distinguished.
>
> *Senator McCumber.* Where there is not difference in the price, how would you determine which one to follow?
>
> *Mr. Davis.* We would have to subtract from the price in Kansas City the expense of bringing it from foreign markets to Kansas City, the duty, *the foreign agent's commission, or profit,* and the net amount, is the amount that goes back to the other side becomes the exporter's sales price.

S. Comm. on Finance, *Emergency Tariff and Antidumping: Hearing on H.R. 2435,* 67th Cong., 1st Sess. 42-43 (1921) (emphasis added).

Timken does not argue that Mr. Davis, in the above colloquy, actually had in mind the profits earned by a subsidiary of a foreign exporter. It rather argues that Mr. Davis was explaining the general concept involved, namely, that what is deducted from ESP is the

benefit accruing to the related party selling in the United States—whether in the form of a paid commission or other profit. While Timken's reading is plausible, an equally plausible reading of Mr. Davis's remarks is to understand his reference to "commission, or profit" as merely reflecting the fact that a commission received by an agent will generally represent a profit to that agent—a fact that does not necessitate a conclusion that profit in any form that is earned by resale of goods by a subsidiary corporation must therefore be characterized as a "commission." Furthermore, "[r]eliance on such isolated fragments of legislative history in divining the intent of Congress is an exercise fraught with hazards, and 'a step to be taken cautiously.' " *New England Power Co.* v. *New Hampshire*, 455 U.S. 331, 342 (1982) (quoting *Piper* v. *Chris-Craft Industries, Inc.*, 430 U.S. 1, 26 (1977)); *see Garcia* v. *United States*, —— U.S. ——, ——, 105 S. Ct 479, 484 (1984) (isolated statement of floor of House not impressive legislative history); *United States* v. *Taylor*, 752 F.2d 757, 764 (1st Cir.), *jurisdiction postponed to hearing on merits sub nom. Maine* v. *Taylor*, —— U.S. ——, 106 S. Ct. 307 (1985).

Withal, Timken claims to find further support for a reading of the term "commission" to include profits whether earned via commission or otherwise, in the unusually broad meaning ascribed to the word "consignment" under the Tariff Act of 1913, which was in effect at the time of passage of the 1921 Antidumping Act. *See J.H. Cottman & Co.* v. *United States*, 20 CCPA 344, 354-56, 359 T.D. 46,114 (1932) (court looks to meaning of terms in customs valuations law in construing similar language in antidumping law), *cert. denied*, 289 U.S. 750 (1933); R. Sturm, Customs Law and Administration § 47.5, at 366 (2d ed. 1980). Specifically, Timken cites a section of the Tariff Act that provided for the calculation of a United States value by taking a United States sale price and deducting from it certain items including "a *commission* not exceeding 6 per centum if any has been paid or contracted to be paid on *consigned* goods * * *." Tariff Act of 1913, ch. 16 § III, para. L, 38 Stat. 114, 186 (emphasis added). This provision somewhat resembles the provision of section 204 for the calculation of ESP by deduction of commissions from a United States price.

Timken points out that the language in the 1913 Tariff Act section regarding goods "consigned" for sale was understood to refer to goods imported by a related party for sale in the United States, even if the goods in question were not being consigned from a principal to an *agent*. Thus, in *United States* v. *Johnson Co.*, 9 Ct. Cust. App. 258, 266-68, T.D. 38,215 (1919), goods sent from a factory abroad that was owned by the party importing the goods were deemed "consigned." Timken's argument seems to be that because the term "consign" thus has a broader meaning under the Tariff Act of 1913 then it does in common parlance, then the word "commission"—which is often used in conjunction with the word "con-

signment," as the term denoting the benefit accruing to the party receiving consigned goods—also has a broader meaning, and hence encompasses the concept of any profit earned by a related party "consignee." The difficulty is that Timken fails to provide any direct support for this proposition. Therefore, its argument that in Customs Service terminology of 1921, the clear meaning of the word "commissions" *was* "commissions or profits," is insufficiently established.

There is an additional reason for rejecting Timken's argument. Timken does not contend that whatever profits are claimed by a subsidiary should be deducted from ESP, but rather maintains that "*reasonable* profits" should be deducted from ESP. Deduction of "reasonable" profits is advocated to avoid an alleged danger that a related exporter and importer could manipulate profits so as to obtain maximum benefit from an ESP calculation. There is nothing in legislative history to indicate a congressional intent that "reasonable" profits be deducted. Further, Congress knew how to provide for the deduction of only reasonable commissions or profit when it wished to do so. Thus, the 1913 Tariff Act section discussed above include a "lid" on the amount of commissions and profits that could be deducted from the United States price. That "lid" provided that commissions not exceeding six per cent could be deducted when goods were consigned and that profit not exceeding eight percent could be deducted when goods were purchased. Tariff Act of 1913, ch. 16 § III, para. L, 38 Stat, 114, 186.[8] The absence of similar specificity as to a percentage amount of commissions that may be deducted from ESP under section 204 suggests that Congress did not intend to limit the deductions for "commissions" to only "reasonable commissions" and that Timken's reading of "commissions" as "commissions and *reasonable* profits" is unduly creative.

4. International Law

Timken cites a provision of the International Antidumping Code as further evidence that section 204's reference to "commissions" should be understood as a reference to "commissions and profits." The International Antidumping Code is a multilateral agreement signed by the United States in 1979 in the course of the Tokyo Round of Multilateral Trade Negotiations (MTN). Agreement on Implementation of Article VI of the General Agreements on Tariffs and Trade, Apr. 12, 1979, 31 U.S.T. 4919 T.I.A.S. 9650, *reprinted in* H.R. Doc. No. 153, part I, 96th Cong., 1st Sess. 313–14 (1979) (International Antidumping Code or Code).

[8] Presumably, these maximum percentages were included in the Tariff Act section because importers would have benefited by large deductions of commissions or profits under the appraisement law, inasmuch as such deductions would have reduced the United States price and so in certain cases reduced dutiable value. By contrast, in calculating ESP under section 204 of the 1921 Antidumping Act, an importer will generally not benefit from a deduction of profits because deduction of profits will decrease ESP and thus increase the possibility that sales at less than fair value will be found. *See* Hemmendinger & Barringer, *supra*, 6 N.C.J. Int'l L. & Com. Reg. 433–34.

The Code, together with other trade agreements negotiated during the MTN, was approved and implemented by passage of the 1979 Trade Agreements Act (1979 Act), which repealed the 1921 Antidumping Act. Trade Agreements Act of 1979, Pub. L. No 96-39, § 2, 93 Stat. 147, 19 U.S.C. § 2503 (1982). The Code provides that where an export price may be unreliable because of an association between the exporter and importer, an export price may be constructed on the basis of the price at which the imported products are first resold to an independent buyer. When export price is so constructed, "allowance for costs, including duties and taxes, incurred between importation and resale, *and for profits accruing,* should also be made." International Antidumping Code, art. 2, paras. 5-6 (emphasis added). In other words, the Code indicates that "profits accruing" should be deducted from a constructed export price that is the analogue of ESP.[9]

Timken argues that because a provision of this international code—implemented in 1979—provides a deduction from ESP for "profits accruing," section 204 of the Antidumping Act of *1921* should be interpreted similarly to allow for deduction of profits. Timken's argument for such consistency of interpretation is that the Code as a whole has been characterized as "consistent" with the 1979 Act; that the ESP provisions of the 1979 Act and the 1921 Act are in relevant parts identical; and that therefore the ESP provisions of the 1921 Act and of the Code necessarily must be consistent." *See* S. Rep. No. 249, 96th Cong., 1st Sess. 1, 15-16, *reprinted in* 1979 U.S. Code Cong. & Ad. News 381, 401-02 (S. Rep. No. 249) (bill that became the 1979 Act implements the Tokyo Round of the MTN and adds a comprehensive statute that replaces the Antidumping Act of 1921 and is consistent with the MTN Antidumping Code); Statements of Administrative Action, *reprinted in* H.R. Doc. No 153, 96th Cong., 1st Sess., part II, at 392 (1979), *and in* 1979 U.S. Code Cong. & Ad. News 665, 667 (the 1979 Trade Agreements Act approves and implements the trade agreements negotiated in the MTN and has been developed to be fully consistent with those agreements). *Compare* Tariff Act of 1930, § 772, *as amended,* 19 U.S.C. § 1677a (1982) *with* Antidumping Act of 1921, § 204.

In analyzing the current Code, it is useful to review legislative history pertaining to its *predecessor,* the 1967 International Antidumping Code. Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade, June 30, 1967, 19 U.S.T. 4348, T.I.A.S. 6431, *reprinted in* J. Jackson, World Trade and the Law of GATT § 16.6, at 426-28 (1969) (1967 Code). The 1967 Code, unlike the current Code, was never the subject of implementing legislation in the United States. S. Rep. No. 249 at 1. However, like the current Code, it included an ESP provision providing that "al-

[9] Such constructed export price will hereinafter also be referred to as "ESP."

lowance for * * * profits accruing *should also be made."* 1967 Code, art. 2, para. f (emphasis added).

The Executive Branch in a report to Congress in 1968 attempted to demonstrate that the 1967 Code was consistent with the Antidumping Act of 1921. That report related each provision of the Code to the "relevant provisions" of the 1921 Act and to the regulations and administrative practice thereunder. Executive Branch, *Analysis of International Antidumping Code in Relation to Antidumping Act, 1921* (1968), *reprinted in* S. Comm. on Finance, 90th Cong., 2d Sess., *Text of Antidumping Act, 1921, International Dumping Code, and Related Materials* 55, 60 (Comm. Print 1968). With regard to calculation of ESP, the "relevant provision" of the 1921 Act was unquestionably section 204. In the course of an analysis of the here pertinent provision of the 1967 Code, paragraph f, the Executive Branch report stated:

> In addition, paragraph (f) provides that due allowance shall be made in each case, on its merits, for the differences in conditions and terms of sale, for the differences in taxation, and for the other differences affecting price comparability. This provision is consistent with the [1921 Antidumping Act]. *Finally, paragraph (f) provides that in the cases involving constructed export price * * * allowance for costs, including duties and taxes, incurred between importation and resale, and for profits accruing, should also be made. Since this is a hortatory provision, it creates no inconsistency with the Act.*

Comm. Print 60 (emphasis added). The above analysis is notable in that it apparently found the provision of the 1967 Code concerning "profits accruing" to be not inconsistent with the relevant provision of the 1921 Act (section 204) *only* because the Code provision was "hortatory" in nature. Apparently, the word "should" in the Code provision—"allowance * * * for profits accruing, *should* also be made" (emphasis added)—was understood as an exhortation rather than as a requirement. This suggests that the ESP provision of the 1967 Code was never perceived as the equivalent of section 204 of the 1921 Act but, to the contrary, was regarded as "consistent" with that section only because the Code provision was not viewed as mandatory.

Because this legislative history contradicts an argument that section 204 should be viewed as in substance identical to the ESP provision of the *1967* International Antidumping Code, it similarly contradicts Timken's argument that section 204 must be viewed as "consistent with" the ESP provision of the *current* International Antidumping Code.

Timken contends that despite this legislative history, nothing *precludes* requiring a deduction of profits under United States law so as to ensure conformity of that law with the Code provision. It further asserts that many of the trading partners of the United States deduct profit from ESP, and that a failure to interpret

United States law to provide for such a deduction creates a disparity that operates to the detriment of domestic industry in contravention of the general intent of Congress that the antidumping law protect such industy. *Cf. J.C. Penney Co.* v. *United States Treasury Department,* 439 F.2d 63, 64 (2d Cir.), *cert. denied,* 404 U.S. 869 (1971) (the Antidumping Act is designed to prevent actual or threatened harm to a domestic industry caused by the sale of merchandise at prices lower than those in the country of origin). But even assuming, *arguendo,* that the Code provision regarding "profits accruing" should be given effect under the implementing 1979 Trade Agreements Act in order to ensure conformity with the Code, it would not follow that the *1921* Act provision here in question should be interpreted so as to conform with the Code. *Cf. United States* v. *Philadelphia National Bank,* 374 U.S. 321, 348-49 (1963) (views of a subsequent Congress form a hazardous basis for inferring intent of an earlier one); *Giardino* v. *Commissioner,* 776 F.2d 406, 409 (2d Cir. 1985) (court would not venture beyond clear meaning of statute because, although clear meaning was contradicted by subsequent legislative history, it did not result in absurdity). In addition, legislative history indicates that Congress, in passing the 1979 Act, intended to preserve the status quo as to all administrative practice regarding the antidumping laws except where specifically noted. *See* S. Rep. No. 249 at 93, 107, *reprinted in* 1979 U.S. Code Cong. & Ad. News at 479, 493; *Brother Industries, Ltd.* v. *United States,* 3 CIT 125, 136, 540 F. Supp. 1341, 1353-54 (Senate Finance Committee did not disapprove the current regulations and administrative practice under the 1921 Act, but in effect preserved the status quo), *aff'd sub nom. Smith-Corona Group* v. *United States,* 713 F.2d 1568 (Fed. Cir. 1983), *cert. denied,* 465 U.S. 1022 (1984); *cf. Lorillard* v. *Pons,* 434 U.S. 575, 580 (1978) (Congress is presumed to be aware of administrative or judicial interpretation of a statute).

In short, although Timken raises provocative questions regarding the appropriateness of an antidumping law that conflicits in part with the law of our trading partners in a manner detrimental to United States industry, it has presented no basis for interpreting section 204 in light of the International Antidumping Code provision.

5. Non-absurdity of Results

Finally, Timken argues that unless section 204 is interpreted so as to require the deduction of profits as well as commissions, the consequence is an absurd result, inconsistent with the underlying purpose of the provisions regarding ESP. Thus, Timken points out that if profits are not deducted from ESP, dumping margins may differ substantially depending upon whether a foreign manufacturer elects to sell in the United States through (1) an agent selling the merchandise on consignment and receiving a commission, or (2) through a subsidiary purchasing the imported merchandise and

then reselling it, earning a profit. Timken contends that in substance those import transactions are identical, and that Congress did not intend that the form of transactions could be structured to eliminate or reduce dumping margins.

Timken also notes that ESP is defined in such manner as to make it "[i]n substance, the net amount *returned to the foreign exporter.*" S. Rep. No. 16, 67th Cong., 1st Sess. 12 (1921) (emphasis added); *see Brother Industries, Ltd.* v. *United States,* 3 CIT at 141 n. 13, 540 F. Supp. at 1357 n.13. According to Timken, if profits are not deducted from ESP, ESP will equal "the net amount returned to the foreign exporter" *plus* the subsidiary's profit, and so will be in conflict with this underlying definition. However, Congress could reasonably have determined that a foreign exporter and its United States subsidiary should be treated as one "pocket" for purposes of determining what net amount is "returned to the foreign exporter." Indeed, the very nature of ESP calculation, requiring the deduction from an arm's length resale price of readily verifiable amounts, indicates that in the context of ESP calculation Congress wished to stay away from any assessment of the legitimacy or significance of monetary transactions between related parties. Certainly it is possible, as Timken itself points out, that related corporations could show profit in whatever place—the United States or abroad—was most convenient for them. The fact that such manipulation is theoretically possible is a reasonable basis for including in "net amount returned to the foreign exporter" the profit going to *both* the foreign exporter and to its United States subsidiary.

Another reason for permitting a subsidiary's *profit* on resale of imported goods to *increase* ESP—in effect, treating a subsidiary's profit as part of the "net amount returned to the foreign exporter"—is that, regardless of how the word "commissions" is interpreted, any *loss* incurred by a subsidiary will *decrease* ESP—in effect, decreasing the "net amount returned to the foreign exporter." Congress could reasonably have determined that because, for purposes of calculating ESP, a foreign exporter and its subsidiary are effectively treated as one unit when the subsidiary has incurred a loss, that those parties should similarly be treated as one unit when the subsidiary has made a profit. A statutory scheme under which profit is not deducted from ESP is therefore hardly absurd. Consequently, the ITA's interpretation of the word "commissions" to mean only commissions, and not "commissions and profits," is reasonable.

B. *Cost-value Relationship*

Timken contends that the ITA erred in making adjustments for differences in circumstances of sale based on the *costs* of those differences.

In determining whether goods have been sold in the United States at less than fair value, the ITA must compare the United States price of the goods with the foreign market value of identical

or similar goods. However, United States price and foreign market value may differ for reasons that do not implicate the fairness of the foreign trade practices of the exporter. For example, foreign market value and United States price may be influenced by differences in the chain of commerce by which the goods reached the export or domestic market. Accordingly, in comparing foreign market value with United States price, the ITA must adjust foreign market value for differences in the circumstances of sale of the goods.

Section 202 of the 1921 Act provided in part:

> (c) in determining the foreign market value * * * if it is established to the satisfaction of the Secretary or his delegate that the amount of any difference between the exporter's sales price and the foreign market value (or that the fact that the exporter's sales price is the same as the foreign market value) is wholly or partly due to—
>
> * * * * * * *
>
> (2) other differences in circumstances of sale * * *.
>
> * * * * * * *
>
> then due allowance shall be made therefor.

Antidumping Act of 1921, § 202, 19 U.S.C. § 161 (1976). An implementing regulation provided:

> In determining the amount of the reasonable allowances for any differences in circumstances of sale, the Secretary will be guided primarily by the *cost* of such differences to the seller but, where appropriate, may also consider the effect of such differences upon the market value of the merchandise.

19 C.F.R. § 153.10(c) (1979) (emphasis added). In *Smith-Corona Group* v. *United States*, 713 F.2d 1568 (Fed. Cir. 1983), *cert. denied*, 465 U.S. 1022 (1984), the Federal Circuit upheld a regulation virtually identical to section 153.10(c). There Smith-Corona contended that the preference for cost established by the regulation is inconsistent with the underlying statutory requirement that claimed differences of sale must result in differences in price or value—not cost. The court rejected the argument on the ground that the assumption underlying the regulation—that differences in price or value are very likely to exist where there are differences in cost—was reasonable. 713 F.2d at 1577. The court noted that precluding the ITA from making that assumption would require it to engage in "extensive complex econometric analysis," and that making such an assumption "may be the only *practical* way to administer the statute." *Id.* at 1577 n.27 (emphasis in original). Yet, in language now relied upon by Timken, the court also stated:

> The Secretary may not, however, rely on cost *to the exclusion* of its effect on value. The regulation does not *prohibit* reli-

> ance on value, but merely expressed a preference for cost; value may be considered where appropriate.

Id. at 1577 (emphasis in original). The court further stated:

> We do not hold that the Secretary may blindly rely on cost to the exclusion of its effect on value * * *. *[A]bsent evidence that costs do not reflect value,* the Secretary may reasonably conclude that cost and value are directly related.

Id. at 1577 n.26 (emphasis added).

In this case, the ITA made adjustments for differences in circumstances of sale based upon cost information. Timken claims that those adjustments were unwarranted because it had presented evidence to the ITA that the differences in cost did not in fact result in a difference in the value of the goods. The evidence thus referred to is data showing that when certain costs *increased,* including those costs reflecting differences in circumstances of sale, the price of foreign market goods in many cases *decreased* or stayed the same. According to Timken, in only a few instances did prices rise in conjunction with a rise in costs. Hence, Timken argues, it is clear that the costs reflecting differences in circumstances of sale did *not* increase the value of the goods and therefore foreign market value should not have been adjusted to reflect those costs. In so arguing, Timken relies upon the *Smith-Corona* language: "*absent evidence that costs do not reflect value,* the Secretary may reasonably conclude that cost and value are directly related." *Id.* (emphasis added).

In effect, Timken's position is that the data establishing that as certain costs went up, price went down or stayed the same, constitutes evidence that "costs do not reflect value," and so makes unreasonable the ITA's usual assumption that costs are reflected in value. The court disagrees. The ITA's assumption, reflected in its regulation, of a relation between cost and value, does not hold good only in cases in which there is a positive correlation between prices and specific costs. Prices are influenced by many factors other than costs, *e.g.,* market demand, competition, and volume of sales. Furthermore, where the costs in question are not total costs, but merely costs of differences in circumstances of sale, such additional factors may well have a proportionately greater impact on price than do increases in those costs. Thus, costs of differences in circumstances of sale may be directly related to value and yet not control final price. Given this, Timken's evidence that prices did not increase with the rise in certain costs did not establish that values did not increase together with those cost increases; it at most established that values and/or prices were influenced by other factors as well.

Timken contends also that once it had presented data showing the absence of a positive correlation between costs and prices, it became incumbent upon NTN to rebut that evidence by affirma-

tively establishing that cost did indeed influence value. The argument is misplaced. The assumption of a cost-value relation implicit in the regulation and sanctioned by *Smith-Corona* is not a burden-shifting device. *See id.* It is rather an assumption embodying the informed judgment of an agency charged with the responsibility of administering the statute. Upon presentation of Timken's data on cost and price, the ITA's task was to determine whether, in light of that evidence, its assumption of a positive relation between cost and value *continued* valid. The ITA decided that it did, and the court finds that decision reasonable. For, as discussed above, prices may be influenced by many factors, so that an assumption that higher costs result in higher values is not undermined by the fact that certain relatively small cost increases do not coincide with price increases.[10]

V. *Conclusion*

This action is remanded to the ITA for (1) collection and review of data for a period extending up to the date of the ITA's preliminary determination; (2) collection and review of additional home market sales data for the period of time already reviewed by the ITA, and for reassessment of proper TRB model comparisons; (3) review of the accuracy of all pertinent NTN production costs; (4) correction of all errors that may have occurred below; and (5) recalculation of dumping margins in a manner consistent with this opinion. The ITA is directed to report its findings to the court within one hundred twenty (120) days of the date of this order.

(Slip Op. 86-18)

DONNA KELLEY, ET AL., PLAINTIFFS *v.* SECRETARY, U.S. DEPARTMENT OF LABOR, DEFENDANT

Court No. 85-03-00437

OPINION AND ORDER

[Motion for certification for interlocutory appeal denied.]

(Decided February 20, 1986)

Donna Kelley, pro se.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, *Platte B. Moring, III,* Civil Division, United States Department of Justice, for defendant.

---

[10] The court has considered the remaining contentions of the parties and finds either that they are without merit, or that the court's determination to remand this action makes those contentions either moot, or not appropriate for consideration at this time. *See Ford Motor Co.* v. *NLRB,* 305 U.S. 364, 372-76 (1939) (it is familiar appellate practice to remand causes for further proceedings without deciding the merits, where justice demands that course in order that some defect in the record may be remedied).

RESTANI, *Judge:* Defendant has moved for certification of the statute of limitations issue as resolved by the court in Slip Op. 85–132, Court No. 85–03–00437. Before addressing the issue raised here, the court believes clarification of the court's decision on the statute of limitations may be helpful. Defendant asserts in its motion for certification that plaintiff-Kelley, and presumably her co-plaintiffs, did not appear before the Secretary of Labor as a petitioner in the investigation leading to denial of eligibility to apply for trade adjustment assistance. Although this appears from the administrative record to be the case, plaintiffs filed their action with this court to contest the Secretary's denial of the petition for eligibility and, therefore, plaintiff-Kelley and her co-plaintiffs stand in the shoes of the actual petitioners.[1] The petition for trade adjustment assistance lists three workers as petitioners and provides the name of the workers' representative by whom the petition was to be filed. Each of these four individuals signed the petition and their respective addresses were provided. Plaintiff alleged and defendant did not deny that Catherine McLeroy, one of the three worker-petitioners, received actual notice of the Secretary of Labor's denial of the petition on February 18, 1985.[2] There has been no indication that any of the other three petitioners received actual notice on an earlier date. Thus, the court determined that February 18, 1985, under the specific circumstances of this case, marks the beginning of the running of the statute of limitations. Thus, although there may be a suggestion in the court's original opinion that plaintiff-Kelley was an actual petitioner, the court concludes that this has no impact on the court's decision in Slip Op. 85–132.

In addition, defendant notes that plaintiff-Kelley knew that the Secretary of Labor's investigation of the petition would probably take six months to complete. That the Department of Labor is apparently unable to comply with the statutory sixty day time period for issuing determinations on such petitions, 19 U.S.C. § 2272 (1982 & Supp. I 1983), may support the need for Congress to amend the requirements of the statute. Informing petitioners of the approximate number of months that an investigation will take to complete, however, is not the same as telling the petitioners exactly when a determination will be issued and is not a substitute for compliance with section 2272. Such a general notification cannot remove the potential procedural consequences of a failure to

---

[1] The statute does not limit the parties entitled to challenge the Secretary of Labor's determination on a petition for eligibility to apply for trade adjustment assistance to those who filed the petition. Rather, the statute provides:

> A worker, group of workers, certified or recognized union, or authorized representative of such worker or group aggrieved by a decision of the Secretary of Labor under section 2273 of this title * * * may, within sixty days after notice of such determination, commence a civil action in the United States Court of International Trade for review of such determination.

19 U.S.C. § 2395(a) (1982).

There has been no question raised as to plaintiff-Kelley's status as a "worker" within the meaning of the statute, and her standing to bring suit is unaffected by whether she was a petitioner.

[2] Plaintiff-Kelley, too, received notice on that date.

comply with the statute and relevant regulations concerning notice procedures.

Finally, defendant notes that in *Brunelle* v. *Donovan*, 3 CIT 76 (1982), this court dismissed plaintiff's action for failure to comply with the statute of limitations despite the Secretary of Labor's delinquent issuance of its final determination on the petition for trade adjustment assistance. The court in *Brunelle*, however, did not specifically address the issue of the timeliness of the Secretary's determination and gave no indication that it even considered the issue. Thus, *Brunelle* is not persuasive as to the potential procedural consequences of a late determination.

To certify an issue for interlocutory appeal requires a showing that "a controlling question of law is involved with respect to which there is substantial ground for difference of opinion *and* that an immediate appeal from [the court's] order may materially advance the ultimate termination of the litigation." 28 U.S.C. § 1292(d)(1) (West Supp. 1985) (emphasis added). Interlocutory appeals are to be used only in those exceptional cases that are likely to require lengthy or expensive proceedings. *See National Corn Growers Association* v. *James A. Baker, III*, 9 CIT ——, Slip Op. 85-119 at 21-22 (Nov. 26, 1985); *C.L. Hutchins & Co., Inc.* v. *United States*, 67 Cust. Ct. 354, 358, C.D. 4297, 334 F. Supp. 188, 191 (1971). Defendant offers no facts to support the claim of the Office of Trade Adjustment Assistance that the court's remand order will require a rather lengthy investigation and the expenditure of more than a minimal amount of government resources. The court is not convinced that the burden imposed on defendant in carrying out the court's remand order, in terms of time or expense, is of such magnitude as to justify certification for interlocutory appeal. *See National Corn Growers*, Slip Op. 85-119 at 22 (indicating certification inappropriate where issues raised do not "portend a protracted trial"); *C.L. Hutchins*, 67 Cust. Ct. at 358, 334 F. Supp. at 191-92 (certification denied where proceedings not likely to be "expensive" or "protracted"). In this case, no trial is called for and the court is unable to conclude from defendant's conclusory statement that compliance with the remand order will require anything but ordinary administrative steps of a not particularly burdensome nature.

The normal course is to let litigation proceed on its own until termination by action of the parties or until a final court decision is reached. Interlocutory appeals have their own potential for delay. Therefore, certification should not be permitted unless the court is convinced that the proceedings sought to be avoided would be protracted or expensive. *See Milbert* v. *Bison Laboratories*, 260 F.2d 431, 433 (3d Cir. 1958) (discussing parallel interlocutory appeal provision applicable to federal district courts) (cited in *Caldwell* v. *Chesapeake & Ohio Railway Co.*, 504 F.2d 444, 446 (6th Cir. 1974); *Kraus* v. *Board of County Road Commissioners*, 364 F.2d 919, 922 (6th Cir. 1966)). Here, the potential for delay in termination of the

litigation both in terms of the parties' interests and in terms of judicial economy dictates denial of defendant's motion for certification to file an interlocutory appeal and for stay of the court's order.

(Slip Op. 86-19)

TERUMO CORP., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 84-8-01089

Before DICARLO, *Judge.*

Plaintiff challenges classification of dialyzers used to filter and purify blood under item 709.17 of the Tariff Schedules of the United States (TSUS), arguing that the merchandise is classifiable under item 661.95, TSUS. Defendant moves for summary judgment.

Held: Medical dialyzers are properly classified under Schedule 7, Part 2, Subpart B, TSUS, rather than under a provision describing nonmedical merchandise.

[Defendant's motion is granted.]

(Decided February 21, 1986)

Stein Shostak Shostak & O'Hara (Robert Glenn White) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Field Office, Department of Justice (*Saul Davis*), for the defendant.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Plaintiff challenges the United States Customs Service (Customs) classification of merchandise invoiced as "Clirans Hollow Fiber Dialyzers" under item 709.17 of the Tariff Schedules of the United States (TSUS) as "Electro-medical apparatus, and parts thereof: * * * Other." Plaintiff claims that the dialyzers are properly classifiable under item 661.95, TSUS, as "filtering and purifying machinery and apparatus * * * for liquids or gases * * * and parts thereof * * * other."

Defendant moves for summary judgment. The parties agree that the dialyzers are used for medical purposes in the filtering and purifying of blood and that there are no questions of fact which prevent the Court from deciding the motion. Defendant's motion is granted.

Defendant asserts that item 661.95, TSUS, comes under Headnote 1(v) to Schedule 6, Part 4, TSUS, which states: "This part does not cover— * * * articles and parts of articles specifically provided for elsewhere in the schedules." Defendant argues that the dialyzers are specifically provided for under item 709.17, TSUS, as other electro-medical apparatus. Further, says defendant, even if item 709.17, TSUS, is not a specific provision within the meaning of Headnote 1(v), the merchandise is still properly classified under that provision.

Plaintiff contends that item 709.17, TSUS, is a broad tariff provision which does not provide "specifically" for the dialyzers within the meaning of Headnote 1(v) to Schedule 6, Part 4. Plaintiff admits that the merchandise comes within the description of item 709.17, TSUS, but argues that item 661.95, TSUS, is more specific. It also argues that the Brussels Nomenclature [1] indicates Congressional intent that dialyzers be classified under item 661.95, TSUS, as filtering and purifying machinery.

The Court holds that the specificity of the competing provisions does not control since Congress intended that medical dialyzers be classified under Part 2 of Schedule 7. "[T]he basic rule of construction of a statute is that the intent of Congress is to be given effect and all other rules of construction must yield * * *." *S & T Imports, Inc.* v. *United States,* 78 Cust. Ct. 45, 49, C.D. 4690 (1977). The Court may look to the intent of Congress when "not entirely certain of the meaning of the statutory language when applied to the particular facts of this case." *Rikfin Textiles Corp.* v. *United States,* 54 CCPA 138, 142, C.A.D. 925, *cert. denied,* 389 U.S. 931 (1967).

The *Explanatory Notes* to the Brussels Nomenclature are a source for ascertaining legislative intent, where the language of the Brussels Nomenclature and the TSUS are similar. *See Toyota Motor Sales, U.S.A., Inc.* v. *United States,* 7 CIT ——, 585 F. Supp. 649, 655 (1984), *aff'd,* 753 F.2d 1061 (Fed. Cir. 1985). Items 661.95 and 709.17 of the TSUS are similar to Headings 84.18 and 90.17 of the Brussels Nomenclature. *See Pharmacia Fine Chemicals, Inc.* v. *United States,* 7 CIT ——, 585 F. Supp. 649, 655 (1984), *aff'd,* 753 F.2d 1061 (Fed. Cir. 1985); *Nippon Kogaku (U.S.A.), Inc.* v. *United States,* 1 CIT 328, 521 F. Supp. 466 (1981).

Plaintiff contends that the dialyzers are classifiable under item 661.95, TSUS, since the *Explanatory Notes* state regarding Brussels Heading 84.18:

> The heading also covers dialysers, special type filters consisting essentially of a semi-permeable membrane through which liquids can pass by diffusion and thus be separated from colloidal particles.

This note, which refers to dialyzers generally, does not indicate that Heading 84.18 covers dialyzers that are chiefly used for medical purposes.[2]

---

[1] Customs Co-Operation Council, *Nomenclature for the Classification of Goods in Customs Tariffs* (1955) (Brussels Nomenclature), and *Nomenclature-Explanatory Notes* (1955).

[2] *Webster's Third New International Dictionary* defines the following terms:

dialyzer: an apparatus in which dialysis is carried out consisting essentially of one or more containers for liquids separated into compartments by membranes in any of various forms (as a sheet, bag or tube)

dialysis * * * 1: the separation of substances in solution by means of semipermeable membranes (as of parchment, cellophane, or living cells) through which the smaller molecules and ions diffuse readily whereas the larger molecules and colloidal particles diffuse very slowly or not at all, such separations being important in nature (as in living organisms and in soils) and having many applications (as in blood) fractionation or in the recovery of sodium hydroxide in the manufact of viscose)—used esp. of the separation of noncolloids from colloids (as proteins); * * * 2 bot: the tion of parts which are normally united esp. in the same floral whorl

The *Explanatory Notes* description of Brussels Heading 90.17 indicates that articles described by a term which may be used to describe both medical and nonmedical apparatus should be classified under the heading which describes the term in its general meaning only where the articles in question are not identifiable as being for medical use:

> This heading covers a very wide range of instruments and appliances which, in the vast majority of cases, are used only in professional practice (e.g., by doctors, surgeons, dentists, veterinary surgeons, midwives, etc.), either to make a diagnosis, or * * * to carry out some treatment on the patient.
>
> * * * * * * *
>
> It should be noted that a number of the instruments used in medicine and surgery (human and veterinary) are, in effect, tools * * *. Such articles are classified in the present heading only when they are clearly identifiable as being for medical or surgical use * * *.

Therefore, while nonmedical dialyzers might come under Brussels Heading 84.18, medical dialyzers would be classified under heading 90.17.[3] To the extent that the *Explanatory Notes* are relevant, they support Customs classification.

The intent of Congress is more explicitly shown in the *Tariff Classification Study*. "The *Tariff Classification Study*, published by the United States Tariff Commission pursuant to Congressional delegation (Customs Simplification Act of 1954, Public Law 83-768, 68 Stat. 1136), is regarded by the court as a source of legislative history of the TSUS." *Certified Blood Donor Services, Inc.* v. *United States*, 62 CCPA 66, 69 n.2, C.A.D. 1147, 511 F. 2d 572, 575 (1975).

The *Tariff Classification Study* says that Schedule 7, Part 2, Subpart B, entitled "Medical and Surgical Instruments and Apparatus," which contains item 709.17, encompasses medical instruments and appliances which previously were spread among seven of the schedules of the Tariff Act of 1930.

> This subpart covers a wide variety of instruments and appliances used generally in professional practice for diagnosis, prevention, and treatment of diseases, the correction of deformities and defects, the repair of injuries, etc. These articles are presently dutiable at a number of different rates in a number of widely separated paragraphs in seven of the present tariff schedules. In assimilating the various provisions for these closely related instruments and appliances into this subpart, articles imported in significant quantities have been provided for wherever possible at the existing rates of duty * * *.

9 *Tariff Classification Study*, at 144-46.

---

[3] Headnote 1(e) to chapter 84 of the Brussels Nomenclature provides further indication that medical dialyzers would be classified under heading 90.17. The headnote states: "This section does not cover * * * articles falling within chapter 90."

Plaintiff's proposed classification, item 661.95, TSUS, is contained in Schedule 6 of the TSUS, entitled "Metals and Metal Products." Its predecessor, Schedule 3 of the Tariff Act of 1930, entitled "Metals and Manufactures of," was one of the seven schedules from which Schedule 7, Part 2, Subpart B was assimilated.[4]

Schedule 6, Part 4 of the TSUS was intended to cover general-purpose articles rather than medical equipment. Subpart A, which includes item 661.95, TSUS, is entitled "Boilers, Non-Electric Motors and Engines, and Other General-Purpose Machinery." The Tariff Classification Study states:

> This subpart covers a wide variety of machinery and appliances which can be used in numerous industrial applications as set forth in headnote 1 to this subpart. * * * The systematic grouping of general-purpose machines and appliances in this subpart, together with the rule expressed in the headnote, would provide greater stability to the product classifications.

8 *Tariff Classification Study*, at 260. Nothing in the *Tariff Classification Study* indicates that medical equipment is classifiable under item 661.95, TSUS.[5]

The Court concludes that Schedule 6, Part 4 of the TSUS does not provide for the classification of medical dialyzers which are properly classified under Schedule 7, Part 2, Subpart B of the TSUS.

After considering the undisputed facts, the relevant portions of the TSUS, and the intent of Congress, the Court concludes that medical dialyzers fall within Schedule 7, Part 2, Subpart B of the TSUS, and that they are properly classified within that subpart under item 709.17, TSUS.[6] Judgment will be entered accordingly. So ordered.

(Slip Op. No. 86-20)

KENDA RUBBER INDUSTRIAL CO., LTD., ET AL., PLAINTIFFS *v.* UNITED STATES, DEFENDENT

Court No. 84-7-00949

Before CARMAN, *Judge*.

---

[4] *See* 9 *Tariff Classification Study*, at 144. The predecessor provisions to the items contained in Schedule 7, Part 2, Subpart B indicate that this subpart was assimilated from schedules 2, 3, 4, 9, 12, 13, and 15 of the Tariff Act of 1930. *See id.* at 102-03.

[5] The *Tariff Classification Study* lists as predecessor provisions to item 661.95, TSUS, paragraphs 353, 360 and 372 of the Act. 8 *Tariff Classification Study* at 243, 263. Insofar as any medical instruments might previously have been classified under those paragraphs, such articles are currently provided for under Subpart B to part 2 of Schedule 7, since paragraph 360 is cited as a predecessor to item 790.07, TSUS, and paragraph 372 as predecessor to items 709.40 and 709.45, TSUS.

Although paragraph 353 of the Tariff Act of 1930 refers to certain therapeutic and diagnostic apparatus, it provided for non-medical articles as well. Since paragraph 353 is cited as a predecessor provision to item 709.17, as well as item 709.40, 709.45, 709.50, and 709.61-70, TSUS, it is apparent that Congress intended that the portion of that paragraph relating to medical articles be succeeded by provisions contained in Schedule 7, and that the portion relating to non-medical articles be succeeded by provisions contained in Schedule 6.

[6] The Court need not, and does not, address defendant's argument that item 709.17, TSUS, is a provision which describes dialyzers "specifically" within the meaning of Headnote 1(v) Schedule 6, Part 4.

[Judgment for defendant.]

(Decided February 24, 1986)

Myron Solter for the plaintiff.

Lyn M. Schlitt, General Counsel, *Michael P. Mabile*, Assistant General Counsel, and *Brenda A. Jacobs*, United States International Trade Commission, for the defendent.

CARMAN, *Judge:* Before the Court is plaintiffs' motion for judgment upon the agency record, pursuant to Rule 56.1, in this antidumping investigation. Defendant United States opposes the motion. Plaintiffs ask for a review of the International Trade Commission's (Commission) determination in *Bicycle Tires and Tubes from Taiwan*, U.S.I.T.C. Public. 1532, Investigation No. 731-TA-166 (Final) (May 1984), that imports of bicycle tires and tubes from Taiwan are materially injuring industries in the United States.

Plaintiffs challenge the Commission's determination on basically two grounds. First, plaintiffs contend that the Commission improperly found injury to the separate tire and tube industries on the basis of aggregated data. Second, plaintiffs claim that a majority of Commission members based their determination on a period six to nine years before the date of the determination, and that the use of such a period contravenes the language of the relevant statute. Use of the earlier period, plaintiffs claim, made it impossible to determine whether the dumping caused the injury, and a determination based on that period, when applied to present entries, operates as an unlawful penalty. For the reasons given below, the Court sustains the Commission's determination.

BACKGROUND

Before outlining the facts of this case, it may be useful to examine the procedures followed in an antidumping investigation, since much of the controversy in this case arises from a disjointed procedure that resulted from a court remand. To initiate an antidumping investigation, an interested party files a petition with the administering authority, the United States Department of Commerce (Commerce) [1] and simultaneously with the Commission, alleging the sale of imports at less than fair value (LTFV). 19 U.S.C. § 1673a(b) (1982). Within 20 days Commerce determines whether to initiate an investigation and informs the Commission of its determination. If Commerce decides to initiate an investigation, the Commission makes a preliminary determination of whether there is a reasonable indication that the alleged LTFV sales are injuring or threatening to injure a domestic industry. 19 U.S.C. § 1673b(a). If the Commission's determination is affirmative, Commerce conducts an investigation and arrives at a preliminary determination of

[1] The administering authority is currently Commerce, but at the time of the initial investigation in this case it was the Department of Treasury. The administering authority may also initiate its own investigation. 19 U.S.C. § 1673a(a) (1982).

whether there have been LTFV sales. 19 U.S.C. § 1673b(b). Commerce then performs a complete investigation and arrives at a final determination. 19 U.S.C. § 1673d(a). Finally, if Commerce's final determination is affirmative, the Commission performs its complete investigation and makes its final determination of whether the LTFV sales materially injure or threaten to injure a domestic industry. *Id.* at § 1673d(b). The statutory scheme involves a series of interlocking steps by the agencies, the next step of each dependent upon the prior step of the other. The statute clearly contemplates that each step will follow close upon the other, mandating a period of days for the completion of each step. From filing of the petition to the Commission's final injury determination should take 230 days, if verification is waived (*see* 19 U.S.C. § 1673b(b)(2)), to at most 420 days in an extraordinary complicated case (*see* 19 U.S.C. § 1673b(c)).

In this case the administering authority at the time, the United States Department of Treasury (Treasury), made a negative final determination as to LTFV sales, which the petitioner appealed. Upon remand the new administering authority, Commerce, made an affirmative final determination, and the Commission then made an affirmative injury determination, serveral years after Treasury's initial investigation. It is the Commission's determination that plaintiffs now challenge. A more detailed history of the case follows.

In January 1978 Carlisle Tire & Rubber Co. filed a petition with Treasury alleging LTFV sales of bicycle tires and tubes from Taiwan. In December 1978 Treasury made a negative final determination of LTFV sales [2] and Carlisle appealed to this court's predecessor, the United States Customs Court. In May 1982 the court remanded that case, Court No. 79-3-00513, instructing that a different methodology be used to calculate dumping margins.

While that case was under advisement, Carlisle filed a new petition again alleging LTFV sales of bicycle tires and tubes from Taiwan. The Commission conducted a preliminary investigation and determined that there was a reasonable indication that the alleged dumping was injuring a domestic industry. U.S.I.T.C. Public. 1258, Investigation No. 731-TA-94 (Preliminary) (June 1982). In May 1983, however, Commerce made a final negative determination regarding LTFV sales occurring between December 1, 1981 and May 31, 1982. Carlisle's appeal of that determination to this court was designated Court No. 83-5-00773.

In October 1983 Commerce issued its redetermination in the remanded 1978 investigation, finding LTFV sales, and referred the case to the Commission for an injury determination. *See* 49 Fed. Reg. 2492 (1984). At this juncture Carlisle settled its appeal of the 1982 determination, on the basis of Commerce's affirmative rede-

[2] Because Carlisle filed its petition prior to passage of the 1979 Trade Agreements Act, Treasury did not refer the case to the Commission for a preliminary injury determination.

termination in the 1978 case, and the court issued an order dismissing the appeal.

In January 1984 the Commission began its final injury determination in the 1978 case. The Commission sent a questionnaire to Carlisle [3] and to importers and purchasers of imported bicycle tires and tubes, seeking data for the period 1981–1983. During the investigation the Commission also determined that it had in its files data on the domestic industry and imports dating from 1973. The data had been collected in a 1978 investigation under section 201 of the Trade Act of 1974, preliminary antidumping and countervailing duty investigations in 1982, and a 1983 review investigation under section 104 of the Trade Agreements Act of 1979. The Commission determined that the data from these investigations were calculated on the same basis as the data in the ongoing investigation. It therefore incorporated some of the tables and the staff reports from the prior investigations into the record in the ongoing investigation.

Controversy arose during the investigation as to which time period the Commission should examine to determine injury—the period of the initial investigation, around 1978, or the "present" period, 1981–1983. Carlisle argued that the earlier period was appropriate, while the Taiwanese respondents argued for the present period. The Commissioners did not reach a unanimous decision on which time period to use, though whichever period each used, all of them found that the domestic industry was injured by LTFV sales of imports. Commissioners Stern, Haggart, and Rohr based their decision on the period 1975–1978, U.S.I.T.C. Public. 1532, at 3 n.1, although Commissioner Haggart also noted that she had considered the 1981–1983 data and reached the same conclusion. *Id.* Then-Chairman Eckes and Commissioner Lodwick based their injury determination on the period 1975–1983. In January 1984 plaintiffs appealed the Commission's affirmative injury determination. That appeal is now before the Court.

OPINION

Plaintiffs raise a number of challenges to the Commission's determination, all of which fall into basically two categories. First, plaintiffs claim that the Commission improperly found injury to the separate tire and tube industries on the basis of aggregated data. Second, they claim that the determination was based upon data from the period 1975–1978 and that the use of this earlier time period was improper. Plaintiffs claim that in committing these two errors the Commission acted *ultra vires* and its determination is therefore void. An agency action is *ultra vires* when the agency has acted beyond the scope of its defined authority. In this case, the Commission conducted an investigation and issued a de-

[3] Defendant asserts, and plaintiff does not contest, that Carlisle was the only domestic producer of bicycle tires and tubes. *See* Defendant's Brief at 6.

termination within the confines of its statutorily granted authority. Plaintiffs present no evidence that the Commission exceeded that authority. The Court's review of agency determinations in such a case is governed by 19 U.S.C. § 1516a(b)(1)(B) (1982). Thus, under that statute, the issues in this case are whether the Commission's determination is "unsupported by substantial evidence on the record, or otherwise not in accordance with law" (1) because the agency based its determination of injury to the separate tire and tube industries on data that was not segregated for, 1975–1978 as to the profits for each industry, and (2) because the agency based its determination on an improper time period.

A. *Separate Injury Based on Aggregated Profits Data*

The Commission found that the bicycle tire and bicycle tube industries were separate industries, and that each was separately injured by reason of LTFV imports. U.S.I.T.C. Public. 1532, at 8, 15. To reach this determination, the Commission relied on data in its files compiled in part from previous investigations. *Id.* at 6. For the period 1979–1983 the Commission had before it segregated data regarding all relevant aspects of the domestic industries, including profits data. For the period 1975–1978 the Commission had segregated data on all relevant aspects of the domestic industries except profits. Nothing in the record of the investigation indicates that the Commission made any attempt to obtain segregated profits data for 1975–1978.

Under the appropriate standard of review, the first question the Court must address is whether the Commission acted in accordance with law when it failed to request segregated profits data from Carlisle for the period 1975–1978. In other words, did the Commission have an affirmative duty to attempt to obtain this data? The Court finds that the relevant statute should not be read so strictly as to impose upon the agency an affirmative duty to obtain segregated profits data.

The controlling statute is 19 U.S.C. § 1677 (1982), which contains definitions and special rules governing both countervailing duty and antidumping investigations. In determining "material injury" to a domestic industry, the Commission is required to consider the impact of the LTFV imports on the domestic industry, and is further required to "evaluate all relevant economic factors which have a bearing on the state of the industry, including, but not limited to * * * profits. 19 U.S.C. § 1677(7)(C)(iii)(I) (1982). Thus to determine whether there is material injury to an industry, the Commission must look at a variety of factors, including profits. The statute further instructs the Commission to determine injury for like products separately, where possible.

> The effect of subsidized or dumped imports shall be assessed in relation to the United States production of a like product if available data permits the separate identification of production

> in terms of such criteria as the production process or the producer's profits.

19 U.S.C. § 1677(4)(D) (1982).

Plaintiff would have the Court construe these provisions to require the Commission to seek separate profits data in every instance where more than one industry is affected. Although ideally an investigation would include such data, neither the legislative history of the statute nor the cases construing it require such a strict reading. The Senate Report accompanying the 1979 amendment that added the present section 1677 indicates that the Commission is to consider a variety of factors relating to each separate product where separate consideration is reasonable.

> In examining the impact of imports on the domestic producers comprising the domestic industry the ITC should examine the relevant economic factors (such as profits, productivity, employment, cash flow, capacity utilization, etc.), as they relate to the production of only the like product, if available data permits a reasonably separate consideration of the factors with respect to production of only the like product.

S. Rep. No. 249, 96th Cong., 1st Sess. 83–84 (1979). This Court had occasion to examine this passage of the Senate Report in *Roquette Freres* v. *United States*, 7 CIT ——, 583 F. Supp. 599 (1984). After quoting this passage the Court stated, "It is incumbent on the ITC to acquire all obtainable or accessible information from the affected industries on the economic factors *necessary for its analysis.*" 583 F. Supp. at 604 (emphasis added). Congress did not intend to require the Commission to obtain separate data on every enumerated economic factor; rather, it directed the Commission to obtain such data, where possible, as allows it to make "a reasonably separate consideration."

That the statute does not require the Commission to seek separate data for every factor is supported by the analogous case of *Atlantic Sugar, Ltd.* v. *United States*, 744 F.2d 155¢ (Fed. Cir. 1984) (*rev'g* 4 CIT 248, 553 F. Supp. 1055 (1982)). That case involved a final injury determination in which the Commission considered impact on regional industries. *See* 19 U.S.C. § 1677(4)(C) (1982). One producer claimed it was unable to provide segregated data for each of its plants, and therefore could not provide data segregated by region. The Commission accordingly applied the "best information" rule, which allows it to use the best information available when a party is unable or refuses to produce requested information. *See* 19 U.S.C. § 1677e(b) (1982). This court found that the Commission's use of the aggregated data was improper, stating that the Commission could not consider data from outside the regional boundaries it had established. *Atlantic Sugar, Ltd.* v. *United States*, 4 CIT 248, 250, 553 F. Supp. 1055, 1058 (1982).

The Court of Appeals for the Federal Circuit reversed on this point. It found that the Commission was not required to obtain

completely segregated data. 744 F.2d at 1562. Instead, the court examined the entire record to determine whether the conclusions the Commission drew from the data were supported by substantial evidence on the record. *Id.*[4] That is the issue that must now be addressed in the instant case.

The "substantial evidence" standard of review has been well explicated in many decisions. *See Carlisle Tire and Rubber Co.* v. *United States,* 9 CIT ——, 622 F. Supp. 1071 (1985). Review of the agency determination is limited, ensuring that agency conclusions are reasonably drawn from some evidence, more than a mere scintilla, in light of the record as a whole. Applying this standard to the Commission's determination of injury to the bicycle tire and tube industries, the Court finds that there is sufficient evidence in the record from which a reasonable mind might draw the conclusions that the Commission drew.

The Commission had before it segregated data for bicycle tires and tubes regarding domestic shipments, production, exports, consumption, capacity, manufacturing costs, prices, inventories, employment, as well as imports for consumption. The Commission also had aggregated data for profits, and segregated data for profits from 1979 forward. The Court finds that this was sufficient data from which the Commission could conclude that the domestic industries were injured during the period 1975–1978.

B. *The Time Period of the Investigation*

The statute under which the Commission makes its injury determination provides in relevant part:

> The Commission shall make a final determination of whether an industry in the United States is materially injured, or is threatened with material injury * * * by reason of imports of the merchandise with respect to which the administering authority has made an affirmative determination under subsection (a)(1) of this section.

19 U.S.C. § 1673d(b)(1). Plaintiffs contend that this statute requires the Commission to make a present determination of injury and that a majority of the Commission members erroneously based their determination on the period 1975–1978. Plaintiffs also con-

[4] Plaintiffs also cite *Budd Co., Ry. Div.* v. *United States,* 1 CIT 67, 507 F. Supp. 997 (1980), to support their argument. That case involved a preliminary injury determination by the Commission, which the relevant statute requires be made based upon "the best information available." 19 U.S.C. § 1673b(a) (1982). The court construed the statute's command to mean that "all information that is 'accessible or may be obtained,' from whatever its source may be, must be reasonably sought by the Commission." 1 CIT at 75, 507 F. Supp. at 1003–04. The Commission in that investigation had obtained no data on domestic producers of components and parts, yet found that the domestic industry was not injured. The court held that this determination was not supported by substantial evidence in the record, and further found that the Commission had not conducted a thorough investigation as required by statute. *Id.* at 79, 507 F. Supp. at 1006. Thus the court implicitly found that the determination was not in accordance with law, as well as unsupported by substantial evidence.

Although the court in *Budd Co.* used broad language imposing a duty upon the Commission to obtain *all* information, the facts in that case clearly distinguish it from the instant case. There the Commission had gathered essentially no data. Here the Commission had data relating to each of the factors enumerated in the statute, including profits. Lack of certain segregated data might render a determination unsupported by substantial evidence, but it does not make the determination out of accordance with law.

tend that the Commission's use of the earlier period made it impossible to determine the requisite causal connection between the LTFV imports, and that the Commission's use of the earlier period when applied to present entries operates as an unlawful penalty.

Plaintiffs argue that the statute requires the Commission to look at the present period because of the present tense wording of the statute. Although the relevant section is cast in the present tense, the Court does not find this argument compelling. The statutory scheme contemplates that antidumping determinations will be made in a relatively short space of time, usually less than one year, from the time the petition is filed until the final injury determination is made. Thus Congress apparently intended the Commission's determination to follow hard upon Commerce's finding of LTFV imports. In a normal investigation, the present tense language of the statute anticipates that the Commission will examine a time period close to that examined by Commerce. In an unusual case such as this, the statutory scheme has been interrupted. Had Treasury originally found LTFV imports, the Commission would then have examined the earlier period. When this Court remanded to Commerce, it directed Commerce to reexamine the period of the original investigation. There is some logic in the Commission, too, examining that earlier period. Indeed in other cases where this court has remanded to the Commission, it has directed it to look at the early period it originally investigated. *See, e.h., Roquette Freres* v. *United States*, 7 CIT ——, 583 F. Supp. 599 (1984).

The court hesitates, however, to establish an absolute rule that would require the Commission to examine a period years earlier where Commerce finds LTFV imports in a remanded case. It may not always be possible for the Commission to obtain data regarding the earlier period. As the statute does not expressly command the Commission to examine a particular period of time, the Court finds that the Commission has discretion to examine a period that most reasonably allows it to determine whether a domestic industry is injured by LTFV imports.[5]

Plaintiffs further protest that by failing to determine injury during the present period, the Commission made it impossible to find the requisite causality between the injury and the LTFV imports. Plaintiff is correct that the Commission must find that the injury occurred "by reason of" the LTFV imports. This is precisely what the Commission found. *See* U.S.I.T.C. Public. 1532, at 15. Commerce's investigation covered the period September 1, 1977 through February 28, 1978. The Commission majority based its determina-

[5] The Commission's determination in this investigation is rather unusual in that the Commissioners were split over which time period was most appropriate. Three Commissioners considered the 1975–1978 period, while two based their decision on 1975–1983. Of the three who looked at 1975–1978, one said that she also considered the period 1981–1983, and that "she would have reached an affirmative determination based on the period 1981–83 as well." U.S.I.T.C. Public. 1532, at 3 n.l. The Commission's analysis accompanying the determination also discussed the entire period of 1975–1983. One could argue, then, as defendant does, that a majority of the Commission's members looked both at the 1975–1978 period, and at the later 1981–1983 period, which plaintiffs contend applies.

tion on the period 1975–1978. The Court concludes that it was both possible and reasonable for the Commission to determine that the injury it found was caused by the LTFV imports during the time of Commerce's investigation.

Plaintiff finally complains that the Commission's injury determination operates as an unlawful penalty because presumably it will lead to imposition of duties on entries made after 1982, when Commerce found in its later investigation that there were no LTFV imports. The only agency action that the Court is reviewing in this case is an injury determination by the Commission, not a final antidumping duty order issued by Commerce. The Commission's determination that the domestic industries are injured by reason of the LTFV imports found by Commerce does not operate as an unlawful penalty.

Conclusion

The Court finds that the Commission's use of aggregated profits data and its consideration of the 1975–1978 period are in accordance with law. Moreover, the Court finds the Commission's actions reasonable in light of the fact that the Commission had a wealth of data from this early period, and further finds the Commission's conclusion that LTFV imports were injuring a domestic industry is supported by substantial evidence in the record. The Commission's determination, being both supported by substantial evidence and in accordance with law, is therefore sustained.

(T.D. 86-59)

Customs Regulations Amendments Relating to Penalties for Failure to Manifest Narcotics or Marihuana

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to clarify that the $500 penalty amount set forth for failure to manifest merchandise found aboard or unladen from aircraft does not apply to such violations involving narcotics or marihuana. The penalty amount for failure to manifest these substances is that provided for in 19 U.S.C. 1584, for failure to manifest narcotics or marihuana. This section is made applicable to aircraft by 19 U.S.C. 1431(b) and 1644. This action is necessary in order to avoid any confusion as to the penalties applicable to non-manifesting violations involving narcotics or marihuana.

EFFECTIVE DATE: March 12, 1986.

FOR FURTHER INFORMATION CONTACT: Stuart P. Seidel, Office of Chief Counsel (202-566-2482), U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Sections 6.7 and 6.11, Customs Regulations (19 CFR 6.7, 6.11), provide for civil penalties of $500 for failure to manifest merchandise carried by aircraft and other violations of the Customs laws and regulations respecting aircraft. Section 162.72(b), Customs Regulations (19 CFR 162.72(b)), provides for an identical penalty for failure to manifest merchandise found aboard or unladen from an aircraft, and a $10,000 or domestic value of merchandise penalty for unmanifested merchandise found aboard or unladen from a vessel or vehicle. Section 162.65(b), Customs Regulations (19 CFR 162.65(b)), states that the penalties applicable to violations involv-

ing unmanifested narcotic drugs found aboard or unladen from a vessel or vehicle are those prescribed in § 584, Tariff Act of 1930, as amended (19 U.S.C. 1584). Since these penalties are based upon a flat rate of $10, $25, or $50 (depending upon the nature of the controlled substance found), times the number of ounces of the controlled substance, they are often greatly in excess of $500.

Customs routinely assesses penalties under 19 U.S.C. 1584 for failure to manifest narcotics and marihuana found aboard or unladen from aircraft. However, persons and some air carriers have alleged that, as written, the Customs Regulations do not permit penalties in excess of $500 for failure to manifest violations involving aircraft, regardless of the nature of the non-manifested merchandise. These parties maintain that §§ 6.7(h)(5) and 6.11, as well as § 162.72(b), mandate $500 penalties for all manifest discrepancy violations involving merchandise carried by aricraft.

We do not agree with these allegations. However, in order to remove any ambiguity and to preclude any misunderstanding that the $500 manifest discrepancy penalties are not applicable to violations involving narcotics or marihuana, we are amending §§ 6.7, 6.11, and 162.72(b), Customs Regulations, to make it clear that manifest discrepancy violations involving narcotics or marihuana are covered by the specific penalty provisions of 19 U.S.C. 1584. We are also amending §§ 162.65 (b) and (e), Customs Regulations, to include marihuana among the substances for which failure to manifest would result in a penalty under the provisions of 19 U.S.C. 1584, and to include aircraft among the conveyances which may be involved in a failure to manifest violation. The penalty provisions of 19 U.S.C. 1584 were made applicable to aircraft by §§ 431(b) and 644, Tariff Act of 1930, as amended (19 U.S.C. 1431(b), 1644).

Other minor non-substantive amendments to Parts 6 and 162, Customs Regulations, are also made to update the regulations and to conform them to the other changes.

Inapplicability of Public Notice and Delayed Effective Date Provisions

Inasmuch as these are minor amendments which merely clarify existing statutes and regulations, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary, and pursuant to 5 U.S.C. 553(d)(3), a delayed effective date is not required.

Executive Order 12291

Because this document will not result in a "major rule" as defined by E.O. 12291, the regulatory analysis and review prescribed by the E.O. is not required.

Regulatory Flexibility Act

This document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 602 *et seq.*). That Act does not apply to any regulations, such as these, for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) or any other statute.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Amendments to the Regulations

Part 6, Customs Regulations (19 CFR Part 6), is amended as set forth below.

PART 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 is revised to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1624, 49 U.S.C. 1474, 1509; § 6.2 also issued under 19 U.S.C. 1322, 1448, 1450, 1451, 1644; § 6.6 also issued under 19 U.S.C. 1431; § 6.7 also issued under 19 U.S.C. 1431 and 1644; § 6.8 also issued under 19 U.S.C. 1644, 46 U.S.C. 91, 92; § 6.10 also issued under 19 U.S.C. 1644; § 6.11 also issued under 19 U.S.C. 1431; § 6.17 also issued under 19 U.S.C. 1551, 1552, 1553; §§ 6.18 and 6.20 also issued under 19 U.S.C. 1552, 1553.

2. The first sentence of § 6.7(h)(5) is amended by inserting, after the phrase "under § 584, Tariff Act of 1930, as amended", a parenthetical reference to "(19 U.S.C. 1584)", and by inserting, after the word "overage", the phrase "other than narcotics or marihuana (see § 162.65 of this chapter),".

3. Section 6.10 is amended by removing the word "part" and by inserting, in its place, the word "chapter".

4. The first sentence of § 6.11 is amended by inserting, after the amount "$500," the phrase "except for failure to manifest narcotics or marihuana in which case the penalties set forth in § 584, Tariff Act of 1930, as amended (19 U.S.C. 1584) apply,".

5. Section 6.11 is further amended by inserting, in the second sentence, after the phrase "§ 466, Tariff Act of 1930, as amended," a parenthetical reference to "(19 U.S.C. 1466)".

Part 162, Customs Regulations (19 CFR Part 162), is amended as set forth below.

PART 162—RECORDKEEPING, INSPECTION, SEARCH, AND SEIZURE

1. The authority citation for Part 162 is revised to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1624; § 162.32 also issued under 19 U.S.C. 1603, 1610; § 162.44 also issued under 19 U.S.C. 1614; § 162.46 also issued under 19 U.S.C. 1609, 1611; §§ 162.65 and 162.72 also issued under 19 U.S.C. 1431(b) and 19 U.S.C. 1644.

2. Section 162.65 is amended by revising the heading to paragraph (b), and the text of paragraphs (b), (d), and (e), to read as follows:

§ 162.65 Penalties for failure to manifest narcotic drugs or marihuana.

* * * * * * *

(b) *Unmanifested narcotic drugs or marihuana.* When an unmanifested narcotic drug or marihuana is found on board of, or after having been unladen from, a vessel, vehicle, or aircraft, the penalties prescribed in § 584, Tariff Act of 1930, as amended (19 U.S.C. 1584), shall be assessed. The penalty shall be applied without exception and without regard to any question of negligence or responsibility.

(c) * * *

(d) *Referral to the U.S. attorney.* If the penalty incurred under § 584, Tariff Act of 1930, as amended (19 U.S.C. 1584), is not paid, or a petition is not filed as provided in Part 171 of this chapter, or if payment is not made in accordance with the decision on a petition or a supplemental petition, the district director, after required collection action, shall refer the case to the U.S. attorney.

(e) *Withholding clearance of vessel.* Where a penalty has been incurred under § 584, Tariff Act of 1930, as amended (19 U.S.C. 1584), for failure to manifest narcotic drugs or marihuana, clearance of the vessel involved shall be withheld until the penalty is paid or a bond satisfactory to the district director is given for the payment thereof unless

(1) The narcotics or marihuana were discovered in a passenger's baggage and the district director is satisfied that neither the master nor any of the officers nor the owner of the vessel knew or had any reason to know or suspect that the narcotics or marihuana had been on board the vessel, or

(2) Prior authority for the clearance without payment of the penalty or the furnishing of the bond is obtained from Customs.

3. Section 162.72(b)(3)(ii) is revised to read as follows:

§ 162.72 Penalties and forfeitures under §§ 466 and 584(a)(1), Tariff Act of 1930, as amended.

* * * * * * *

(b) * * *

(3)(i) * * *

(ii) A penalty of $500 (see § 6.11 of this chapter) if merchandise (other than narcotics or marihuana—see § 162.65 of this chapter) is found on board of or after having been unladen from an aircraft—if the merchandise is not included or described in the manifest or does not agree with the manifest (an "overage").

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: February 24, 1986.

FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

(T.D. 86-16)

Foreign Trade Zones; Specialized and General Provisions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document revises Customs Regulations relating to foreign trade zones to provide a new audit-inspection method of zone supervision by Customs. A foreign trade zone is a defined area, considered to be outside the Customs territory of the U.S., where certain lawful activities can be conducted with a minimum of formalities. A zone provides a site at or adjacent to a Customs port of entry where operations involving foreign merchandise can take place, which otherwise might have been done abroad for tariff and trade reasons. The revision sets forth the general provisions applicable to the administration of all zones and other specialized provisions applicable to subzones and zone sites. In addition, changes in the language of the regulations will clarify some provisions, eliminate inconsistencies, and conform the regulations to current administrative practices.

EFFECTIVE DATE: May 12, 1986.

Operational Aspects: John Holl, (202-566-8151);

Inventory Control and Recordkeeping System Aspect: Marcus Sircus, (202-566-2812);

Appraisement and Valuation Aspect: Myles Flynn, (202-535-4134);

Liquidated Damages, Penalty and Suspension Aspect: William Lawlor, (202-566-5856);

Economic Aspect: Daniel Norman, (202-535-4138).

All of the above Customs personnel are located at: U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In 1934, Congress enacted the Foreign-Trade Zones Act to expedite and encourage foreign commerce. The Act created domestic foreign trade zones and was designed to stimulate international trade and create jobs in the U.S. At that time, zones were envisioned as storage, manipulation, and transshipment (exportation) centers. In 1950, an amendment to the Act was passed, authorizing manufacturing and exhibition inside zones. Foreign trade zones

(zones) are areas within the U.S. (but outside the "Customs territory of the U.S.," as defined in § 101.1(e), Customs Regulations (19 CFR 101.1(e)), where foreign or domestic merchandise may be brought for manipulation, manufacture, assembly or other processing, or for storage or exhibition, provided that these operations are not otherwise prohibited by law. Foreign merchandise may be brought into a zone without being subject to the usual Customs entry procedures and payment of duty. Foreign or domestic merchandise may be exported or entered into the Customs territory from a zone. Quota restrictions do not normally apply to foreign merchandise in a zone. Merchandise moved to a zone for export may be considered exported upon its admission to a zone for purposes of excise tax rebates and drawback.

Zones are established under the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a–81u), and the general regulations and rules of procedure of the Foreign-Trade Zones Board (the Board), Department of Commerce (15 CFR Part 400). Part 146, Customs Regulations (19 CFR Part 146), governs the admission of merchandise into a zone; the manipulation, manufacture, destruction, or exhibition in a zone; the exportation of merchandise from a zone; and the transfer of merchandise from a zone into the Customs territory.

Typically, a foreign trade zone is a fenced-in area with a general warehouse type building or buildings and access to all modes of transportation. Space is available for leasing to firms for authorized zone activity. Some zones have industrial park characteristics or are located within such facilities and have lots on which zone users can construct their own facilities. Subzones are locations authorized by the Board through zone grantees for operations by individual firms when zone procedures are vital for an operation that is in the public interest but cannot be accommodated within an existing zone.

Between 1934 and 1970, just 12 zones were approved by the Board. At this time, there are 109 general purpose zones and 60 subzones. It has been estimated that the volume of business in zones has multiplied substantially from 1970 to the present with zones now handling about $4.8 billion worth of merchandise each year.

As can be appreciated from the foregoing, the number of zones and the operations conducted therein have increased tremendously in recent years. Historically, Customs has administered zones and their operations by the physical presence of Customs officers at the various zone locations. However, as time has passed, Customs staffing available to supervise zones has declined while zones have continued to proliferate. This has resulted in delays in the approval of activation of a given zone, and has presented problems for Customs in the exercise of effective control over some zone operations, especially subzone manufacturing activities. Therefore, Customs undertook an effort to devise a method to reduce Customs staffing requirements in zones and other areas (notably bonded warehouses)

without endangering the revenue or law enforcement priorities, while also not hampering the growth of those areas and not impeding commerce.

The audit-inspection program approach to administration of those areas of Customs responsibility, which de-emphasizes the physical presence of a Customs officer to supervise each transaction, was successfully implemented in regard to the operation of bonded warehouses (see T.D. 82-204, published in the Federal Register on November 1, 1982 (47 FR 49355)). Audit-inspection is a method of supervision based on spot checks and audits of foreign trade zone activities as represented in records maintained by the zone operator. This method is substituted in lieu of physical on-site supervision by Customs when merchandise is admitted to, transferred from, or processed in the zone.

The principal advantage for Customs of audit-inspection is that it requires fewer Customs personnel to administer the zones. The principal advantages for the importing community are that (1) merchandise may be admitted, transferred, or processed without a Customs officer being present, allowing increased flexibility in zone operations, and (2) for most zones, the reimbursable cost paid to Customs is reduced. Audit-inspection is based on several procedures, which are essential for its proper functioning and success. These procedures are:

1. The determination by Customs of the identity and nature of the merchandise through examination before or upon admission to the zone so that the initial responsibility of the operator for the merchandise can be determined.
2. The issuance of a prior permit by Customs to the zone operator for admission, transfer to the Customs territory, and processing in the zone.
3. The assumption by the zone operator of responsibility for the merchandise, maintaining records concerning the merchandise, and physical supervision of the zone. Quantities of merchandise received at the zone and transferred to the Customs territory are determined jointly by the zone operator and the carrier.
4. The performance by Customs of spot checks and audits to determine whether the zone operator is properly supervising the zone and maintaining records of the merchandise. The cost of the spot checks and audits is reimbursed to Customs through an annual fee charged the zone operator for this service.
5. The assessment of liquidated damages in an amount sufficient to ensure performance of the operator's duties and responsibilities under the rules and regulations needed for proper zone supervision and recordkeeping.
6. The temporary suspension by Customs of zone operations which do not comply with the rules and regulations.

It is noted that Customs initiated use of the audit-inspection method in August 1983, on the basis of voluntary agreements be-

tween Customs and zone operators. At present, 12 subzones and 6 general-purpose zones have entered into voluntary agreements to use the audit-inspection method to administer their operations. Customs has taken that limited experience under the zone audit-inspection method into account in preparing this revision.

To implement the audit-inspection method of supervision in foreign-trade zones, it is necessary to substantially revise Part 146, Customs Regulations (19 CFR Part 146), concerning the administration of foreign trade zones, and to revise to a much lesser extent, Parts 18, 24, 112, 113, 141, 144, 178 and 191, to conform them to changes made by the revision to Part 146. Accordingly, by notice published in the Federal Register on July 17, 1984 (49 FR 28855), an extensive revision of Part 146 and minor conforming revisions of Parts 18, 24, 112, 141, 144 and 191 were proposed. A detailed discussion of the proposed amendments to Part 146 can be found on pages 28856–28859 of the notice.

Interested parties were given until October 15, 1984, to submit written comments. However, by notice published in the Federal Register on September 11, 1984 (49 FR 35658), the comment period was extended to November 30, 1984, as an accommodation to the National Association of Foreign-Trade Zones. Approximately 150 comments were received in response to the notice. A discussion of the comments and our responses to the comments follow.

Discussion of Comments

Most of the commenters commend efforts to improve the regulations. However, many of them have complaints about several provisions of the proposal. Many commenters question the reasonableness of the proposed fees, penalties and liquidated damages provisions. They also allege that the proposal is inconsistent with genrally accepted accounting principles and the Foreign-Trade Zones Act, and that it could impede the flow of commerce. Commenters further complained that the proposed regulations do not provide an orderly transition to the new audit-inspection system and that they were unduly complex and restrictive. Specific comments and our responses are as follows:

Comment: Under the proposed regulations, Customs would treat merchandise destined for a zone as imported and subject to examination prior to admission to the zone, unless a subzone or zone site qualifies under special procedures for exemption from the prior examination requirement. This treatment of zone-destined merchandise may impede or delay shipments.

Response: We disagree. Merchandise which is destined for a zone is imported, within the meaning of § 101.1(h), Customs Regulations. Under § 499, Tariff Act of 1930, as amended (19 U.S.C. 1499), imported merchandise is subject to examination in Customs territory. Therefore, examination of zone-destined merchandise is already provided for under the law. The frequency and intensity of these

examinations, however, will be reduced by selective examination procedures. Also, only occasional examinations will be necessary at certain subzones and zone sites because shipments to these sites are repetitive, liability for violations is known in advance, and elaborate audit trails for checking for diversions of the merchandise exist.

Comment: The proposed regulations do not clearly distinguish between physical and record identification of merchandise. The two systems cannot work together. Record identification is the only viable system under the proposed revision.

Response: We disagree, The physical and record systems of identifying merchandise are compatible. Under the specific identification system, the zone operator maintains a zone lot control system, physically segregating his merchandise by zone lots and controlling identification of merchandise by zone lot records from admission through final zone removal. Under the record identification system, the merchandise is identified by inventory records, using a Customs-approved inventory method, *e.g.*, the first-in, first-out method (FIFO). Both methods require a reconciliation, at least annually, of physical merchandise on hand to quantities reflected by the Customs-approved inventory method. Any discrepancies would require corrective action by the operator.

The physical identification of merchandise is required to ensure reliability of admissions, inventory record accuracy, and proper zone status requests, among other things. For these reasons, it is retained in the regulations.

Comment: The proposal provides no mechanism or guidance for transition to the audit-inspection method of supervision. Serious consideration should be given to grandfathering in some zones or allowing them sufficient time to change over to the new method.

Response: We disagree. Allowing some zone operations to be grandfathered in, *i.e.*, granted an exemption from the new foreign trade zone regulations, is not feasible because it would result in the perpetuation of different sets of rules for some zones. The intent of the proposed regulations is that one set of rules should govern all zone operations.

The regulatory changes will become effective as a final rule 90 days from the date of publication, except that zones with Alternative Inventory Control Systems (AICS) will have either 180 days after the publication date or to the end of their current business year to comply with the new recordkeeping regulations. This 90-day period, instead of the 30-day period ordinarily granted, will allow zone operators a sufficient period of time for bringing their inventory system into compliance with the new regulations.

Zones under the AICS are different from other zones in that the record of inventory is maintained by the zone grantee or operator, or by the individual zone firms or their agents, under the supervision of the grantee or operator, rather than by Customs. The zone

grantee or operator is responsible for the posting of inventory ledgers, the supervision of individual zone firms which maintain their own inventory records, the correction of inventory discrepancies, the conducting of periodic selective inventories of open lots of all zone firms, and various additional tasks which require time and other resources to handle the paperwork associated with these tasks. Because of the complexity of operating this type of inventory control system, these zones will require more time than non-AICS zones to convert to the audit-inspection supervision system under the new regulations. For this reason zones under AICS will be given either 180 days from the date of publication of the new regulations or to the end of their business year to bring their inventory system into compliance with the new regulations. However, they will be subject to the 90-day period for bringing all other aspects of their zone operations into compliance with the new regulations.

Conversion to audit-inspection supervision under the new regulations will occur as follows:

All zone operators, except as noted below, will furnish a certification that their inventory control and recordkeeping system complies with the new regulations, a procedures manual, the date of the end of their business year, and the annual fee on or before the date the new regulations take effect, and the prescribed zone operator's bond. If these requirements are not complied with by the effective date, no further merchandise will be admitted to the zone and the activated status of the zone may be suspended.

In addition, the following actions will be taken with respect to specific zones:

(a) *Zones where Customs has maintained inventory records.* Customs will provide a listing of inventory balances for all lots in the zone on the effective date. The operator will have 30 days to review the lot balances, conduct a physical inventory, and resolve any differences with Customs. On or before the end of the 30-day period, the operator will sign to accept the lot balances as reflecting the inventory on hand on the effective date, with such adjustments as are mutually agreed to between the operator and the district director.

(b) *Zones with voluntary audit-inspection agreements.* Zone operators will have the option of conducting a physical inventory before the effective date and certifying as to specific quantities of merchandise for which they are responsible on the effective date. Otherwise, they will be held responsible for losses and overages unless they can clearly show, with competent evidence, that the losses and/or overages occurred before the effective date.

(c) *Zones with alternative inventory control systems.* Zone operators may request postponement of the procedures manual and certification requirements until one of the following dates:

(i) 90 days after the effective date of the new regulations; or

(ii) end of their current business year.

With respect to paragraph (c), the district director may approve the request for a postponement if he is satisfied that the postponement is necessary for the conversion of the operator's recordkeeping system to comply with the requirements of Subpart B, Part 146, Customs Regulations. During the interim before the procedures manual and certification are received, the operator will be allowed to maintain the inventory and recordkeeping system as agreed under the AICS, and he need not meet the requirements of Subpart B. However, the operator must meet and follow all the other requirements of the new regulations upon their effective date. The same physical inventory option will be available for zones with an AICS as for zones with a voluntary audit-inspection agreement. If that option is not exercised, any losses or overages found after the effective date will be considered to have occurred after the effective date, unless the operator can clearly show, with competent evidence, that the losses and/or overages occurred before the effective date.

Comment: The proposed regulations are inconsistent with generally accepted accounting principles as well as modern business practices.

Response: The commenters do not point to any specific instance of inconsistency. However, we do not that Customs method of identifying merchandise by the first-in, first-out (FIFO) method does not conform to generally accepted accounting principles (GAPP) under which FIFO is used to determine the value of goods in an ending inventory. Customs use of FIFO to indentify merchandise expedites the movement of goods in and out of zones. It is used as an alternative to specific identification of merchandise.

Comment: While the proposed regulations provide for the removal of Customs officers from zones, there are no provisions detailing the methods and the time restraints for transmitting data and documents to Customs, particularly when a zone is remote from a Customs office. There should be a variety of mechanisms to transmit data and documents to expedite zone operations.

Response: We disagree. The regulations need not specify the method of transmittal. Many methods of transmittal, such as mail, messenger delivery, or electronic transmittal, can be accommodated so long as they can be administratively handled by Customs. There should be no problem with timely delivery of the required documentation to Customs on the part of any zone since, in order to be designated a foreign trade zone, it must be in or adjacent to a port of entry.

There are specific provisions for the timing of the transmittal and receipt of documentation by Customs from zone operators, such as in § 146.40(a) and (b), and wherever else specific provisions are necessary. In the absence of any stated provisions, documentation

must be received by Customs before a permit to admit, handle or transfer merchandise can be issued.

Comment: The regulations should include a provision allowing merchandise to be temporarily removed from a zone for repair, restoration, or incidental operations and then returned to the zone.

Response: Customs has been testing such a proposal with, as yet, inconclusive results. If the test has favorable results, the procedure will be implemented on a permanent basis through a separate rulemaking proceeding.

Comment: One commenter states that Customs should not extend its concept of adjacency, in respect to subzones, beyond 35 miles from a port. Other commenters believe that subzones that are distant from ports should not be required to deliver merchandise and documentation to Customs, as is required in proposed § 146.15(a).

Response: The adjacency concept, and its application to subzones which are 35 miles from a port, is under review in a separate rulemaking proceeding at the Department of Commerce. Since this entire issue is under review, proposed § 146.15 is premature. Accordingly, it has been deleted from the final regulations.

Comment: Several commenters believe that the proposed regulations are too complicated, impose unnecessary requirements, and make zones less manageable.

Response: We have simplified the proposed regulations and removed certain requirements. The regulations, as revised, impose minimum requirements for recordkeeping and inventory systems, which zone operators are free to supplement so as to meet their own recordkeeping and inventory control requirements. The requirements for recordkeeping are similar to those any conscientious businessman would adhere to in the supervision of his business. The revised regulations make zones more, not less, manageable. They also allow Customs to carry out its mission of protecting U.S. revenue and enforcing importation laws and regulations more efficiently.

Comment: Many commenters criticize the criteria under proposed § 146.14 for allowing domestic status merchandise to be admitted to a zone without a prior application and permit for each shipment. They believe the criteria are too stringent, particularly those involving commercially identical merchandise and merchandise which has been combined so that it has lost its identity.

Response: We agree with these comments. Therefore, proposed § 146.14 is deleted. The subject matter of § 146.14 is transferred to § 146.43, which is further amended to specify that no prior permit will be required for the admission, handling, or transfer to Customs territory of domestic status merchandise except (1) when mixed or combined with merchandise of another zone status, or (2) when so ordered by the Commissioner of Customs under certain circumstances. This latter authority on the Commissioner's part allows Customs to properly control domestic status merchandise in unusu-

al circumstances. The zone operator must still maintain proper inventory records of domestic status merchandise as prescribed in Subpart B, Part 146, Customs Regulations, even if no permit is required.

Comments: Several commenters inquire as to the authority for Customs allowing activation of a zone under § 146.6. They also question whether this allowance is not more appropriately within the authority of either the Board or the zone grantee.

Response: Authority for Customs approval of activation of zones is found in the individual grants to the zones and subzones, as well as the Act itself. The grants contain provisions to the effect that operations at the zone shall not commence until the grantee obtains all the necessary permits from Federal authorities, and that the grant is subject to an agreement between the grantee and Customs regarding compliance with requirements for the protection of the revenue.

Section 15(b) of the Foreign-Trade Zones Act (19 U.S.C. 81o(b)) gives the Secretary of the Treasury broad authority to approve regulations for the protection of the revenue under the Act, while § 9 (19 U.S.C. § 81(i)) directed the Board to cooperate with Customs. The activation procedure is the method which Customs has chosen for protecting the revenue. Through this procedure Customs is assured that the zone is ready to receive merchandise in zone status.

Comment: Section 146.65 creates a new valuation concept, *i.e.*, "total zone value." There are a substantial number of Customs rulings dealing with zone valuation issues. These rulings should serve as the proper guidance for Customs position on this issue.

Response: "Total zone value" may be a new regulatory term, but it is not a novel regulatory concept. It is the value provided for by current § 146.48(e). Its significance relates to the valuation of recoverable waste or scrap from a zone operation and situations where the rate of duty applicable to nonprivileged foreign merchandise is dependent on the value of the article being transferred from a zone. Section 146.65 therefore, accurately reflects the current Customs position on zone valuation matters.

Comment: Many commenters are concerned with proposed § 146.8, which authorizes the zone operator to affix and break Customs in-bond seals. Heretofore, only Customs officers could affix and break Customs in-bond seals.

Response: Since under the audit-inspection approach a Customs officer will no longer be physically present in most cases, it is necessary that the zone operator be given authority in certain areas to perform functions that were previously conducted by Customs. One of these is the authority to affix and break in-bond seals. Under the new regulation, the zone operator will report to Customs any discrepancies in seal condition. This will protect the zone operator from liability when it is determined that the loss of merchandise occurred prior to arrival of the merchandise at the zone site.

Comment: Special procedures for admitting and removing zone merchandise limited to subzones and zone sites should be extended to general-purpose zones. Also, the criteria for admittance and removal are too stringent for most zones.

Response: We disagree. The audit-inspection requirement is that a permit is required before admission to a zone or transfer to Customs territory. The purpose of proposed § 146.13 is to exempt shipments from this prior permit requirement only when they are repetitive, predictable, and relatively unchanging over a period of time. The exemption was intended to be restrictive because of Customs experience that a major portion of trade destined for zones is non-repetitive and difficult to predict.

In response to the comments on this subject, however, Customs has made a number of changes in the special procedures. First, the criteria for direct delivery are moved to § 146.39 since they are applicable only to merchandise being admitted to a zone, and § 146.13 is deleted.

Secondly, the criteria for direct delivery as they appear in § 146.39 have been simplified. There is now no requirement for direct transmittal of statistical information to the Bureau of the Census. Also, the criteria have been grouped according to those that apply to merchandise and those that apply to the operator. The specific restriction of the direct delivery procedure to subzones and zone sites has been limited. However, we believe that most general-purpose zones will not qualify for the procedure because the zone operator is not the owner or purchaser of the merchandise (as interpreted by Customs in Customs Directive 3530-02, dated November 6, 1984). The criteria for direct delivery ensure that not only are the shipments repetitive and relatively unchanging, but also that the zone operator is in a position to see that they remain so.

Finally, the criteria for direct delivery no longer apply to merchandise transferred from a zone for weekly entry or permit for consumption, transportation, or exportation under proposed §§ 146.63 and 146.69. Instead, the criteria for a weekly permit under the direct delivery procedure in these sections is whether the merchandise is manufactured or changed to its final form just shortly (within 24 hours) before physical transfer from the zone. These sections are necessary for assembly-line type operations where there otherwise would be little time for examination of the merchandise and furnishing of proper entry documentation after the merchandise is in its final form but before physical removal from the zone. By allowing a weekly entry based on an estimate of merchandise to be removed during the week, Customs has prior information as to merchandise to be removed and documentation to serve as the basis of physical examination of the merchandise. At the same time, the assembly-line operation need not be delayed

pending acceptance of an entry and Customs examination of the merchandise.

Comment: To qualify for many of the more liberal procedures, zones must provide statistical data directly to the Bureau of the Census instead of providing a statistical carbon copy of Customs Form 214–A, titled "Application For Foreign Trade Zone Admission And/Or Status Designation" to Customs. This may be very difficult for many zone users, and it abrogates the responsibility of Customs to collect statistics.

Responses: We disagree. Customs responsibility is to support the Census in collecting foreign trade statistics. In some instances, Census has allowed direct transmittal of statistics by zone importers, relieving Customs of the necessity of collecting a copy of Customs Form 214–A. Normally, collection of this form is very important to Census because it ensures that statistical information is collected on each and every shipment to a zone. Direct transmittal of statistics is permitted by Census only when it is satisfied through other means that each and every shipment will be covered by the direct transmittal.

Census has indicated that trade statistics need not be collected for domestic status merchandise admitted to a zone. Therefore, the criteria in proposed § 146.13(b)(1) is not needed. Also, Customs will not, except as ordered by the Commissioner, require a prior permit for the admission of domestic status merchandise to a zone.

Under proposed § 146.13(b), direct transmittal of statistical information to Census is necessary to qualify a zone importer for direct delivery of merchandise to a zone without a prior permit to admit merchandise. Section 146.40 requires importers to submit Customs Form 214 for merchandise recorded into the zone inventory and recordkeeping system the previous business day. The previous business day may not occur until several weeks after the merchandise is physically received in the zone. Census is concerned that statistical information on zone importations may not be reported timely.

To alleviate Census concern, yet reduce barriers to use of the direct delivery procedures by importers under § 146.40, Customs has decided to allow two alternatives to meeting Census statistical reporting requirements. The zone importer must either have a direct transmittal arrangement with Census or he must submit an individual Customs Form 214 and 241–A under § 146.40(c)(2) for each shipment, within 10 days after the end of the month in which the merchandise is physically received in the zone. No extension will be authorized to this statistical reporting requirement. The statistics for each shipment of merchandise to the U.S., including nationality of the shipping vessel or aircraft, date of exportation, and date of importation, must be reported separately.

These requirements are being incorporated into § 146.40 inasmuch as § 146.13 is deleted, as discussed above.

Comment: Many commenters object to proposed regulations concerning Customs examination and documentation requirements before or upon admission to zones. Specifically, the objections are that the examination required by the proposed regulations (1) is contrary to the Act; (2) would unreasonably delay the shipment of merchandise to zones; (3) reduces the advantages to using zones; and (4) would result in insufficient supervision for the proper enforcement of the foreign trade zone regulations. Commenters also state that examination should only be done in zones, that removal of Customs officers from zones would make it impossible to examine merchandise there, that commercial invoices are not usually available for presentation before or upon admission to a zone, further delaying shipments, and that merchandise admitted to a zone but destined only for exportation should not be examined by Customs.

Responses: We do not agree. Physical examination is a key principle of audit-inspection supervision because it enables Customs to determine the initial responsibility of the operator for the merchandise. Proper duty assessment and enforcement of admissibility requirements are also benefits of zone merchandise examination. The authority for such examinations is found in §§ 4, 8, and 15(b) of the Act (19 U.S.C. 81d, h, and o(b)), as well as in § 499 of the Tariff Act of 1930, as amended (19 U.S.C. 1499).

The purpose of providing a commercial invoice or similar documentation is to assist Customs in physical examination by disclosing the purported nature of the merchandise. It also aids in planning examinations under Customs selective examination procedures.

Furthermore, the proposed examination and documentation requirements do not unreasonably delay shipments to zones. First, under selective examination procedures, only about 20–30 percent of shipments are examined. Secondly, merchandise destined for zone sites under direct delivery procedures (§ 146.40) is examined even less frequently. Thirdly, if proper documentation is not available or is incomplete, the merchandise may be temporarily deposited in the zone, pending its receipt and Customs examination (§ 146.35).

Additionally, the examination and documentation requirements do not decrease the advantages of zones. First, there would not be unreasonable delays. Secondly, zone importers would not have to await the arrival of a Customs officer to physically supervise admission, as under the existing system. Thirdly, at worst the delays caused by examination and documentation requirements and those caused by awaiting the arrival of a Customs officer for physical supervision are equal. Zones will have very significant advantages conferred upon them under the Act.

As to the place of examination, we believe that this should be left to the discretion of the district director, so as to allow the most

efficient deployment of personnel to carry out Customs tasks. In many cases, examination can be done more quickly at the dock, where Customs officers may be stationed full time, rather than at a zone with no full-time Customs officers.

The main purpose of audit-inspection supervision is to replace the physical supervision of zones. It does not deal directly with Customs staffing of zones for examination or documentation purposes. If the workload of a zone is large enough to warrant assignment of an officer full-time to examine merchandise and review documentation, the district director may do so. If the zone workload is light and commitments to other segments of the import community heavy, it would be inefficient and unreasonable to assign a full-time officer to a zone. There is nothing in the Act or elsewhere that obliges Customs, in its deployment of personnel, to accord zones more favorable treatment than other segments of the importing community.

Audit-inspection supervision will not result in ineffective enforcement of U.S. laws and regulations in zones. Under this system, Customs does not abandon supervision; rather, it supervises in a different manner, relying on physical supervision and recordkeeping by zone operators, enforced through liquidated damages, penalites, and suspension procedures. Customs believes these deterrents will provide better enforcement than physical supervison.

As to merchandise with no invoice or an incomplete invoice, we note that this merchandise may be sent to a zone for temporary deposit. Customs will accept alternate documentation in lieu of a commercial invoice, providing the documentation provides a clear description of the nature of the merchandise. However, Customs experience has been that commercial invoices exist for most zone shipments.

Finally, with regard to merchandise destined only for exportation, this merchandise is subject to examination for identification purposes under audit-inspection supervision just as any other merchandises destined for zones.

Comment. Proposed § 146.73(d)(2) prohibits duty-paid merchandise from being futher processed in a zone. This provision is contrary to the Act and Customs Headquarters Ruling 215870. It therefore should be deleted.

Response: Whether or not the provision is contrary to Ruling 215870, the regulations take precedence. The prohibition against further processing of duty-paid merchandise is applicable only to merchandise previously in a zone, and not to all duty-paid merchandise.

The purpose of proposed § 146.73(d)(1) was to allow merchandise to remain in a zone after it had been constructively transferred to Customs territory and entered. It was intended to accommodate zone users who wished to make entry for a large amount of merchandise, but for various commercial reasons did not wish to imme-

diately remove all or some of the merchandise from the zone. The prohibition on further processing was intended to avoid abuse of this privilege by an assortment of schemes designed to circumvent high duty rates or import restrictions. Examples of such schemes are as follows:

1. Merchandise is entered for consumption at a duty rate of 5 percent. After entry the merchandise is retained in the zone, or it is removed but shortly thereafter returned to the same or a different zone in domestic status. Then it is further manufactured into a product whose rate of duty is 25 percent. However, the merchandise is no longer subject to duty since it is now wholly in domestic status.

2. There is a quota on sugar products containing over 65 percent sucrose. The importer adds another product to the sugar in a zone to produce a product with less than 65 percent sucrose content, which is not subject to the quota. The importer files an entry on the product in the latter state, but the merchandise is retained in the zone in domestic status. Then the added product is sifted out, leaving a sugar product containing 90 percent sucrose. The merchandise is no longer subject to quota upon its ultimate removal from the zone because it is in domestic status.

3. A firm produces pharmaceutical products in a zone. During an intermediate stage of processing, the merchandise is in a condition subject to a free rate of duty, while the final rate of duty would be 15 percent. The intermediate stage is transitory, lasting no more than an hour. During this period, the firm files an entry at the free rate of duty. The intermediate stage merchandise is left in the zone for continuous processing, or is piped in a loop that runs into Customs territory and immediately back into the zone, whereupon the firm requests readmission in domestic status. By the time Customs accepts the entry and has an opportunity to examine the merchandise, it is no longer in its condition as entered. Besides circumventing the higher rate of duty, the merchandise covered by the entry can no longer be examined for verification or appraisement purposes.

Entry for consumption in these cases is a sham. Merchandise which is entered but not commingled with U.S. commerce is not, in Customs opinion, entered for consumption, and such entries may be declared null and void and cancelled by the district director. We note that there is a line of court decisions in support of the view that entered for consumption means that the merchandise has entered U.S. commerce as an integral part thereof. See *U.S.* v. *Rolls Royce of America, Inc.*, T.D. 41202 and *U.S.* v. *Mussman and Schafer*, C.A.D. 506, C.D. 1367.

Section 3 of the Act permits zones two choices in the rate of duty upon entry for consumption—the rate of duty on the merchandise in its condition when the choice is made, or the rate of duty on the merchandise in its condition when transferred to Customs terri-

tory. A sham consumption entry allows a third choice—the rate applicable to the merchandise in an intermediate stage of processing in the zone.

In lieu of a prohibition on further processing, proposed § 146.73(d)(1) (now § 146.71(d)(1)) is being amended to authorize district directors to reject or cancel consumption entries from zones when the merchandise is not timely removed from the zone after entry, and merchandise removed from the zone does not enter U.S. commerce and is subsequently readmitted to a zone in domestic status. If the merchandise is so readmitted and the entry cancelled, it will be restored to its last zone status and a new entry required upon its transfer to Customs territory. This amendment closes an existing loophole so as to protect the revenue and properly enforce U.S. import laws and regulations.

A determination as to whether merchandise has not entered the commerce will be made by district directors on a case by case basis, considering factors such as the following:

1. Length of time the merchandise was outside the zone before readmission.
2. Whether readmission was requested by the importer of record or his agent, or a person acting in collusion with the importer of record.
3. Credible evidence that there was an intent by the importer or others, at the time of entry, to seek readmission to the zone.
4. The merchandise evades a higher rate of duty or an import restriction because of its having been admitted in domestic status.
5. The merchandise was not used or was not the subject of a bona fide sale by the importer after entry.
6. The merchandise was not further processed or manufactured outside the zone, or such processing or manufacture was minimal or cosmetic in nature.

Entries of merchandise readmitted in zone-restricted status will not be cancelled under this provision. It is noted that the position set forth in § 146.71(d)(1) is consistent with those in §§ 146.61, 146.63(c)(1) and 146.71(d)(2) in that merchandise which was entered but never removed from the zone is treated as constructively transferred back to the zone in its previous zone status.

An exception is made in § 146.71(c) from the general requirement of prompt zone removal for articles for use in a zone, such as production equipment, construction materials, and articles to be consumed in a zone.

A new § 146.71(d)(3) is added to clarify that merchandise which is actually entered into commerce may be readmitted to a zone in domestic status.

Comment: Several commenters were concerned that under the revised regulations, Customs would no longer approve a zone's procedures manual.

Response: Currently, Customs has three methods of supervising zones: (1) Customs maintained zone inventory ledgers; (2) Alternative Inventory Control Systems (AICS) maintained by the zone operator; and (3) the Audit-Inspection Program where the zone operator maintains his inventory control. Only under AICS has Customs approved a zone operator's inventory control system. The reason for Customs allowing the AICS method of operating a zone stems from the fact that Customs did not have regulatory guidelines available for use by zone operators. However, there were some problems with the AICS method due to Customs limited ability to assist in the design of sophisticated data processing systems within short time frames so as to allow zones to be activated. Also, several zone systems were approved where zone operations were delayed sometimes for several years, resulting in the original system either being rendered obsolete or in need of major changes at the time the zone was activated.

Accordingly, Customs decided to provide much needed inventory control guidelines in the regulations and allow the individual zones to adopt their own inventory systems within the guidelines devised by Customs. Questions as to whether particular elements of a proposed inventory control and recordkeeping system meet the criteria in revised Subpart B, Part 146, Customs Regulations, may be referred to the district director for a non-binding ruling, or to Customs Headquarters for a ruling in accordance with Part 177, Customs Regulations (19 CFR Part 177). Customs will not review any system in its entirety to render an opinion as to whether it meets all of the criteria in Subpart B.

Comment: Since the Government's expense in providing Customs officers at the zone is reimbursed by the zone itself, there is no logical reason why Customs personnel cannot be permanently stationed at the zone.

Response: Although the expense of maintaining a Cusoms officer at a zone is a consideration in our decision to implement audit-inspection supervision, there are other considerations of equal value. One is that audit-inspection supervision would provide protection to the revenue, which is equal to or greater than that under the existing systems. This was apparent from a 4-year study of warehouses which had converted to audit-inspection supervision. Another consideration is that the new system allows Customs to assign personnel to other areas which have a higher priority. A great many zone operators, grantees and users do not realize that Customs warehouse and zone officer positions, although they are fully reimburseable, are counted against Customs overall personnel ceiling. If officers are assigned to warehouses and zones, there will be fewer officers for assignment to higher priority tasks.

Comment: The proposed regulations do not reduce recordkeeping and information costs to operators.

Response: We disagree. To meet present document filing requirements, zone operators must gather, maintain, and compile certain data on their zones's admissions and removals and file required documents with Customs. Under the proposal, data gathering and maintenance needs will not change appreciably, but required document filings will be reduced dramatically. We estimate 50,000–70,000 annual form filings will be eliminated by the proposal, resulting in operator data handling and form filing cost reductions of from $600,000 to $700,000. We regard document cost reductions of an average $10,000 per year per activated zone site to be real and significant.

Comment: Since Customs no longer will be approving operator procedures manuals in their entirety, it is not fulfilling its obligations to assist the importing and exporting public. Customs should therefore provide some instruction to zone operators.

Response: We agree. Accordingly, Customs will provide the following assistance to the importing and exporting public:

1. Every attempt has been made to make the new regulations clear and concise.
2. Rewrite the Customs pamphlet on foreign trade zones.
3. Develop a booklet on foreign trade zones for operators and users.
4. Provide informational seminars for the public on the new regulations.
5. Rewrite operational guidelines based upon the new regulations.
6. Provide materials and seminars for Customs personnel, as well as the public.

Comment: Because of its impact, the proposal qualifies as a major rule under E.O. 12291 and thus requires a regulatory analysis.

Response: We disagree. Section 1(b) of E.O. 12291 requires a regulatory impact analysis for a proposal when one or more of the following criteria are met:

(1) A net national economic cost of $100 million or more;

(2) Significant cost increases for consumers; and

(3) Adverse effect upon the international competitiveness of U.S. firms.

In conducting an initial regulatory analysis under the terms of the Regulatory Flexibility Act (5 U.S.C. 603, 604), we concluded that none of the criteria was met.

Comment: Many commenters object to the panalty and liquidated damages provisions of the proposed regulations as excessive, unwarranted and not comparable to the bonded warehouse liquidated damages provisions or the penalties for fraud under § 592, Tariff Act of 1930, as amended (19 U.S.C. 1592). They also question the authority of district directors to suspend a zone's activated status, claiming that this action amounts to revocation of the zone grant.

Response: As to the liquidated damages and penalties provisions of the new regulations not being comparable to those for bonded warehouse, we note that there are considerable differences between zones and bonded warehouses. Merchandise in a bonded warehouses is in Customs territory, has been entered, and is secured by both the warehouse proprietor's bond and the warehouse entry bond, whereas merchandise in a zone is not in Customs territory, is not entered and is not generally subject to the Customs laws or the bonding requirements. Also, there is much greater freedom to manufacture and manipulate merchandise in a zone than in a bonded warehouse. In view of this relative freedom from Customs control of activities in zones as compared to warehouses, the bonding requirements proposed are minimal.

As to the comment that the liquidated damages provisions under the new regulations should be consistent with those for bonded warehouses, we note that the proposed liquidated damages provisions for restricted merchandise or alcoholic beverages are consistent with those for such articles under the importor's and warehouse proprieter's bonds. They are in a higher amount than liquidated damages for other merchandise. This is necessary to remove the economic incentive to breach the bond, in certain cases, in order to evade quota, licensing, labeling or other restrictions.

With respect to liquidated damages claims not relating to merchandise, the liquidated damages proposed were in an amount to be determined by the district director, but not more than $200. Several commenters, however, were of the opinion that liquidated damages for non-merchandise related defaults of the zone operator's bond should be consistent with those for default of the warehouse proprietor's bond. Customs agrees with this position. Therefore, proposed § 146.81 is deleted, and the zone operator's bond in § 113.73, Customs Regulations (19 CFR 113.73), is modified to include the provisions previously appearing in § 146.81. Liquidated damages for merchandise and non-merchandise related defaults of the zone operator's bond will conform to these applicable to the warehouse proprietor's bond as well as other Customs bonds.

The only *penalty* provision in the new regulations is a restatement of 19 U.S.C 81s (§ 19, the Act), which authorizes a fine of not more than $1,000 for violation of the Act or any regulations thereunder. The regulations in Part 146, Customs Regulations, are regulations under the Act. The penalty for fraud under 19 U.S.C. 1592 is the domestic value of the merchandise plus any duties. These two penalty provisions are concerned with preventing two different types of activity which bear no relationship to each other. The penalties can in no way be compared to each other.

With respect to Customs authority to suspend activation of a zone, in proposed § 146.83, we note that §§ 3, 5, 8 and 15(b) of the Act (19 U.S.C. 81c, e, h, o(b)), confer authority upon the Secretary

of the Treasury to make rules and regulations under the Act. Customs derives this authority from the Secretary.

Suspension of activation of a zone is not a revocation of the zone grant, which is the only remedy currently available to Customs for improper activity or continued violations of the foreign trade zones regulations, provided that the Board orders the revocation. Furthermore, under § 18 of the Act (19 U.S.C. 81r), the zone grant cannot be revoked without giving four months notice and taking other actions.

Suspension gives Customs an alternative method for dealing with improper activity in a zone. It allows Customs to single out the improper activity, subzone, or zone site involved and apply certain sanctions, without disturbing other proper zone activities. For example, suspension may be limited to the activities of a particular site, such as suspension of the privilege to admit merchandise for a particular activity, and it may not necessarily be directed at the activation of the zone as a whole. Proposed §§ 146.83 (a) and (b)(1) (now §§ 146.82 (a) and (b)(1)) have been modified to clarify this procedure.

Some commenters also object to the proposed regulations on suspension on the grounds that they recognize only the operator as a party to suspension proceedings. These commenters suggest that grantees and users also be made parties to suspension proceedings. Customs agrees with this suggestion with respect to grantees, and, accordingly, we have added new paragraph (4) to § 146.83(b) to recognize the grantee. However, we do not agree that a user should be a party. Approval of zone activation is given to a grantee or operator, not to users. Suspension, or partial suspension, of that approval is a matter between Customs and the grantee or operator who is responsible for the zone.

Finally, it is noted that suspensions are for a limited period, are designed for fast action to minimize developing problems, and are substantially less onerous than revocation provisions applicable to customs brokers, warehouses proprietors, container station operators, and cartmen.

Comment: Language is not used consistently and accurately throughout the proposal. In describing the process of merchandise flow through a zone, the following words are used: admit, brought, enter, receive, remove, transfer, deliver, and withdraw. Also the terms zone, zone site, noncontiguous zone site, zone user, zone firm and zone seller are used with different intents but without definition.

Response: Customs does not agree with this comment. Nevertheless, it appears that some commenters do not understand, or misunderstand, the use of a number of terms. Accordingly, it has been decided to revise and expand the definitions section and, through editorial changes throughout the proposed regulations, improve clarity. "Secretary", "Board", "State," "Corporation", "Public Cor-

poration", "Private Corporation", "Applicant", "Grantee", and "Zone", are defined in § 1 of the Act (19 U.S.C. 81a), and wherever those terms appear in Part 146, they are used in consonance with their statutory meaning, unless otherwise stated. The statutory definitions will not be repeated in the new regulations.

Definitions of several terms, i.e., "subzone", "operator", and "user" have appeared in the proposed regulations of the Board published on February 18, 1983, in the Federal Register (48 FR 7189). As it is not known when those proposed regulations may become final, and as the use of these words is necessary in these regulations, their definitions have been added to § 146.1. If it appears necessary, the definitions may be modified when the proposed regulations of the Board become final.

The terms "zone site" and "noncontiguous zone site" result from particular grants of authority by the Board to establish and operate a zone. It is believed that grantees and operators of those sites are aware of their meanings. The term "noncontiguous zone" has been deleted from these regulations wherever it appears. A definition of "zone site" has been added.

The exclusion of production equipment, building materials, and supplies from the definition of "merchandise" in § 146.1(h) is consistent with Customs decision on this subject. Production equipment, building materials, and supplies are not "merchandise" within the meaning of § 3 of the Act (19 U.S.C. 81c) for the reasons set forth in Customs Service Decision (C.S.D.) 79-418. Also, in H.R. 98-267 on H.R. 3398 (Trade and Tariff Act of 1984, June 24, 1983), at page 36, it is stated that the Act does not apply to machinery and equipment. They are, therefore, dutiable upon entry.

This position is supported by 19 U.S.C. 1311, the statute establishing bonded manufacturing warehouses, which specifically prohibits the duty-free entry of imported implements, machinery, or apparatus to be used in the construction or repair of any bonded manufacturing warehouse or for the prosecution of the business carried on therein. It would be inconsistent for Customs to prohibit the duty-free entry of such articles into a manufacturing warehouse, from which manufactured goods must be exported, and to permit the duty-free entry of the same articles into a zone. If zones had no such limitation, they would have a distinct advantage over domestic manufacturers since domestic manufacturers are required to enter and pay duty on those articles.

Review does not reveal differing intents in the use of "zone user", "zone firm", and "zone seller" and their meaning is self-evident in context. However, a definition of "user" has been added to § 146.1, and an effort has been made to remove the terms or to further clarify their meaning by editorial changes.

"Enter", where used, refers to the entry of merchandise into the Customs territory of the United States. "Withdrawal" refers to

withdrawal from warehouses. Both words are used in the ordinary tariff sense.

To minimize confusion, and since goods are neither entered into nor withdrawn from a zone in the tariff sense, the words "admit", for bringing goods into a zone in zone status, and "transfer", for taking goods out of a zone, have been used. Definitions of these words have been added. "Brought", "receive", "remove", and "deliver", wherever used, have their ordinary meaning. While inconsistent and inaccurate use of the terms in the proposed regulations is not evident, their use has been reviewed and editorial changes have been made wherever appropriate.

Comment: Several commenters objected to the procedures for appealing decisions of the district director denying applications to activate a zone or suspending the activated status of a zone, but these comments were not specific.

Response: We see no problem with the appeal procedure for suspensions of the activated status of a zone or of certain activities in a zone. The procedures include the right to request a hearing and to obtain the decision of the regional commissioner.

With respect to denial of an application to activate a zone or zone site, the decision of the district director is considered the final adminstrative decision for several reasons. First, there may not even be an appealable right. The grant to establish and operate a zone is conditioned upon the grantee's obtaining all necessary permits and licenses, and securing the permission of the district director to begin operations in the zone. Where the district director denies activation because the conditions have not been complied with, or for other stated reasons, denial of activation does not result in denial of an appealable right since the right to activate the zone has not been granted.

Secondly, the district director is more closely connected with the application for and activation of a zone than Customs regional or headquarters officials. Appeals of denials to the Customs region or to Headquarters would result in little more than delay and inquiries into the factual basis of the decision. We believe that the Board and the courts provide the most suitable forum for appeals from denials of activation on the part of the district director.

Comment: The annual fees proposed for zones are unreasonably high.

Response: We disagree. The purpose of the annual fee is to recover Customs costs incurred in carrying out the audit-inspection supervision program. The annual fee to be charged each zone is a function of the degree of complexity in Customs auditing and inspection of zones.

Under the present inspectional system, Customs bills zone operators approximately $1.3 million annually for inspectional services. Zone operators recover this expense in their fee and rental/lease

billings to zone users. We estimate that the Customs component of these fees paid by zone users averages $870 per year per user.

Under the proposed audit-inspection system with different fee tiers, Customs billings to operators of general purpose zones will amount to approximately $1 million per year, versus the estimated $1.3 million at present. The Customs component of small business users' payment to operators will average $670 per year per user, versus the $870 per year per user at present. Future increases in the annual fee will reflect cost increases incurred by Customs in delivering audit and inspection services. These increases will consist largely of annual rises in labor costs. It is expected that labor costs, and thus annual fees charged zone operators, will rise by a moderate 2-4 percent each year.

The proposed fees, therefore, are not unreasonable. Moreover, the proposed annual fee has been restructured into a three-tiered system with the larger, more active zones set to pay higher fees than the smaller zones. This would provide equitable treatment for the smaller zones in that they would no longer subsidize the larger zones. Appendix B reflects the revised structure of the annual fee.

Comment: Many commenters requested clarification of the respective liabilities to Customs of grantees, operators, and users of zones.

Response: As the privilege of establishing, operating, and maintaining a zone is given to a grantee, Customs is of the opinion that all liabilities to Customs involving zone activities reside ultimately with the grantee of the zone. If the operator is not the grantee, these liabilities can be minimized by the operator's being named as principal on the zone operator's bond. There is no liability to Customs on the part of zone users, other than users that are also operators. It is the grantee or the grantee and operator who have responsibilities to Customs with the attendant liabilities. Grantees are free to make whatever contractual agreements regarding indemnification with operators and users that they choose. Furthermore, Customs is not aware of any way that a grantee can divest itself of all liability, or limit its liability, in the event of loss or damage to Customs resulting from zone activities. While 19 U.S.C. 1623(c) and § 113.51, Customs Regulations (19 CFR 113.51), authorize the cancellation of bonds or bond charges under certain circumstances, that authority does not apply to prospective transactions nor does it extend to the waiver of any lawful claims against the grantee, not secured by bond, that arise from zone activities.

Comment: A few comments were received concerning Subpart D, Part 146. The commenters stated that many of the sections and subsections of Subpart D were definitional in nature and should be in Subpart A.

Response: The subject matter of Subpart D—the status of merchandise in a zone is of sufficient importance to merit its own subpart. The terms "privileged foreign merchandise," "nonprivileged

foreign merchandise," "domestic merchandise," and "zone-restricted merchandise" do not appear in the Act. They were coined to describe the status of certain merchandise in a zone with reference to particular provisos of § 3 of the Act (19 U.S.C. 81c). In that sense, the terms are not definitional but descriptive, in that they simply provide a name for conditions prescribed by law, *e.g.*, "zone-restricted" describes the status of merchandise subject to the fourth proviso of 19 U.S.C. 81c.

One commenter urged that § 146.44 (zone-restricted merchandise) be expanded to include a requirement that merchandise placed in a zone to obtain payment of drawback and subsequently removed for shipment to an insular possession of the U.S. be reported by the zone operator to the district director. Upon consideration, it has been decided not to add that requirement to Part 146. Section 191.13, Customs Regulations (19 CFR 191.13), provides that there is no authority to allow drawback on articles shipped to insular possessions. There is authority to allow drawback on articles placed in a zone in zone-restricted status. Subsequent shipment of such articles to an insular possession would be contrary to the Act since it would not be an exportation, destruction, or storage. The likelihood of such shipments is remote and since § 191.13 essentially covers the situation, there is no need to make allowance for it in § 146.44.

In connection with the deletion of § 146.14, § 146.43 is amended to specify that no permit will be required for the admission, handling, or transfer to Customs territory of domestic status merchandise except (1) when mixed or combined with merchandise of another zone status, and (2) when so ordered by the Commissioner in individual circumstances. The latter residual authority is retained to allow Customs to properly control domestic status merchandise in unusual circumstances. The operator must still maintain proper records of domestic status merchandise under Subpart B, Part 146, even if no permit is required.

Finally, a new § 146.14 has been added. This section is a restatement of the statutory limitation on retail trade in a zone, found in § 15(d) of the Act (19 U.S.C. 81o(d)).

Changes are made throughout the regulations to conform them to the changes made by this document. Also, as a general point, whenever the word "days" appears in this revision, it means calendar days, unless "working days" is specified.

After careful analysis of all the comments received and upon further review of the matter, it has been determined advisable to adopt the proposed regulatory amendments with the various modifications as set forth above.

Executive Order 12291

It has been determined that these amendments are not a "major rule" within the criteria provided in § 1(b) of E.O. 12291, and therefore no regulatory impact analysis is required.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are applicable to this document. An initial regulatory analysis was prepared and included in the NPRM as Appendix C. A final regulatory flexibility analysis is attached to this document as an appendix.

Paperwork Reduction Act

The collection of information requirements contained in § 146.25 and the recordkeeping requirement contained in § 146.4, are subject to the provisions of the Paperwork Reduction Act (44 U.S.C. 3504(h)) and have been cleared by the Office of Management and Budget (OMB). Accordingly, Part 178, Customs Regulations (19 CFR Part 178), which lists the information collections contained in the regulations and the control numbers assigned by OMB, is being amended to include OMB control number 1515-0151.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Amendments to the Regulations

Chapter 1, Title 19, Code of Federal Regulations, is amended by revising Part 146 to read as follows:

PART 146—FOREIGN TRADE ZONES

Sec.

146.0 Scope.

SUBPART A—GENERAL PROVISIONS

Sec.
146.1 Definitions.
146.2 District director as Board representative.
146.3 Customs supervision.
146.4 Operator responsibility and supervision.
146.5 Activation fee and annual fee.
146.6 Procedure for activation.
146.7 Zone changes.
146.8 Seals; authority of operator to break and affix.
146.9 Permission of operator
146.10 Authority to examine merchandise.
146.11 Transportation of merchandise to a zone.
146.12 Use of zone by carrier.
146.13 Customs forms and procedures.
146.14 Retail trade within a zone.

SUBPART B—INVENTORY CONTROL AND RECORDKEEPING SYSTEM

146.21 General requirements.
146.22 Admission of merchandise to a zone.
146.23 Accountability for merchandise in a zone.
146.24 Transfer of merchandise from a zone.
146.25 Annual reconciliation.
146.26 System review.

SUBPART C—ADMISSION OF MERCHANDISE TO A ZONE

146.31 Admissibility of merchandise into a zone.
146.32 Application and permit for admission of merchandise.
146.33 Temporary deposit for manipulation.
146.34 Merchandise transiting a zone.
146.35 Temporary deposit in a zone; Incomplete documentation.
146.36 Examination of merchandise.
146.37 Operator admission responsibilities.
146.38 Certificate of arrival of merchandise.
146.39 Direct delivery procedures.
146.40 Operator responsibilities for direct delivery.

SUBPART D—STATUS OF MERCHANDISE IN A ZONE

146.41 Privileged foreign status.
146.42 Nonprivileged foreign status.
146.43 Domestic status.
146.44 Zone-restricted status.

Sec.

SUBPART E--HANDLING OF MERCHANDISE IN A ZONE

146.51 Customs control of merchandise.
146.52 Manipulation, manufacture, exhibition, or destruction; Customs Form 216.
146.53 Shortages and overages.

SUBPART F—TRANSFER OF MERCHANDISE FROM A ZONE

146.61 Constructive transfer to Customs territory.
146.62 Entry.
146.63 Entry for consumption.
146.64 Entry for warehouse.
146.65 Classification, valuation, and liquidation.
146.66 Transfer of merchandise from one zone to another.
146.67 Transfer of merchandise for exportation.
146.68 Transfer for transportation or exportation; estimated production.
146.69 Supplies, equipment, and repair material for vessels or aircraft.
146.70 Transfer of zone-restricted merchandise into Customs territory.
146.71 Release and removal of merchandise from zone.

SUBPART G—PENALTIES; SUSPENSION; REVOCATION

146.81 Penalties.
146.82 Suspension.
146.83 Revocation of zone grant.

AUTHORITY: 19 U.S.C. 66, 81a–81u, 1202 (Gen. Hdnote 11), 1623, 1624, § 146.5 also issued under 31 U.S.C. 9701.

SOURCE: T.D. 86–16 unless otherwise noted.

§ 146.0 Scope.

Foreign trade zones are established under the Foreign Trade Zones Act and the general regulations and rules of procedure of the Foreign Trade Zones Board contained in 15 CFR Part 400. This Part 146 of the Customs Regulations governs the admission of merchandise into a foreign trade zone, manipulation, manufacture, or exhibition in a zone; exportation of the merchandise from a zone; and transfer of merchandise from a zone into Customs territory.

SUBPART A—GENERAL PROVISIONS

§ 146.1 Definitions.

(a) The following words, defined in § 1 of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a), are given the same meaning when used in this part, unless otherwise stated: "Board", "Grantee", and "Zones".

(b) The following are general definitions for the purpose of this part:

(1) *Act.* "Act" means the Foreign-Trade Zones Act of June 18, 1934, as amended (48 Stat. 998–1003; 19 U.S.C. 81a–u).

(2) *Activation.* "Activation" means approval by the grantee and district director for operations and for the admission and handling of merchandise in zone status.

(3) *Admit.* "Admit" means to bring merchandise into a zone with zone status.

(4) *Alteration.* "Alteration" means a change in the boundaries of an activated zone or subzone; activation of a separate site of an already-activated zone or subzone with the same operator at the same port; or the relocation of an already-activated site with the same operator.

(5) *Customs territory.* "Customs territory" is the territory of the U.S. in which the general tariff laws of the U.S. apply. "Customs territory of the United States" includes only the States, the District of Columbia, and Puerto Rico. (General Headnote 2, Tariff Schedules of the United States (19 U.S.C. 1202)).

(6) *Constructive transfer.* "Constructive transfer" is a legal fiction which permits acceptance of a Customs entry for merchandise in a zone before its physical transfer to the Customs territory.

(7) *Deactivation.* "Deactivation" means voluntary discontinuation of the activation of an entire zone or subzone by the grantee or operator. Discontinuance of the activated status of only a part of a zone site is an alteration.

(8) *Default.* "Default" means an action or omission that will result in a claim for duties, taxes, charges, or liquidated damages under the Foregn Trade Zone Operator Bond.

(9) *Merchandise.* "Merchandise" includes goods, wares and chattels of every description, except prohibited merchandise. Building materials, production equipment, and supplies for use in operation of a zone are not "merchandise" for the purpose of this part.

(10) *Domestic merchandise.* "Domestic merchandise" is merchandise which has been (1) produced in the U.S. and not exported therefrom, or (2) previously imported into Customs territory and properly released from Customs custody.

(11) *Foreign merchandise.* "Foreign merchandise" is imported merchandise which has not been properly released from Customs custody in Customs territory.

(12) *Conditionally admissible merchandise.* "Conditionally admissible merchandise" is merchandise which may be imported into the U.S. under certain conditions. Merchandise which is subject to permits or licenses, or which may be reconditioned to bring it into compliance with the laws administered by various Federal agencies, is an example of conditionally admissible merchandise.

(13) *Prohibited merchandise.* "Prohibited merchandise" is merchandise the importation of which is prohibited by law on grounds

of public policy or morals, or any merchandise which is excluded from a zone by order of the Board. Books urging treason or insurrection against the U.S., obscene pictures, and lottery tickets are examples of prohibited merchandise.

(14) *Fungible merchandise.* "Fungible merchandise" means merchandise which for commercial purposes is identical and interchangeable in all situations.

(15) *Operator.* "Operator" is a corporation, partnership, or person that operates a zone or subzone under the terms of an agreement with the zone grantee. Where used in this part the term "operator" also applies to a "grantee" that operates its own zone.

(16) *Reactivation.* "Reactivation" means a resumption of the activated status of an entire area that was previously deactivated without any change in the operator or the area boundaries. If the boundaries are different, the action is an alteration. If the operator is different, it is an activation.

(17) *Subzone.* "Subzone" is a special-purpose zone established as part of a zone project for a limited purpose, that cannot be accommodated within an existing zone. The term "zone" also applies to a subzone, unless specified otherwise.

(18) *Transfer.* "Transfer" means to take merchandise with zone status from a zone for consumption, transportation, exportation, warehousing, cartage or lighterage, vessel supplies and equipment, admission to another zone, and like purposes.

(19) *Unique identifier.* "Unique identifier" means the numbers, letters, or combination of numbers and letters that identify merchandise admitted to a zone with zone status.

(20) *User.* "User" means a person or firm using a zone or subzone for storage, handling, or processing of merchandise.

(21) *Zone lot.* "Zone lot" means a collection of merchandise maintained under an inventory control method based on specific identification of merchandise admitted to a zone by lot.

(22) *Zone site.* "Zone site" means the physical location of a zone or subzone.

(23) *Zone status.* "Zone status" means the status of merchandise admitted to a zone, i.e., nonprivileged foreign, privileged foreign, zone restricted, or domestic.

§ 146.2 District director as Board representative.

The district director in whose district the zone is located shall be in charge of the zone as the representative of the Board.

§ 146.3 Customs supervision.

(a) *Assignment of Customs officers.* Customs officers will be assigned or detailed to a zone as necessary to maintain appropriate Customs supervision of merchandise and records pertaining thereto in the zone, and to protect the revenue.

(b) *Supervision.* Customs supervision over any zone or transaction provided for in this part will be in accordance with § 161.1 of this

chapter. The district director may direct a Customs officer to Supervise any transaction or procedure at a zone. Supervision may be performed through a periodic audit of the operator's records, guantity count of goods in a zone inventory, spot check of selected transactions or procedures, or review of recordkeeping, security, or conditions of storage in a zone.

§ 146.4 Operator responsibility and supervision.

(a) *Supervision.* The operator shall supervise all admissions, transfers, removals, recordkeeping, manipulations, manufacturing, destruction, exhibition, physical and procedural security, and conditions of storage in the zone as required by law and regulations. Supervision by the operator shall be that which a prudent manager of a storage, manipulation, or manufacturing facility would be expected to exercise, and may take into account the degree of supervision exercised by the zone user having physical possession of zone merchandise.

(b) *Customs access.* The operator shall permit any Customs officer access to a zone.

(c) *Safekeeping of merchandise and records.* The operator responsible for safekeeping of merchandise and records concerning merchandise admitted to a zone. The operator, at its liability, may allow the zone importer or owner of the goods to store, safeguard, and otherwise maintain or handle the goods and the inventory records pertaining to them.

(d) *Records maintenance.* The operator shall (i) maintain the inventory control and recordkeeping system in accordance with the provisions of Subpart B, (ii) retain all records required in this Part and defined In § 162.1(a) of this chapter, pertaining to zone merchandise for 5 years after the merchandise is removed from the zone, and (iii) protect proprietary information in its custody from unauthorized disclosure. Records shall be readily available for Customs review at the zone.

(e) *Merchandise security.* The operator shall maintain the zone and establish procedures adequate to ensure the security of merchandise located in the zone in accordance with applicable Customs security standards and specifications.

(f) *Storage and handling.* The operator shall store and handle merchandise in a zone in a safe and sanitary manner to minimize damage to the merchandise, avoid hazard to persons, and meet local, state, and Federal requirements applicable to a specific kind of goods. All trash and waste will be promptly removed from a zone. Aisles will be established and maintained, and doors and entrances left unblocked for access by Customs officers and other persons in the performance of their official duties.

(g) *Guard service.* The operator is authorized to provide guards or contract for guard service to safeguard the merchandise and ensure the security of the zone. This authorization does not limit the au-

thority of the district director to assign Customs guards to protect the revenue under section 4 of the Act (19 U.S.C. 81d).

(h) *Miscellaneous responsibilities.* The operator is responsible for complying with requirements for admission, manipulation, manufacture, exhibition, or destruction, shortage, or overage; inventory control and recordkeeping systems, transfer to Customs territory, and other requirements as specified in this part.

§ 146.5 Activation fee and annual fee.

The operator, or where there is no operator, the grantee, will be charged a nonrefundable fee to activate a zone or any portion of a zone, or to alter or relocate an activated portion of a zone, under the provisions of 31 U.S.C. 9701. The operator of an activated zone will be charged a nonrefundable annual fee for each activated zone as payment of the cost of the additional Customs service required under the Act as provided in 19 U.S.C. 81n and the regulations in this part. The operator or grantee shall pay the annual fee to the district director of the district in which the zone is located within 14 days after activation and within 14 days after the effective date of the published fee schedule for each year thereafter that the area remains activated. The fee schedule will be revised annually and published in the Federal Register and the CUSTOMS BULLETIN.

§ 146.6 Procedure for activation.

(a) *Application.* A zone operator, or where there is no operator, a grantee, shall make written application to the district director of the district in which the zone is located to obtain approval of activation of a zone or zone site. The area to be activated may be all or any portion of the zone approved by the Board. The application must include a description of all the zone sites covered by the application, any operation to be conducted therein, and a statement of the general character of the merchandise to be admitted.

(b) *Supporting documents.* The appliclation must be accompanied by the following:

(1) The application fee required by § 146.5;

(2) A blueprint of the area approved by the Board to be activated showing area measurements, including all openings and buildings; and all outlets, inlets, and pipelines to any tank for the storage of liquid or similar product, that portion of the blueprint certified to be correct by the operator of the tank;

(3) A gauge table, when appropriate, showing the capacity, in the appropriate unit, of any tank, certified to be correct by the operator of the tank;

(4) A procedures manual describing the Inventory control and recordkeeping system that will be used in the zone, certified by the operator or grantee to meet the requirements of Subpart B; and

(5) The written concurrence of the grantee, when the operator applies for activation, in the requested zone activation.

(c) *Inquiry by district director.* As a condition of approval of the application, the district director may order an inquiry by a Customs officer into:

(1) The qualifications, character, and experience of an operator and/or grantee and their principal officers; and

(2) The security, suitability, and fitness of the facility to receive merchandise in a zone status.

(d) *Decision of the district director.* The district director shall promptly notify the applicant in writing of his decision to approve or deny the application to activate the zone. If the application is denied, the notification will state the grounds for denial which need not be limited to those listed in § 146.82. The decision of the district director will be the final Customs administrative determination in the matter. On approval of the application, a Foreign Trade Zone Operator's Bond shall be executed on Customs Form 301, containing the bond conditions of § 113.73 of this chapter.

(e) *Activation.* Upon the district director's approval of the application and acceptance of the executed bond the zone or zone site will be considered activated; and merchandise may be admitted to the zone. Execution of the bond by an operator does not lessen the liability of the grantee to comply with the Act and implementing regulations.

§ 146.7 Zone changes.

(a) *Alteration of an activated area.* An operator shall make written application to the district director for approval of an alteration of an activated area, including an alteration resulting from a zone boundary modification. The application must be accompanied by the fee required in § 146.5 and the supporting document requirements specified in § 146.6, as applicable. The district director may review the security, suitability, and fitness of the area, and shall reply to the applicant as provided for in § 146.6.

(b) *Deactivation or reactivation.* A grantee, or an operator with the concurrence of a grantee, shall make written application to the district director for deactivation of a zone site, indicating by layout or blueprint the exact site to be deactivated. The district director shall not approve the application unless all merchandise in the site in zone status (other than domestic status) has been removed at the risk and expense of the operator. The district director may require an accounting of all merchandise in a zone as a condition of approving the deactivation. A zone may be reactivated using the above procedure if a sufficient bond is on file under § 146.6(d). No fee is required for deactivation or reactivation.

(c) *Suspenson of activated site.* When approval of an activated status has been suspended through the procedure in Subpart G, the district director may require all goods in that area in zone status (other than domestic status) to be transferred to another zone, a bonded warehouse, or other location where they may lawfully be

stored, if the district director considers that transfer advisable to protect the revenue or administer any Federal law or regulation.

(d) *New bond.* The district director may require an operator to furnish, on 10 days notice, a new Foreign Trade Zone Operator's Bond on Customs Form 301. If the operator fails to furnish the new bond, no more merchandise will be received in the zone in zone status. Merchandise in zone status (other than domestic status) will be removed at the risk and expense of the operator. A new bond may be required if (i) the activated zone area is substantially altered; (ii) the character of merchandise admitted to the zone or operations performed in the zone are substantially changed; (iii) the existing bond lacks good and sufficient surety; or (iv) for any other reason that substantially affects the liability of the operator under the bond. Although a new bond may not be required, the operator shall obtain the consent of the surety to any material alteration in the boundaries of the zone.

(e) *New operator.* A grantee of an activated zone site shall make written application to the district director for approval of a new operator, submitting with the application a certification by the new operator that the inventory control and recordkeeping system meets the requirements of Subpart B, and a copy of the system procedures manual if different from the previous operator's manual. The district director may order an inquiry into the qualifications, character, and experience of the operator and its principal officers.

(f) The bond in § 146.6 shall be submitted by the operator before the operating agreement may become effective in respect to merchandise in zone status. The district director shall promptly notify the grantee, in writing, of the approval or disapproval of the application.

(g) *List of officers, employees, and other persons.* The district director may make a written demand upon the operator to submit, within 30 days after the date of the demand, a written list of the names, addresses, social security numbers, and dates and places of birth of officers and persons having a direct or indirect financial interest in the operator, and of persons employed in the carriage, receipt or delivery of merchandise in zone status, whether employed by the zone operator or a zone user. If a list was previously furnished, the district director may make a written demand for the same informaton in respect to new persons employed in the carriage, receipt, or delivery of zone status merchandise within 10 days after such employment. The list need not include employees of common or contract carriers transporting goods to or from the zone.

§ 146.8 Seals, authority of operator to break and affix.

The district director may authorize an operator to break a Customs in-bond seal affixed under § 18.4 of this chapter, or under any Customs order or directive, on any vehicle or intermodal container containing merchandise approved for admission to the zone upon

its arrival at the zone; or to affix a Customs in-bond seal to any vehicle or intermodal container of merchandise for which an entry, withdrawal, or other approval document has been obtained for movement in-bond from the zone. The authorized affixing or breaking of that seal will be considered to have been done under Customs supervision. The operator shall report to the district director, upon arrival of the vehicle or container at the zone, any seal found to be broken, missing, or improperly affixed, and hold the vehicle or container and its contents intact pending instructions from the district director. If the operator does not obtain the written concurrence of the carrier as to the condition of the seal or delivering conveyance, the district director shall deem the seal or delivering conveyance to be intact.

§ 146.9 Permission of operator.

An application for permission to admit merchandise into a zone, or to manipulate, manufacture, exhibit, or destroy merchandise in a zone must include the written concurrence of the operator, except where the regulations of this part provide for the making of application by the operator itself or where the operator files a separate specific or blanket application. The written concurrence of the operator in the removal of merchandise from a zone is not required because the merchandise is released by the district director to the operator for delivery from the zone, as provided in § 146.71(a).

§ 146.10 Authority to examine merchandise.

The district director may cause any merchandise to be examined before or at the time of admission to a zone, or at any time thereafter, if the examination is considered necessary to facilitate the proper administration of any law, regulation, or instruction which Customs is authorized to enforce.

§ 146.11 Transportation of merchandise to a zone.

(a) *From outside Customs territory.* Merchandise may be admitted directly to a zone from any place outside Customs territory.

(b) *Through Customs territory, foreign merchandise.* Foreign merchandise destined to a zone and transported in-bond through Customs territory will be subject to the laws and regulations applicable to other merchandise transported in-bond between two places in Customs territory.

(c) *From Customs territory, domestic merchandise.* Domestic merchandise may be admitted to a zone from Customs territory by any means of transportation which will not interfere with the orderly conduct of business in the zone.

(d) *From a bonded warehouse.* Merchandise may be withdrawn from a bonded warehouse under the procedure in § 144.37(g) of this chapter and transferred to a zone for admission in zone restricted status.

150-144 O - 86 - 4

§ 146.12 Use of zone by carrier.

(a) *Primary use; lading and unlading.* The water area docking facilities, and any lading and unlading stations of a zone are intended primarily for the unlading of merchandise into the zone or the lading of merchandise for removal from the zone. Their use for other purposes may be terminated by Customs if found to endanger the revenue, or by the Board if found to impede the primary use of the zone.

(b) *Carrier in zone not exempt from law or regulations.* Nothing in the Act or the regulations in this part shall be construed as excepting any carrier entering, remaining in, or leaving a zone from the application of any other law or regulation.

§ 146.13 Customs forms and procedures.

Where a Customs form or other document is required in this part, the number of copies of the form or document required to be presented and their manner of distribution and processing shall be determined by the district director, except as otherwise specified in this part.

§ 146.14 Retail trade within a zone.

Retail trade is prohibited within a zone except as provided in 19 U.S.C. 81o(d). See also the regulations of the Board as contained in 15 CFR Part 400.

SUBPART B—INVENTORY CONTROL AND RECORDKEEPING SYSTEM

§ 146.21 General requirements.

(a) *Systems capability.* The operator shall maintain either manual or automated inventory control and recordkeeping systems or combination manual and automated systems capable of:

(1) Accounting for all merchandise, including domestic status merchandise, temporarily deposited, admitted, granted a zone status and/or status change, stored, exhibited, manipulated, manufactured, destroyed, transferred, and/or removed from a zone;

(2) Producing accurate and timely reports and documents as required by this part;

(3) Identifying shortages and overages of merchandise in a zone in sufficient detail to determine the quantity, description, tariff classification, zone status, and value of the missing or excess merchandise;

(4) Providing all the information necessary to make entry for merchandise being transferred to the Customs territory;

(5) Providing an audit trail to Customs forms from admission through manipulation, manufacture, destruction or transfer of merchandise from a zone either by zone lot or Customs authorized inventory method.

(b) *Procedures manual.*

(1) The operator shall provide the district director with an English language copy of its written inventory control and recordkeeping systems procedures manual in accordance with the requirements of this part.

(2) The operator shall keep current its procedures manual and shall submit to the district director any change at the time of its implementation.

(3) The operator may authorize a zone user to maintain its individual inventory control and recordkeeping system and procedures manual. The operator shall furnish a copy of the zone user's procedures manual, including any subsequent changes, to the district director. However, the operator will remain responsible to Customs and liable under its bond for supervision, defects in, or failures of a system.

(4) The operator's procedures manual and subsequent changes will be furnished to the district director for information purposes only. Customs receipt of a manual does not indicate approval or rejection of a system.

(c) *Liability of operator.* Upon zone activation approval the operator remains liable for complying with all inventory control and recordkeeping system requirements set forth in this part.

§ 146.22 Admission of merchandise to a zone.

(a) *Identification.* All merchandise will be recorded in a receiving report or document using a zone lot number or unique identifier. All merchandise, except domestic status merchandise for which no permit for admission is required under § 146.43, will be traceable to a Customs Form 214 and accompanying documentation.

(b) *Reconciliation.* Quantities received will be reconciled to a receiving report or document such as an invoice with any discrepancy reported to the district director as provided in §146.37.

(c) *Incomplete documentation.* Merchandise received without complete Customs documentation or which is unacceptable to the inventory control and recordkeeping system will be recorded in a suspense account or record until documentation is complete or the system is capable of accepting the information, at which time it will be formally admitted to the zone under § 146.32 or 146.40. The receiving report or document will provide sufficient information to identify the merchandise and distinguish it from other merchandise. The suspense account or record will be completely documented for Customs review to explain the differences noted and corrections made.

(d) *Recordation.* Merchandise received will be accurately recorded in the inventory system records from the receiving report or document using the zone lot number or unique identifier for traceability. The inventory record will state the quantity and date admitted, cost or value where applicable, zone status, and description of the merchandise, including any part or stock number.

§ 146.23 Accountability for merchandise in a zone.

(a) *Identification of merchandise.*

(1) *General.* A zone lot number or unique identifier will be used to identify and trace merchandise.

(2) *Fungible merchansise.* Fungible merchandise may be identified by an inventory method authorized by Customs, which is consistently applied, such as First-In-First-Out (FIFO) and using an unique identifier.

(b) *Inventory records.* The inventory records will specify by zone lot number or unique identifier:

(1) Location of merchandise;

(2) Zone status;

(3) Cost or value, unless operator's or user's financial records maintain cost or value and the records are made available for Customs review,

(4) Beginning balance, cumulative receipts and removals, adjustments, and current balance on hand by date and quantity;

(5) Destruction of merchandise; and

(6) Scrap, waste, and by-products.

(c) *Physical inventory.* The operator shall take at least an annual physical inventory of all merchandise in the zone (unless continuous cycle counts are taken as part of an ongoing inventory control program) with prior notification of the date(s) given to Customs for any supervision of the inventory deemed necessary. The operator shall notify the district director of any discrepancies in accordance with §146.53.

§ 146.24 Transfer of merchandise from a zone.

(a) *Accountability.*

(1) All zone status merchandise transferred from a zone will be accurately recorded within the inventory control and recordkeeping system.

(2) The inventory control and recordkeeping system for merchandise transfers must have the capability to trace all transfers back to a zone admission under a Customs authorized inventory method.

(b) *Information.* The inventory control and recordkeeping system must be capable of providing all information necessary to make entry for transfer of merchandise from the zone.

§ 146.25 Annual reconciliation.

(a) *Report.* The operator shall prepare a reconciliation report within 90 days after the end of the zone/subzone year unless the district director authorizes an extension for reasonable cause. The operator shall retain that annual reconciliation report for a spot check or audit by Customs, and need not furnish it to Customs unless requested. There is no form specified for the preparation of the report.

(b) *Information required.* The report must contain a description of merchandise for each zone lot or unique identifier, zone status,

quantity on hand at the beginning of the year, cumulative receipts and transfers (by unit), quantity on hand at the end of the year, and cumulative positive and negative adjustments (by unit) made during the year.

(c) *Certification.* The operator shall submit to the district director within 10 working days after the annual reconciliation report, a letter signed by the operator certifying that the annual reconciliation has been prepared, is available for Customs review, and is accurate. The certification letter must contain the name and street address of the operator, where the required records are available for Customs review; and the name, title, and telephone number of the person having custody of the records. Reporting of shortages and overages based on the annual reconciliation will be made in accordance with § 146.53. These reports must accompany the certification letter.

§ 146.26 System review.

The operator shall perform an annual internal review of the inventory control and recordkeeping system and shall report to the district director any deficiency discovered and corrective action taken, to ensure that the system meets the requirements of this part.

Subpart C—Admission of Merchandise to a Zone

§ 146.31 Admissibility of merchandise into a zone.

Merchandise of every description may be admitted into a zone unless prohibited by law. A distinction is made between prohibited and conditionally admissible merchandise.

(a) *Prohibited merchandise.* District directors shall not admit prohibited merchandise. If there is a question as to whether the merchandise may be prohibited, district directors may permit the temporary deposit of the merchandise in a zone pending a final determination of its status. Any prohibited merchandise which is found within a zone will be disposed of in the manner provided for in the laws and regulations applicable to that merchandise.

(b) *Conditionally admissible merchandise.* The admission of this merchandise into a zone is subject to the regulations of the Federal agency concerned.

§ 146.32 Application and permit for admission of merchandise.

(a) *Application on Customs Form 214 and permit.* Merchandise may be admitted into a zone only upon application on a uniquely and sequentially numbered Customs Form 214 ("Application for Foreign Trade Zone Admission and/or Status Designation") and the issuance of a permit by the district director. Exceptions to the Customs Form 214 requirement are for merchandise temporarily deposited (§ 146.33), transiting merchandise (§ 146.34), or domestic merchandise admitted without permit (§ 146.43). The applicant for admission shall present the application to the district director and

shall include a statistical copy on Customs Form 214–A for transmittal to the Bureau of Census, unless the applicant has made arrangements for the direct transmittal of statistical information to that agency.

(b) *Supporting documents.*

(1) *Commercial documentation.* The applicant shall submit with the application two copies of an examination invoice meeting the requirements of Subpart F, Part 141, of this chapter, for any merchandise, other than that excepted in paragraph (a) of this section, to be admitted to a zone. The notation of tariff classification and value required by § 141.90 of this chapter need not be made, unless the merchandise is to be admitted in privileged status.

(2) *Evidence of right to make entry.* The applicant for admission shall submit with the application a document similar to that which would be required as evidence of the right to make entry for merchandise in Customs territory under § 141.11 or 141.12 of this chapter.

(3) *Release order.* Merchandise will not be authorized for delivery by Customs to a zone until a release order has been executed by the carrier which brought the merchandise to the port, unless the merchandise is released back to that same carrier for delivery to the zone (see § 141.11 of this chapter). When a release order is required, it will be made on any of the forms specified in § 141.111 of this chapter, or by the following statement attached to Customs Form 214:

Authority is hereby given to release the merchandise described in this application to _____

_____

Name of carrier _____

_____

Signature and title of carrier representative _____

_____

A blanket or qualified release order may be authorized for the transfer of merchandise to a zone as provided for in § 141.111 of this chapter.

(4) *Application to unlade.* For merchandise unladen in the zone directly from the importing carrier, the application on Customs Form 214 will be supported by an application to unlade on Customs Form 3171.

(5) *Other documentation.* The district director may require additional information or documentation as needed to conduct an examination of merchandise under Customs selective entry processing criteria, or to determine whether the merchandise is admissible to the zone.

(c) *Conditions for issuance of a permit.* The district director will issue a permit for admission of merchandise to a zone when:

(1) The application is properly executed and includes the zone status desired for the merchandise, as provided in Subpart D of this part;

(2) The operator's approval appears either on the application or in a separate specific or blanket approval;

(3) The merchandise is retained for examination at the place of unlading, the zone, or other location designated by the district director, except for merchandise for direct delivery to a zone under §§ 146.39 and 146.40. The merchandise may be examined as if it were to be entered for consumption or warehouse; and

(4) All requirements have been fulfilled.

(d) *Blanket application for admission of merchandise.* Merchandise may be admitted to a zone under blanket application upon presentation of a Customs Form 214 covering more than one shipment of merchandise. A blanket application for admission is for:

(1) Shipments which arrive under one transportation entry as described in § 141.55 of this chapter, or

(2) Shipments which are destined to the same zone applicant on a single business day, in which case the applicant shall:

(i) Present the examination invoices required by paragraph (b) of this section to the district director before the merchandise is admitted into the zone,

(ii) Have been approved for the direct transmittal of statistical trade information to the Bureau of Census under an agreement with that agency; and

(iii) Have examination invoices containing a unique identifier to trace the shipment to the manifest of the carrier that brought the merchandise to the port having jurisdiction over the zone, as well as to the inventory control and recordkeeping system of the operator as described in Subpart B.

§ 146.33 Temporary deposit for manipulation.

Imported merchandise for which an entry has been made and which has remained in continuous Customs custody may be brought temporarily to a zone for manipulation and return to Customs territory under Customs supervision, pursuant to § 562, Tariff Act of 1930, as amended (19 U.S.C. 1562), and § 19.11 of this chapter. That merchandise will not be considered within the purview of the Act but will be treated as though remaining in Customs territory. No zone form or procedure will be considered applicable, but the merchandise will remain subject to any requirements necessary for the enforcement of § 562 and other Customs laws while in the zone.

§ 146.34 Merchandise transiting a zone.

The following procedure is applicable when merchandise is to be unladen from any carrier in the zone for immediate transfer to

Customs territory, or if it is to be transferred from Customs territory through the zone for immediate lading on any carrier in the zone:

(a) *Application.* Application for permission to lade or unlade will be filed with the district director on Customs Form 3171 prior to transfer of the merchandise into the zone.

(b) *Permit.* The district director shall permit the transfer unless he has reason to believe that the merchandise will not be moved promptly from the zone or will be made the subject of an application for admission in accordance with § 146.32(a).

(c) *Treatment of merchandise.* Upon the issuance of a permit to lade, or unlade, the merchandise will be treated as though the lading or unlading were in the Customs territory.

(d) *Delay in zone transit.* Merchandise delayed while transiting a zone must be made the subject of an application for admission in accordance with § 146.32, or it must be removed from the zone.

§ 146.35 Temporary deposit in a zone; Incomplete documentation.

(a) *General.* Temporary deposit of merchandise in a zone is allowed in circumstances where the information or documentation necessary to complete the Customs Form 214 is not available at the time of arrival of merchandise within the jurisdiction of the port. The merchandise will be subject to examination as provided in § 146.36.

(b) *Application.* An application for temporary deposit will be made to the district director on a properly signed and uniquely numbered Customs Form 214, annotated clearly "Temporary Deposit in a Zone".

(c) *Conditions.* Merchandise temporarily deposited under the provisions of this section has no zone status and is considered to be in the Customs territory. It will:

(1) Be physically segregated from all other zone merchandise;

(2) Be held under the bond and at the risk of the operator; and

(3) Be manipulated only to the extent necessary to obtain sufficient information about the merchandise to file the appropriate admission or entry documentation.

(d) *Approval.* The district director shall approve the application for temporary deposit of merchandise in a zone if the provisions of paragraphs (b) and (c) are met.

(e) *Submission of Customs Form 214.* A complete and accurate Customs Form 214 will be submitted, as provided in § 146.32, within 5 working days plus any extension granted by the district director, or the merchandise shall be placed in general order.

§ 146.36 Examination of merchandise.

Except for direct delivery procedures provided for in § 146.39, all merchandise covered by a Customs Form 214 may be retained for Customs examination at the place of unlading, the zone, or another

location, as designated by the district director. The district director may authorize release of the merchandise without examination, as provided in § 151.2 of this chapter. If a physical examination is conducted, the Customs officer shall note the results of the examination on the examination invoices.

§ 146.37 Operator admission responsibilities.

(a) *Maintenance admission documentation.* The operator shall maintain either:

(1) *Lot file.* The operator shall open and maintain a lot file containing a copy of the Customs Form 214, the examination invoice, and all other documentation necessary to account for the merchandise covered by each Customs Form 214. The lot file will be maintained in sequential order by using the unique number assigned to each Customs Form 214 as the file reference number; or

(2) *Authorized inventory method.* Where a Customs authorized inventory method other than a lot system (specific identification of merchandise) is used, e.g., First-In-First-Out (FIFO), no lot file is required but the operator shall maintain a file of all Customs Form's 214 in sequential order.

(b) *Examination invoice.* The operator shall give a copy of the examination invoice to the person making entry to transfer the merchandise from the zone upon request of that person or the district director.

(c) *Liability for merchandise.* The operator will be held liable under its bond for the receipt of merchandise admitted in the quantity and condition as described on the Customs Form 214, except as modified by a discrepancy report:

(1) Signed jointly by the operator and carrier on the Customs Form 214 or other approved form within 15 days after admission of the merchandise, and reported to the district director within 2 working days thereafter; or

(2) Submitted on Customs Form 5931 under the provisions of Subpart A, Part 158, of this chapter within 20 days after admission of the merchandise. The operator may file a Customs Form 5931 on behalf of the person who applied for admission of merchandise to the zone.

(d) *Supervision of merchandise.* The district director may authorize the receipt of zone status merchandise at a zone without physical supervision by a Customs officer (see section 146.3). In that case, the operator shall supervise the receipt of merchandise into the zone, report the receipt and condition of the merchandise, and mark packages with the unique Customs Form 214 number so that the merchandise can be traced to a particular Customs Form 214. Packages that are accounted for under a Customs-authorized inventory method other than specific indentification, need not be marked with a unique Customs Form 214 number but must be adequately identified so Customs can conduct an inventory count. The

150-144 O - 86 - 5

operator shall submit the Customs Form 214 to Customs at the location specified by the district director.

§ 146.38 Certificate of arrival of merchandise.

When a certificate prepared by Customs as to the arrival of any merchandise in a zone is required by a Federal agency, the district director shall issue the document certifying only that authorization to deliver the merchandise to a zone has been made. The operator shall issue a certificate of arrival of merchandise at a zone.

§ 146.39 Direct delivery procedures.

(a) *General.* This procedure is for delivery of merchandise to a zone without prior application and approval on Customs Form 214.

(b) *Application.* An operator, meeting the criteria of paragraph (c) of this section, shall file a written application with the district director at least 30 days before the special procedure is to become effective. The application will describe the merchandise to be handled or processed, and the kind of operation which it will undergo in the zone.

(c) *Criteria.* the district director shall approve the application if the following criteria are met:

(1) The merchandise is not restricted or of a type which requires Customs examination or documentation review before or upon its arrival at the zone;

(2) The merchandise to be admitted to the zone, and the operations to be conducted therein, are known well in advance, are predictable and stable over the long term, and are relatively fixed in variety by the nature of the business conducted at the site; and

(3) The operator is the owner or purchaser of the goods.

(d) *Application decision.* The district director shall promptly notify the operator, in writing, of Customs decision on the application. If the application is denied, the district director shall specify the reason for denial in his reply. The district director's decision will constitute the final Customs administrative determination concerning the application.

(e) *Revocation of approval.* The district director may revoke the approval given under this section if it becomes necessary for Customs routinely to examine the merchandise or documentation before or upon admission to the zone.

§ 146.40 Operator responsibilities for direct delivery.

(a) *Arrival of conveyance.* Upon arrival at a subzone or zone site of a conveyance containing foreign merchandise, the operator shall:

(1) Collect in-bond or cartage documentation from the carrier;

(2) Check the condition of any seal affixed to the conveyance, and if broken, missing or improperly affixed, notify the district director and receive instructions before unloading the merchandise;

(3) Check each incoming in-bond and cartage shipment to determine if the manifested quantity or the quantity on the cartage document agrees with the quantity actually received;

(4) Sign and date the in-bond or cartage documentation to accept responsibility for the merchandise under the Foreign Trade Zone Operator' Bond and to relieve the carrier of responsibility.

(5) Forward the in-bond or cartage documentation so as to reach the district director within 2 working days after the date of arrival of the conveyance at the subzone or zone site;

(6) Maintain a file of open in-bond manifests in chronological order of date of conveyance arrival to identify shipments that have arrived but the entire contents of which have not been admitted to the subzone or zone site; and

(7) Notify the district director, by annotation on the Customs Form 214, when the entire contents of a shipment have been admitted.

(b) *Admission of merchandise: alternative procedures.*

(1) *Cumulative Customs Form 214.* If the operator has an agreement with the Bureau of Census for direct transmittal of statistical information, he shall submit to the district director each business day a properly signed and uniquely numbered Customs Form 214 listing all merchandise except for domestic status merchandise admitted under § 146.43 recorded into the inventory control and recordkeeping system during the previous business day. The Customs Form 214 must contain a list of all in-bond (I.T.) numbers or the unique number of any cartage document, as well as the number of invoices for each I.T. or cartage document, pertaining to merchandise which has been entered into the system.

(2) *Individual Customs Form 214.* If a cumulative Customs Form 214 is not submitted as provided in paragraph (b)(1) of this section, the operator shall file with the district director each business day an individual Customs Form 214 and 214–A covering each shipment recorded into the inventory control and recordkeeping system during the previous business day. The forms shall be submitted within 10 days after the end of the month in which the merchandise was received in the zone, and no extension beyond that time will be approved by the district director.

(3) *General order.* Merchandise which is not admitted into a subzone or zone site as provided in this section within 5 working days after its arrival there may be sent to general order unless:

(i) The district director grants the operator's request for an extension of the 5 working day period; or

(ii) The importer of record files an appropriate Customs entry for the merchandise and removes it from the zone premises.

(4) *inventory control and recordkeeping system.* The operator shall establish and maintain a continuing input quality control program to ensure that information concerning merchandise in admission documents, verified or corrected by counts and checks, is accurately recorded in the inventory control and recordkeeping system. Quantities recorded in the system, after allowance by the district director for any discrepancies, will be the quantities of merchan-

dise for which the operator shall be held liable under its bond for admission to the subzone or zone site. A discrepancy involving a within-case shortage (or overage) need not be reported on Customs Form 5931, if the operator is able to report that information in another manner so that the district director can determine whether there is liability for the discrepancy under the bond of any party to the importation.

Subpart D—Status of Merchandise in a Zone

§ 146.41 Privileged foreign status.

(a) *General.* Foreign merchandise which has not been manipulated or manufactured so as to effect a change in tariff classification will be given status as privileged foreign merchandise on proper application to the district director.

(b) *Application.* Each application for this status will be made on Customs Form 214 at the time of filing the application for admission of the merchandise into a zone or at any time thereafter before the merchandise has been manipulated or manufactured in the zone in a manner which has effected a change in tariff classification.

(c) *Supporting documentation.* Each applicant for this status shall submit to the district director, with the application, an invoice notated as provided for in § 141.90 of this chapter.

(d) *Determination of duties and taxes.* Upon receipt of the application and accompanying invoice, the district director may examine the merchandise to determine whether to approve the application. The merchandise will be subject to classification and valuation as provided in § 146.65.

(e) *Status as privileged foreign merchandise binding.* A status as privileged foreign merchandise cannot be abandoned and remains applicable to the merchandise even if changed in form by manipulation or manufacture, except in the case of recoverable waste (see § 146.42(b)), as long as the merchandise remains within the purview of the Act. However, privileged foreign merchandise may be exported or withdrawn for supplies, equipment, or repair material of vessels or aircraft without the payment of taxes and duties, in accordance with §§ 146.67 and 146.69.

§ 146.42 Nonprivileged foreign status.

All of the following will have the status of nonprivileged foreign merchandise:

(a) *Foreign merchandise.* Foreign merchandise properly in a zone which does not have the status of privileged foreign merchandise or of zone-restricted merchandise;

(b) *Waste.* Waste recovered from any manipulation or manufacture of privileged foreign merchandise in a zone; and

(c) *Certain domestic merchandise.* Domestic merchandise in a zone, which by reason of noncompliance with the regulations in

this part has lost its identity as domestic merchandise, will be treated as foreign merchandise. Any domestic merchandise will be considered to have lost its identity if the district director determines that it cannot be identified positively by a Customs officer as domestic merchandise on the basis of an examination of the articles or consideration of any proof that may be submitted promptly by a party-in-interest.

§ 146.43 Domestic status.

(a) *General.* Domestic status may be granted to merchandise:

(1) The growth, product, or manufacture of the U.S. on which all internal-revenue taxes, if applicable, have been paid;

(2) Previously imported and on which duty and tax has been paid; or

(3) Previously entered free of duty and tax.

(b) *Application.* No application or permit is required for the admission of domestic status merchandise, including domestic packing and repair material, to a zone, except upon order of the Commissioner of Customs. No application or permit is required for the manipulation, manufacture, exhibition, destruction, or transfer to Customs territory of domestic status merchandise, including packing and repair materials, except (1) when it is mixed or combined with merchandise in another zone status, or (2) upon order of the Commissioner of Customs. When the Commissioner orders a permit to be required for domestic status merchandise, he may also order the procedures, forms, and terms under which the permit will be received and processed.

(c) *Return of merchandise to Customs territory.* Upon compliance with the provisions of this section, any of the merchandise specified in paragraph (a) of this section, may subsequently be returned to Customs territory free of quotas, duty, or tax.

§ 146.44 Zone-restricted status.

(a) *General.* Merchandise taken into a zone for the sole purpose of exportation, destruction (except destruction of distilled spirits, wines, and fermented malt liquors), or storage will be given zone-restricted status on proper application. That status may be requested at any time the merchandise is located in a zone, but cannot be abandoned once granted. Merchandise in zone-restricted status may not be removed to Customs territory for domestic consumption except where the Board determines the return to be in the public interest.

(b) *Application.* Application for zone-restricted status will be made on Customs Form 214.

(c) *Merchandise considered exported.*

(1) *For Customs purposes.* If the applicant desires a zone-restricted status in order that the merchandise may be considered exported for the purpose of any Customs law, all pertinent Customs requirements relating to an actual exportation shall be complied

with as though the admission of the merchandise into the zone constituted a lading on an exporting carrier at a port of final exit from the U.S. Any declaration or form required for actual exportation will be modified to show the merchandise has been deposited in a zone in lieu of actual exportation, and a copy of the approved Customs Form 214 may be accepted in lieu of any proof of shipment required in cases of actual exportation.

(2) *For other purposes.* If the merchandise is to be considered exported for the purpose of any Federal law other than the Customs laws, the district director shall be satisifed that all pertinent laws, regulations, and rules administered by the Federal agency concerned have been complied with before the Customs Form 214 is approved.

(d) *Merchandise entered for warehousing transferred to a zone.* Merchandise entered for warehousing and transferred to a zone, other than temporarily for manipulation and return to Customs territory as provided for in § 146.33, will have the status of zone-restricted merchandise when admitted into the zone. The application on Customs Form 214 will state that zone-restricted status is desired for the merchandise.

Subpart E—Handling of Merchandise in a Zone

§ 146.51 Customs control of merchandise.

No merchandise, other than domestic status merchandise provided for in § 146.43, will be manipulated, manufactured, exhibited, destroyed, or transferred from a zone in any manner or for any purpose, except under Customs permit as provided for in this part. The district director may require segregation of any zone status merchandise whenever necessary to protect the revenue or properly administer U.S. laws or regulations.

§ 146.52 Manipulation, manufacture, exhibition or destruction; Customs Form 216.

(a) *Application.* Prior to any action, the operator shall file with the district director an application (or blanket application) on Customs Form 216 for permission to manipulate, manufacture, exhibit, or destroy merchandise in a zone. After Customs approves the application (or blanket application), the operator will retain in his recordkeeping system the approved application.

(b) *Approval.*

(1) The district director shall approve the application unless (i) the proposed operation would be in violation of law or regulation; (ii) the place designated for its performance is not suitable for preventing confusion of the identify or status of the merchandise, or for safeguarding the revenue; (iii) the district director is not satisfied that the destruction will be effective; or (iv) the Executive Secretary of the Board has not granted approval of a new manufacturing operation.

(2) The district director is authorized to approve a blanket application for a period of up to one year for a continuous or repetitive operation. The district director may disapprove or revoke approval of any application, or may require the operator to file an individual application.

(c) *Appeal of adverse ruling.* If an approved application is subsequently rescinded by the district director for any reason, the applicant or grantee may appeal the adverse ruling pursuant to the hearing provisions of § 146.82(b)(2). The rescission shall remain in effect pending the decision on the appeal.

(d) *Report results.*

(1) *Separate application.*—The operator shall report on Customs Form 216 the results of an approved manipulation, manufacture, exhibition, or certification of destruction (other than by a blanket application), unless the district director chooses physically to supervise the operation.

(2) *Blanket application.*—The operator shall maintain a record of an approved manipulation, manufacture, exhibition, or certification of destruction, in its inventory control and recordkeeping system so as to provide an accounting and audit trail of the merchandise through the approved operation.

(e) *Destruction.*

The district director may permit destruction to be done outside the zone, in whole or in part and at the risk and expense of the applicant, and under such conditions as are necessary to protect the revenue, if proper destruction cannot be accomplished within the zone. Any residue from the destruction within a zone, which is determined to be without commercial value, may be removed to Customs territory for disposal.

§ 146.53 Shortages and overages.

(a) *Report required.* The operator shall report, in writing, to the district director upon identification, as such, of any:

(1) Theft or suspected theft of merchandise;

(2) Merchandise not properly admitted to the zone; or

(3) Shortage of one percent (1%) or more of the quantity of merchandise in a lot or covered by a unique identifier, if the missing merchandise would have been subject to duties and taxes of $100 or more upon entry into the Customs territory. The operator shall record upon identification all shortages and overages, whether or not they are required to be reported to the district director at that time, in its inventory control and recordkeeping system. The operator shall record all shortages and overages as required in the annual reconciliation report under § 146.25.

(b) *Certain domestic merchandise.* Except in a case of theft or suspected theft, the operator need not file a report with the district director, or note in the annual reconciliation report, any shortage or overage concerning domestic status merchandise for which no permit is required.

(c) *Shortage.*

(1) *Operator responsibility.* The operator is responsible under its Foreign Trade Zone Operator's Bond for any loss of merchandise or for any merchandise which cannot be located or otherwise accounted for (except domestic status merchandise for which no permit is required), unless the district director is satisfied that the merchandise was:

(i) Never received in the zone;

(ii) Removed from the zone under proper permit;

(iii) Not removed from the zone; or

(iv) Lost or destroyed in the zone through fire or other casualty, evaporation, spillage, leakage, absorption, or similar cause, and did not enter the commerce of the U.S.

(2) *Liability for duty and taxes.* Upon demand of the district director, the operator shall make entry for and pay duties and taxes applicable to merchandise which is missing or otherwise not accounted for.

(d) *Overage.* The person with the right to make entry shall file, within 5 days after identification of an overage, an application for admission of the merchandise to the zone on Customs Form 214 or file a Customs entry for the merchandise. If a Customs Form 214 or a Customs entry is not timely filed, and the district director has not granted an extension of the time provided, the merchandise shall be sent to general order.

(e) *Damage.* The liability of the operator under its Foreign Trade Zone Operator's Bond may be adjusted for the loss of value resulting from damage to merchandise occurring in the zone. The operator shall segregate, mark, and otherwise secure damaged merchandise to preserve its identiy as damaged merchandise.

Subpart F—Transfer of Merchandise From a Zone

§ 146.61 Constructive transfer to Customs territory.

The district director shall accept receipt of any entry in proper form provided under this subpart, and the merchandise described therein will be considered to have been constructively transferred to Customs territory at that time, even though the merchandise remains physically in the zone. If the entry is thereafter rejected or cancelled, the merchandise will be considered at that time to be constructively transferred back into the zone in its previous zone status.

§ 146.62 Entry.

(a) *General.* Entry for foreign merchandise which is to be transferred from a zone, or removed from a zone for exportation or transportation to another port, for consumption or warehouse, will be made on Customs Form 7512, Customs Form 3461, Customs Form 7501, or other applicable Customs forms. If entry is made on Customs Form 3461, the person making entry shall file an entry

summary for all the merchandise covered by the Customs Form 3461 within 10 working days after the time of entry.

(b) *Documentation.* Customs Form 7501 or the entry summary will be accompanied by the entry documentation, including invoices, as provided in Parts 141 and 142 of this chapter. The person with the right to make entry shall submit any other supporting documents required by law or regulations that relate to the transferred merchandise and provide the information necessary to support the admissibility, the declared values, quantity, and classification of the merchandise. If the declared values are predicated on estimates or estimated costs, that information must be clearly stated in writing at the time an entry or entry summary is filed.

Customs Form 7512 for merchandise to be transferred to another port or zone or for exportation shall state that the merchandise covered is foreign trade zone merchandise; give the number of the zone from which the merchandise was transferred; state the status of the merchandise; and, if applicable, bear the notation or endorsement provided for in § 146.64(c), 146.66(b), or 146.70(c).

(c) *Waiver of supporting documents.* The district director may waive presentation of an invoice and supporting documentation required in paragraph (b) of this section with the entry or entry summary, if satisfied that presentation of those documents would be impractical, and the person making entry or the operator either files invoices and supporting documentation with the district director or maintains and makes those records available for examination by Customs.

§ 146.63 Entry for consumption.

(a) *Foreign merchandise.* Merchandise in foreign status or composed in part of merchandise in foreign status may be entered for consumption from a zone.

(b) *Zone-restricted merchandise.* Merchandise in a zone-restricted status may be entered for consumption only when the Board has ruled that merchandise can be entered for consumption.

(c) *Estimated production.*

(1) *Weekly entry.* When merchandise is manufactured or otherwise changed in a zone (exclusive of packing) to its physical condition as entered within 24 hours before physical transfer from the zone for consumption, the district director may allow the person making entry to file an entry on Customs Form 3461 for the estimated removals of merchandise during the calendar week. The Customs Form 3461 must be accompanied by a *pro forma* invoice or schedule showing the number of units of each type of merchandise to be removed during the week and their zone and dutiable values. Merchandise covered by an entry made under the provisions of this section will be considered to be entered and may be removed only when the district director has accepted the entry on Customs Form 3461. If the actual removals will exceed the estimate for the week, the person making entry shall file an additional Customs Form

3461 to cover the additional units before their removal from the zone. Notwithstanding that a weekly entry may be allowed, all merchandise will be dutiable as provided in § 146.65. When estimated removals exceed actual removals, the excess merchandise will not be considered to have been entered or constructively transferred to the Customs territory.

(2) *Individual transfers.* After acceptance of the weekly entry, individual transfers of merchandise covered by the entry may be made from the zone.

(d) *Textiles and textile products.* Subject to the existing statutory authority of the Board, textiles and textile products admitted into a zone, regardless of whether the merchandise has privileged or nonpriviledged foreign status, which would have been subject to quota or visa or export license requirements in their condition at the time of importation (if entered for consumption rather than admitted to a zone), may not be subsequently transferred into the Customs territory for consumption if, during the time the merchandise is in the zone, there has been a change by manipulation, manufacture, or other means:

(1) In the country of origin of the merchandise as defined by § 12.130 of this chapter;

(2) To exempt from quota or visa or export license requirements other than a change brought about by statute, treaty, executive order or Presidential proclamation; or

(3) From one textile category to another textile category.

§ 146.64 Entry for warehouse.

(a) *Foreign merchandise.* Merchandise in privileged foreign status or composed in part of merchandise in privileged foreign status may not be entered for warehouse from a zone. Merchandise in nonprivileged foreign status containing no components in privileged foreign status may be entered for warehouse in the same or at a different port.

(b) *Zone-restricted merchandise.* Foreign merchandise in zone-restricted status may be entered for warehouse in the same or at a different port only for storage pending exportation, unless the Board has approved another disposition.

(c) *Textiles and textile products.* Textiles and textile products which have been changed as provided for in § 146.63(d) may be entered for warehouse only if the entry is endorsed by the district director to show that the merchandise may not be withdrawn for consumption.

(d) *Time limit.* Merchandise may neither be placed nor remain in a Customs bonded warehouse after 5 years from the date of importation of the merchandise.

§ 146.65 Classified, valuation, and liquidation.

(a) *Classification.*

(1) *Privileged foreign merchandise.* Privileged foreign merchandise provided for in this section will be subject to tariff classification according to its character, condition and quantity, at the rate of duty and tax in force on the date of filing, in complete and proper form, the application for privileged status. Classification of merchandise subject to a tariff-rate import quota will be made only at the higher non-quota duty rate in effect on the date privileged foreign status was granted.

(2) *Nonprivileged foreign merchandise.* Nonprivileged foreign merchandise provided for in this section will be subject to tariff classification in accordance with its character, condition and quantity as constructively transferred to Customs territory at the time the entry or entry summary is filed with Customs.

(b) *Valuation.*

(1) *Total zone value.* The total zone value of merchandise provided for in this section will be determined in accordance with the principles of valuation contained in §§ 402 and 500 of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979 (19 U.S.C. 1401a, 1500). The total zone value shall be that price actually paid or payable to the zone seller in the transaction that caused the merchandise to be transferred from the zone. Where there is no price paid or payable, the total zone value shall be the cost of all materials and zone processing costs related to the merchandise transferred from the zone.

(2) *Dutiable value.* The dutiable value of merchandise provided for in this section shall be the price actually paid or payable for the merchandise in the transaction that caused the merchandise to be admitted into the zone less, if included, international shipment and insurance costs and U.S. inland freight costs. If there is no such price actually paid or payable, or no reasonable representation of that cost, the dutiable value may be determined by excluding from the zone value any included zone costs of processing or fabrication, general expenses and profit and the international shipment and insurances costs and U.S. inland freight costs related to the merchandise transferred from the zone. The dutiable value of recoverable waste or scrap provided for in § 146.42(b) will be the price actually paid or payable to the zone seller in the transaction that caused the recoverable waste or scrap to be transferred from the zone.

(3) *Allowance.* An allowance in the dutiable value of zone merchandise may be made by the district director in accordance with the provisions of Subparts B and C of Part 158 of this chapter, for damage, deterioration, or casualty while the merchandise is in the zone.

(c) *Liquidation; extension to update cost data.* When the declared value of values of the merchandise are based on an estimate or estimates, the person making entry may request an extension of liquidation pending the presentation of updated or actual cost data. A

request for an extension may be granted at the discretion of the district director.

§ 146.66 Transfer of merchandise from one zone to another.

(a) *At the same port.* A transfer of merchandise to another zone with a different operator at the same port (including a consolidated port) will be by a licensed cartman under an entry for immediate transportation on Customs Form 7512 or other appropriate form with a Customs Form 214 filed at the destination zone. A transfer of merchandise between zone sites at the same port having the same operator may be made under a permit on CF 6043 or under a local control system approved by the district director wherein any loss of merchandise between sites will be treated as if the loss occured in the zone.

(b) *At a different port.* A transfer of merchandise from a zone at one port of entry to a zone at another port will be by bonded carrier under an entry for immediate transportation on Customs Form 7512. All copies of the entry must bear a notation that the merchandise is being transferred to another zone designated by its number.

(c) *Forwarding of merchandise history; documentation.* When merchandise is transferred under the provisions of this section, the operator of the transferring zone shall provide the operator of the destination zone with the documented history of the merchandise being transferred.

(1) The following documentation must accompany merchandise maintained under a lot inventory control system:

(i) A copy of the original Customs Form(s) 214 with accompanying invoices for admission of the merchandise and all components thereof;

(ii) A copy of any Customs Form 214 filed subsequent to admission to change the status of the merchandise or its components; and

(iii) A copy of any Customs Form 216 to manipulate or manufacture the merchandise.

(2) The following documentation must accompany merchandise not under a lot system, and not manufactured in a zone:

(i) A copy of the original Customs Form(s) 214 with accompanying invoices for admission of the merchandise as attributed under the particular zone inventory method;

(ii) A copy of any Customs Form 214 filed subsequent to admission to change the status of the merchandise as attributed under the particular zone inventory method; and

(iii) A copy of any Customs Form 216 to manipulate the merchandise as attributed under the particular zone inventory method.

(3) If the documents specified in paragraph (c)(2) of this section are not presented, the operator of the transferring zone shall submit the following:

(i) A statement of the zone value, dutiable value, quantity, description, unique identifier, and zone status (showing any changes of status after admission and whether the merchandise was manipulated so as to change its tariff classification) of all the merchandise in the shipment covered by the transportation entry; and

(ii) A certification that the statement in paragraph (c)(3)(i) of this section, is true and that the information contained therein is contained in the inventory control and recordkeeping system of the transferring zone.

(4) The following documentation must accompany merchandise not under a lot system, but manufactured in a zone:

(i) A statement by the transferring zone operator of the zone value, dutiable value, quantity, description, unique identifier, and zone status of all the merchandise (and components thereof, where applicable) covered by the transportation entry. The statement will also show any change in zone status in the transferring zone and whether the merchandise has been manufactured or manipulated in the zone so as to change its tariff classification; and

(ii) A certification by the operator of the transferring zone that the statement in paragraph (c)(4)(i) of this section is true and the information therein is contained in the inventory control and recordkeeping system of the zone.

(5) The operator of the transferring zone shall transmit the historical documentation of the merchandise to the receiving zone within 10 working days after it has been delivered to the bonded carrier for transportation. The documentation will be referenced to the I.T. number covering the merchandise.

(d) *Arrival at destination zone.* Upon arrival of the merchandise at the destination zone, it will be admitted under the procedure provided for in § 146.32, except that no invoice or Customs examination will be required. When the historical documentation is received, the operator of the destination zone shall associate it with the Customs Form 214 for admission of the merchandise and incorporate that information into the zone inventory control and recordkeeping system.

§ 146.67 Transfer of merchandise for exportation.

(a) *Direct exportation.* Any merchandise in a zone may be exported directly therefrom (without transfer into Customs territory) upon compliance with the procedures of paragraph (b) of this section.

(b) *Immediate exportation.* Each transfer of merchandise to the Customs territory for exportation at the port where the zone is located, will be made under an entry for immediate exportation on Customs Form 7512. The person making entry shall furnish an export bond on Customs Form 301 containing the bond conditions provided for in § 113.62 of this chapter.

(c) *Transporation and exportation.* Each transfer of merchandise to the Customs territory for transportation to and exportation from

a different port, will be made under an entry for transportation and exportation on Customs Form 7512. The bonded carrier will be responsible for exportation of the merchandise in accordance with § 18.26 of this chapter.

(d) *Textiles and textile products.* Textiles and textile products which have been changed as provided for in § 146.63(d) may be exported and returned to Customs territory for warehousing provided the entry for warehouse is endorsed by the district director to show that the merchandise may not be withdrawn for consumption.

(e) *Merchandise produced or manufactured in a zone and returned to Customs territory after exportation.* Merchandise produced or manufactured in a zone and exported without having been transferred to Customs territory other than for exportation or for transportation and exportation will be subject, on its return to Customs territory, to the duties and taxes applicable to like articles of wholly foreign origin, unless it is conclusively established that it was produced or manufactured exclusively with the use of domestic merchandise. The identity of the domestic merchandise must have been maintained in accordance with the provisions of this part, in which case that merchandise will be subject to the provisions of Schedule 8, Part 1, Tariff Schedules of the United States (19 U.S.C. 1202).

§ 146.68 Transfer for transportation or exportation; estimated production.

(a) *Weekly permit.* The district director may allow the person making entry for merchandise provided for in § 146.63(c) to file an application for a weekly permit to enter and release merchandise during a calendar week for exportation, transportation, or transportation and exportation. The application will be on Customs Form 7512 stating at the top the words "Application for Weekly Zone Permit," and will be filed with the district director. The application must be accompanied by a *pro forma* invoice or schedule like that required in § 146.63(c)(1). If actual transfers will exceed the estimate for the week, the person with the right to make entry shall file a supplemental Customs Form 7512 to cover the additional merchandise to be transferred from the subzone or zone site. No merchandise covered by the weekly permit may be transferred from the zone before approval of the application by the district director.

(b) *Individual entries.* After approval of the application for a weekly permit by the district director, the pereson making entry will be authorized to execute individual Customs Forms 7512 for exportation, transportation, or transportation and exportation of the merchandise covered by permit. Upon transfer of the merchandise, the operator shall obtain a receipt from the carrier on Customs Form 7512 to ensure its assumption of liability under the carrier's or cartman's bond. Customs will consider the time of entry to be when the removing carrier signs the receipt for the merchan-

dise. The operator shall give the bonded carrier a copy of the individual Customs Form 7512 and the destination copy (Customs Form 7512–C), as provided for in § 18.2(c) of this chapter. The operator also shall ensure that the district director receives a copy of the Customs Form 7512 and the origin copy (Customs Form 7512–C) by the end of the next working day after the carrier has receipted for the merchandise.

(c) *Statement of merchandise entered.* The person making entry for merchandise under an approved weekly permit shall file with the district director, by the close of business on the second working day of the week following the week designated on the permit, a statement of the merchandise entered under that permit. The statement must list each Customs Form 7512 by its unique I.T. number, and will provide a reconciliation of the quantities on the weekly permit with the manifested quantities on the individual Customs Forms 7512 submitted to Customs, as well as an explanation of any discrepancy.

§ 146.69 Supplies, equipment, and repair material for vessels or aircraft.

(a) *General.* Any merchandise which may be withdrawn duty and tax free in Customs territory under § 309 or § 317, Tariff Act of 1930, as amended (19 U.S.C. 1309, 1317), and under §§ 10.59 through 10.65 of this chapter, may similarly be transferred from a zone, regardless of its zone status, under those statutes and regulations. Each transfer from a zone for delivery to a qualified vessel or aircraft, will be made on Customs Form 7512 (see § 10.60 of this chapter). The person making entry shall furnish a bond on Customs Form 301 containing the bond conditions provided for in § 113.62 of this chapter.

(b) *Merchandise for delivery within zone.* Upon acceptance of the entry and bond, the district director shall release the merchandise to the operator for delivery to the qualified vessel or aircraft for lading in the zone.

(c) *Merchandise for delivery outside zone.* Upon acceptance of the entry and bond, the district director shall release the merchandise to the operator for delivery to the bonded cartmen, lighterman, or carrier, for transportation through the Customs territory to the qualified lading vessel or aircraft.

§ 146.70 Transfer of zone-restricted merchandise into Customs territory.

(a) *General.* Zone-restricted merchandise may be transferred to Customs territory only for entry for exportation, for entry for transportation and exportation, for warehousing pending exportation, for destruction (except destruction of distilled spirits, wines and fermented malt liquors), for transfer from one zone to another, or for delivery to a qualified vessel or aircraft or as ground equipment of a qualified aircraft under § 309 or 317, Tariff Act of 1930,

as amended (19 U.S.C. 1309, 1317), unless the Board has ruled that the return of the merchandise to Customs territory for domestic consumption is in the public interest. With Board approval (See 15 CFR Part 400), that merchandise may be entered for consumption, for warehousing, for immediate transportation without appraisement, or under any other provision of the Customs laws, unless the Board has specified the form of entry to be made.

(b) *For consumption.* If the return of zone-restricted merchandise to Customs territory for consumption has been ruled by the Board to be in the public interest, the entry shall be endorsed by the district director to show the authority under which it was made, and that the merchandise is subject to the provisions of Schedule 8, Part 1, Tariff Schedules of the United States (19 U.S.C. 1202).

(c) *For warehousing.* Zone-restricted merchandise may be transferred from a zone to a Customs bonded warehouse for storage pending exportation. The Customs Form 7501 shall be endorsed by the district director to show that the merchandise may not be withdrawn for consumption. In the case of zone-restricted merchandise transported in bond to another port for warehousing and exportation, Customs Form 7512 shall be endorsed by the district director to show that the merchandise in foreign trade zone merchandise in zone-restricted status, which shall be entered for warehouse with proper endorsement on Customs Form 7501, and which may not be withdrawn for consumption. Zone-restricted merchandise transferred from a zone to a Customs bonded warehouse may not be manipulated, except for packing or unpacking incidental to exportation.

(d) *For other purposes.* Upon acceptance of an entry or withdrawal for zone-restricted merchandise for any purpose other than that described in a Board order, the entry shall be endorsed by the person making entry to show that actual exportation of the merchandise is required by the fourth proviso to § 3 of the Act, as amended, or the entry endorsed to require delivery to a qualified vessel or aircraft, under § 309 or 317, Tariff Act of 1930, as amended (19 U.S.C. 1309, 1317).

§ 146.71 Release and removal of merchandise from zone.

(a) *General.* Except as provided for in § 146.43, no merchandise will be transferred from a zone without a Customs permit on the appropriate entry or withdrawal form or other document as required in this part. The district director may authorize transfer from a zone without physical supervision or examination by a Customs officer. Upon issuance of a permit, the district director will authorize delivery of the merchandise only to the operator, who then may release the merchandise to the importer or carrier.

(b) *Liability for discrepancy.* When a transfer is not physically supervised by a Customs officer, the operator will be relieved of responsibility only for the merchandise in a zone in the condition and quantity as shown on the entry, withdrawal, or other appropriate

form. The operator will be relieved of responsibility only if it receives the signed receipt on the document of the importer or the carrier named in that document. The responsibility of the operator may be adjusted by any discrepancy report made jointly by the operator and the bonded cartman, lighterman, or carrier, or the importer, and signed by the above or an authorized representative within 15 days after transfer of the merchandise from the zone. Any adjustment must be noted on the permit copy of the entry, withdrawal, or other appropriate form or document. A copy of any joint report of discrepancy must be submitted to the district director within 10 working days of signing by the parties.

(c) *Time limit.* Except in the case of articles for use in a zone, merchandise for which a Customs permit for transfer to Customs territory has been issued must be physically removed from the zone within 5 working days of issuance of that permit. The district director, upon request of the operator, may extend that period for good cause. Merchandise awaiting removal within the required time limit will not be further manipulated or manufactured in the zone, but will be segregated or otherwise identified by the operator as merchandise that has been constructively transferred to Customs territory.

(d) *Retention or return of merchandise to zone for consumption.*

(1) The district director shall cancel any entry for consumption where (i) the merchandise is not removed from the zone within the period specified in paragraph (c) of this section, or (ii) the merchandise was removed from the zone but did not enter the commerce of the U.S. in Customs territory and was subsequently readmitted to a zone in domestic status. If the district director has reason to believe any new entry would be cancelled under the provisions of this subparagraph, he may reject the entry or demand a written stipulation, as a condition of entry acceptance, that the merchandise will not be returned to a zone in domestic status. Merchandise covered by an entry which has been cancelled under this subparagraph shall be restored to its last foreign status.

(2) A component of merchandise which has been entered, but not physically removed from a zone, shall be restored to its last zone status, provided the district director determines that the component was included in the entry through clerical error, mistake of fact, or other inadvertence not amounting to an error in the construction of the law. Such an error, including that in appraisement of any entry or liquidation due to the above circumstances, may be corrected pursuant to § 520(c)(1), Tariff Act of 1930, as amended (19 U.S.C. 1520(c)(1)), in accordance with the procedures described in Part 173 of this chapter. If the district director decides there has been no error, mistake, or inadvertence, or that the information was not timely provided, the component will be considered as an overage and subject to the provisions of § 146.53(d).

(3) When merchandise which has been entered for consumption is subsequently returned to a zone for a reason other than that specified in subparagraph (d)(1), it shall be admitted in domestic status.

SUBPART G—PENALTIES; SUSPENSION; REVOCATION

§ 146.81 Penalties.

(a) *Amount.* Upon violation of the Act, or any regulation issued under the Act, by the grantee, or any officer, agent, operator or employee thereof, the person responsible for or permitting the violation shall be subject to a fine of not more than $1,000. Each day during which a violation continues will constitute a separate offense. Liquidated damages, where applicable, will be imposed in addition to the fine (19 U.S.C. 81s).

(b) *Review.* All fines assessed by the district director under this section will be reviewed by the Director, Entry Procedures and Penalties Division, Headquarters, to determine whether further action against the grantee or operator, such as suspension or a recommendation for revocation of the grant, is warranted.

§ 146.82 Suspension.

(a) *For cause.* The district director may suspend for cause the activated status of a zone or zone site, or the privilege to admit, manufacture, manipulate, exhibit, destroy, transfer or remove merchandise at a zone or zone site for a period not to exceed 90 days. Upon order of the Board the suspension may be continued. If appropriate, the suspension may be limited to an individual user or users and not to the zone or zone site as a whole, or may be limited to a particular activity of an operator or user, such as suspension of the privilege to admit merchandise or the privilege to manufacture. An action to suspend will be taken in accordance with the procedure in paragraph (b) of this section if:

(1) The approval of the application to activate the zone was obtained through fraud or the misstatement of a material fact;

(2) The operator neglects or refuses to obey any proper order of a Customs officer or any Customs order, rule, or regulation relating to the operation or administration of a zone;

(3) The operator, or any officer of a corporation which has been granted the right to operate a zone, is convicted of or has committed an act that would constitute a felony, or would constitute a misdemeanor involving theft.

(4) The operator fails to furnish a current list of names, addresses, or other information as required by § 146.7;

(5) The operator does not provide a secure facility or properly safeguard merchandise within a zone;

(6) The operator fails to pay, within 30 days after the due date, all annual fees associated with the operation of a zone;

(7) The operator, or any officer, agent, or employee of the operator, discloses to an unauthorized person proprietary information contained on a Customs form or in the inventroy control and recordkeeping system; or

(8) The inventory control and recordkeeping system is impaired to the point where the identity of merchandise in zone status has been lost and cannot be reestablished without a suspension of zone operations.

(b) *Procedure.*

(1) *Notice.* The district director may, at any time, serve notice, writing, upon an operator to show cause why its right to continue operation of a zone should not be suspended or why an individual user or activities of an individual user should not be suspended, as provided for in paragraph (a) of this section. The notice will advise the operator of the grounds for the proposed action and will afford the operator an opportunity to respond, in writing, within 15 days after receipt of the notice. Thereafter, the district director shall consider the allegations and any response made by the operator and issue a decision, unless the operator requests a hearing in the matter.

(2) *Hearing.* If the operator requests a hearing, it will be held before a hearing officer designated by the Commissioner of Customs or his designee within 30 days following the operator's request. The operator may be represented by counsel at the hearing, and any evidence and testimony of witnesses in the proceeding, including substantiation of the allegations and the response thereto, will be presented. The right of cross-examination will be available to both parties. A stenographic record of the proceeding will be made and a copy will be delivered to the operator. At the conclusion of the hearing, the hearing officer shall transmit promptly all papers and the stenographic record of the hearing to the regional commissioner of the region in which the zone is located, together with a recommendation for final action.

(3) *Decision of regional commissioner.* Within 10 calendar days after delivery to the operator of a copy of the stenographic record of the hearing, the operator may submit to the regional commissioner in writing any additional views or arguments. The regional commissioner shall then render a written decision stating his reasons therefor. That decision will be served on the operator and will be considered the final Customs administrative action in the case.

(4) *Grantee.* If the grantee of the zone is not the operator, a copy of the notice to show cause will be served upon the grantee. The grantee, as a party-in-interest, may join the operator in any proceeding under this section.

§ 146.83 Revocation of zone grant.

(a) *Recommendation of district director.* The district director may at any time recommend to the Board that the privilege of establishing, operating, and maintaining a zone or subzone under Customs

jurisdiction be revoked for willful and repeated violations of the Act (19 U.S.C. 81r). If the district director believes that a substantial question of law exists as to whether willful and repeated violations of the Act have occurred, that officer may request internal advice under the provisions of Part 177 of this chapter from the Director, Carriers, Drawback and Bonds Division, Headquarters. A recommendation to the Board that a zone or subzone grant be revoked does not preclude, and may be in addition to, any liquidated damages, penalty, or suspension for cause.

(b) *Decision of the Board.* The procedure for revocation of a grant, the decision of the Board, and appeal is covered by the provisions of the Act and Title 15, Chapter IV, Part 400, Code of Federal Regulations.

CONFORMING AMENDMENTS

PARTS 18, 24, 112, 113, 141, 144, 178, AND 191

To conform the Customs Regulations to the changes made by the revision of Part 146, Customs Regulations (19 CFR Part 146), Parts 18, 24, 112, 113, 141, 144, 178, and 191, Customs Regulations (19 CFR Parts 18, 24, 112, 113, 141, 144, 178, and 191) are amended in the following manner:

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

1. The authority citation for Part 18 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1551-1553, 1624.

2. Section 18.2 is amended in the following manner:

a. By revising the heading to paragraph (a)(1) to read "Merchandise other than from warehouse or foreign trade zone delivered to bonded carrier."

b. By removing the words "paragraph (a)(2)" in the first sentence of paragraph (a)(1) and inserting, in their place, the words "paragraphs (a)(2) and (a)(3) of this section."

c. By adding a new paragraph (a)(4) to read as follows:

§ 18.2 Receipt by carrier manifest.

(a) * * *

(4) *Merchandise delivered from foreign trade zone.* When merchandise is delivered from a foreign trade zone to a bonded carrier for transportation in bond, supervision of lading will be accomplished in accordance with the procedure set forth in § 146.71(a) of this chapter.

* * * * * * *

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The authority citation for Part 24 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11, Tariff Schedules of the United States), 1624, 31 U.S.C. 9701.

2. Section 24.13 is amended by inserting in the first sentence of paragraphs (c) and (f), the words "a foreign trade zone operator," before the words "and bonded warehouse proprietor," respectively.

PART 112—CARRIERS, CARTMEN, AND LIGHTERMEN

1. The authority citation for Part 112 is revised to read as follows:

AUTHORITY: 19 U.S.C. 66, 1551, 1565, 1623, 1624.

2. All other statutory authority cited at the end of various sections in Part 112 is removed.

3. The last sentence of § 112.12(b)(3), is revised to read as follows:

§ 112.12 Application for authorization.

* * * * * * *

(b) *Special requirements.*

* * * * * * *

(3) *Private carriers.* * * * If the private carrier is the proprietor of one or more Customs bonded warehouses or bonded container stations, or the operator of a foreign trade zone, to which imported merchandise will be transported, he shall accompany the bond and copies of the bond by a statement showing the location of each warehouse, container station, or zone.

* * * * * * *

PART 113—CUSTOMS BONDS

1. The authority citation for Part 113 continues to read as follows:

AUTHORITY: 19 U.S.C. 66, 1623, 1624.

2. Section 113.73 is amended by revising paragraphs (a)(1) and (a)(2), and by adding paragraph (d), to read as follows:

§ 113.73 Foreign trade zone operator bond conditions.

* * * * * * *

(a) *Receipt, Handling, and Disposition of Merchandise.* The principal agrees to comply with:

(1) The law and Customs Regulations relating to the receipt, admission, status, handling, transfer, and removal of merchandise from the foreign trade zone or subzone, and

(2) The Customs Regulations concerning the maintenance of inventory control and recordkeeping systems covering merchandise

in the foreign trade zone or subzone. If the principal defaults and the default involves merchandise other than domestic merchandise for which no permit for admission is required, the obligors (principal and surety) agree to pay liquidated damages equal to the value of the merchandise involved in the default, or three times the value of the merchandise involved in the default if the merchandise is restricted merchandise or alcoholic beverages, or such other amount as may be authorized by law or regulation. It is understood and agreed that whether the default involves merchandise is a determination made by Customs, that the amount to be collected under this condition shall be based upon the quantity and value of the merchandise as determined by Customs, and that value as used in these provisions means value as determined under 19 U.S.C. 1401a. If the principal defaults and the default does not involve merchandise, the obligors agree to pay liquidated damages of $1000 for each default, or such other amount as may be authorized by law or regulations.

(b) * * *

(c) * * *

(d) *Payment of Annual Fee.* The principal agrees to pay timely any annual fee or fees as provided in the Customs Regulations. If the principal defaults, the obligors agree to pay liquidated damages equal to the amount of the annual fee due but not paid and an amount equal to one percent of the annual fee for each of the first seven days the annual fee is in arrears, two percent of the annual fee for each of the succeeding seven days the annual fee is in arrears, and three percent of the annual fee for each day thereafter in which the annual fee is in arrears.

PART 141—ENTRY OF MERCHANDISE

1. The authority citation for Part 141 continues to read as follows:

AUTHORITY: 19 U.S.C. 66, 1448, 1484, 1624.

2. Section 141.111(d) is revised to read as follows:

§ 141.111 Carrier's release order.

* * * * * * *

(d) *Qualified release order.* In the case of merchandise which is entered for warehousing, for transportation in bond, for exportation, or is to be admitted to a foreign trade zone, the release order may be qualified as follows:

(1) "For transfer to the bonded warehouse designated in the warehouse entry," if the merchandise is entered for warehousing;

(2) "For transfer to the bonded carrier designated in the transportation entry," if the merchandise is entered for transportation in bond;

(3) "For transfer to the carrier designated in the export entry," if the merchandise is entered for exportation; or

(4) "For transfer to the foreign trade zone designated in Customs Form 214," if the merchandise is to be admitted to a foreign trade zone.

PART 144—WAREHOUSE AND REWAREHOUSE ENTRIES AND WITHDRAWALS

1. The authority citation for Part 144 is revised to read as follows:

AUTHORITY: 5 U.S.C. 301, 7 U.S.C. 1854, 19 U.S.C. 66, 1311, 1312, 1484, 1552, 1553, 1555, 1556, 1557, 1559, 1562, 1563, 1623, 1624, 1646(a), 26 U.S.C. 5214; Pub. L. 95-410; Pub. L. 95-176; Pub. L. 96-511.

2. All other statutory authority cited at the end of various sections in Part 144 is removed.

3. Section 144.36(g) is revised to read as follows:

§ 144.36 Withdrawal for transportation.

* * * * * * *

(g) *Procedure at destination.* Upon arrival at destination, the merchandise may be:

(1) Entered for rewarehouse in accordance with § 144.41;

(2) Entered for combined rewarehouse and withdrawal for consumption in accordance with § 144.42;

(3) Exported in accordance with paragraph (h) of this section;

(4) Forwarded to another port or returned to the port of origin in accordance with § 18.5 (c) or (d) of this chapter; or

(5) Admitted to a foreign trade zone in zone-restricted status as provided in Part 146 of this chapter.

§ 144.37 Withdrawal for exportation.

* * * * * * *

4. Section 144.37 is amended by adding a new paragraph (g), to read as follows:

* * * * * * *

(g) *Exportation at a foreign trade zone.* Merchandise may be withdrawn for exportation at a foreign trade zone in the same or at a different port. The merchandise will be considered exported upon admission to a zone in zone-restricted status, as provided in § 146.44(c) of this chapter.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 *et seq.*

2. Section 178.2 is amended by inserting the following in the appropriate numerical sequence according to the section number the colums indicated:

§ 178.2 Listing of OMB Control Numbers.

19 CFR Section	Description	OMB Control No.
146.6, 146.7	Procedures for activation of a foreign trade zone; procedures for zone changes, including alteration, deactivation and suspension.	1515-0151

PART 191—DRAWBACK

1. The authority citation for Part 191 continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1313, 1624.

§§ 191.163-191.165 also issued under 19 U.S.C. 81c.

2. Section 191.162 is amended by removing reference to "§ 146.25," and inserting, in its place, reference to "§ 146.44."

3. Section 191.163 (c) and (d) are revised to read as follows:

§ 191.163 Articles manufactured or produced in the U.S.

* * * * * * *

(c) *Action of the district director on the notice of transfer.* The district director shall assign a number to each notice of transfer, return one copy to the transferor and forward another copy to the zone operator at the foreign trade zone.

(d) *Action of foreign trade zone operator.* After articles have been received in the zone, the zone operator at the zone shall certify on a copy of the notice of transfer the receipt of the articles (see § 191.164(d)(2)) and forward the notice to the transferor or the person designated by the transferor. The transferor shall verify that the notice has been certified before filing it with the drawback entry.

* * * * * * *

4. Paragraphs (b) and (c) of § 191.164 are revised to read as follows:

§ 191.164 Merchandise transferred from continuous Customs custody.

* * * * * * *

(b) *Drawback entry.* Before the transfer of merchandise from continuous Customs custody to a foreign trade zone, the importer or a person designated in writing by the importer for that purpose shall file with the district director a direct export entry on Customs Form 7512 in duplicate. The district director shall forward one copy of Customs Form 7512 to the zone operator at the zone.

(c) *Certification by zone operator.* After the merchandise has been received in the zone, the zone operator at the zone shall certify on the copy of Customs Form 7512 the receipt of the merchandise (see paragraph (d)(2) of this section) and forward the form to the transferor or the person designated by the transferor. After executing the certifications provided for in paragraph (d)(3) of this section, the transferor shall resubmit Customs Form 7512 to the district director in place of the bill of lading required by § 191.136.

* * * * * * *

5. Paragraphs (b) and (c) of § 191.165 are revised to read as follows:

§ 191.165 Same condition drawback merchandise and merchandise not conforming to sample or specifications or shipped without the consent of the consignee.

* * * * * * *

(d) *Drawback entry.* Before transfer of the merchandise to a foreign trade zone, the importer or a person designated in writing by the importer for that purpose shall file with the district director an entry on Customs Form 7539 in duplicate. The district director shall forward one copy of Customs Form 7539 to the zone operator at the zone.

(c) *Certification by zone operator.* After the merchandise has been received in the zone, the zone operator at the zone shall certify on the copy of Customs Form 7539 the receipt of the merchandise and forward the form to the transferor or the person designated by the transferor. After executing the certifications provided for in paragraph (d)(3) of this section, the transferor shall resubmit Customs Form 7539 to the district director in place of the bill of lading required by § 191.136.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: December 10, 1985.

DAVID D. QUEEN,
Acting Assistant Secretary of the Treasury.

APPENDIX

FINAL REGULATORY FLEXIBILITY ANALYSIS ON PROPOSED CUSTOMS REGULATIONS AMENDMENTS RELATING TO FOREIGN TRADE ZONES

INTRODUCTION

The economic impact review below constitutes the Customs Service final regulatory flexibility analysis in compliance with the requirements of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 603). The Act requires that regulatory effects be analyzed so as to determine and quantify, if possible, the economic effects of proposals on small business operations. The Act's key concepts revolve around identifying "significant economic impacts on a substantial number of small entities." The initial analysis was modified as necessary into a final regulatory flexibility analysis upon receipt and review of public comments resulting from Federal Register publication of this rule as a notice of proposed rulemaking.

RATIONAL

The number of Foreign Trade Zones, complexity of operations and volume of trade passing through zones has increased significantly in recent years. From less than 20 zones in the early 1970's, activated zones and sub-zones reporting activity at the end of 1984 numbered 88 (57 general purpose zones and 31 subzones), with 83 other zones approved but not reporting activity (see table 1).

Meanwhile, Customs inspection and supervision of zone activity has changed little in practice. Secular reductions in agency resources have combined with unchanged practices to produce (1) operational hardships on zone grantees and users and (2) uncertain inspection and control of zone activity.

The proposed revisions to 19 CFR Parts 18, 24, 112, 141, 144, 146, and 191 (relating to Customs administration of foreign trade zones) is an administrative attempt to update zone supervision in accordance with current business practices.

Objectives

The proposal is intended to bring about three fundamental changes:

1. The method of accountability of merchandise admitted, stored, manipulated, exhibited, manufactured and removed from zones;
2. The method of enforcement of Customs laws through audits and spot checks instead of more costly physical presence of inspectional resources; and
3. The method of reimbursing Customs for its zone-related operational expenses.

Legal Basis for Proposal

This regulatory project is initiated under the authority of R.S. 251, as amended, Sections 1-21, 48 Stat. 998, 999, as amended, 1000, 1002, as amended, 1003, 77A Stat. 14, Section 624, 46 Stat. 759 (19 U.S.C. 66, 81a-81u, 1202 (General Headnote 11), 1924).

Estimated Number of Small Entities Affected

Tallies of zone activity in Customs regions indicated that approximately 1,500 users occupy space in zones and carry out the range of permitted manipulation manufacturing and storage activities. Of these, 600 operate on a full-time, year-round basis. The remaining 900 operate on a part-time basis. These estimates do not include users in foreign trade sub-zones. Sub-zone users tend to be large (oftentimes multinational) corporations and thus do not fit within the purview of the requirements of the Regulatory Flexibility Act which concentrate on small business concerns.

Economic Effects of Compliance With the Proposal

After review of the proposal's work plan, we have identified within the proposal the following seven procedural/administrative and fee-related changes likely to affect economic concerns of small business:

A. Procedural administrative changes:
   1. Inventory control and record keeping system;
   2. Operator's control over admission and removal of goods;
   3. Elimination of customs forms 7502/7505/215.

B. Fee changes:
   1. Elimination of present form of reimbursement to Customs;
   2. Implementation of an annual fee covering audits and spot checks;
   3. Zone activation an boundary alteration fee.

TABLE I.—NUMBER OF FOREIGN TRADE ZONES IN THE UNITED STATES [1]

	Approved	Reporting Activity	No Reported Activity
General Purpose Zones	111	57	54
Sub-zones	60	31	29
Total	171	88	83

[1] As of the end of FY 1984.

Source: Foreign Trades Zones Board, U.S. Department of Commerce and special reports from U.S. Customs Service Regions.

A. *Procedural/Administrative Changes*

—Inventory Control and Record Keeping System

An inventory control and record keeping system with Customs prescribed data will result from this proposal. A similar system (Alternative Inventory Control System) has been in effect since 1976 and currently operates at 7 general purpose zones. Data required for the new system will consist of standard business data currently collected and tabulated for small users by each zone's operator/grantee. We do not anticipate a significant net reporting burden on users or operators as a result of this segment of the proposal.

—Operators' Control Over Admission and Removal of Goods

Under present Customs supervision, a Customs officer must be present to clear admissions of merchandise to and removals of merchandise from a zone, thus limiting these transactions to the availability of a Customs officer. Under the present proposal, an operator will be able to admit and remove merchandise without a Customs officer being present, after receiving Customs approval. However, Customs approval for admission will require an invoice in support of the application for admission on CF 214 and that the merchandise be retained for Customs examination at the place of unlading, the zone, or other location designated by the district director. Upon admittance to a zone, textile goods subject to visa controls will require a CF 214 with an invoice annotated by a Customs officer. Withdrawal of those goods will require the visa, either the original if withdrawn in its original lot size or new visas if withdrawn in break bulk, partial quantities. Presentation of an invoice and merchandise examination prior to admission are not currently required and will represent an additional paperwork requirement and possible delay in the arrival of merchandise at the zone. Customs approval for removals will be simplified by a reduction in paperwork as outlined in the next section. In total, the additional admission requirements will be offset by the simplified removal procedure and the enhanced business flexibility derived from being

able to admit or remove merchandise freely into and out of the zone after Customs approval has been received.

—Forms Reduction—Customs Forms 7501/7505/215

Under present practice, Customs forms 7501 and 214 are required to obtain privileged foreign status. Removal of privileged foreign status merchandise from a zone requires filing CF 7505 for consumption. CF 215 is required to remove all zone status merchandise, except merchandise in privileged status or wholly composed of merchandise in privileged status. The estimated number of forms filed in FY 1984 appear in Table 2 below.

Table 2

Form		
*7501	.....	15,000
7505	.....	20,000
215	.....	45,000

* The present CF 7501 requires data previously requested on the CF 7502.

Under a provision of this proposal, a request for privileged foreign status would require a CF 214 and invoice (as before) but would eliminate the CF 7501. Upon removal of privileged foreign status goods from a zone, the applicable entry form would replace the 7505 (no net gain or loss). Further, the CF 215 will be eliminated under this proposal. Current clerical, data base management and brokerage costs for an estimated 60,000 forms 7501/215 would be eliminated, giving small businesses a net gain on the order of $650,000 yearly from this procedural change.

—Mandatory Bonding

One of the major proposed changes in zone administration is to involve the operator/grantee in data keeping and reporting. A new mandatory bond at a minimum level of $50,000 would be required in another provision of the proposal, with the goal of encouraging operator/grantee accuracy in compliance with his new responsibilities. The new bond would cover non-compliance with these proposed regulations as well as losses of merchandise. In terms of practical effects of this provision on small businesses, we anticipate no net appreciable added burden or cost. Most activated zones currently have bonds which meet or exceed the proposed minimum level.

B. *Fee Changes*

—Elimination of Present Forms of Customs Reimbursement

Under present practices, operators/grantees reimburse Customs for inspectional services rendered at zones. In fiscal year 1984, payments to Customs totaled an estimated $1.7 million, of which $1.3 million pertain to operations at general purpose zones. Assuming operators charge users flat fees to recover these payments, then

each small user pays an average of $870 per year for these present Customs services. The proposed revisons would *eliminate* this $1.3 million present fee, substituting in its place (see below) tiered fees which would cover Customs costs in carrying out audits and spot checks.

A particular concern is underscored at this point, concerning the distribution of this $1.3 million benefit (eliminated Customs reimbursement). The 57 general purpose zones at the end of FY 1984 are widely distributed around the country. A small business interested in participating in a foreign trade zone generally finds itself limited to one and only one zone provider in its operating area. The offering of foreign trade zone services could thus be regarded as a monopolistic market condition. Significant regulatory requirements and administrative and application costs in seeking approval and setting up a zone essentially prevents access by (especially small) businesses. In essence, then, they must generally contract with the sole established zone operator in the geographic area.

In economic theory, the pricing practices of a good/service provided under monopolistic conditions are oriented towards extracting a maximum profit for the unique provider, and, in practice, the level of fees charged by some zone operators/grantees is a known concern of the Commerce Department's Foreign Trade Zone Board.

As stated above, average savings per user from elimination of Customs reimbursement is expected to approximate $870 per year. Based on actual trade zone market conditions, however, real actual savings to users may total well below the average $870/year. We expect that zone operator/grantees will pass through to small users only a portion (quite possible small) of the total $1.3 estimated benefit of this provision of the proposed regulation. In the public comments, no commenters (largely major general purpose and sub-zone operators) addressed this issue. We expect that in most cases operators will neglect to pass on savings to small users. The Foreign Trade Zone Board has authority to review fees and charges to users if those fees are challenged as unreasonable.

The fiscal year 1984-based fee schedule is tiered. The purpose of the annual fee is to recover Customs costs incurred in carrying out the audit-inspection supervision program. The annual fee to be charged each zone is a function of the degree of complexity in Customs auditing and inspection of zones. In order to account for those distinct operating conditions, each zone with fall into a distinct size/complexity tier, with a specific fee for each tier. In this way, small, less operationally complex zones will not subsidize large zones. The tiers are based on operational complexity as measured by the number of admissions and removals of foreign and zone restricted merchandise.

A zone will be classified as to its fee tier according to the following simple criteria if admissions/transfers of foreign and zone restricted merchandise:

(i) Are less than 300 per year, then TIER I ($1,400 per year fee);
(ii) Fall between 300 and 3,000 per year, then TIER II ($15,500 per year fee);
(iii) Are greater than 3,000 per year, then TIER III ($33,800 per year fee).

We expect general purpose zones to be largely skewed towards the TIER I level (see Table 3).

The annual fee is due and payable on the effective date of final Rule and on January 1 of each subsequent year. For existing zones the tier will be based on the number of admissions and transfers of foreign and zone restricted merchandise made during fiscal year ending September 30, 1984. Zones currently under a voluntary audit-inspection agreement need not pay an additional annual fee for calendar year 1985, nor will there be any refunds of fees paid. For subsequent years the tier will be based on the number of admissions and transfers of foreign and zone restricted merchandise made during the previous fiscal year ending September 30. Each zone operator is responsible for determining the appropriate tier. The operator's determination is subject to Customs verification. Operators of zones activated during a calendar year will be responsible for paying an annual fee based on tier I.

TABLE 3.—DISTRIBUTION OF FOREIGN TRADE ZONES BY ANNUAL FEE TIERS

	Tier I [1]	Tier II [2]	Tier III [3]	Small Business Users
Total	44	33	11	1,500
General Purpose Zones	30	18	8	1,300
Sub-zones	14	15	3	200

[1] $1,400 fee per year.
[2] $15,500 fee per year.
[3] $33,800 fee per year.

Under the present inspectional system Customs bills general purpose zone operators approximately $1.3 million annually for inspectional services. Zone operators recover this expense in their fee and rental/lease billings to zone users. As above, we estimate that the Customs component of these fees paid by zone users average $870 per year per user.

Under the proposed audit-inspection system with different fee tiers, Customs billings to general purpose operators will amount to approximately $591,000 per year, versus the estimated $1.3 million at present. The Customs component of small business users' payments to operators will average $450 per year per user, versus the

$870 per year per user at present. Future increases in the annual fee will reflect cost increases incurred by Customs in delivering audit and inspection services. These increases will consist largely of annual rises in labor costs. It is expected that labor costs, and thus annual fees charged zone operators, will rise by a moderate 2-4% per year.

Since sub-zone users are generally large companies, the effects of fees on them do not fall within the purview of the RFA and this analysis and thus will not be considered in this economic review. The burden on small business from this fee schedule (yielding $591,000/yr.) would be an average $450 per small user. Elimination of the current reimbursement method ($870 per small user annually), even under the caveats noted above, would more than cover these new audit-inspection approach fees.

—New Zone Activation and Boundary Alteration Fees

Under present procedures, zone applicants are not billed for necessary Customs preparatory work prior to a zone's activation or alteration. The proposed revisions contain a provision allowing Customs to recover its costs for such tasks, among others, as site surveys, background investigations, zone approval processing, inventory systems review and associated clerical costs. These fees would be applicable to zones which are activated, relocated or altered on or after the effective date of final rulemaking.

Prospective fees are currently estimated at the following:

(a) $1,021 for zone activation;

(b) $442 for zone relocation; and

(c) $442 for zone alterations.

Concerning effects on small businesses, we expect average added cost pass-through from this source to be insignificant.

Overlapping Rules

None identifiable.

Alternative Rules

None feasible. The *Status Quo* becomes more untenable as complex zone manufacturing operations increase in number, while Customs resources diminish.

Summary of Economic Effects

Based on present available data, the proposed revisions would appear to provide net yearly benefits to zone operators and users of $1.3 million, as summarized below:

Quantified Cost (−)/Benefits (+)

[In dollars]

Document Reduction	+650,000
Current Reimbursement Eliminated	+1,300,000
New Annual Fees for Audit Approach	−591,000
Total	+1,359,000

Non-Quantified Factors

	Added Costs	New Benefits	Neutral Effect
Admission of goods	X		
Removal of goods		X	
Inventory control and record keeping system.			X
Mandatory bonding			X

(T.D. 86-17)

Leaded Naphtha; Change of Tariff Classification

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Change of practice.

SUMMARY: Customs has determined that a uniform and established practice exists to classify certain imported leaded naphtha for tariff purposes as motor fuel. Because this petroleum product, as imported, is not chiefly used as motor fuel, it cannot be classified as such, nor can it be classified as naphtha in view of the added lead content. Accordingly, Customs believes the classification practice is clearly wrong. The most appropriate tariff provision for the classification of leaded naphtha is for mixtures not specifically provided for, i.e., mixtures that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil, or natural gas.

EFFECTIVE DATE: This change of practice will be effective as to merchandise entered for consumption, or withdrawn from warehouse for consumption, on or after May 8, 1986.

SUPPLEMENTARY INFORMATION:

U.S. Customs Service

General Notice

Solicitation of Public Comments Regarding Tariff Classification of Prefinished Hardboard Siding

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Solicitation of public comments.

SUMMARY: Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard lap siding. The product in question is a plank of hardboard, 7/16-inch thick, and either 9 or 12 inches wide. Approximately 1-inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline in the plank above. The planks are prefinished at the time of importation with acrylic latex paint. The current tariff classification was challenged administratively by the filing of a domestic interested party petition. That petition was denied by Customs. In the subsequent court proceeding contesting the denial by Customs, an alternative classification not previously considered was suggested. Customs has been directed by the court to consider the alternative classification, which we are publishing for public comments in order to make an administrative decision on the claim. The Court further directed Customs to communicate its administrative decision within 60 days from the date of the Court order, January 27, 1986.

DATE: Comments (preferably in triplicate) must be received on or before April 10, 1986.

ADDRESS: Comments may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8237).

FOR FURTHER INFORMATION CONTACT: Jeremy N. Baskin, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8181).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard lap siding. The product in question is a plank of hardboard, 7/16-inch thick, and either 9 or 12 inches wide. Approximately 1 inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline in the plank above. The planks are prefinished at the time of importation with acrylic latex paint. The current tariff classification is under the tariff provision for "Other boards, of vegetable fibers (including wood fibers) * * *", in item 245.90, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), a duty-free provision.

Customs published a notice in the FEDERAL REGISTER on March 22, 1982 (47 FR 12258), acknowledging receipt of a petition from a domestic interested party filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516). The notice solicited public comments on the merits of the petition. The deadline for receipt of comments was subsequently extended by a FEDERAL REGISTER notice published on May 27, 1982 (47 FR 23249). The petitioner claimed that the proper classification of the siding should be under the tariff provision for other hardboard in item 245.30, TSUS. The current duty rate under item 245.30, TSUS, is 7.5 percent ad valorem.

In accord with proper administration practice, by a ruling dated October 29, 1982, Customs informed the petitioner that the comments solicited by the March 22, 1982, notice had been considered and, upon review of the matter, it was decided to deny the petition and to continue to classify the imported siding in item 245.90, TSUS.

In response to the October 29, 1982, ruling, by letter of November 29, 1982, the petitioner filed notice of its intention to contest the decision in accordance with § 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

By publication of T.D. 83-104 in the Federal Register on May 11, 1983 (48 FR 21231), Customs informed the public of the petitioner's desire to contest the decision, and gave a detailed account of the proceedings to that date together with a full explanation of the reasons for denying the petition.

In the subsequent proceeding contesting the classification before the Court of International Trade, *American Hardboard Association* v. *United States and MacMillan Blodel, Ltd.*, Party-in-Interest, Court No. 83-9-01301, a tariff classification not previously considered was suggested. On January 27, 1986, the Court remanded the case for ecision on the correctness of the current tariff classification as opposed to the newly suggested alternative classification under the provision for "Building boards * * * Laminated boards

* * *", in item 245.80, TSUS. Materials classified under item 248.80, TSUS, are currently subject to a compound rate of duty of 1.4 cents per pound, plus 2.6 percent ad valorem.

Accordingly, in order to properly consider the issue Customs is requesting the views of the public on classification of the imported prefinished hardboard lap siding in item 245.80, TSUS, as opposed to classification in item 245.90 TSUS. A comment period of 30 days is being allowed in view of the short deadline imposed upon Customs by the Court to report on our decision.

COMMENTS

Before making a determination on this matter, Customs will consider any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), between 9:00 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, Room 2426, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Decisions of the United States Court of International Trade

(Slip Op. 86-21)

PABRINI, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 83-3-00372

Before: DICARLO, *Judge.*

Plaintiff challenges imposition of country of origin marking duties on umbrellas. *Held: Small labels sewn inside umbrellas were not "conspicuous" and racetrack patrons receiving the umbrellas after paying regular price of admission were "ultimate purchasers" of the umbrellas under section 304 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1304 (1982).*

[Summary judgment for defendant.]

(Decided February 25, 1986)

Leonard M. Fertman, P.C. (*Leonard M. Fertman*) for plaintiff.

Richard K. Willard, Assistant Attorney General, *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Department of Justice (*Judith M. Barzilay*) for defendant.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Umbrellas from Taiwan entered at the Port of Los Angeles were assessed country of origin marking duties of ten percent *ad valorem* pursuant to section 304 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1304 (1982), when liquidated in April, 1982 by the United States Customs Service (Customs). Section 304 requires that all imported merchandise be marked in a manner "conspicuous" to the "ultimate purchaser."[1] Plaintiff protested assessment of the marking duties and filed this action following denial of the protest, pursuant to 19 U.S.C. § 1515 (1982) and 28 U.S.C. § 1581(a) (1982).

Before the Court are plaintiff's motion and defendant's cross-motion for summary judgment. Plaintiff contends that (1) the umbrellas need not be individually marked since they were distributed as gifts by a donor who was the "ultimate purchaser" and was

[1] Section 304 provides, in part:

Except as hereinafter provided, every article of foreign origin (or its container * * *) imported into the United States shall be marked in a conspicuous place as legibly, indelibly, and permanently as the nature of the article * * * will permit in such manner as to indicate to an ultimate purchaser in the United States the English name of the country of origin of the article.

aware of the country of origin, and (2) a small label sewn to one of the seams inside the umbrellas sufficiently identifies the country of origin. The Court disagrees with both contentions. Summary judgment is granted for defendant.

"Ultimate Purchaser"

Plaintiff alleges that the umbrellas were distributed without further charge to patrons of the Hollywood Park Race Track paying the regular admission fee.[2] Plaintiff argues that the "ultimate purchaser" of the umbrellas within the meaning of section 304 was not the racetrack patron, but the racetrack, which was aware of the umbrellas' country of origin, and the umbrellas are therefore excepted from the marking requirement by 19 U.S.C. § 1304(a)(3)(H) and 19 C.F.R. § 134.32(h).[3] Plaintiff challenges as contrary to section 304 a regulation, 19 C.F.R. § 134.1(d)(4), that defines "ultimate purchaser" to include the recipients of gifts.[4]

The current language of the first paragraph of section 304 was enacted as part of the Customs Administrative Act of 1938, ch. 679, § 3, 52 Stat. 1077. Previously the marking statute did not mention an end user or "purchaser" of the article. The statute provided simply that "Every article imported into the United States * * * shall be marked * * *." Tariff Act of 1930, ch. 497, Title III, § 304, 46 Stat. 590, 687 (repealed 1938).[5] The principal purpose of the 1938 revision of section 304 was to eliminate the previous requirement that the article, its immediate container, and the outer package all be marked with the country of origin.[6]

"As in all cases involving statutory construction, 'our starting point must be the language employed by Congress.' " *American Tobacco Co.* v. *Patterson*, 456 U.S. 63, 68 (1982) (quoting *Reiter* v. *Sonotone Corp.*, 442 U.S. 330, 337 (1979)). *Webster's Second New International Dictionary* 2015 (1934), published four years before the enactment of the statute, defines "purchaser" as "one who purchases", and "purchase" as "to obtain (anything) by paying money or its

---

[2] Defendant has denied for lack of information plaintiff's allegations concerning the distribution of the umbrellas. For purposes of deciding the motion, the Court assumes that plaintiff's allegations are true.

[3] 19 C.F.R. § 134.32(h) excepts from the marking requirements:

> Articles for which the ultimate purchaser must necessarily know the country of origin by reason of the circumstances of their importation or by reason of the character of the articles even though they are not marked to indicate their origin.

[4] 19 C.F.R. § 134.1(d)(4) provides:

> The "ultimate purchaser" is generally the last person in the United States who will receive the article in the form in which it was imported. It is not feasible to state who will be the "ultimate purchaser" in every circumstance. The following examples may be helpful * * *.
>
> 4. If the imported article is distributed as a gift, the recipient is the "ultimate purchaser."

Customs has applied section 304 to cover gifts at least since 1924. *See* C.S.D. 80-232 (1980) (digital pen watches to be distributed as gifts to business associates must be individually marked); C.S.D. 79-406 (1979) (plastic pencils to be distributed free as advertising must be individually marked); T.D. 40547 (1924) (clocks purchased as gifts to friends denied entry as improperly marked). 19 C.F.R. § 134.1(d)(4) was promulgated in current form to include the "example" covering gifts in 1972. 37 Fed. Reg. 20,318 (1972), T.D. 72-262.

[5] The requirement that all goods entering the United States must be marked with their country of origin dates to the Tariff Act of 1890, ch. 1244, § 6, 26 Stat. 567, 613.

[6] The legislative history of the 1938 act provides no evidence of congressional intent with respect to the meaning of "ultimate purchaser." In colloquy at hearings before the subcommittee considering the proposed legislation, Senator David I. Walsh, chairman of the subcommittee, did refer to the "consumer" of the merchandise. *Customs Administrative Act: Hearings on H.R. 8099 Before a Subcomm. of the Comm. on Finance United States Senate*, 75th Cong., 3d Sess. 57 (1938).

equivalent." Thus, the question before the Court is whether by paying admission to the racetrack the racetrack patrons obtained the umbrellas by paying "money or its equivalent."

Under federal common law at the time the statute was enacted, consideration was defined as "some * * * benefit or advantage conferred upon the promisor * * * or any detriment * * * suffered or undertaken by the promisee." *Cuneo Press* v. *Claybourn Corp.*, 90 F.2d 233, 236 (7th Cir. 1937). This definition is consistent with current law under the Uniform Commercial Code (UCC) and the common law of contracts under which a single consideration is sufficient to support two promises. R. Anderson, 1 *Uniform Commercial Code* § 2-106:6 (3rd ed. 1981). *See, e.g., Sheppard* v. *Revlon, Inc.*, 267 So. 2d 662, 664 (Fla. 1972) (transfer of "free" jar of facial cream with purchase of cosmetics a "sale" within UCC § 2-106). *See also* A. Corbin, *Contracts* § 125 (1950). By purchasing a ticket to the racetrack, the patrons paid one consideration for two promises by the racetrack: admission to the racetrack and transfer of an umbrella.

The Court holds that racetrack patrons receiving the umbrellas as a condition to payment of the regular price of admission were not donees of gifts[7] but "ultimate purchasers" of the imported merchandise within section 304. Since the Court holds that the racetrack patrons were the "ultimate purchasers" of the umbrellas within the meaning of section 304, the Court need not, and does not, consider the validity of any part of 19 C.F.R. § 134.1(d).

"Conspicuous Place"

Plaintiff also contends that a label sewn to one of the seams inside the umbrella measuring approximately 1⅜ inches by ⅜ inches printed with the words "100% NYLON MADE IN TAIWAN" is "conspicuous" within the meaning of the statute.

Section 304 provides that the Secretary of the Treasury "may by regulations * * * prescribe * * * a conspicuous place on the article * * * where the marking shall appear * * *." 19 C.F.R. § 134.41(b) provides that "the ultimate purchaser in the United States must be able to find the marking easily and without strain."

Whether the marking is conspicuous is a question of fact. *See Midwood Industries, Inc.* v. *United States*, 64 Cust. Ct. 499, 503, C.D. 4026 (1970); *cf. Uniroyal, Inc.* v. *United States*, 3 CIT 220, 224, 542 F. Supp. 1026, 1029 (substantial transformation for marking purposes a question of fact); *U.S. Wolfson Bros. Corp.* v. *United States*, 52 Cust. Ct. 86, C.D. 2442 (1964), *aff'd*, 52 CCPA 46, C.A.D. 856 (1965) (ultimate purchaser a question of fact). Nevertheless, the parties agree that this issue is appropriate for summary judgment.

[7] The Court notes that under federal common law at the time of the enactment of the statute, "gift" was defined as a gratuitous transfer of property to another without consideration. *See, e.g. Schumacher* v. *United States*, 55 F.2d 1007, 1011 (Ct. Cl. 1932). Plaintiff does not allege that the racetrack was motivated by generosity in distributing the umbrellas.

Plaintiff included a sample of the merchandise with its motion for summary judgment. Since the case would be tried to the Court and the Court's determination on this issue would not turn on an assessment of witness credibility or demeanor, disposition by summary judgment is appropriate. A trial would add little, if anything, to the Court's ability to decide the issue. *See Nunez* v. *Superior Oil Co.*, 572 F.2d 1119, 1123–24 (5th Cir. 1978); Schwarzer, *Summary Judgment Under the Federal Rules: Defining Genuine Issues of Material Fact*, 99 F.R.D. 465, 476–480 (1984). *Cf., United States* v. *Rockwell International Corp.*, 10 CIT , Slip Op. 86–11 (January 22, 1986), at 9–10 (summary judgment denied where defendant contested ultimate fact of negligence).

The Court finds as a matter of fact that the small label cannot be seen easily and without strain. The label cannot be seen unless the umbrella is opened, and even then it is difficult to find. The Court holds that the marking is not "conspicuous" within the meaning of section 304. *See J.B. Meltzer* v. *United States*, 2 Cust. Ct. 675, Abs. No. 41126 (1939).

Since the Court finds that the umbrellas were not marked in a manner conspicuous to the ultimate purchaser, summary judgment for defendant is granted. Judgment will be entered accordingly.

So ordered.

(Slip Op. 86–22)

DETERMINED PRODUCTIONS, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 80–9–01527

Before DICARLO, *Judge.*

Two stuffed toy figures designed, packaged, sold, and purchased as a unit but which are intended to be disassembled and used separately and with other toys are not an entirety since neither figure is essential to the completeness of the other, and the identities of the individual figures are not subordinate to the identity of the unit.

[Judgment for defendant.]

(Decided February 26, 1986)

Stein Shostak Shostak & O'Hara (Joseph P. Cox), for plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Department of Justice (*Susan Handler-Menahem*), for defendant.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Plaintiff challenges the United States Customs Service (Customs) classification of merchandise invoiced as "Clinging Snoopy/Woodstock" imported from the Republic of Korea. The Snoopy figures were classified under item 737.30, Tariff Schedules of the United States (TSUS), as "toy figures of animate objects: not

having a spring mechanism: stuffed: valued over 10 cents per inch of height" at nine percent ad valorem and the Woodstock figures were classified under item 737.25, TSUS, as "toy figures of animate objects: not having a spring mechanism: stuffed: valued not over 10 cents per inch of height" at twenty-eight percent ad valorem.

Plaintiff argues the merchandise should be classified as an entirety, under item 737.30, TSUS.

Defendant moves and plaintiff cross-moves for summary judgment. In their statements of material issues of fact submitted pursuant to Rule 56(i) of the Rules of this Court the parties agree that the merchandise consists of two stuffed figures modeled after the *Peanuts* comic strip characters Snoopy and Woodstock; that in its imported condition, the Snoopy figure embraces the Woodstock figure by means of a velcro fastener on the ends of its front paws; that the merchandise was designed, packaged, sold, and purchased as a unit; and that plaintiff sells numerous different sizes and types of stuffed and other kinds of Snoopy and Woodstock figures as individual items, but does not individually sell Snoopy and Woodstock figures identical to those before the court.

The parties also agree that the two figures have an "individual identity and play value." They do not agree whether the two figures have an individual "commercial value." The parties have stipulated that the Court will make a finding of fact with respect to this issue.[1]

Plaintiff argues that since the merchandise is designed, packaged, sold, and purchased as a unit, it is properly classified as an entirety.

But these facts are not determinative of the entirety inquiry. *United States* v. *Altray*, 54 CCPA 107, 110, C.A.D. 919 (1967); *Lang Co.* v. *United States*, 15 CCPA 341, 342, T.D. 42495 (1927); *Mattel, Inc.* v. *United States*, 8 CIT 323, Slip Op. 84-133 (December 11, 1984). In *Mattel* doll stands designed, imported, and sold with "Pretty Changes Barbie" dolls which could be used with other dolls were held not to be an entirety with the Barbie dolls. Applying the "somewhat discordant principles" of entireties law, the Court said that the stands and the dolls were not entireties because: "When merged, they do not form a new and distinct article of commerce having a different character or use. Further, because neither is essential to the completeness of the other, and since neither bears a natural affinity or relation to the other, they must be classified and assessed duty separately." *Mattel*, Slip Op. at 4-6.

Plaintiff's catalog contains an illustration of nine stuffed Snoopy figures and three stuffed Woodstock figures of various sizes sold individually by plaintiff. The Snoopy and Woodstock figures before the Court appear substantially similar to several of these Snoopy

[1] Transcript of Telephone Conference, January 28, 1986, at 2-6.

and Woodstock figures.[2] The important physical distinction apparent to the Court between other figures sold by plaintiff and the merchandise before the Court is the velcro fastener on the end of Snoopy's paws. Both the figures before the Court can be used separately or with other toys, including other Snoopy and Woodstock figures sold by plaintiff.[3] Examining a sample of the merchandise, plaintiff's catalog, other exhibits before the Court, and the parties' statements of material issues of fact submitted pursuant to Rule 56(i), the Court finds as a matter of fact, on the basis of this record, that the Snoopy and Woodstock figures have an individual commercial value.[4]

In the opinion of the Court, the addition of the velcro fastener is insufficient to make either the Snoopy or the Woodstock figure essential to the completeness of the other or to give the figures a "natural affinity or relation" to each other, as those terms have been applied in entireties law. *See United States* v. *John Wanamaker, Philadelphia, Inc.*, 20 CCPA 367, 369 (1933); *Mattel, supra.*[5] *As the Court of Customs and Patent Appeals said in United States* v. *Altray Co.*, 54 CCPA 107, 110, C.A.D. 919 (1967):

> where the design of the combination in issue by its very nature contemplates its disassembly and the utilization of the constituents in the manner for which they are otherwise used and when articles very similar to those constituents are on sale as separate items, the combination is not, in the sense of the customs law, an entirety.

Cases cited by plaintiff are inapposite. Unlike the "two-piece shirt-short sets" or "cabana sets" at issue in *Miniature Fashions, Inc.* v. *United States*, 54 CCPA 11, C.A.D. 894 (1966), or the "cotton flannel shirts and corduroy longie sets" at issue in *Nissho American Corp.* v. *United States*, 64 Cust. Ct. 378, C.D. 4005 (1970), the Snoopy and Woodstock figures before the Court have an independent commercial value and the character and use of the figures are substantially the same whether the figures are used together, individually, or with other merchandise. Unlike the cotton pads impregnated with inhalant and their cylindrical holders at issue in *Donalds Ltd., Inc.* v. *United States*, 32 Cust. Ct. 310, 315, C.D. 1619

---

[2] The Snoopy figure before the court is 11 inches tall, and the Woodstock figure is 7 inches tall. According to plaintiff's catalog, plaintiff also sells an 11 inch "Baby Plush Snoopy", an 18 inch "Medium Plush Snoopy", an 18 inch "Sleepy Snoopy", a 6 inch "Velveteen Woodstock", a 9 inch "Plush Swinging Woodstock", and a 9 inch "Plush Woodstock."

[3] An entire line of "Snoopy's Wardrobe" clothing available for the "Baby Plush Snoopy", may be used with the Snoopy figure before the Court. There is also a line of accessories, including a wardrobe trunk, chairs, sleeping bags, and tent, which could be used with the figures.

[4] Customs is presumed to have found every subsidiary fact necessary to suport its classification, *United States* v. *New York Merchandise Co., Inc.*, 58 CCPA 53, 57-59, C.A.D. 1004, 435 F.2d 1315, 1317-1319 (1970), and plaintiff has the burden to show by a preponderance of the evidence that the facts found by Customs in making its classification are incorrect. *See* 19 U.S.C. § 2639(a)(1) (1982); *Jarvis Clark Co.* v. *United States*, 733 F.2d 873, 876, *reh. denied*, 739 F.2d 628 (Fed. Cir. 1984). Customs must have found that the figures had an independent commercial value to classify them, and assess ad valorem duty, separately, and the Court finds that plaintiff has not overcome its burden to demonstrate the incorrectness of this finding.

[5] Plaintiff argues that the Snoopy and Woodstock figures together have an "enhanced play value." But plaintiff does not allege that the figures are, or are intended to be, used predominately in their "clinging" position, or that the figures have any special significance in that position.

(1954), the individual identities of the figures before the Court are not subordinate to the identity of the unit.

It is axiomatic that the entireties doctrine is merely an aid to ascertain the intent of Congress. *Miniature Fashions, Inc.* v. *United States,* 54 CCPA 11, 16, C.A.D. 894 (1966). Congress has determined that less expensive stuffed figures are dutiable at a substantially higher rate than more expensive figures. The Court would frustrate the intent of Congress if it considered the figures before the Court an entirety, and dutiable at the lower rate.

The Court holds that the merchandise is not an entirety. Judgment for the defendant will be entered accordingly. So ordered.

(Slip Op. 86-23)

DETROIT ZOOLOGICAL SOCIETY, PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 85-2-00275

OPINION AND ORDER

[Motion to dismiss granted in part. Decision on motion to amend complaint reserved.]

(Decided February 28, 1986)

Edmund Maciorowski for plaintiff.

Richard K. Willard, Assistant Attorney General, *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, *Jerry P. Wiskin*, Civil Division, United States Department of Justice, for defendant.

RESTANI, *Judge:* Plaintiff, the Detroit Zoological Society, is the consignee of five entries made between November 21, 1983, and March 12, 1984.[1] Plaintiff sought to have the imported merchandise classified under a duty free item, TSUS 862.10: "Articles imported for exhibition by any institution or society established for the encouragement of * * * education or science * * *." The United States Customs Service (Customs), however, classified the entries under TSUS items 690.05, 690.15 and 806.20 and required the deposit of duties in accordance with the rates applicable to those items. *See* 19 U.S.C. § 1505(a) (1982 & West Supp. 1985) (requiring deposit of estimated duties at the time of entry). Plaintiff filed a protest concerning classification of the first entry on February 18, 1985,[2] and filed another protest on February 25, 1985, cov-

[1] The entries consisted of a locomotive and coaches for plaintiff's "zoo train." It is not disputed that the entry numbers and dates of entry are as follows:

Entry No.	*Date of Entry*
345803	10/21/83
336957	11/29/83
338023	01/06/84
339266	02/16/84
340029	03/12/84

[2] Protest No. 3801-5-000967.

ering the second through fourth entries.[3] The following day, plaintiff filed a complaint with this court, asserting jurisdiction under 28 U.S.C. §§ 1581(i), 1585 and 2202, seeking to have all five entries deemed liquidated by operation of law under 19 U.S.C. § 1504(a).[4] Subsequently, plaintiff filed a protest, dated May 14, 1985, covering the last of the five entries.[5] Plaintiff now seeks to amend its complaint to include an assertion of jurisdiction under 28 U.S.C. § 1581(a) (1982). This matter is before the court on plaintiff's motion to amend its complaint and on defendant's motion to dismiss for lack of subject matter jurisdiction.[6]

Section 1581(a) provides the Court of International Trade with "exclusive jurisdiction of any civil action commenced to contest the denial of a protest, in whole or in part, under section 515 of the Tariff Act of 1930. [19 U.S.C. § 1515]." 28 U.S.C. § 1581(a) (1982). The prerequisites of section 1581(a) jurisdiction are that a protest has been filed as to protestable subject matter; that the protest has been denied; and that the protest was timely filed. The court will examine each of these requirements in turn to determine whether section 1581(a) jurisdiction is appropriate in the case at bar. A protest may be filed to contest, among other things, "the classification and rate and amount of duties chargeable," 19 U.S.C. § 1514(a)(2) (1982), or "the liquidation * * * of an entry * * *." 19 U.S.C. § 1514(a)(5) (1982). Thus, it is evident that plaintiff's dispute as to the alleged deemed liquidation, classification and duties to be paid on its entries is protestable subject matter under section 1514(a).

The parties agree that plaintiff's first protest was denied on May 15, 1985, and there has been no allegation that either of plaintiff's other two protests were denied earlier than that date. Plaintiff, however, filed its complaint on February 26, 1985. Thus, plaintiff's complaint preceded the denial of any of its protests. This failure to

---

[3] Protest No. 3801-5-001358.

[4] 19 U.S.C. § 1504(a) provides:

(a) Liquidation

Except as provided in subsection (b) of this section [applying to extension of liquidation,] an entry of merchandise not liquidated within one year from:

(1) the date of entry of such merchandise;

* * * * * * *

shall be deemed liquidated at the rate of duty, value, quantity, an amount of duties asserted at the time of entry by the importer, his consignee, or agent * * *.

19 U.S.C. § 1504(a) (1982).

The court notes that 19 U.S.C. § 1504 has been modified by Public Law 98-573, § 191(d)(1) (1984). The amendments only apply to entries made on or after the 15th day after October 30, 1984, Pub. L. No. 98-573, § 195(a) (1984), and thus they are not applicable to the case at bar. Citations to § 1504 will, therefore, unless otherwise indicated, refer to the 1982 Code.

[5] Protest No. 3801-5-001907.

[6] As a preliminary matter, the court observes that § 1581(i) is the residual jurisdiction of this court. *United States* v. *Uniroyal, Inc.*, 69 CCPA 179, 182-83, 687 F.2d 467, 471-72 (1982); *Ass'n of Food Indus., Inc.* v. *von Raab*, 9 CIT ——, Slip Op. 85-128 at 4 (Dec. 17, 1985); *Visitor Corp.* v. *United States*, 7 CIT 170, 585 F. Supp. 1419, 1424-25 (1984); *aff'd*, 761 F.2d 1552, 1559 (Fed. Cir. 1985). As such, it may only be invoked when other available avenues of jurisdiction are "manifestly inadequate or necessary because of special circumstances to avoid extraordinary and unjustified delays caused by the exhaustion of administrative remedies." *Manufacture de Machines du Haut-Rhin* v. *von Raab*, 6 CIT 60, 569 F. Supp. 877, 882-83 (1983) (citing *Lowa, Ltd.* v. *United States*, 5 CIT 81, 561 F. Supp. 441 (1983), *aff'd* 724 F.2d 121 (Fed. Cir. 1984); *United States Cane Sugar Refiners' Ass'n* v. *Block*, 69 CCPA 172, 683 F.2d 399 (1982)). *Accord American Ass'n of Exporters and Importers—Textile and Apparel Group* v. *United States*, 751 F.2d 1239, 1246 (Fed. Cir. 1985); *Uniroyal*, 69 CCPA at 187, 687 F.2d at 475 (Nies, J., concurring); *Visitor*, 7 CIT at ——, 585 F. Supp. at 1425. Consequently, the potential jurisdiction of this court under § 1581(a) must be considered prior to addressing the claim of § 1581(i) jurisdiction, despite the fact that plaintiff raises these alternative jurisdictional bases in the reverse order.

exhaust the requisite administrative review process of protest *and* denial of protest before filing the complaint would have prevented this court from invoking section 1581(a) jurisdiction when the complaint was filed. *See Wear Me Apparel Corp.* v. *United States,* 1 CIT 194, 195, 511 F. Supp. 814, 816 (1981) (denial of protest as prerequisite to invoking section 1581(a) jurisdiction) (citing *United States* v. *Reliable Chemical Co.,* 66 CCPA 123, C.A.D. 1232, 605 F.2d 1179 (1979) (denial of protest as jurisdictional prerequisite under predecessor to section 1581(a)); H.R. Rep. No. 96–1235, 96th Cong., 2d Sess. 44, *reprinted in* 1980 U.S. Code Cong. & Ad. News 3729, 3755 (indicating intent in enacting the Customs Courts Act of 1980 to preserve requirement of protest and denial as prerequisites to jurisdiction under section 1581(a)). Plaintiff claims in its motion for leave to file an amended complaint, however, that its protests covering each of the entries have been denied or will be denied during the course of this litigation, thus conferring section 1581(a) jurisdiction on this court.

A party may file a supplemental complaint to cure a jurisdictional defect of failure to exhaust administrative remedies if the requisite actions are taken after filing a complaint. *See Mathews* v. *Diaz,* 426 U.S. 67, 75 (1976) (jurisdiction prerequisite under Social Security Act of filing application for enrollment was satisfied by supplemental pleadings establishing that application was filed after plaintiff was joined in action); *Wear Me Apparel,* 1 CIT at 197, 511 F. Supp. at 817 (leave to file an amended complaint under section 1581(a) granted where protest denied after complaint was filed). Although plaintiff did file an amended complaint after two of the three protests were denied, leave to amend is appropriate here only if the amended complaint cures the jurisdictional defect. Thus, the court must determine whether the final jurisdictional requirement of section 1581(a), that the protests themselves be timely filed, has been satisfied.

The time frame for filing a protest under 19 U.S.C. § 1514(a) is specifically provided for by statute:

> (2) A protest of a decision, order, or finding described in subsection (a) of this section shall be filed with such customs officer within ninety days after but not before—
>
> (A) *notice of liquidation* or reliquidation, or
>
> (B) in circumstances where subparagraph (A) is inapplicable, *the date of the decision as to which protest is made.*

19 U.S.C. § 1514(c)(2) (1982) (emphasis added).

Although 19 U.S.C. § 1504(a) (1982) specifically states that notice of a deemed liquidation need not be provided, the implementing regulations require that Customs provide such notice. 19 C.F.R. § 159.9(c)(2)(ii) (1984). Regardless of this apparent inconsistency, where Customs contends, as here, that entries are not deemed liquidated, notice obviously would not be provided. In this case it is appropriate to allow a protest as to the alleged deemed liquidation

to be filed within the time frame of section 1514(c)(2)(B) (above), prior to notice of liquidation.[7] The propriety of this ruling is made clear by the legislative history of liquidation by operation of law. Congress noted that "[u]nder the present law, [prior to enactment of the deemed liquidation provision,] an importer may learn years after goods have been imported and sold that additional duties are due, or may have deposited more money for estimated duties than are actually due but be unable to recover the excess for years as he awaits liquidation." S. Rep. No. 95–778, 95th Cong., 2d Sess. 32, *reprinted in* 1978 U.S. Code Cong. & Ad. News 2211, 2243. Congress sought to alleviate this problem by providing for liquidation by operation of law. To require a party to await notice of liquidation before filing a protest as to an alleged deemed liquidation would frustrate the legislative intent here, which was to prevent a party from bearing the burden of an inordinate delay in the liquidation of an entry. Thus the question is whether plaintiff's protests were timely filed in accordance with section 1514(c)(2)(B).[8]

Defendant argues that the liquidation of the entries in question was extended and that, as a result, plaintiff's protests were filed prior to liquidation of each respective entry. From this, defendant concludes that plaintiff's protests were not timely filed and, as such, the denial of those protests does not provide the basis for section 1518(a) jurisdiction.

Plaintiff filed each protest more than a year after each respective entry, after what if alleges was deemed liquidation of the entries.[9] Even so, only if the alleged extensions of liquidation were invalid could the protests have been filed within the requisite time frame of section 1514(c)(2)(B). *See supra* footnote 8. Whether the

---

[7] This is not to say that a party would be time barred from filing a protest if it chose to file its protest after notice of liquidation. *See Pagoda*, 9 CIT ——, 617 F. Supp. 96, 97, *appeal docketed*, No. 86–750, (Fed. Cir. Dec. 18, 1985) (protest related to alleged deemed liquidation filed within 90 days after notice of liquidation); T.D. 79–221, 44 Fed. Reg., 46,794, 46,809, 13 Cust. Bull. 641, 684–85 (1979) (Customs' explanation that an importer has "two time frames" for protesting a deemed liquidation: 90 days after either deemed liquidation or notice of deemed liquidation).

[8] Here, "the decision as to which protest is made," 19 U.S.C. § 1514(c)(2)(B) (1982) (above), is the liquidation, allegedly by operation of law, of the entries in question. As noted, protest must be made "within ninety days after *but not before*" this decision. *Id.* (emphasis added). Thus, only if the entries were in fact deemed liquidated by operation of law could plaintiff's protests have been timely filed under § 1514(c)(2)(B).

[9] Although an entry liquidated by operation of law is "deemed liquidated at the rate of duty, value, quantity, and amount of duties asserted at the time of entry by the importer, his consignee, or agent * * *," 19 U.S.C. § 1504(a) (1982), this does not eliminate the possibility that this rate of duty and amount of duties will be contested through protest. For, as plaintiff seems to acknowledge, the rate of duty corresponding to the classification asserted "at the time of entry" is that which is on the entry summary accepted by Customs and contains *not* what the importer, his consignee, or agent necessarily desires but rather what Customs insists upon as a condition precedent to release of the merchandise. *See* T.D. 79–221, 44 Fed. Reg. 46,794, 46,829, 13 Cust. Bull. 641, 685 (1979). Thus, the importer, his consignee or other eligible person may wish to file a protest as to the rate of duty at which the entry is deemed liquidated. An alternative view would interpret § 1504(a) to effect deemed liquidation at that classification under which the importer, his consignee, or agent attempted to enter the merchandise. This would, in effect, operate as a substantive penalty on Customs for its failure to liquidate merchandise within a year of entry, rather than simply avoiding undue delays in a party's ability to challenge a liquidation. *See supra* discussion of 19 U.S.C. § 1514(c) (court's indication that deemed liquidation or notice of liquidation is prerequisite to filing protest of classification and rate and amount of duties chargeable or of liquidation of an entry); see discussion in Shayne, *Deemed Liquidated*, American Import-Export Bulletin, July 1979 at 37–40. As was discussed, *supra*, the legislative history of deemed liquidation clearly indicates that liquidation by operation of law is designed to expedite the process of liquidation. The court is not convinced, however, that Congress sought to impose a harsh penalty on Customs for a failure to timely liquidate an entry. Thus, in this opinion the court is not disposing of plaintiff's claim on the merits. Rather, the court is only addressing the time for filing a protest.

protests were timely filed, and thus whether this court has jurisdiction under 28 U.S.C. § 1581(a), therefore turns on the validity of the alleged extensions of liquidation. *See Computime* v. *United States,* 772 F.2d 874, 875 (Fed. Cir. 1985); *ITT Semiconductors* v. *United States,* 6 CIT 233, 576 F. Supp. 641, 643 (1983) (both indicating that denial of a timely filed protest is a prerequisite to section 1581(a) jurisdiction).

Plaintiff challenges the validity of the extensions of liquidation on two distinct grounds. First, plaintiff argues that the Customs Service had all the information required to complete the liquidations and therefore Customs was not justified in issuing extensions of liquidation under 19 U.S.C. § 1504(b) (1982). Second, plaintiff contends that notice of the extensions was not provided to plaintiff-consignee and therefore the extensions did not take effect. As to plaintiff's first contention, defendant responds that Customs required additional information to process the classifications. In addition, defendant claims that plaintiff's request that Customs seek internal advice on the classifications constituted an implicit request that liquidation be delayed pending receipt of the advice from Customs Headquarters.[10] Finally, defendant argues that its decision to extend liquidation is not reviewable by this court because there is allegedly no law to apply. At the outset, it must be noted that this court does in fact have limited authority to review Customs' decision to extend the period in which to liquidate entries. There are specific circumstances under which Customs may issue such extensions.[11] Customs must interpret the statutes which it administers reasonably, *Zenith Radio Corp.* v. *United States,* 437 U.S. 443 (1978), and its decisions are "subject to judicial review for arbitrariness and abuse of discretion, even though the discretion may be broad." *Bar Bea Truck Leasing Co.* v. *United States,* 4 CIT 138, 140 (1982) (quoting *People* v. *United States Dept. of Agriculture,* 427 F.2d 561, 567 (D.C. Cir. 1970)); *see Pagoda,* 9 CIT at ——, 617 F. Supp. at 99-100 (finding no valid ground for extension or suspension). Both grounds asserted by defendant as justifying the extensions—the need to obtain information and a request by a party for an extension—are specifically provided for by statute. 19 U.S.C. § 1504(b)(1), (3) (1982). The notices of extension here, however, mentioned only the need to obtain information as justification for the extensions. Customs is required to specify its reasons for granting an extension in each notice of extension, 19 C.F.R. § 159.12(b)

---

[10] The procedures for internal advice requests are set forth in 19 C.F.R. § 177.11.

[11] The circumstances justifying an extension of liquidation are set forth in 19 U.S.C. § 1504(b) (1982) which provides:

(b) Extension

The Secretary may extend the period in which to liquidate an entry by giving notice of such extension to the importer, his consignee, or agent in such form and manner as the Secretary shall prescribe in regulations, if—

(1) *information needed for the proper appraisement or classification of the merchandise is not available to the appropriate customs officer;*

(2) liquidation is suspended as required by statute or court order; or

(3) *the importer, consignee, or his agent requests such extension and shows good cause therefor.*

(emphasis added).

(1984), and the court will, therefore, analyze the alleged extensions solely in light of the reason stated in the notices.[12] The court does not doubt, as plaintiff claims, that plaintiff provided Customs with information regarding the classifications. The term "information," as it is used in the statute, 19 U.S.C. § 1504(b)(1) (1982), however, should be construed to include whatever is reasonably necessary for proper appraisement or classification of the merchandise involved. When a request for internal advice of a classification decision is granted, the "information" required to make the appropriate classification includes that advice. An extension of liquidation is thus justified in such a case if additional time is needed to obtain the internal advice and to consider it before making the classification decision.

The statute imposes a four year outside limit on extensions of liquidation, 19 U.S.C. § 1504(d) (1982), and the regulations state that each individual extension is not to exceed one year. 19 C.F.R. § 159.12(a)(1) (1984). Nonetheless, the court must conclude that it was intended that an extension be granted only for a reasonable period of time relative to the situation. The request for internal advice was made on May 21, 1984, providing Customs with between approximately five months and ten months before the anniversary dates of the various entries and between approximately eight months and twelve months before the respective protests were filed. These time periods in and of themselves cannot be said to be unreasonable. Ordinarily, the court should defer to Customs' determination that it needs additional information to liquidate an entry and therefore requires an extension of the statutory time period. As stated by the Temporary Emergency Court of Appeals, "deference to an agency's judgment is especially appropriate when the issue is the ability of that same agency to perform certain tasks." *Basin, Inc.* v. *Federal Energy Administration*, 552 F.2d 931, 937 (Temp. Emer. Ct. App. 1977) (review of Federal Energy Administration regulation freezing supplier-purchaser relations pursuant to the Emergency Petroleum Allocation Act.). Although it is unclear how long an extension would be reasonable, the court cannot conclude, based on the facts before it, that at the time the protests were filed the delay had been so great as to constitute an abuse of discretion, thereby invalidating the extensions.[13]

As noted, plaintiff also claims that even if extensions were justified, the failure to provide notice of any such extensions to plaintiff-consignee determines that the alleged extensions were invalid and, as a result, the entries were liquidated by operation of law.

---

[12] Thus, the court need not determine whether a request for internal advice is tantamount to a request for an extension of liquidation.

[13] It appears that liquidation of the entries may not yet be completed. The legitimacy of the extensions must be judged as of the date the protests were filed, however, because the protests were timely filed only if the extensions were invalid as of the date of each respective filing. The court expresses no opinion as to the validity of any additional extensions that may have been granted beyond the initial one year period. Absent such additional valid extensions, deemed liquidation would appear to have occurred, a notice of liquidation should issue and protest would be appropriate.

The statute specifies that the period in which to liquidate an entry may be extended "*by providing notice* of such extension to the importer, his consignee, *or* agent in such form and manner as the Secretary shall prescribe in regulations * * *." 19 U.S.C. § 1504(b) (1982) (emphasis added). The implementing regulations state that "[i]f the district director extends the time for liquidation, * * * he promptly shall notify the importer *or* the consignee *and* his agent *and* surety * * *." 19 C.F.R. § 159.12(b) (1984) (emphasis added). Here, although notices were apparently provided to the importer of record and to the surety, no such notices were sent to plaintiff-consignee.[14]

Plaintiff claims that "importer of record" is a term of art in Customs usage and that an "importer of record" is not an "importer" within the meaning of the statute or regulations. Plaintiff further argues that Congress intended to have notice provided to the party incurring liability, whether it be the importer or consignee and that plaintiff-consignee was, therefore, entitled to notice of the alleged extensions. In support of the latter argument, plaintiff cites the legislative history to the deemed liquidation and notice provisions which states that these provisions "would increase certainty in the customs process for importers, surety companies, *and other third parties with a potential liability* relating to a customs transaction." S. Rep. No. 95-778 at 32, 1978 U.S. Code Cong. & Ad. News at 2243 (emphasis added). Thus, plaintiff concludes that even if notice was provided to the importer of record, this was insufficient to effect the alleged extensions.

Plaintiff's arguments here are unpersuasive. As noted, the statute requires that notice be provided to "the importer, his consignee, *or* agent * * *." 19 U.S.C. § 1504(b) (1982) (emphasis added). The listing of these parties in the alternative indicates that notice to any one will suffice.[15] Thus, under the literal words of the statute failure to give notice to plaintiff-consignee does not invalidate the extensions if one of the other two parties named in the statute is notified of the extensions. Plaintiff seems to acknowledge in its complaint that the importer of record here is an "agent" of plaintiff-consignee and in this case it appears that the importer of record was notified. Assuming that "agent" in the statute refers to "agent" of the "consignee," notice to the importer of record here meets the statutory requirement regardless of whether the importer of record is also the "importer."[16] On the other hand, even if

---

[14] Plaintiff denied knowledge of whether any notices of extension were provided as to three of the entries. An affidavit subsequently provided by defendant, however, indicates that the required notices of extension apparently were provided to the importer of record and to the surety.

[15] Congress has amended § 1504(b) to specifically require that notice of extension be provided only to the importer of record. 19 U.S.C.A. § 1504(b) (West Supp. 1985).

[16] Although the parties have not provided any definitions of these terms, the implementing regulations indicate that an "importer of record" can be an "importer" within the meaning of the regulations. 19 C.F.R. § 101.1(k) defines "importer" as follows:

(k) *Importer.* "Importer" means the person primarily liable for the payment of any duties on the merchandise, *or an authorized agent acting on his behalf.* The importer may be:

(1) *The consignee,* or

Continued

"agent" means "agent" of the "importer" and not "agent" of the "consignee," the statute is satisfied. In the case at bar, "importer" can only mean "importer of record" or "consignee." Given the parties here, there are no other alternatives. By providing notice to the importer of record, either the "importer" was notified (if the importer of record is the "importer") or the "agent" of the "importer" was notified (if the consignee is the "importer"). Thus, under any construction of the statute, notice to the importer of record is sufficient to effect the extensions in this case.

Section 159.12(b) of the regulations (quoted above) would seem to require notices to the importer *or* consignee *and* to the agent *and* surety.[17] In this case, notification of the surety is not at issue. Therefore, the essential question is whether the regulation may properly require additional notice to the consignee as a condition precedent to a valid extension in a case where the importer of record/agent of the consignee is notified. The statute does provide that the Secretary of the Treasury shall specify the "form and manner" in which notice is to be given. 19 U.S.C. § 1504(b) (1982). That the Secretary is allowed to choose among various types of notice methods, however, does not mean that the Secretary may change the requirements for an extension from notice to *one* of three parties into notice to *each* of three parties. The Secretary may provide that notice is to be given to both the importer of record and the consignee, where these are two separate parties, as a matter of convenience to the parties. Such a provision, however, cannot alter the statutory requirements for effecting a valid extension.[18]

Furthermore, the court's decision is in accord with the legislative history of 19 U.S.C. § 1504 (quoted above). The deemed liquidation statute does indeed increase "certainty in the customs process" for parties with potential liability by limiting the time for liquidation. Of course, a specific notice requirement for all concerned parties would further increase certainty, but that is not necessarily required by the legislative history. The court also notes that a contractual agreement between the importer of record and the ultimate consignee would help to insure that whatever notices are required by statute or regulation would be passed on to the party not required to be notified. Based on the evidence produced to date, indicating that the proper parties were notified of the original exten-

(2) *The importer of record*, or
(3) The actual owner of the merchandise, if an actual owner's declaration and superseding bond has been filed in accordance with § 141.20 of this chapter, or
(4) The transferee of the merchandise, if the right to withdraw merchandise in a bonded warehouse has been transferred in accordance with Subpart C of Part 144 of this chapter.

19 C.F.R. § 101.1(k) (1984) (emphasis added).

[17] *See*, C.S.D. 83-20, 17 Cust. Bull. 754 (1982) (liability of surety discharged due to failure to provide it with notice of extension), *rev'd in part*, 17 Cust. Bull. No. 19 at 8 (1983). The validity of Customs' reversal of C.S.D. 83-20 is currently being challenged in this court. *Old Republic Insurance Co. v. United States*, Court No. 83-10-01450. Because these decisions relate to surety liability only, they do not determine the outcome of this case.

[18] The court need not and does not reach the question of what the Secretary actually intended to require pursuant to 19 C.F.R. § 159.12(b). On its face section 159.12(b) does not mesh easily with the definitional regulation, 19 C.F.R. § 101.1(k) (1984), or with the statute.

sions, the court must conclude that the protests were not timely filed and that the denial of these protests does not, therefore, provide this court with the basis for section 1581(a) jurisdiction. *See Computime* v. *United States,* 772 F.2d 874, 875 (Fed. Cir. 1985); *ITT Semiconductors* v. *United States,* 6 CIT 233, 576 F. Supp. 641, 643 (1983).

As indicated, plaintiff also asserts jurisdiction under 28 U.S.C. § 1581(i) (1982). Although plaintiff contends that the Customs Service was not justified in granting extensions of liquidation, the delay in liquidation due to the extensions was not so great as to constitute the "special circumstances" necessary to invoke section 1581(i) jurisdiction in a case where section 1581(a) is available. *See supra* footnote 6. Plaintiff was required to deposit estimated duties and will not be able to obtain a refund, if at all, until it is determined that any such refund is appropriate, either through the administrative review process or through judicial review following liquidation, protest and denial of protest. This delay in obtaining a refund is a necessary consequence of the statutory scheme and any additional hardship imposed on plaintiff by the extensions is experienced by all importers or consignees required to deposit estimated duties for entries, the liquidation of which is extended. Thus, plaintiff here lacks justification to invoke section 1581(i) jurisdiction. *Compare United States Cane Sugar Refiners' Association* v. *Block,* 69 CCPA 172, 175 n.5, 683 F.2d 399, 402 n.5 (1982) (proceeding under section 1581(a) found "manifestly inadequate" where delay posed grave threat to the industry and the economy). To invoke section 1581(i) jurisdiction in the case at bar is inappropriate because to do so would "frustrate the orderly administration of the customs laws by permitting plaintiff to circumvent the usual and normal administrative review process." *Lowa Ltd.* v. *United States,* 5 CIT 81, 89, 561 F. Supp. 441, 447 (1983), *aff'd,* 724 F.2d 121 (Fed. Cir. 1984).

Finally, plaintiff also asserts jurisdiction under 28 U.S.C. §§ 1585 and 2201. It is clear, however, that neither of these provisions provides a basis of subject matter jurisdiction. *Manufacture De Machines Du Haut-Rhin* v. *von Raab,* 6 CIT 60, 569 F. Supp. 877, 881 (1983) (28 U.S.C. § 1585 does not grant jurisdiction to the Court of International Trade, rather confers ability to provide injunctive relief) (citing *Kidco, Inc.* v. *United States,* 4 CIT 103, 104 (1982)); *Smith* v. *Lehman,* 533 F. Supp. 1015, 1018 (E.D.N.Y.) (28 U.S.C. § 2202 is not jurisdictional but rather remedial), *aff'd,* 689 F.2d 342 (2d Cir. 1982), *cert. denied,* 459 U.S. 1173 (1983).

Thus far, plaintiff has failed to establish facts to support an appropriate basis of jurisdiction in either its original complaint or in the proposed amended complaint. As discussed, however, 28 U.S.C. § 1581(a), which is alleged in the proposed amended complaint, could provide a basis of jurisdiction if no extensions of liquidation had occurred when the protests were filed.

Because discovery was stayed pending consideration of this motion, plaintiff has not had an opportunity to discover facts relating to jurisdiction, which may be peculiarly within Customs' control. Nonetheless, some factual material has been turned over by the government. Furthermore, discovery related only to specific jurisdictional issues will be permitted at this time. The court is also aware that detailed examination of a Customs' extension decision based on the need for additional information could be useless and burdensome. (See previous discussion of agency's discretion in this area.) Of course, indications of bad faith on the part of Customs would be a reason to examine such a decision in some detail. Thus far, however, there are no such indications. Therefore, while to a limited degree the need for additional information may be an area of permissible discovery, this has not been shown to be a likely area of fruitful inquiry. The focus of plaintiff's discovery, if any questions remain unanswered, more likely should be whether or not the importer of record was sent the requisite notices.

Therefore, if plaintiff wishes to proceed with jurisdiction predicated on its original protests, and if it believes that discovery is necessary, it should advise the court of its specific and limited discovery plan within 10 days hereof. The government will have 5 days to respond to this plan, at which time the court will decide what discovery is appropriate. Failure to timely file a discovery plan will be deemed an admission that no jurisdictional facts remain to be discovered and this action will be dismissed for the reasons set forth above.

U.S. Customs Service

Treasury Decision

19 CFR Part 101

(T.D. 86-68)

Change in the Customs Field Organization; Pascagoula, MS

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by extending the geographical limits of the port of entry of Pascagoula, Mississippi. The change extends the existing port limits to include all of Jackson County, Mississippi. These extended port limits coincide with the jurisdiction of the Jackson County Port Authority, and encompass areas undergoing industrial development and growth, thereby allowing them access to Customs services. Moreover, they will enable Customs to provide better service to carriers, importers and the public.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, Customs is amending § 101.3, Customs Regulations (19 CFR 101.3), by extending the geographical limits of the port of entry of Pascagoula, Mississippi.

Prior to this amendment, T.D. 56333, published in the Federal Register on January 12, 1965 (30 FR 344), extended the geographical limits of Pascagoula, Mississippi, to include the corporate limits of Pascagoula, and that area lying eastward of the city limits to 88° 28 minutes west longitude, and south of 30° 23 minutes north latitude to the existing shoreline.

The amendment extends the existing port limits to include all of Jackson County, Mississippi. These extended port limits coincide with the jurisdiction of the Jackson County Port Authority, and encompass area undergoing industrial development and growth, thereby allowing them access to Customs services. The list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations, is being amended accordingly.

The change set forth in this document was set forth in a notice published in the Federal Register on October 8, 1985 (50 FR 40982), and although public comments were invited, none were received. Accordingly, after further review of the matter, Customs has determined to make the change as proposed.

Change in the Customs Service Field Organization

Under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949–1953 Comp. Ch. II), and pursuant to authority provided by Treasury Department Order No. 101-5 (47 FR 2449), the existing geographical limits of the port of Pascagoula, Mississippi, are extended to include all of Jackson County, Mississippi. Accordingly, the limits of the port of Pascagoula, Mississippi, include all of Jackson County, Mississippi.

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Imports, Organization.

Amendment to the Regulations

PART 101—GENERAL PROVISIONS

1. The authority citation for Part 101, Customs Regulations (19 CFR Part 101), continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1, 66, 1202 (Gen. Hdnote 11), 1624, Reorganization Plan 1 of 1965; 3 CFR Part 1965 Supp.

2. To reflect the change, the list of Customs regions, districts, and ports of entry in § 101.3, Customs Regulations (19 CFR 101.3), is amended by removing "T.D. 56333" under the column headed "Ports of entry" after the phrase "Pascagoula, Miss., including territory described in" and inserting, in its place, "T.D. 86-68", in the Mobile, Alabama, Customs district in the South Central Region.

Executive Order 12291

Because the amendment relates to the organization of the Customs Service, pursuant to § 1(a)(3) of E.O. 12291, it is not subject to the Executive Order.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this amendment. Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this change may have a limited effect upon some small entities in the Pascagoula, Mississippi area, it is not expected to be significant because the extension of the limits of Customs ports of entry in other locations has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Regulatory Flexibility Act. Accordingly, it is certified under the provisons of § 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the amendment will not have a significant economic impact on a substantial number of small entities.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service Headquarters. However, personnel from other Customs offices participated in its development.

William von Raab,
Commissioner of Customs.

Approved: March 5, 1986.

Francis A. Keating II,
Assistant Secretary of the Treasury.

Decisions of the United States Court of International Trade

(Slip Op. 86-24)

STAVELEY MACHINE TOOLS, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82-10-01384

Before DICARLO, *Judge.*

Plaintiff challenges the denial of a request for reliquidation to correct clerical error under section 520(c) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1520(c) (1982), and moves for summary judgment. Defendant opposes plaintiff's motion and moves to dismiss for lack of jurisdiction on the ground that the protest was not timely.

Held: Plaintiff failed to file a protest within ninety days after the United States Customs Service (Customs) denied a request made by plaintiff's broker under section 520(c). Customs denial of plaintiff's subsequent request for the same relief was not protestable.

[Defendant's motion to dismiss is granted.]

(Decided March 12, 1986)

Sullivan & Lynch, P.C. (Herbert J. Lynch) for plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Civil Division, Department of Justice *(Judith M. Barzilay)* for defendant.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* This action is before the Court on plaintiff's motion for summary judgment and defendant's cross-motion to dismiss for lack of jurisdiction. The Court holds that plaintiff's protest was not timely filed, denying the Court jurisdiction in this action. Defendant's motion is granted.

Merchandise manufactured in England and invoiced as a "horizontal boring machine" was imported by plaintiff, Staveley Machine Tools, Inc. (Staveley) in August, 1979.[1] According to Staveley, the machine was originally exported from England for temporary exhibition in Vera Cruz, Mexico. It was then sent to the United States for temporary exhibition in Dallas, Texas.

[1] The facts in this opinion reflect those set forth in the complaint. For purposes of deciding the motion, the Court assumes that plaintiff's allegations are true. Plaintiff and its London affiliate, the Kearns-Richards Division of Staveley Machine Tools, Ltd., are both referred to as "Staveley" throughout this opinion.

The machine entered under a consumption entry bond and duties of $18,859.56 were paid. No attempt was made to enter the machine under a temporary import bond, which, if applicable, would have permitted duty free entry.[2] The machine, which had a list value of 124,377 pounds sterling, was erroneously entered at a declared value of 143,626 pounds sterling. The United States Customs Service (Customs) was not informed that the machine arrived at the port of Houston in damaged condition and that marine surveyors estimated its value at only 55,352 pounds sterling. On October 12, 1979 duties were liquidated in the amount paid on entry. The machine could not be exhibited due to its damaged condition and was returned to England on or about October 15, 1979.

On July 15, 1980, Staveley's customs broker requested reliquidation and a refund of duties based on clerical error, pursuant to section 520(c) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1520(c) (1976 & Supp. IV 1980).[3] The broker said duties should not have been paid since the machine was entitled to enter under a temporary import bond, and alternatively that the duties paid were too high since the machine was damaged and overvalued.

On July 18, 1980, Customs denied the request for reliquidation under section 520(c) stating (1) the request was not timely for the purposes of the voluntary reliquidation provisions of 19 U.S.C. § 1501, and (2) the request did not present a clerical error correctable under section 520(c)(1). No protest was filed within ninety days although Customs informed the broker that a protest contesting its decision must be filed within that time.[4]

On August 22, 1980 the broker again wrote Customs requesting a refund of duties. This request was denied by telephone on September 5, 1980.

On September 22, 1980 Staveley's London office wrote Customs requesting a refund of duties on grounds substantially similar to those raised by Staveley's broker on July 15, 1980. On December 3, 1980, Customs refused to grant the requested relief, noting that similar request by Staveley's broker previously had been denied.

[2] Plaintiff contends that the machine was entitled to enter free of duty under a temporary import bond under item 864.20 or 864.30 of the Tariff Schedules of the United States.

[3] Section 520(c) states in pertinent part:

> Notwithstanding a valid protest was not filed, the appropriate customs officer may, in accordance with regulations prescribed by the Secretary, reliquidate an entry to correct—
>
> (1) a clerical error, mistake of fact, or other inadvertence not amounting to an error in the construction of a law, adverse to the importer and manifest from the record or established by documentary evidence, in any entry, liquidation, or other customs transaction, when the error, mistake, or inadvertence is brought to the attention of the appropriate customs officer within one year after the date of liquidation or exaction; * * *

[4] Section 514(a) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1514(a) (1976 & Supp. IV 1980) states in part: decisions of the appropriate customs officer, including the legality of all orders and findings entering into the same, as to—

> (7) the refusal to reliquidate an entry under section 1520(c) of this title, shall be final and conclusive upon all persons * * * unless a protest is filed in accordance with this section * * *

Section 1514(c)(2) states in part:

> A protest of a decision, order, or finding described in subsection (a) of this section shall be filed with such customs officer within ninety days after but not before—
>
> (A) notice of liquidation or reliquidation, or
>
> (B) in circumstances where subparagraph (A) is inapplicable, the date of the decision as to which protest is made.

On March 2, 1981, Staveley filed a protest contesting the denial of the September 22, 1980 request, and Customs denied the protest as untimely on April 29, 1982.

Staveley contends that the protest is timely since it was filed within ninety days after December 3, 1980, the date on which Customs refused to grant the relief requested by Staveley. It argues (1) that the period for filing a protest did not elapse ninety days after the denial of its broker's request of July 15, 1980 because the broker did not have authority to file a petition for reliquidation pursuant to section 520(c); (2) Staveley's request contained new grounds for reliquidation; and (3) whether or not its broker had authority, the request by Staveley dated September 22, 1980 is timely since it was filed within one year after liquidation.

The first issue is whether Staveley's broker had authority to file a request for reliquidation and refund of duties under section 520(c) on behalf of Staveley.

Staveley executed a "Corporation Power of Attorney," Customs Form 5293, on July 14, 1969, giving its broker broad authority to transact all customs business on its behalf, "except making, signing and filing of protest."[5] Staveley acknowledges that the power of attorney was neither revoked nor limited prior to July 15, 1980, but argues that a request for reliquidation under section 520(c) is similar to a protest and therefore the broker's actions were not authorized. Since the July 15, 1980 request was not authorized, Staveley contends that the first protestable denial of relief under section 520(c) did not occur until December 3, 1980.

The Court disagrees. Protests and requests under section 520(c) serve different functions. *See* 19 U.S.C. §§ 1514(a); 1520(c). The Customs Regulations contain special provisions applicable to the filing of protests by agents which are not applicable to the filing of requests under section 520(c). *See* 19 C.F.R. §§ 111.40, 174.3(2) (1980), 19 C.F.R. §§ 8.19, 17.2 (1969). The exception in the power of attorney relates solely to the making, signing and filing of protests. The Court holds that the exception does not implicity deny the broker authority to request reliquidation under section 520(c). The broker properly exercised its authority when it made such a request on July 15, 1980.

Staveley next claims that the passage of ninety days after the denial of its broker's request under section 520(c) does not preclude its filing a protest upon the denial of its subsequent section 520(c) request since the latter request contained new grounds for reliqui-

[5] The power of attorney, attached as exhibit F to defendant's brief, permits the broker:

> generally to transact at the Customhouses in said district any and all customs business, except making, signing, and filing of protests under section 514 of the Tariff Act of 1930, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent and attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; the foregoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of Customs of the district aforesaid.

(emphasis omitted).

dation and refund of duties. At oral argument, however, Staveley admitted that the September 22, 1980 request differs from the July 15, 1980 request only insofar as it is lengthier and was written by Staveley's London office rather than by the broker.

The Court holds that the length and authorship of the September 22, 1980 letter are of no importance. Comparison of the contents of the two letters reveals that the requests were in substance identical. Since the grounds alleged in the requests of Staveley and its broker are the same, the Court need not decide whether an importer may protest a denial of a request under section 520(c) after the expiration of the time available for the protest of a denial of a 520(c) request premised on separate grounds.

The final issue is whether, within one year after liquidation but more than ninety days after denial of an authorized request under section 520(c), an importer may protest the denial of a later request under section 520(c) containing the same grounds for relief as the first request. The Court holds that it may not. Section 514 expressly provides that a refusal to reliquidate under section 520(c) becomes final and conclusive unless a protest is filed within ninety days. *See* 19 U.S.C. §1514(a)–(c); *supra* note 4. Since Staveley failed to file a protest within ninety days after July 18, 1980, Customs refusal to grant relief under section 520(c) became unassailable. *Cf. Hambro Automotive Corp.* v. *United States*, 81 Cust. Ct. 29, 30, 458 F.Supp. 1220, 1221, C.D. 4761 (1978), aff'd, 66 CCPA 113, C.A.D. 1231, 603 F.2d 850 (1979). Customs denial of Staveley's September 22, 1980 request for reliquidation and refund was not protestable. *See James Loudon & Co.* v. *United States*, 79 Cust. Ct. 149, 158–61, C.D. 4727 (1977). Since the protest was not filed in accordance with section 514, the Court does not have jurisdiction under 28 U.S.C. § 1581(a) to consider its denial by Customs. *See Computime Inc.* v. *United States*, 8 CIT 259, 601 F.Supp. 1029 (1984), *aff'd.* 772 F.2d 874 (Fed. Cir. 1985).

Defendant's motion to dismiss for lack of subject matter jurisdiction is granted. So ordered.

(Slip Op. 86-25)

THE WEST BEND CO., DIV. OF DART INDUSTRIES, PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 80-10-01774

Before WATSON, *Judge.*

MEMORANDUM AND ORDER

[Motion for summary judgment granted]

(Decided March 12, 1986)

Barnes, Richardson & Colburn (Andrew P. Vance and *Michael A. Johnson)* for plaintiff.

Richard K. Willard, Assistant Attorney General, *Joseph I. Liebman,* International Trade Field Office (*Barbara M. Epstein,* Attorney) for defendant.

WATSON, *Judge:* This matter is before the court on defendant's motion for summary judgment. This follows a determination by the President, pursuant to the court's remand in Slip Op. 84-85 (July 13, 1984) that, in terms of 19 U.S.C. § 2464(d)(1), (1975), hot air popcorn poppers are directly competitive with hot oil popcorn poppers produced in the United States on January 3, 1975 (50 Fed. Reg. 47198-9, November 14, 1985.)

By the terms of the limitations on the preferential treatment available under the Generalized System of Preferences (19 U.S.C. § 2464(c)(1)(B) this determination made plaintiff's popcorn poppers ineligible for a waiver of the 50% competitive need limit and justified the loss of duty-free treatment which led to this action.

Plaintiff has cross-moved for the filing of the administrative record of the remand determination in the hope of demonstrating that there were further procedural irregularities. However, the court is not persuaded that any further judicial inquiry is justified in this matter.

The President has made the determination called for by the court. That determination now conclusively supports the government's classification and the assessment of duties on this merchandise. It is therefore

ORDERED, ADJUDGED AND DECREED that the plaintiff's motion for the filing of the administrative record is denied and it is further

ORDERED that the government's motion for summary judgment is granted; and it is hereby

ORDERED, ADJUDGED AND DECREED that the government's classification of this merchandise and assessment of duties under Item 684.20, TSUS is affirmed and the action is dismissed.

ERRATA

(Slip Op. 86–5)

NEC CORP., PLAINTIFF *v.* UNITED STATES, DEFENDANT

The above-noted slip opinion was originally published in CUSTOMS BULLETIN, Vol. 20, No. 6, dated February 12, 1986, starting on page 33. Delete second paragraph in its entirety (page 33, line 7 through page 34, line 14. Replace with the following:

"The Court initially notes that on December 4, 1985, prior to the filing of this motion, plaintiff filed a notice of appeal to the Federal Circuit of the November 19, 1985 judgment. Under Rule 4(a)(4) of the Federal Rules of Appellate Procedure as amended in 1979, the timely filing of a motion for new trial or to alter or amend the judgment pursuant to Rule 59 of the Federal Rules of Civil Procedure nullifies a previously filed notice of appeal, and the time for appeal runs from the district court's disposition of the motion. *See* Advisory Committee Note to 1979 Amendment to Fed. R. App. P. 4(a)(4); *Griggs* v. *Provident Consumer Discount Co.*, 459 U.S. 56, 59–61 (1982). Since Rule 59 of this court is patterned after Rule 59 of the Federal Rules of Civil Procedure, the court concludes that it has jurisdiction to dispose of the instant motion, the filing of which nullified the previously filed notice of appeal."

Treasury Decisions

19 CFR Part 4

(T.D. 86-69)

Amendment to the Customs Regulations Concerning the Coastwise Transportation of Certain Articles by Vessels of the Netherlands Antilles

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to add the Netherlands Antilles to the lists of nations which permit vessels of the U.S. to transport certain articles specified in § 27, Merchant Marine Act of 1920, as amended, between their ports.

Customs has been furnished satisfactory evidence that the Netherlands Antilles places no restrictions on the transportation of certain specified articles by vessels of the U.S. between ports in that country. This amendment provides reciprocal privileges for vessels registered in the Netherlands Antilles.

EFFECTIVE DATE: The reciprocal privileges for vessels registered in the Netherlands Antilles became effective on October 22, 1984.

FOR FURTHER INFORMATION CONTACT: Donald Reusch, Carriers, Drawback & Bonds Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

Background

Section 27, Merchant Marine Act of 1920, as amended (46 U.S.C. 883) (the "Act"), provides generally that no merchandise shall be transported by water, or by land and water, between points in the U.S. except in vessels built in and documented under the laws of the U.S. and owned by U.S. citizens. However, the 6th proviso of the Act, as amended, by Pub. L. 89-194 (79 Stat. 823, T.D. 66-176) and Pub. L. 90-474 (82 Stat. 700, T.D. 68-227), provides that upon a finding by the Secretary of the Treasury, pursuant to information obtained and furnished by the Secretary of State, that a foreign

nation does not restrict the transportation of certain articles between its ports by vessels of the U.S., reciprocal privileges will be accorded to vessels of that nation, and the prohibition against the transportation of those articles between points in the U.S. will not apply to its vessels.

Section 4.93(b)(1), Customs Regulations (19 CFR 4.93(b)(1)), lists those nations found to extend reciprocal privileges to vessels of the U.S. for the transportation of empty cargo vans, empty lift vans, and empty shipping tanks. Section 4.93(b)(2), Customs Regulations (19 CFR 4.93(b)(2)), lists those nations found to extend reciprocal privileges to vessels of the U.S. for the transportation of equipment for use with cargo vans, lift vans, or shipping tanks; empty barges specifically designed for carriage aboard a vessel and certain equipment for use with these barges; certain empty instruments of international traffic; and certain stevedoring equipment and material.

On October 18, 1984, the Department of State advised the Director, Carriers, Drawback and Bonds Division, of the Customs Service Headquarters that the Netherlands Antilles places no restrictions on the transportation of the articles listed in the Act by vessels of the U.S. between ports in the Netherlands Antilles. The effective date of such notification was October 22, 1984.

The Carriers, Drawback and Bonds Division is of the opinion that satisfactory evidence has been furnished to establish the reciprocity required in § 4.93(b). Therefore, the Director of the Division has determined that, effective retroactively to October 22, 1984, the Netherlands Antilles should be added to the lists of nations set forth in § 4.93(b)(1) and (2).

By Treasury Department Order 165–25 the Secretary of the Treasury has delegated authority to the Commissioner of Customs to prescribe regulations relating to §§ 4.22, 4.81a(b), 4.93(b)(1) and (b)(2), 4.94(b), and 10.59(f), Customs Regulations (19 CFR 4.22, 4.81a(b), 4.93(b)(1) and (b)(2), 4.94(b), and 10.59(f)). These sections relate to lists of nations entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated this authority to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office of Regulations and Rulings, who then re-delegated it to the Director, Regulations Control and Disclosure Law Division.

FINDING

On the basis of the information received from the Secretary of State, as described above, it is determined that the Netherlands Antilles places no restrictions on the transportation of the articles specified in the 6th proviso of § 27 of the Merchant Marine Act of 1920, as amended, by vessels of the U.S. between ports in the Neth-

erlands Antilles. Therefore, reciprocal privileges are accorded as of October 22, 1984, to vessels registered in the Netherlands Antilles.

List of Subjects in 19 CFR Part 4

Customs duties and inspection, cargo vessels, maritime carriers, vessels.

Regulations Amendments

To reflect the reciprocal privileges granted to vessels registered in the Netherlands Antilles, Part 4, Customs Regulations (19 CFR Part 4), is amended in the following manner:

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The authority citation for Part 4, continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103; § 4.93 also issued under 19 U.S.C. 1322(a); 46 U.S.C. 883.

2. Sections 4.93(b)(1) and (b)(2), Customs Regulations (19 CFR 4.93(b)(1), (b)(2)), are amended by adding "Netherlands Antilles", in appropriate alphabetical order to the lists of nations entitled to reciprocal privileges.

Inapplicability of Public Notice and Delayed Effective Date Requirements

Because this is a minor amendment in which the public is not particularly interested and there is a statutory basis for the described extension of reciprocal privileges, notice and public procedure pursuant to 5 U.S.C. 553(b)(B) are unnecessary. In accordance with 5 U.S.C. 553(d)(1), a delayed effective date is not required because this amendment grants an exemption.

Inapplicability of Regulatory Flexibility Act

This document is not subject to the provisions of 5 U.S.C. 603, 604, as added by § 3 of Pub. L. 96-354, the "Regulatory Flexibility Act." That Act does not apply to any regulations such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) or any other statute.

Executive Order 12291

This amendment does not meet the criteria for major regulation as defined in § 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S.

Customs Service. However, personnel from other Customs offices participated in its development.

Synopses of Drawback Decisions

The following are synopses of drawback rates issued November 12, 1985, to December 30, 1985, inclusive, pursuant to Subpart C, Part 191, Customs Regulations.

In the synopses below are listed for each drawback rate approved under 19 U.S.C. 1313(b), the name of the company, the specified articles on which drawback is authorized, the merchandise which will be used to manufacture or produce these articles, the factories where the work will be accomplished, the date the statement was signed, the basis for determining payment, the Regional Commissioner to whom the rate was forwarded or issued by, and the date on which it was forwarded or issued.

(A) Company: American Chrome and Chemicals Inc.
Articles: Sodium dichromate in liquid form
Merchandise: Sodium dichromate (anhydrous)
Factory: Corpus Christi, TX
Statement signed: October 11, 1985
Basis of claim: Used in
Rate forwarded to Regional Commissioner of Customs: New York, December 6, 1985

(B) Company: Atlantic Industries, Inc.
Articles: Coal tar dyestuffs; pigments and intermediates; blends of dyestuffs; and dyestuffs reduced in strength
Merchandise: Various chemicals
Factory: Nutley, NJ
Statement signed: October 15, 1985
Basis of claim: Used in

Rate issued by Regional Commissioner of Customs in accordance with section 191.25(b)(2), Customs Regulations: New York, December 3, 1985
Revokes: T.D. 55423–C and T.D. 52718–B, to cover name change from Atlantic Chemical Corporation

(C) Company: Bristol De Puerto Rico
Articles: Sodium ampicillin sterile; ampicillin trihydrate sterile; sodium cephapirin sterile; potassium hetacillin sterile
Merchandise: Sodium ethyl hexanoate salt; ampicillin trihydrate; cephapirin acid; hetacillin
Factory: Barceloneta, PR
Statement signed: December 20, 1984
Basis of claim: Used in
Rate forwarded to Regional Commissioner of Customs: New York, December 20, 1985

(D) Company: Carlton Forge Works
Articles: Titanium alloy billets (forged)
Merchandise: Titanium alloy ingots
Factory: Paramount, CA
Statement signed: July 31, 1985
Basis of claim: Used in, less valuable waste
Rate forwarded to Regional Commissioner of Customs: New York, November 14, 1985

(E) Company: Carlton Forge Works
Articles: Titanium alloy rough forgings
Merchandise: Titanium alloy billets
Factory: Paramount, CA
Statement signed: July 31, 1985
Basis of claim: Used in, less valuable waste
Rate forwarded to Regional Commissioner of Customs: New York, November 14, 1985

(F) Company: City Auto Stamping Co., Inc.
Articles: Automotive, agricultural, and industrial stampings
Merchandise: Hot rolled steel sheet, cold rolled steel sheet, galvanized steel sheet and zincrometal
Factory: Toledo, OH
Statement signed: October 15, 1985
Basis of claim: Appearing in
Rate issued by Regional Commissioner of Customs in accordance with section 191.25(b)(2), Customs Regulations: New York, December 11, 1985
Revokes: T.D. 81–190–D

(G) Company: Collins & Aikman Corporation
Articles: Dyed and/or texturized acrylic, polyester and nylon yarn

Merchandise: Undyed acrylic filament, texturized acrylic; polyester filament, texturized polyester; nylon filament and texturized nylon yarn
Factories: Graham and Hickory, NC
Statement signed: August 19, 1985
Basis of claim: Appearing in
Rate forwarded to Regional Commissioner of Customs: New York, December 20, 1985

(H) Company: Cressona Aluminum Company
Articles: Extruded shapes, rod, bar, seamless tube and pipe
Merchandise: Aluminum and aluminum alloy ingots
Factories: Cressona, PA; Farmersville, TX

19 CFR Part 4

(T.D. 85-191)

Liquidated Damages Claims Against Bonded Carriers

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule; correction.

SUMMARY: In FR Doc. 85-25007, published as T.D. 85-180, in the Federal Register on October 21, 1985 (50 FR 42516), § 18.8(e)(1), Customs Regulations (19 CFR 18.8(e)(1)), was extensively revised to reflect the terms of the 1975 Convention on International Road Transport (TIR) Carnets.

Subsequently, § 18.8(e)(1) was further amended in FR Doc. 85-28433, published as T.D. 85-191, in the Federal Register on November 29, 1985 (50 FR 49037). This document made minor changes to the third sentence of § 18.8(e)(1). However, it erroneously referred to the second sentence. Accordingly, on page 49039, in the second column, in the third numbered paragraph, the word "second" should be changed to "third".

Dated: March 25, 1986.

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

U.S. Court of Appeals for the Federal Circuit

(Appeal No. 85-2107)

WARNER BROTHERS, INC., APPELLANT *v.* U.S. INTERNATIONAL TRADE COMMISSION, APPELLEE

J. Joseph Bainton, of New York, New York, argued for appellant. With him on the brief were *Steven H. Reisberg* and *Joseph J. Iarocci*, Reboul, MacMurray, Hewitt, Maynard & Kristol, of counsel.

William E. Perry, Office of the General Counsel, of Washington, D.C., argued for appellee. With him on the brief were *Lyn M. Schlitt*, General Counsel and *Michael P. Mabile*, Assistant General Counsel.

Richard M. Cooper and *Mary G. Clark*, Williams & Connolly, of Washington, D.C., were on the brief for Amicus Curiae, Motion Picture Association of America, Inc.

Appealed from: U.S. International Trade Commission.

(Appeal No. 85-2107)

WARNER BROTHERS, INC., APPELLANT *v.* U.S. INTERNATIONAL TRADE COMMISSION, APPELLEE

(Decided March 20, 1986)

Before MARKEY, *Chief Judge*, SMITH and NIES, *Circuit Judges*.

NIES, *Circuit Judge*.

Warner Brothers, Inc. appeals from the final decision of the International Trade Commission (ITC) in investigation No. 337-TA-201, which declined to grant Warner's request for a temporary exclusion order (TEO) because Warner failed to prove that the domestic industry would suffer immediate and substantial harm in the absence of such relief. Because the ITC applied the correct legal standard, and its finding of no immediate and substantial harm is supported by substantial evidence, the decision of the ITC is affirmed.*

---

* This appeal was originally decided in an unpublished opinion released January 10, 1986, and has now been reissued in published form.

OPINION

As a threshold matter in this appeal, the ITC argues that Warner has waived its right to challenge the immediate and substantial harm standard because it failed to file a petition for review of the ALJ's initial decision by the Commission. We do not agree. The government's argument on waiver hopelessly confuses the precedent dealing with requirements that a private litigant must first exhaust administrative remedies with the Commission's *sua sponte* right to restrict the disposition of a case to a single dispositive issue.

With respect to the latter, this court held in *Beloit Corp.* v. *Valmet Oy*, 742 F.2d 1421, 1423, 223 USPQ 193, 194 (Fed. Cir. 1984), *cert. denied*, 105 S. Ct. 2706 (1985):

> The Commission, on the other hand, is at perfect liberty to reach a "no violation" determination on a single dispositive issue. That approach may often save the Commission, the parties, and this court substantial unnecessary effort. Like many good things, that approach carries with it a risk—here the risk of a reversal, and a consequent need for the Commission to revisit one or more portions of the initial determination on which it had taken no position.

Whether or not a petition for review is filed, the ITC may limit resolution of a case to a single dispositive issue. It may not, however, parse that issue so finely that meaningful judicial review is precluded. In this case, the ITC in its notice of "nonreview" of the initial decision (ID) specifically adopted "that portion of the administrative law judge's ID finding that there is no immediate and substantial harm to the domestic industry." Although the ITC's statement appears to be directed to the factual finding of no immediate and substantial harm, it would make no sense for the ITC to treat that finding as dispositive were it not in agreement with the legal standard. Thus, a challenge to the legal propriety of the standard as well as to the factual satisfaction of that standard may be raised at this time.

With respect to a party's *waiver* of an issue, the precedent cited by the government has no applicability here. *Tong Seae Industries Co., Ltd.* v. *USITC*, 67 C.C.P.A. 160, 164 (1980) repeated the hornbook rule that a party may not raise issues on appeal "that were *never* raised below." *Astra-Sjuco A.B.* v. *USITC*, 629 F.2d 682 (CCPA 1980) was decided under the prior rules where the ALJ decision did not automatically become the decision of the Commission.

As we read the current regulations, 19 C.F.R. § 210.55(a)(2), if a party does file a petition for review of the ID, any issue not raised therein "will be deemed to have been abandoned." That rule obviously applies where a party files such a petition. However, there is no requirement that a party file a petition for review or risk

waiver of all adversely decided issues. On the contrary, as indicated in *Beloit, supra* at 1424, where Valmet filed no petition:

> Valmet obviously desires to argue before us the validity and injury issues as insurance against the possibility of our reversing the "no-infringement" finding adopted by the Commission. That desire, and the back-door appeal it would create, are premature. If this court affirms on "no-infringement", the litigation ends (absent grant of certiorari) favorably to Valmet. If this court reverses on that issue, and if on remand the Commission adopts the portions of the Initial Determination relating to the validity and injury issues, Valmet may appeal that decision to this court at that time.

Beloit clearly did not sanction a rule that a party waives appeal rights by failure to file a petition for review. Where the Commission limits the issues, *sua sponte,* a reversal on those issues will result in a remand. *Id.*

Regarding Warner's challenges to the ALJ's refusal to invoke a presumption of irreparable injury in copyright cases, this court has already spoken:

> [S]ection 337 does not function merely as the international extension of our patent, trademark and copyright laws * * *. Instead, section 337 has consistently been interpreted to contain a distinct injury requirement of independent proof.

Textron, Inc. v. *U.S. International Trade Commission,* 753 F.2d 1019, 1028, 224 USPQ 625, 631 (Fed. Cir. 1985) (citation omitted). This is particularly important where, as here, temporary relief is sought. The ALJ properly declined to adopt a relaxed proof requirement as might exist when seeking injunctive relief under the copyright statute. The two statutes protect different rights, and similarity of two statutory schemes in one respect does not warrant eradication of purposefully designed differences in another. Finally, the Commission's finding of no immediate and substantial harm to Warner is reasonable on the evidentiary record. Thus, we hold that the finding is supported by substantial evidence. *See SSIH Equipment S.A.* v. *USITC,* 718 F.2d 365, 381-83, 218 USPQ 678, 692-93 (Fed. Cir. 1983) (Nies, J., supplemental opinion).

For the foregoing reasons, the ITC's refusal to issue a temporary exclusion order is affirmed.

AFFIRMED

(Appeal No. 85-2282)

VISCOFAN, S.A., PETITIONER *v.* U.S. INTERNATIONAL TRADE COMMISSION, UNION CARBIDE CORP., AND TEEPAK, INC., RESPONDENTS

Thomas V. Heyman, Dewey, Ballantine, Bushby, Palmer & Wood, of New York, New York, argued for appellant. With him on the brief were *Saul P. Morgenstern*

and *Claire Ann Koegler*. *Steven H. Bazerman* and *Julius Rabinowitz*, Kuhn, Muller & Bazerman, of New York, New York, of counsel.

Judith M. Czako, Office of the General Counsel, U.S. International Trade Commission, of Washington, D.C., argued for appellee International Trade Commission. With her on the brief were *Lyn M. Schlitt*, General Counsel and *Michael P. Mabile*, Assistant General Counsel.

H. Blair White, P.C., Sidley & Austin, of Chicago, Illinois, argued for appellee Union Carbide. With him on the brief were *David T. Pritikin*, *Rex E. Lee*, *Richard E. Young*, Sidley & Austin, of Washington, D.C., *C. Frederick Leydig*, *Homer J. Schneider*, *Charles S. Oslakovic*, *Mark E. Phelps*, Leydig, Voit & Mayer, Ltd., of Chicago, Illinois and *Thomas I. O'Brien*, *Clyde V. Erwin*, Union Carbide Corp., Danbury, Connecticut.

Appealed from: U.S. International Trade Commission.

(Appeal No. 85-2282)

VISCOFAN, S.A., PETITIONER *v.* U.S. INTERNATIONAL TRADE COMMISSION, UNION CARBIDE CORP., AND TEEPAK, INC., RESPONDENTS

(Decided March 18, 1986)

Before FRIEDMAN, *Circuit Judge*, NICHOLS, *Senior Circuit Judge*, and BISSELL, *Circuit Judge*.

FRIEDMAN, *Circuit Judge*.

This petition to review challenges (1) aspects of a remedial order the United States International Trade Commission (Commission) entered in a proceeding under section 337 of the Tariff Act of 1930, 19 U.S.C. § 1337 (1982), and 19 U.S.C. §1337a (1982), and (2) the Commission's refusal to declassify confidential information that had been submitted during the Commission proceedings pursuant to a protective order. We affirm the challenged portions of the remedial order and dismiss the challenge to the refusal to declassify as an issue over which we have no jurisdiction.

I

A. In response to a complaint filed by respondent, Union Carbide Corporation (Carbide), the Commission in October 1983 initiated an investigation to determine whether the petitioner, Viscofan, S.A. (Viscofan), had committed unfair methods of competition and unfair acts in violation of section 337. The alleged unfair practices consisted of the importation and selling by Viscofan, a Spanish corporation, of certain skinless sausage casings. Carbide's complaint to the Commission alleged that Viscofan had manufactured the casings by processes that (1) violated two of Carbide's patents, and (2) involved trade secrets of Carbide that Viscofan had misappropriated. Carbide is one of the two major American manufacturers and sellers of skinless sausage casings.

The Commission consolidated this investigation with another investigation it previously had instituted, involving similar claims of patent infringement (but no claim of misappropriation of trade se-

crets) made by the other major American manufacturer and seller of skinless sausage casings, Teepak, Inc. (Teepak). No issues relating to the Teepak investigation are involved in the case before us.

In its opinion, the Commission stated that the

> general manufacturing process for skinless sausage casings as practiced by each of the parties to these investigations involves three distinct manufacturing operations: (1) chemical preparation, which involves the manufacture of viscose from natural cellulose fibers; (2) simultaneous regeneration of the cellulose and continuous formation of accurately-sized cellulose tubes in extrusion machines, including drying the extruded casing under carefully controlled conditions and winding it onto reels of semi-finished material called "flat stock;" and (3) shirring, which is a finishing operation during which lengths of flat stock are finely pleated and compressed into short, self-supporting, tubular sticks. [Footnote omitted.]

The Commission further stated:

> Meatpackers use skinless sausage casings to make sausage products by sliding a stick of shirred casing over the stuffing tube or horn of a sausage stuffing machine and pumping a meat emulsion into the stick as it de-shirrs, or extends. The meat-filled casing is twisted at intervals to define individual sausages or links. The long chain of links produced is cooked, after which the casing is normally removed, and the resulting product is sold as "skinless" sausages or frankfurters. [Footnote omitted.]

Following a hearing, the administrative law judge in July 1984 rendered a 363-page initial decision holding that Viscofan had violated section 337 and 19 U.S.C. § 1337a by (1) infringing a valid patent owned by Teepak, and (2) misappropriating Carbide's trade secrets. He determined that Viscofan had misappropriated six of those trade secrets.

The Commission stated:

> The ALJ found all the other elements of a violation of section 337 to exist in each investigation. The ALJ also determined that respondent Viscofan had failed to prove its affirmative defenses of patent misuse and unclean hands, wherein it alleged that complainants Teepak and Union Carbide had conspired to monopolize the manufacture of skinless sausage casings in the United States by means of illegal patent pooling, cross-licensing, price-fixing, and predatory behavior.

The Commission declined to review the initial decision, which thereby became the agency's final decision. The Commission then considered the relief stage of the proceedings and received submissions on the relief and public interest aspects of the case from the parties and others.

The Commission's final order, which became effective in January 1985, excluded "from entry into the United States for the remain-

ing term of the patent" "[s]mall caliber sausage casings manufactured abroad in accordance with the process disclosed" in the Teepak patent. It provided that persons desiring to import such casings "may petition the Commission to institute" further proceedings to determine whether the casings sought to be imported fell within the bar of the preceding paragraph.

Paragraph 3 of the Commission's order, the validity of which is a major issue before us, "excluded from entry into the United States for * * * ten (10) years from the date of this order" "[s]mall caliber cellulose sausage casings manufactured by Viscofan" or any affiliated company or related business entity.

The Commission explained at considerable length the reasons that led it to adopt paragraph 3, which we discuss in some detail in part II, *infra*. Here we merely summarize the Commission's reasoning.

The Commission rejected Viscofan's contention that "a cease and desist order is the only appropriate remedy in a trade secrets investigation * * *." It stated that because there was no way in which it could determine from the finished casings whether they had been manufactured by processes using the misappropriated trade secrets, and because it could not police Viscofan's manufacturing operations in Spain to determine whether the misappropriated secrets were being used, an exclusion order was "the only remedy that promises to be reasonably effective."

In setting the period of exclusion at 10 years, the Commission stated that the normal period of relief in a trade secrets misappropriation case is the time it would take the misappropriator "independently to develop the technology using lawful means." It rejected Viscofan's contention that the proper basis for ascertaining that period was the time it would have taken Viscofan to discover each trade secret separately, because "this approach ignores the interrelationships between and among the trade secrets and technology involved" and the fact that Viscofan had misappropriated six such interrelated trade secrets. The Commission concluded that it should "consider a single independent development time" for the six misappropriated trade secrets together. On the basis of the evidence Carbide submitted and Carbide's arguments regarding the time necessary independently to develop an integrated manufacturing process without the benefit of the six misappropriated trade secrets, the Commission concluded that its "remedial order should apply for a period of ten years."

Finally, the Commission concluded that the 10-year period of exclusion should run from the date of its order rather than, as Viscofan argued, from the date of the misappropriation of the trade secrets. It stated: "The facts of this investigation, particularly the fact that the misappropriation involved an actual theft of trade secrets, support the conclusion that Viscofan should not be credited

with the time between the misappropriation and the entry of the Commission's remedial order."

B. During the Commission proceedings, Carbide submitted to the Commission certain material relating to the circumstances surrounding the misappropriation of its trade secrets. This material was submitted as "confidential business information" pursuant to a protective order of the administrative law judge that provided for confidential treatment of such information.

Later in the proceedings Viscofan moved to redesignate this material as nonconfidential and thus make it a part of the public record in the case. Viscofan stated that it wanted to use this information in connection with a foreign court proceeding. The administrative law judge denied the motion.

Although the Commission denied review of the administrative law judge's initial decision, it granted review of his denial of Viscofan's motion to redesignate the material as nonconfidential. The Commission affirmed the administrative law judge's ruling. It stated that "[t]he proper standard of review on this issue is whether the ALJ abused his discretion in denying respondent Viscofan's motion" and concluded that "[t]he ALJ's decision was reasonable and not an abuse of discretion * * *."

The Commission stated: "Evidence in a section 337 investigation is gathered solely for the purposes of that proceeding. The statute and rules do not provide any support for the notion that information should be declassified because it is sought for use in a foreign court proceeding." It pointed out that the material involved " 'expenditures' of Union Carbide, and thus qualify as confidential business information within the literal terms of the rules and ALJ's protective order. Nothing in rule 201.6 as it existed when the protective order in this investigation issued, and the subject information was produced, limited the type of 'expenditure' which would qualify as confidential."

II

Section 337 requires the Commission, upon determining a violation of the section, either to "direct that the articles concerned, imported by any person violating the provision of this section, be excluded from entry into the United States" (subsection (d)) or to direct any person violating the section "to cease and desist from engaging in the unfair methods or acts involved, unless after considering the effect of such order upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such order should not be issued." (Subsection (f)(1)).

Under this provision the Commission has broad discretion in selecting the form, scope and extent of the remedy, and judicial review of its choice of remedy necessarily is limited. *See Canadian*

Tarpoly Co. v. *United States International Trade Commission,* 640 F.2d 1322, 1326, 209 USPQ 33, 35–36 (CCPA 1981); *Sealed Air Corp.* v. *United States International Trade Commission,* 645 F.2d 976, 989, 209 USPQ 469, 480–81 (CCPA 1981). As the Supreme Court stated in the leading case of *Jacob Siegel Co.* v. *Federal Trade Commission,* 327 U.S. 608 (1946), in words that are equally applicable to this case:

> The Commission has wide discretion in its choice of a remedy deemed adequate to cope with the unlawful practices in this area of trade and commerce. Here, as in the case of orders of other administrative agencies under comparable statutes, judicial review is limited. It extends no further than to ascertain whether the Commission made an allowable judgment in its choice of the remedy. * * * The Commission is the expert body to determine what remedy is necessary to eliminate the unfair or deceptive trade practices which have been disclosed. It has wide latitude for judgment and the courts will not interfere except where the remedy selected has no reasonable relation to the unlawful practices found to exist.

Id. at 611–13 (footnote omitted). *See also Sealed Air Corp., supra,* ("it is not the function of a court to substitute a different remedy of its own design for that chosen by the ITC, or to substitute its view of the public interest for that of the ITC"). 645 F.2d at 989 (footnote omitted).

We evaluate Viscofan's challenges to paragraph 3 of the Commission's order, in the light of these principles.

As noted, paragraph 3 excluded from entry into the United States for 10 years from the date of the order skinless sausage casings manufactured by Viscofan or an affiliated company. Viscofan contends that this provision is (A) overly broad because it is not limited to sausage casings manufactured by use of the specific trade secrets found to have been misappropriated, and (B) excessively long in duration because the 10-year period of exclusion (1) improperly was based upon the time it would have taken Viscofan independently to develop the entire sausage casing manufacturing process rather than the time it would have taken Viscofan independently to discover separately each of the misappropriated trade secrets, and (2) should have run not from the date of the Commission's order but from the date of the misappropriation.

A. 1. In rejecting Viscofan's contention that the only appropriate remedy against the misappropriation of trade secrets would be a cease and desist order barring Viscofan from importing sausage casings made by a process that utilized the particular trade secrets Viscofan had misappropriated, the Commission justifiably concluded that such an order would not effectively correct the violations found.

The Commission pointed out that "there is no means by which we can determine from the casings whether they were manufac-

tured by a process which incorporates the misappropriated trade secrets." It noted that "Viscofan has represented that it can put into operation a separate production line, which does not incorporate the misappropriated trade secrets, use only that line for U.S. production, certify each shipment, and open its plant to inspection by Commission-appointed experts to ensure that it is not using the misappropriated trade secrets." The Commission concluded, however, that this would be an unsatisfactory and impossible method for insuring compliance with a cease and desist order because

> on the record in this investigation the Commission cannot confidently base the remedy on Viscofan's assurances, and the Commission has neither the jurisdiction nor means to conduct plant inspections in Spain. Therefore, exclusion is the only remedy which promises to be reasonably effective.

Moreover, as the Commission also pointed out, Viscofan's position not only would not provide a practical, effective method for insuring that the sausage casings Viscofan imported would not be made by processes utilizing the misappropriated trade secrets, but also "ignores the interrelationships between and among the trade secrets and technology involved, as well as the ALJ's conclusion that six specific trade secrets were found to have been misappropriated * * *. The trade secret aspects are not independent of the non-trade-secret aspects of the technology involved."

Considering all the circumstances, we cannot say that the Commission had not "made an allowable judgment in its choice of the remedy" in adopting a 10-year exclusion order rather than a cease and desist order, or that "the remedy selected has no reasonable relation to the unlawful practices found to exist." *Jacob Siegel, supra*, 32 U.S. at 612-13.

Viscofan argues that in trade secret litigation, a normal remedial order bars the misappropriator from using only the particular secrets he has taken. The cases upon which it relies, however, all involved private litigation and did not implicate the important public interest considerations implicated in a Commission proceeding under section 337. In the language of the statute, that proceeding is designed to protect American industry from "[u]nfair methods of competition and unfair acts in the importation of articles into [or their sale in] the United States * * * the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States, or to prevent the establishment of such in industry, or to restrain or monopolize trade and commerce in the United States * * *.

2. Viscofan further argues that it is entitled to petition the Commission to show that sausage casings it wants to import have been made by processes that do not utilize misappropriated trade secrets. Pointing to the provision in the portion of the order excluding goods made by processes that infringe the Teepak patent that permits Viscofan to demonstrate to the Commission that particular

processes do not infringe, Viscofan apparently believes that the lack of a similar provison in the trade secrets portion of the order bars it from seeking such relief from the Commission with respect to trade secrets.

At oral agrument, however, Commission counsel stated that Viscofan could seek such relief pursuant to section 211.57 of the Commission's rule. That section provides that "[w]henever any person believes that changed conditions of fact * * * require that a final Commission action be modified or set aside, in whole or in part, such person may file with the Commission a motion requesting such relief." 19 C.F.R. § 211.57(a) (1985). Moreover, paragraph 6 of the order provides: "The Commission may amend this Order in accordance with the procedure described in section 211.57 of the Commission's Rules of Practice and Procedure (19 C.F.R. § 211.57)."

There is nothing in the Commission's order that precludes Viscofan from filing with the Commission a petition for an exception to paragraph 3 of the order to permit Viscofan to import sausage casings manufactured by processes that do not involve or depend upon the trade secrets Viscofan misappropriated. If Viscofan can demonstrate to the Commission's satisfaction that it has developed and will continue to use manufacturing processes totally untainted by the trade secrets it misappropriated, there is no reason to think that the Commission would not permit Viscofan to import the product.

B. 1. In setting the length of the order at 10 years, the Commission correctly recognized that "the duration of relief in a case of misappropriation of trade secrets should be the period of time it would have taken respondent independently to develop the technology using lawful means." The Commission concluded that in the circumstances of this case the basis for determining the development time was the time it would have taken Viscofan to create the manufacturing processes involving the misappropriated trade secrets and not, as Viscofan urged, the time it would have required Viscofan to discover each particular trade secret independently and without regard to the total process. Here, as in the case of the Commission's decision to adopt an exclusion rather than a cease and desist order, we cannot say the Commission abused its discretion or that this aspect of the order is not supported by substantial evidence.

Viscofan misappropriated six specific trade secrets of Carbide. The Commission stated that "to issue a remedial order based on the time necessary to develop each such aspect would ignore the fact that Viscofan had the benefit of the entire machine, system, or set of standards, including non-trade-secret elements, which it had misappropriated, from which to work in developing its 'new technology.' The trade secret aspects are not independent of the non-trade-secret aspects of the technology involved." The agency justifiably concluded "to consider a single independent development time

for the six trade secrets found by the ALJ to have been misappropriated."

There was conflicting evidence regarding the time it would have required Viscofan independently to develop its own technology without the benefit of the misappropriated trade secrets. Viscofan's witnesses viewed the independent development of each of the six misappropriated trade secrets as relatively simple tasks that could have been done in a short period. Carbide, on the other hand, based upon its witnesses' testimony, suggested that "a shirring technology could be developed in between nine to twelve years, and an extrusion technology could be developed in between twelve to fifteen years."

The Commission's conclusion that it would have taken Viscofan 10 years independently to develop the technology is supported by the evidence in the record, and we have no basis for rejecting the Commission's determination that that period is the appropriate duration of the order. As the Commission explained: "To now conclude that Viscofan could have developed alternative technology for the misappropriated trade secrets in a relatively short time would be to give it the benefit of having had the misappropriated trade secrets for a period of years as a basis from which to work. We believe that this would be a wholly inequitable result."

Viscofan argues, however, that *Syntex Ophthalmics, Inc.* v. *Novicky,* 745 F.2d 1423, 223 USPQ 695 (Fed. Cir. 1984), *vacated,* 105 S.Ct. 1740 (1985), *reinstated on remand,* No. 84-838 (Fed. Cir. July 18, 1985), compels a different conclusion. In *Syntex,* this court stated that under governing Illinois law, "an injunction in a trade secret case must be limited to the appropriate length of time necessary for the defendant to duplicate the trade secret by lawful means." 745 F.2d at 1435, 223 USPQ at 704 (citations omitted). That is substantially the same standard the Commission applied here. *Syntex* was a private suit, and the opinion there did not address the question here, which is whether the necessary development time was that required to develop the complete processes in which the misappropriated trade secrets were used rather than the time necessary to discover each trade secret independently.

In *Syntex,* the court significantly reduced the duration of the 20-year injunction the district court entered. It did so, however, because it concluded that the only evidence upon which the district court based that injunction—testimony that more than 20 man-years were spent developing the misappropriated trade secret—was insufficient to support the injunction, primarily because the 20 man-years actually had been expended by several people during only two years. *Syntex* does not support Viscofan's position that the duration of the exclusion order should be based upon the time required to develop each trade secret separately.

2. Viscofan further contends that even if a 10-year order is appropriate, its starting date should have been the date of the misap-

propriation, which Viscofan contends was not later than January 1979, rather than the date on which the Commission's order became final in January 1985. Viscofan relies again on *Syntex*, this time on the holding there that the maximum permissible duration of the injunction was eight years from the misappropriation or four years from the preliminary injunction.

In determining that the 10-year exclusion should run from the date of the Commission's order, the Commission pointed out that in its only previous ruling on this issue, the period of exclusion had so run. *In re Certain Apparatus for the Continuous Production of Copper Rod*, 206 USPQ 138 (U.S.I.T.C. 1979). The Commission concluded: "The facts of this investigation, particularly the fact that the misappropriation involved an actual theft of trade secrets, support the conclusion that Viscofan should not be credited with the time between the misappropriation and the entry of the Commission's remedial order."

The appropriate starting date for an exclusion order based upon misappropriation of trade secrets necessarily depends on the facts of the particular case. In *Syntex* the district court's injunction ran for 20 years from the date of misappropriation. The fact that this court, in reducing the length of the injunction in *Syntex*, indicated that the maximum permissible injunction would be eight years from misappropriation (or four years from the date of the preliminary injunction), does not establish that the Commission abused its discretion in this case in making the effective date of its 10-year exclusion the date of its order.

III

Viscofan challenges the Commission's affirmance of the administrative law judge's refusal to declassify certain material relating to the misappropriation of the trade secrets that had been submitted to the Commission as confidential business records pursuant to a protective order of the administrative law judge. We do not reach the merits of that issue, since we agree with the Commission that we have no jurisdiction to review the refusal to declassify as part of this review proceeding.

Under 28 U.S.C. § 1295(a)(6) (1982), this court has exclusive jurisdiction

> to review the final determinations of the United States International Trade Commission relating to unfair practices in import trade, made under section 337 of the Tariff Act of 1930 * * *.

Congress has specifically defined the "final determinations * * * under section 337 * * *" which this court may review:

> Any person adversely affected by a final determination of the Commission under subsection (d), (e), or (f) of this section may appeal such determination to the United States Court of Appeals for the Federal Circuit * * *

19 U.S.C. § 1337(c) (1982). Commission determinations under subsections (d), (e), and (f) are those excluding articles from entry, excluding articles from entry during an investigation except under bond, and cease and desist orders, respectively. The Commission's refusal to declassify the confidential material, however, was not "a determination" under any of those subsections.

The refusal to declassify was unrelated to the propriety of the exclusion order, which we have jurisdiction to review under subsection (d). An affirmance or reversal of the refusal to declassify would not and could not in any way affect the validity of the exclusion order. Viscofan does not contend to the contrary. It sought to make the confidential information public only because it wanted to use it in a foreign court proceeding, and not because a favorable ruling on that issue would aid its challenge to the exclusion order. The Commission's refusal to declassify the confidential business information is not ancillary to our review of Viscofan's challenges to paragraph 3 of the Commission's order. *Cf. Refractarios Monterrey, S.A.* v. *Ferro Corp.*, 606 F.2d 966, 203 USPQ 568 (CCPA 1979), *cert. denied*, 445 U.S. 943, 205 USPQ 488 (1980. *Duracell, Inc.* v. *United States International Trade Commission*, —— F.2d ——, 228 USPQ 187 (Fed. Cir. 1985).

We express no view on what court, if any, would have jurisdiction to review the Commission's refusal to declassify. We hold only that under our narrow jurisdiction to review Commission determinations, we do not have that authority.

Conclusion

Paragraph 3 of the Commission's order is affirmed. Insofar as the petition to review challenges the Commission's refusal to declassify confidential material, it is dismissed.

UNITED STEELWORKERS OF AMERICA AND ITS LOCALS 68, 7508, AND 196, PLAINTIFFS *v.* RAYMOND J. DONOVAN, SECRETARY OF LABOR, DEFENDANT

Court No. 83-7-00944

Before RE, *Chief Judge.*

ON PLAINTIFFS' MOTION FOR REVIEW OF ADMINISTRATIVE DETERMINATION UPON AGENCY RECORD

Plaintiffs, on behalf of former employees of Duval Corporation, challenge the Secretary of Labor's denial of certification of eligibility for benefits under the trade adjustment assistance program.

Held: The Secretary's determination that increases of imports did not contribute importantly to the workers' separation from employment is not supported by substantial evidence contained in the record, and is not in accordance with law. Hence, the determination of the Secretary is vacated, and the case is remanded.

[Administrative determination of the Secretary of Labor denying certification of worker adjustment assistance benefits vacated; case remanded.]

(Dated March 12, 1986)

Bredhoff & Kaiser (*James D. Holzhauer,* on the motion), for the plaintiffs.

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch (*Sheila N. Ziff,* on the motion), for the defendant.

RE, *Chief Judge:* In this action, plaintiffs, on behalf of former employees of the Duval Corporation, seek review of a final determination by the Secretary of Labor which denied certification of eligibility for benefits under the worker adjustment assistance program of the Trade Act of 1974, tit. II, §§ 221-249, 284, 19 U.S.C. §§ 2271-2321, 2395 (1982 & Supp. I 1983). Specifically, the Secretary found that the workers were not eligible for assistance because increases of imports did not contribute importantly to their separation from employment.

After reviewing the administrative record and the arguments of the parties, the Court holds that the determination of the Secretary is not supported by substantial evidence, and is not in accord-

ance with law. Therefore, the case is remanded to the Secretary for further consideration not inconsistent with this opinion.

On July 6, 1982, July 28, 1982, and August 5, 1982, plaintiffs, on behalf of employees at three mining operations of Duval Corporation, filed petitions for certification of eligibility to apply for trade adjustment assistance benefits. Pursuant to section 221(a) of the Trade Act of 1974, 19 U.S.C. § 2271(a), the Office of Trade Adjustment Assistance (OTAA) of the Department of Labor [1] published notices in the Federal Register stating that it had received the petitions and had instituted an investigation into their validity. 47 Fed. Reg. 31,450, 36,484 (1982).

Section 222 of the Trade Act requires the Secretary to certify a group of workers as eligible to apply for trade adjustment assistance benefits if it is determined:

> (1) that a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,
>
> (2) that sales or production, or both, of such firm or subdivision have decreased absolutely, and
>
> (3) that increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

Trade Act of 1974 § 222, 19 U.S.C. § 2272 (Supp. I 1983).

Plaintiffs contend that increased imports of copper contributed importantly to the decline of sales and production by Duval Corporation, and to the workers' separation from employment. The Secretary denied plaintiffs' petition on the grounds that it failed to satisfy the increased imports requirement of section 222. 19 U.S.C. § 2272(c).

The Secretary of Labor's Determination

The OTAA's investigation disclosed that Duval Corporation, a wholly owned subsidiary of Pennzoil Company, owns three mines in Arizona, which are known as Mineral Park, Sierrita, and Esperanza. On December 15, 1981, all three operations ceased production, and approximately 2,000 workers were separated from employment. Some workers were retained at each site and, on April 1, 1982, the Sierrita Mine resumed production at 40 percent of capacity.

The workers at all three mines were found to be engaged in both the mining of copper ore and the production of copper concentrate. Copper ore, concentrate, precipitate, and matte, are types of copper

[1] The Director of the Office of Trade Adjustment Assistance has been delegated the responsibility for investigating adjustment assistance eligibility. 29 CFR § 90.2 (1985).

which are smelted or converted into blister copper. The record shows that statistics for the domestic production of copper ore, concentrate, precipitate, and matte are grouped under the heading "copper ore." Statistics are also provided for the later stages of processing, under the headings blister copper and refined copper. Most blister copper is cast into copper anodes for electrolytic refining. Refined copper is cast into wirebar, ingot, or other shapes for later fabrication. Duval processed between 20 and 25 percent of its copper concentrate into blister copper. All of the blister copper and the remainder of the copper concentrate produced by Duval was refined by outside companies on a toll basis.

The OTAA performed a trade and industry analysis to ascertain the effect of imports on the domestic copper industry. The investigation disclosed that imports of copper ore in 1980 increased 70.6 percent over 1979. In 1981, imports of copper ore decreased 20.6 percent to a level representing 2.7 percent of domestic production. During the first three quarters of 1982, imports of copper ore increased 338.5 percent. Imports of blister copper decreased 70.3 percent in 1979, from a 5-year high attained in 1978. In 1980, however, imports rose 88.8 percent. Imports of blister copper decreased in 1981 by 35.5 percent, and increased by 229.2 percent in 1982. The investigation also disclosed that imports of refined copper increased 107 percent in 1980 from 1979. Imports of refined copper declined by 21.8 percent in 1981 and 23.7 percent in 1982. The Secretary noted that an industry-wide strike of mine workers affected the total level of copper imports in 1980.

Based on these findings, the Secretary concluded that the workers should be denied certification because, "U.S. imports of refined copper declined both absolutely and relative to domestic production in 1981 compared to 1980 and in the January through September 1982 period compared to the same period in 1981." *See* 48 Fed. Reg. 12,006 (1983).

Thereafter, plaintiffs applied for reconsideration of the administrative determination. On April 25, 1983, the Secretary issued a notice of negative determination in response to plaintiffs' application. 48 Fed. Reg. 28,524 (1983). Subsequently, plaintiffs commenced this action seeking judicial review of the Secretary's final negative determination.

On April 30, 1984, the Court granted the Secretary's motion for a voluntary remand in order to allow the Secretary to supplement the record with a survey of Duval's customers. After reconsideration, on June 29, 1984, the Secretary issued a "further determination," which stated that the "[r]esults of the customer survey [confirmed] the Department's original determination that imports did not contribute importantly to * * * worker separations at the Duval Corporation in 1982." Plaintiffs then requested this Court to set aside the Secretary's determination.

Discussion

Section 284 of the Trade Act of 1974 empowers the Court of International Trade to review a determination by the Secretary of Labor that denies certification of eligibility for adjustment assistance to assure that the determination is supported by substantial evidence and is in accordance with law. 19 U.S.C. § 2395(c); *see Woodrum* v. *Donovan*, 5 CIT 191, 193, 564 F. Supp. 826, 828 (1983), *aff'd*, 737 F.2d 1575 (Fed. Cir. 1984). The findings of fact by the Secretary are conclusive if supported by substantial evidence. Trade Act of 1974, § 284(b), 19 U.S.C. § 2395(b) (1982). Moreover, "the rulings made on the basis of those findings [must] be in accordance with the statute and not be arbitrary or capricious, and for this purpose the law requires a showing of reasoned analysis." *International Union* v. *Marshall*, 584 F.2d 390, 396 n.26 (D.C. Cir. 1978), *quoted in ILWU Local 142* v. *Donovan*, 9 CIT ——, Slip Op. 85–127, at 9 (Dec. 11, 1985); *see* 19 U.S.C. § 2273(c).

The plaintiffs urge that the Secretary's negative determination of eligibility should be set aside. First, they contend that the Secretary improperly used 1982 as a comparison year, because the workers were separated from employment in 1981, not 1982. Second, plaintiffs allege that it was improper for the Secretary to consider import statistics for the third quarter of 1982, a time period subsequent to the separation of the workers. Third, they maintain that the Secretary "erred as a matter of law in limiting his focus to refined copper," and that the Secretary should also have considered imports of copper ore and blister copper. The plaintiffs also contend, for the same reasons, that the consumer survey conducted by the Secretary did not accurately reflect the effect of imports on Duval's sales.

It is well established that, in the absence of a valid reason to consider a different time period, the Secretary determines whether there has been an increase of imports by a comparison of the year of separation with the immediate preceding year. *See, e.g., Paden* v. *United States Dep't of Labor*, 562 F.2d 470, 473 (7th Cir. 1977); *Katunich* v. *Donovan*, 8 CIT 157, 594 F. Supp. 744, 752 (1984). In this case, the Secretary found that there were "major layoffs" in both 1981 and 1982, and, therefore, 1982 was a base year for comparison. Plaintiffs contend that, since a significant number of workers were separated from employment in 1981, by using 1982 as a base year, the Secretary has considered an irrelevant and erroneous time period. Thus, the question presented in this case is whether the Secretary's finding that 1982, in addition to 1981, is a year of separation is supported by substantial evidence in the record, and is in accordance with law.

The Secretary found that, at all three mines, major layoffs occurred in December 1981 and March, May, June, and July 1982. Duval separated approximately 2,000 workers, over 68 percent of its total work force, when the mines ceased production in Decem-

ber 1981. This represented an 88 percent decline in the average number of workers employed at the Mineral Park mines, a 54 percent decline at the Sierrita mine, and an 83 percent decline at the Esperanza mine. Although additional separations occurred in 1982, the number of workers affected was significantly less than in 1981. Plaintiffs contend that since the significant majority of workers were separated from employment in 1981, the Secretary should not have considered whether imports increased in 1982.

The Secretary has promulgated regulations which provide definitions relating to trade adjustments petitions. These regulations provide, in part:

> "Layoff" means a suspension from pay status for lack of work initiated by the employer and expected to last for no less than seven (7) consecutive calendar days * * *.
>
> "Significant number or proportion of the workers" means that:
>
> (a) In most cases the total or partial separations, or both, in a firm . . . are the equivalent to a total unemployment of five percent (5 percent) of the workers or 50 workers, whichever is less * * *.

29 C.F.R. § 90.2 (1985).

Surely, the 2,000 workers who were separated in December 1981 and who filed for adjustment assistance constitute a "significant number or proportion of the workers," as that phrase is defined by the Secretary. *See* 29 C.F.R. § 90.2 (1985). However, the record shows that the workers separated in 1982 also constitute a significant number of workers. From the record, the Court can reasonably discern that the Secretary's determination was based on an analysis of both 1981 and 1982. The workers were denied certification because the Secretary found that imports declined in both 1981 and 1982. On these facts the Court cannot say that the Secretary's choice "is not the product of a reasoned analysis evident in the administrative record." *See International Union* v. *Marshall,* 584 F.2d 390, 396 (D.C. Cir. 1978). Hence, in view of the regulations promulgated by the Secretary, and the evidence contained in the record, the Court holds that the Secretary's decision to use 1982 as a base year is supported by substantial evidence in the record, and is in accordance with law.

Plaintiffs also contend that the Secretary should not have considered import statistics for the third quarter of 1982. Plaintiffs claim that this data is irrelevant to their petition because it relates to a time period subsequent to the workers' separation from employment. In addition, plaintiffs contend that the Secretary's reliance on these statistics is inconsistent with his certification of similarly situated mine workers at Kennecott Minerals Company, who were also represented by the United Steelworkers Union. The Secretary explained that the Duval workers were denied certification because data for the third quarter of 1982 became available, and the Ken-

necott investigation was based on data for the first 6 months of 1982. *See* 48 Fed. Reg. at 28,524. The Secretary did not explain, however, how the decline in imports *subsequent* to the Duval workers' separation was "likely to affect employment in the year of separation." *Paden,* 562 F.2d at 473. Hence, the Court holds that the case must be remanded so that the Secretary may articulate with reasonable clarity his reasons for considering imports after the separation of the workers. *See UAW* v. *Marshall,* 584 F.2d 390, 397 (D.C. Cir. 1978); *Greater Boston Television Corp.* v. *FCC,* 444 F.2d 841, 851 (D.C. Cir. 1970), *cert. denied,* 403 U.S. 923 (1971); *see also Camp* v. *Pitts,* 411 U.S. 138, 143 (1973) (court may require additional explanation of reasons for agency decision).

Plaintiffs also contend that the Secretary improperly restricted his focus to imports of refined copper. The Secretary, however, determined that "the proper focus of competitive impact" should be on refined copper, since that was the product most "like or directly competitive with" the articles produced by Duval.

In *United Shoe Workers* v. *Bedell,* 506 F.2d 174 (D.C. Cir. 1974), the United States Court of Appeals for the District of Columbia Circuit held that component parts of an article are not "like" the imported articles which incorporate them. *Id.* at 177-78. The court also noted that the parties did not contend that the term "directly competitive" applied to the domestic manufacturer of component parts. *Id.* at 178 n.13. Moreover, the *United Shoe Workers* court recognized that the terms "like" and "directly competitive" are not synonymous or explanatory of one another. *Id.* at 186 n.77; *see* S. Rep. No. 1298, 93d Cong., 2d Sess. 121, *reprinted in* 1974 U.S. Code Cong. & Ad. News 7186, 7265. The court distinguished the term "like" from the term "directly competitive" by noting that "many products can be directly competitive without having identical or nearly identical physical characteristics." 506 F.2d at 185.

In the *United Shoe Workers* case, the court stated that Congress had "expressly redefined 'directly competitive' in the Trade Expansion Act to cover items that were in different stages of processing." 506 F.2d at 186; *see* Trade Expansion Act of 1962 § 405(4), 19 U.S.C. § 1806(4) (1970) (current version at 19 U.S.C. § 2481(5)). The legislative history of the Trade Act of 1974 indicates that the term "like or directly competitive" was used in the same context as in the Trade Expansion Act of 1962. S. Rep. No. 1298, 93d Cong., 2d Sess. 121, *reprinted in* 1974 U.S. Code Cong. & Ad. News 7186, 7265; *see Morristown Magnavox Former Employees* v. *Marshall,* 671 F.2d 194, 198 (6th Cir.), *cert. denied sub nom.* 459 U.S. 1041 (1982). The statutory definition of "directly competive' provides:

> (5) An imported article is "directly competitive with" a domestic article at an earlier or later stage of processing, and a domestic article is "directly competitive with" an imported article at an earlier or later stage of processing, if the importation of the article has an economic effect on producers of the

> domestic article comparable to the effect of importation of articles in the same stage of processing as the domestic article. For purposes of this paragraph, the unprocessed article is at an earlier stage of processing.

19 U.S.C. § 2481(5) (1982); *see* 29 C.F.R. § 90.2 (1985).

The legislative history to the Trade Expansion Act provides examples of the expanded definition of directly competitive:

> Under this provision, an imported article may be considered "directly competitive with" a domestic article * * * if the one is at an earlier or later stage of processing than the other, or if one is a processed and the other an unprocessed form of the same article, and if the economic effect of importation of articles is in the same stage of processing as the domestic article.
>
> The term "earlier or later stage of processing" contemplates that the article remains substantially the same during such stages of processing, and is not wholly transformed into a different article. Thus, for example, zinc oxide would be zinc ore in a later stage of processing since it can be processed directly from zinc ore. For the same reason, a raw cherry would be a glace cherry in an earlier stage of processing, and the same is true of a live lamb and dressed lamb meat * * *.

H.R. Rep. No. 1818, 87th Cong., 2d Sess. 24 (1962); *see United Shoe Workers*, 506 F.2d at 186 n.80.

Thus, in the context of petitions filed by workers who mine ore, it is appropriate for the Secretary to consider the effects of imported ore or "the more refined imported product." *See* Bratt, *Issues in Worker Certification and Questions of Future Direction in the Trade Adjustment Assistance Program*, 14 Law & Pol'y Int'l Bus. 819, 848 (1982). The cases cited by the defendant in support of the Secretary's determination are inapposite because they all involve component parts rather than articles in earlier or later stages of processing.

In this case, the Secretary limited his focus to imports of refined copper because "neither copper ore nor copper concentrate was marketed to outside customers." 48 Fed. Reg. 28,524 (1983). The statute, however, contemplates that imported articles which are not "like" the product produced by the domestic firm may nevertheless be "directly competitive with" domestic articles. Indeed, plaintiffs contend that there is "considerable cross-elasticity of demand between refined copper and other forms of copper." By focusing only on the product ultimately marketed by the workers' firm, the Secretary has, in effect, limited the scope of the statutorily defined words "directly competitive." Hence, the Court holds that the Secretary has improperly restricted his focus to articles marketed by Duval, rather than articles like or directly competitive with articles produced by Duval. Therefore, the Secretary's determination is not in accordance with law, and is vacated.

Conclusion

In light of the facts contained in the administrative record, the statute, and relevant case law, it is the holding of the Court that the Secretary of Labor's denial of certification is not supported by substantial evidence, and is not in accordance with law.

Accordingly, the determination of the Secretary of Labor is vacated, and the case is remanded to the Secretary for a redetermination of the certification of eligibility for adjustment assistance. Since the Secretary may wish to take additional evidence on matters which relate to the workers' petition, the Court notes that "the Secretary's latitude on remand extends to the full scope of his function under the Act. It is within his discretion to make a new determination, with new findings and reasons." *International Union* v. *Marshall,* 584 F.2d 390, 396 (D.C. Cir. 1978). Finally, it is ordered that the Secretary shall certify the record and report to the Court the results of the further proceedings within 60 days from the date of the entry of this opinion and order.

(Slip Op. 86–27)

NISSHO-IWAI AMERICAN CORP., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 80–4–00637

Before RE, *Chief Judge.*

MEMORANDUM OPINION AND ORDER

Bridge Sections

[Judgment for the defendant.]

(Decided March 12, 1986)

Stein Shostak Shostak & O'Hara (James F. O'Hara), for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commerical Litigation Branch *(Barbara M. Epstein),* for the defendant.

RE, *Chief Judge:* The question presented in this case pertains to the proper classification, for customs duty purposes, of certain parts and accessories of unassembled bridges or bridge sections imported from Japan.

The merchandise was entered at the port of Anchorage, Alaska, and was classified by the Customs Service under item 652.98 of the Tariff Schedules of the United States (TSUS), a "basket" provision for bridges, bridge sections, and other structures and parts of structures of base metal. Hence, the merchandise was assessed with duty of 9.5 per centum ad valorem.

Plaintiff protests this classification, and contends that the merchandise is properly classifiable under item 652.96, TSUS, as "columns, pillars, posts, beams, girders and similar structural units," made in part of alloy iron or steel, dutiable at 5.5 per centum ad valorem.

Since resolution of the classification issue requires analysis of the tariff items relating to the superior heading, it is helpful to set forth the tariff provisions relating to these base metal structures as of the date of importation:

Schedule 6, Part 3, Subpart F:

Hangars and other buildings, bridges, bridge sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, door and window frames, shutters, balustrades, columns, pillars, and posts, and other structures and parts of structures, all the foregoing of base metal:

	Of iron or steel:	
	Door and window frames:	
* * * * * * *		
	Columns, pillars, posts, beams, girders, and similar structural units:	
	Not in part of alloy iron or steel:	
* * * * * * *		
	In part of alloy iron or steel:	
652.95	In part of stainless steel.....	6% ad val.
652.96	Other	5.5% ad val.
652.98	Other	9.5% ad val.

As noted, plaintiff contends that the imported merchandise is classifiable under item 652.96, with duty at 5.5% ad valorem, whereas Customs has classified the merchandise under item 652.98, with duty at 9.5% ad valorem.

The question presented, therefore, is whether, within the meaning of the competing tariff provisions, the imported merchandise is classifiable under item 652.98, the provision covering bridges, bridge sections, structures and parts of structures of base metal, as classified by Customs, or under item 652.96, the provision encompassing "Columns, pillars, posts, beams, girders, and similar structural units," in part of alloy iron or steel, as claimed by plaintiff. In order to decide this question, the court must consider "whether the government's classification is correct, both independently and in comparison with the importer's alternative." *Jarvis Clark Co.* v. *United States*, 733 F.2d 873, 878, *reh'g denied*, 739 F.2d 628 (Fed. Cir. 1984); *E.R. Hawthorne & Co.* v. *United States*, 730 F.2d 1490, 1490 (Fed Cir. 1984).

The parties have agreed to a stipulation of the facts, and each has moved for summary judgment pursuant to Rule 56 of the Rules

of the Court. Since there is no issue as to any material fact, the case may properly be decided on the parties' cross-motions for summary judgement. *See B&E Sales Co.* v. *United States,* 9 CIT ——, Slip Op. 85–22, at 5 (Feb. 28, 1985); *C.J. Tower & Sons of Buffalo, Inc.* v. *United States,* 68 Cust. Ct. 17, 22, C.D. 4327, 336 F. Supp. 1395, 1399 (1972), *aff'd,* 61 CCPA 90, C.A.D. 1129, 499 F.2d 1277 (1974).

After a careful examination of the stipulated facts, the pleadings and supporting papers, the pertinent tariff provisions, and the relevant case law, it is the determination of the Court that Customs has correctly classified the imported merchandise under item 652.98, TSUS.

The imported merchandise consists of the necessary parts and accessories of unassembled bridges or bridge sections, including columns, beams, girders, bolts, nuts, brackets, plates, hinges, drain boxes, railing, bridge shoes, and railing anchors. All parts and accessories are made of steel, in part of alloy. The merchandise, as imported, was ready for erection into bridge sections, and was later assembled into specific bridge sections of the Anchorage Port Access Bridge project in Anchorage, Alaska.

Plaintiff contends that the imported parts of bridge sections are "similar structural units" to "[c]olumns, pillars, posts, beams, [and] girders," within the ambit of the superior heading to item 652.96. In support of its position, plaintiff cites the canon of construction, *ejusdem generis*. The Court, however, has concluded that, since the imported merchandise is in fact more than these structural units, this guide to statutory interpretation provides no support for the plaintiff's contention that the imported merchandise is classifiable under item 652.96.

Ejusdem generis, which means literally, of the same class or kind, teaches that "where particular words of description are followed by general terms, the latter will be regarded as referring to things of a like class with those particularly described." *United States* v. *Damrak Trading Co.,* 43 CCPA 77, 79, C.A.D. 611 (1956). The doctrine of *ejusdem generis* is "a specific application or illustration of the broader maxim *noscitur a sociis,* i.e., known by its associates." *Economy Cover Corp.* v. *United States,* 76, Cust. Ct. 130, 132, C.D. 4645, 411 F. Supp. 783, 784 (1976). In *Economy Cover Corp.*, the court explained:

> In essence, *ejusdem generis* means that when general words in a statute follow a specific enumeration of persons or things, the general words are not to be construed in their widest sense of meaning, but rather are to be limited, or held to apply, only to persons or things of the same kind or class as those specifically enumerated.

Id.; see Oxford Int'l Corp. v. *United States,* 75 Cust. Ct. 58, 68, C.D. 4608 (1975); *Nomura (America) Corp.* v. *United States,* 62 Cust. Ct.

524, 530, C.D. 3820, 299 F. Supp. 535, 540 (1969), *aff'd*, 58 CCPA 82, C.A.D. 1007, 435 F.2d 1319 (1971).

As applicable to customs classification cases, *ejusdem generis* requires that the imported merchandise possess the essential characteristics or purposes that unite the articles enumerated *eo nomine* in order to be classified under the general terms. *See Economy Cover Corp., supra*, 76 Cust. Ct. at 132, 411 F. Supp. at 784-85; *Stylo Matchmakers Int'l* v. *United States*, 73 Cust. Ct. 78, 83, C.D. 4556 (1974). In order for plaintiff's classification to prevail, therefore, it must be established that the imported parts of bridge sections are structural units similar to columns, pillars, posts, beams and girders. *See United States* v. *Bruckmann*, 65 CCPA 90, 93, C.A.D. 1211, 582 F.2d 622, 625 (1978); *J. Ray McDermott & Co.* v. *United States*, 69 Cust. Ct. 197, 205, C.D. 4394, 354 F. Supp. 280, 286 (1972); *Laurence Myers Scaffolding Co.* v. *United States*, 57 Cust. Ct. 333, 339, C.D. 2809, 259 F. Supp. 874, 878 (1966).

In *Laurence Myers Scaffolding Co.* v. *United States*, 57 Cust. Ct. 333, C.D. 2809, 259 F. Supp. 874 (1966), certain bridge overhang shores, highway shores, and building shores, used to support concrete form work, were classified under item 657.20, TSUS, as other "[a]rticles of iron or steel," not specifically provided for elsewhere in the tariff schedules. The plaintiff argued that the merchandise was properly classifiable under item 652.94 as "columns, pillars, posts, beams, girders and similar structural units," not in part of alloy iron or steel. In analyzing the common meaning of columns, pillars and posts, the court noted that the one common characteristic of these terms was that they offered firm upright support to a building or structure. *Id.* at 340, 259 F. Supp. at 879. In addition, the court found that the structural members were of unitary construction. Since the building shores at issue comprised tubular uprights, fastened together by coupling pins, braced by cross bars and adjusted by stopper pins and an incorporated jack, the court found the shores were composite articles. Thus, the court held that the shores were "not similar structures to columns, pillars and posts within the common meaning of those terms but were in fact more than said designated structural units * * *." *Id.*

The decision in *J. Ray McDermott & Co.* v. *United States*, 69 Cust. Ct. 197, C.D. 4394 (1972), is in accord with this holding. At issue in *McDermott* were two steel components for an offshore oil drilling platform which were described as a "jacket section" and a "box girder." Both units were classified under item 652.98 as "[o]ther" structures or parts of structures of base metal. The plaintiff claimed that both units were properly classifiable under item 652.94 as "[c]olumns, pillars, posts, beams, girders, and similar structural units," not in part of alloy iron or steel. Analyzing each imported component separately, the court held that the "box girder" should have been classified as a "girder" under item 652.94 because it served the single function of providing vertical support

for the rig above it. The court found, however, that the platform jacket's primary function was not to provide upright support, but to protect the pipe piles from the elements. Since the unit's function was not primarily support, the court held that the imported "jacket section" could not be considered a similar structural unit to columns, pillars, and posts. 69 Cust. Ct. at 205. It is significant to note that the imported jacket, although comprised of steel, was classified under item 652.98.

Thse decisions make it clear that the terms columns, pillars, posts, beams, and girders refer to units that offer either vertical or horizontal support to a structure. Lexicographic authorities are in accord with this interpretation. For example, the Random House Dictionary of the English Language (unabr. ed. 1973) provides the following definitions:

> Column: a rigid, relatively slender, upright support, composed of relatively few pieces.

Id. at 292.

> Pillar: an upright shaft or structure * * * relatively slender in proportion to its height * * *.

Id. at 1092.

> Post: a strong piece of timber, metal, or the like, set upright as a support * * *.

Id. at 1122.

> Beam: any of various relatively long pieces of metal, wood, stone, etc., manufactured or shaped esp. for use as rigid members or parts of structures or machines
> * * * *Engineering.* A rigid member or structure supported at each end, subject to bending stresses from a direction perpendicular to its length.

Id. at 129.

> Girder: a large beam * * * for supporting masonry, joists, purlins, etc.

Id. at 598.

Pertinent definitions indicate that columns, pillars and posts provide upright support, while beams and girders provide support against stresses or forces from a direction perpendicular to their lengths. All of these units are described as relatively slender in relation to their lengths or heights.

In this case, neither party contends that the different types of units comprising the bridge sections should be classified separately. Indeed, under the doctrine of entireties, when an importer imports a set of components designed to form a saleable unit, the merchandise is classifiable as that unit. *See, e.g., Lafayette Radio Elec. Corp.* v. *United States,* 57 CCPA 62, 66, C.A.D. 977, 421 F.2d 751, 754 (1970); *United States* v. *Mannesmann Meer, Inc.,* 54 CCPA 24, 26–27,

C.A.D. 897 (1966). Since the parties have stipulated that the imported merchandise consists of all the parts necessary to construct complete bridge sections, the merchandise was properly classified together.

There is no question that some of the imported units are columns, beams, and girders. Many other components of the imported merchandise, however, such as bolts, nuts, brackets, plates, hinges, drain boxes, railing, bridge shoes, and railing anchors, cannot be considered similar structural units to columns, beams, or girders. Clearly, these other parts are different or more than the enumerated units because they serve different functions than providing support. Since they are not of the same class or kind as columns, pillars, posts, beams and girders, plaintiff is not aided by the canon of *ejusdem generis*. Moreover, a bridge or bridge section is more than a column, beam or girder. In short, although the imported parts of bridges and bridge sections may be structural units, these units, classified as an entirety, cannot be considered "similar structural units" to columns, pillars, posts, beams and girders. Hence, they were not classifiable under item 652.96, and were properly classified by Customs under item 652.98.

Plaintiff argues that the imported merchandise cannot be classified under item 652.98 because that item only covers products made of base metals other than iron or steel. This contention, however, is without merit.

The superior headings to items 652.96 and 652.98, TSUS, can best be reviewed by examining each heading individually. Since the broadest superior heading enumerates or lists "bridges," "bridge sections," and "parts" *eo nomine*, it is clear that the imported bridge sections are specifically described under this heading. This superior heading is then subdivided or broken down by the subheading "[o]f iron or steel," Under the heading, "[o]f iron or steel." are only two subordinate headings: "[d]oor and window frames," and "[c]olumns, pillars, posts, beams, girders, and similar structural units."

General Interpretive Rule 10(c)(i) of the Tariff Schedules of the United States provides: "a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby." As a matter of statutory interpretation, the Court finds that the heading "[o]f iron or steel" is limited by its two inferior headings. Therefore, the coordinate heading for "[o]ther" may include structures of iron or steel that are not covered by the inferior headings.

In its brief, plaintiff argues that these two headings, "[d]oor and window frames" and "[c]olumns * * * and similar structural units," which encompass items 652.90 through 652.96, "cover all structures and parts of structures enumerated in the superior heading which are of iron or steel, without exception." Plaintiff's Brief, at 7. Thus, according to plaintiff's reading of the statute, all of the items listed in the primary heading, such as "hangars and

other buildings, bridges, bridge sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, shutters [and] balustrades," if made of iron or steel, must be classified either as door and window frames, or as columns, pillars, posts, beams, girders, and similar structural units. Clearly, this result is untenable.

In order to avoid this anomalous or absurd result, and to effectuate the legislative intent, the two subordinate headings, "door and window frames" and "columns * * *" must be read to limit the superior heading "[o]f iron or steel." *See* General Interpretive Rule 10(c)(i). Thus, the coordinate basket provision, item 652.98, must be read to include not only structures and parts of base metal other than iron or steel, but also structures and parts of iron or steel that are not included in items 652.90 through 652.96. Since the imported bridge parts cannot be classified under item 652.96, they are properly classifiable under the basket provision, item 652.98.

It may be noted that the subsequent legislative history of these provisions of the TSUS sheds light on the question presented in this case. In July 1979, Schedule 6, Part 3, was amended by the Trade Agreements Act of 1979, Pub. L. No. 96-39, § 1107(d), 93 Stat. 313. The statute now provides, in pertinent part:

	Hangars and other buildings, bridges, bridge sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, door and window frames, shutters, balustrades, columns, pillars, and posts, and other structures and parts of structures, all the foregoing of base metal:	
	Of iron or steel:	
* * * * * * *		
	Columns, pillars, posts, beams, girders, and similar structural units:	
* * * * * * *		
	In part of alloy iron or steel:	
652.95	In part of stainless steel	4.2%
652.96	Other	3.9%
652.97	Offshore oil and natural gas drilling and production platforms	9.7%
653.00	Other	9.7%
653.01	Other	9.7%

The effect of this change was to add a basket provision for "other" under the subheading "of iron or steel." Thus, iron and steel structures not specially provided for under the other subheadings will now fall under item 653.00. The stated intent of Congress in amending the statute was to "reduce ambiguity and confusion in the use of the TSUS" without changing the rates of duty or classification of merchandise. *See* S. Rep. No. 249, 96 Cong., 1st Sess. 266, *reprinted in* 1979 U.S. CODE CONG. & AD. NEWS 381, 652. The

Report of the House Ways & Means Committee states that the "[r]earrangement of the provisions is intended to clarify and ease the classification of these articles without effecting any changes in the rates of duty." H.R. Rep. No. 317, 96th Cong., 1st Sess. 194 (1979). The Senate Finance Committee agreed that no substantive change was intended. *See* S. Rep. No. 249, 96th Cong., 1st Sess. 266, *reprinted in* 1979 U.S. CODE CONG. & AD. NEWS 381, 652.

In comparing the TSUS provisions under consideration with the current sections as amended, it is clear that the legislature intended to apply the same tariff to all bridges, bridge sections, and other structures of base metal not set forth in the subordinate headings, without regard to their steel and iron content. Under the 1979 amendment, bridge sections, in part of alloy steel, are classified under item 653.00, TSUS, and are assessed the same duty as structures of base metal other than iron and steel. This result is in accord with the Court's holding in this case.

Based upon an examination of the stipulated facts and other submissions of the parties, applicable statutory and judicial legal authority, it is the determination of the Court that the imported merchandise in issue was properly classified by Customs under item 652.98, TSUS.

Since the imported merchandise was properly classified under item 652.98 of the tariff schedules, plaintiff's protest is denied and the action is dismissed. Judgment will issue accordingly.

(Slip Op. 86-28)

ILWU LOCAL 142, PLAINTIFF *v.* RAYMOND J. DONOVAN, SECRETARY OF LABOR, UNITED STATES, DEFENDANT

Court No. 83-5-00779

Before RE, *Chief Judge.*

ON DEFENDANT'S MOTION FOR REHEARING

[Motion denied.]

(Dated March 13, 1986)

King, Nakamura & Chun-Hoon (*James A. King*), for the plaintiff.
Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch (*Sheila N. Ziff*), for the defendant.

RE, *Chief Judge:* Pursuant to Rule 59(a) of the rules of this Court, defendant has moved for a rehearing of the decision in *ILWU Local 142* v. *Donovan,* Slip Op. 85-127 (Dec. 11, 1985).

In the *ILWU Local 142* case, plaintiff, on behalf of former employees of the Puna Sugar Company, challenged the Secretary of Labor's denial of certification of eligibility for benefits under the trade adjustment assistance program, 19 U.S.C. §§ 2271-2321, 2395

(1982 & Supp. I 1983). The court held that the Secretary's determination that increases of imports did not contribute importantly to the workers' separation from employment was not supported by substantial evidence contained in the record, and was not in accordance with law. Hence, on plaintiff's motion, the court vacated the Secretary's determination, and remanded the case to the Secretary for a redetermination of eligibility for trade adjustment assistance benefits. Slip Op. 85-127, at 14.

In the present motion, defendant contends that the court failed to address several issues raised in defendant's opposition to plaintiff's motion. First, defendant contends that Puna produced refined sugar, and that under 19 U.S.C. § 2272(3) "the import-impacted article must be the commodity that is *marketed,* not the article at an intermediate processing stage prior to marketing." Second, defendant contends that increased imports of raw sugar could not have contributed to the workers' separation from employment because those imports were destined for the export market under the drawback provision of 19 U.S.C. § 1313. Defendant also contends that "the fact that *other* workers producing raw sugar at *other* companies in Hawaii were certified in 1977 is irrelevant to the pending case and cannot 'provide a precedent' for certifying the workers at Puna."

After careful review of defendant's motion, the Court holds that defendant has not satisfied the requirements for the granting of a rehearing, and the motion is denied.

The cases make clear that whether a motion for rehearing shall be granted or denied lies within the sound discretion of the court. *Oak Laminates* v. *United States,* 8 CIT 300, 601 F. Supp. 1031, *denying reh'g to* 8 CIT 176 (1984), *aff'd,* No. 85-1873, slip op. (Fed. Cir. Feb. 11, 1986); *see also Reynolds Trading Corp.* v. *United States,* 61 CCPA 57, 59, C.A.D. 1120, 496 F.2d 1228, 1230 (1974). In addition, Rule 59(a) of the rules of this Court provides that a rehearing may be granted "for any of the reasons for which rehearings have heretofore been granted in suits of equity in the courts of the United States * * *."

In *W.J. Byrnes & Co.* v. *United States,* 68 Cust. Ct. 358, C.R.D. 72-5 (1972), the appropriate grounds for the granting of a rehearing were set out as follows:

> A rehearing may be proper when there has been some error or irregularity in the trial, a serious evidentiary flaw, a discovery of important new evidence which was not available, even to the diligent party, at the time of trial, or an occurrence at trial in the nature of an accident or unpredictable surprise or unavoidable mistake which severely impaired a party's ability to adequately present its case. In short, a rehearing is a method of rectifying a significant flaw in the conduct of the original proceeding.

Id. at 358.

Defendant has failed to demonstrate any grounds that would justify the granting of its motion. Moreover, the defendant's allegations of error, in addition to being insufficient as a basis for the granting of a rehearing, are without merit.

In this case, the record disclosed that Puna Sugar Company produced raw sugar. This raw sugar was "processed into refined sugar by C & H Sugar Company, a cooperative owned by the 15 Hawaiian sugar companies." Slip Op. 85–127, at 5. C & H then marketed the refined sugar for all of the sugar companies. In its original motion for review, plaintiff argued that the "increased imports of raw short and sugar contributed importantly to the workers' separation, and that it never contended * * * that imports of refined sugar impacted adversely on the Puna workers or their employer." In opposition to plaintiff's motion, and again in this motion for rehearing, defendant contends that Puna produced refined sugar. It also contends that under the adjustment assistance program "the import-impacted article must be the commodity that is *marketed*, not an article at an intermediate processing stage prior to marketing." These contentions are without merit.

The Court of International Trade reviews a determination by the Secretary of Labor that denies certification of eligibility for adjustment assistance to assure that the determination is supported by substantial evidence and is in accordance with law. 19 U.S.C. § 2395(c); *see Woodrum* v. *Donovan*, 5 CIT 191, 193, 564 F. Supp. 826, 828 (1983), *aff'd*, 737 F.2d 1575 (Fed. Cir. 1984). The findings of fact by the Secretary are conclusive if supported by substantial evidence contained in the record. 19 U.S.C. § 2395(b).

In this motion, and in its memorandum in support of the Secretary's determination, counsel for the defendant contends that Puna did not produce refined sugar. Plaintiff's petition for adjustment assistance which was filed with the Department of Labor states that Puna produced raw sugar. In the negative determination on reconsideration of the workers' petition, the Secretary stated that "[r]aw sugar production coming from [Puna] is refined by the California and Hawaii Sugar Company (C & H) in San Francisco for consumption on the U.S. mainland." 48 Fed. Reg. 14,073 (1983). In addition, in the agency's notice which stated that it had instituted an investigation into the workers' petition, under the heading "articles produced," Puna is stated to produce "sugar cane—grow sugar—raw & molasses." 47 Fed. Reg. 12,402 (1982). Hence, it is clear that the Secretary found that Puna produced raw sugar and sent it to C & H for refining. The contention that Puna did not produce raw sugar was advanced for the first time by defendant's counsel in its memorandum in opposition to plaintiff's motion for review of the record.

Previous decisions of this court make clear that "the governing statutes contemplate a scheme of judicial review which is based on the record before the decision maker." *Sugar Workers Union* v.

Donovan, 8 CIT 350, Slip Op. 84-138, at 4-5 (Dec. 28, 1984) (construing 28 U.S.C. § 2640(c) & 19 U.S.C. § 2395); *see also Abbott* v. *Donovan*, 3 CIT 54, 55 (1982). Furthermore, it is a fundamental principle of administrative law that agency action must be upheld on the basis articulated by the agency, and not by *post hoc* rationalizations of counsel. *See, e.g., Motor Vehicle Manufacturers Ass'n* v. *State Farm Mutual Auto. Ins. Co.*, 463 U.S. 29, 43 (1983). This "simple but fundamental rule" has been stated as follows:

> [A] reviewing court, in dealing with a determination or judgment which an administrative agency alone is authorized to make, must judge the propriety of such action solely by the grounds invoked by the agency.

SEC v. *Chenery Corp.*, 332 U.S. 194, 196 (1947).

In this case, the court reviewed the Secretary's determination on the basis of the record and the Secretary's summary of decision. 19 U.S.C. § 2395(c). It cannot be doubted that the Secretary found that Puna produced raw sugar. Accordingly, in light of the facts contained in the administrative record, and the findings and reasons articulated by the Secretary, the Court must reject defendant counsel's contention that Puna produced refined sugar.

The Court also rejects defendant's contention that the Secretary may not consider articles at intermediate processing stages. Section 222 of the Trade Act requires that the Secretary determine whether "increases of imports of articles *like or directly competitive with* articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof * * *." 19 U.S.C. § 2272 (Supp. I 1983) (emphasis added).

The Act defines the words "directly competitive with" as follows:

> (5) An imported article is "directly competitive with" a domestic article at an earlier or later stage of processing, and a domestic article is "directly competitive with" an imported article at an earlier or later stage of processing, if the importation of the article has an economic effect on producers of the domestic article comparable to the effect of importation of articles in the same stage of processing as the domestic article. For purposes of this paragraph, the unprocessed article is at an earlier stage of processing.

Trade Act of 1974 § 601(5), 19 U.S.C. § 2481(5) (1982); *see also* 29 C.F.R. § 90.2 (1985).

The defendant's interpretation of the "like or directly competitive with" requirement of the Act would exclude consideration of the effect of an article at an intermediate processing stage. The Court cannot accept that interpretation because it would contradict the statutory definition of the phrase "directly competitive with," as set forth in 19 U.S.C. § 2481(5). *See United States* v. *Bedell*, 506 F.2d 174, 186 n.80 (D.C. Cir. 1974); *United Steelworkers* v. *Donovan*, 10 CIT ——, Slip Op. 86-26, at 14-16 (Mar. 12, 1986).

Defendant also contends that the increased imports or raw sugar could not have contributed to the Puna workers' separation because "most of these imports were not used for domestic consumption." The record shows that the Secretary stated that "[i]n 1981, the refined sugar equivalent of more than 25 percent of total [raw sugar] imports was exported subject to drawback procedures which allowed exporters to be refunded duties and fees paid to the government on previously imported raw sugar." 48 Fed. Reg. 14,072 (1983). The Secretary, however, did not evaluate this data, nor was its relevance explained in the notice of determination.

The only apparent reason for the inclusion of the drawback data is to explain fully the domestic export market. At no point in the record does the Secretary state or imply, as counsel contends, that this data should be evaluated under the "contributed importantly" provision of the statute. 19 U.S.C. § 2272(3).

Moreover, nothing in the record, makes clear that "increased imports did not affect the domestic price of raw sugar" because the "entire increase in exports of refined sugar absorbed almost the entire increase in imports of raw cane sugar in 1981." Indeed, the record indicates that the imports of cheap raw sugar caused the price of both raw and refined sugar to decline. The United States imported 51 percent of its sugar needs in 1981, and the import-to-production ratio for raw cane and beet sugar increased from 76 to 82.1 percent in the same year. Finally, in 1982, the President proclaimed an emergency quota program which limited the amount of raw sugar that could be imported. *See* Slip Op. 85–127, at 6.

The Secretary is directed by the statute to determine whether increases in imports "contributed importantly" to the workers' separation from employment. The record clearly reveals that imports of raw sugar increased significantly in the period prior to separation. The fact that some of these imports were later exported does not relieve the Secretary of the responsibility for assessing their original impact upon importation.

There is nothing in the record, and it seems contrary to logic, to suggest that, because these sugar products were exported after processing, the original influx of these products into the United States had no effect on the market. Indeed, it seems reasonable to suggest that, because of the drop in domestic sugar prices caused by the increase in imports, importers decided to take advantage of the drawback provisions and export their refined sugar rather than sell at the low domestic price.

Hence, since the Secretary chose not to evaluate the drawback data under the contributed importantly test of the Act, or explain the data's relevance to the workers' petition, the Court must reject counsel's explanation of the agency determination.

Defendant's final contention is that the certification of sugar workers at other plantations in Hawaii is irrelevant to the Puna workers' petition. In its judicial opinion in this case, the Court

found that "the Secretary did not sufficiently explain why the earlier 1977 certification of workers producing raw cane sugar in Hawaii did not 'provide a precedent.'" Slip Op. 85–127, at 13. Hence, the court ordered the Secretary to explain his reasons for decision. This order comports with the requirement of fairness that an agency explain the disparate treatment of similarly situated applicants. *See, e.g., ACTWU Local 1627* v. *Donovan,* 7 CIT 212, 587 F. Supp. 74, 78 (1984); *Contractors Transport Corp.* v. *United States,* 537 F.2d 1160 (4th Cir. 1976). Hence, if the agency "does not alter its decision, it should explicitly state its reasons for the apparently inconsistent treatment" of the workers. 537 F.2d at 1162; *see International Union* v. *Marshall,* 584 F.2d, 390, 397 (D.C. Cir 1978).

Therefore, after careful consideration of the arguments of the parties, the facts contained in the administrative record, and the statement of reasons provided by the Secretary, the Court holds that defendant has not demonstrated a "significant flaw" in the original proceeding, and its motion for rehearing is denied. The case is remanded to the Secretary for redetermination of the certification of eligibility. Of course, it is "within his discretion to make a new determination, with new findings and reasons." *International Union,* 584 F.2d at 398. It is ordered that the Secretary shall certify the record on remand, and report to the Court the results of the further proceedings within 30 days of the date of this opinion and order.

(Slip Op. 86–29)

KOKUSAI ELECTRIC CO. LTD., PLAINTIFF *v.* UNITED STATES, DEFENDANT, E.F. JOHNSON CO., DEFENDANT-INTERVENOR

Court Nos. 85–02–00185 and 85–02–00187

Before CARMAN, *Judge.*

[Judgment for defendant.]

(Decided March 14, 1986)

Arent, Fox, Kitner, Plotkin & Kahn (*Margaret Roggensach, Esq.,* on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch (*Wayne W. Herrington, Esq.,* on the motion), for the defendant.

Robbins, Zelle, Larson & Kaplan (*Jann L. Olsten, Esq.,* on the motion) for the defendant-intervenor.

CARMAN, *Judge:* Plantiff challenges in two separate law suits the determination of the United States Department of Commerce (Commerce), Court No. 85–02–00185, and the determination of the International Trade Commission (Commission), Court No. 85–02–00187. Since both cases arose out of the same facts and the same investi-

gation they have been combined for the purposes of discussion in this opinion.

In Court No. 85-02-00185, the Commerce case, plaintiff moves pursuant to Rule 56.1 of the Rules of this Court for judgment on the agency record, contending the determination of Commerce pursuant to an antidumping petition that cell site transceivers imported from Japan were being sold or were likely to be sold at less than fair value (LTFV), extended to dedicated subassemblies, was not supported by substantial evidence and was otherwise not in accord with the law.[1] In Court No. 85-02-00187, the Commission case, plaintiff makes a similar motion challenging the Commission's determination in the same investigation that the LTFV imports are materially injuring an industry in the United States. Defendant United States and defendant-intervenor oppose the motions in each case. The Information and Telecommunications Technologies Group of the Electronic Industries Association appeared as *amicus*. For the reasons stated below, the determinations of both Commerce and the Commission are sustained.

FACTS

Defendant-intervenor filed on December 28, 1983 with Commerce and the Commission an antidumping petition captioned "In the Matter of Cell Site Transceivers and Subassemblies Thereof From Japan." The allegations in the petition and the Request for Relief complained of dumping of cell site transceivers from Japan. The petition contained no allegations with respect to related subassemblies as such. Court Nos. 85-02-00185 and 85-02-00187 Records at Doc. 1 (hereinafter Petition). On January 25, 1984 Commerce published notice of the initiation of its investigation. The notice was styled "Cell Site Transceivers and Related Subassemblies From Japan" and indicated the investigation was to determine whether cell site transceivers and related subassemblies from Japan were being or likely to be sold in the United States at less than fair value. 49 Fed. Reg. 3100 (1984). The preliminary determination of Commerce published on June 12, 1984, captioned "Cell Site Transceivers From Japan," indicated the investigation covered cell site transceivers and related subassemblies. 49 Fed. Reg. 24,155 (1984). The notice made an affirmative preliminary determination of sales at less than fair value as to cell site transceivers and ordered suspension of their liquidation. The final determination of Commerce published October 26, 1984, again captioned "Cell Site Transceivers From Japan," reiterated that the scope of the investigation included cell site transceivers and related subassemblies. 49 Fed. Reg.

[1] Cell site transceivers and related subassemblies are part of radio frequency (RF) equipment in the base station (cell site) of a cellular radio communication system. Apparently the RF equipment functions as a locating receiver and provides simultaneous two way voice and data communication between the base station and the subscriber's mobile phone by using different frequencies to transmit and receive. Subassemblies are an assemblage of components dedicated for use in the cell-site transceivers which were the subject of the investigation. 49 Fed. Reg. 3100, 3101 (1984).

43,080 (1984). The final determination found cell site transceivers from Japan were being sold in the United States at less than fair value. The overall weighted average margin on all sales compared was 59.94 percent. There was no separate determination pertaining to related subassemblies as such.

Subsequent to the publication of the preliminary determination of Commerce, the Commission commenced its final injury investigation by notice on July 5, 1984. 49 Fed. Reg. 27,641 (1984). In its final investigation the Commission issued questionnaires that separately identified cell site transceivers and subassemblies. Plaintiffs argued before the Commission that subassemblies should be excluded from its investigation or alternatively the Commission should make a negative injury determination in regard to importation of subassemblies, contending Commerce made no determination that subassemblies were being sold at less than fair value. Court No. 85-02-00185, Plaintiff's brief 9.

On November 27, 1984 staff members of the Commission questioned by phone the staff of Commerce to ascertain whether or not "related assemblies" of cell site transceivers were included within the investigation and final determination of Commerce. Commerce advised that the omission of subassemblies from the suspension of liquidation section of each of the notices in the Federal Register was in error and further indicated that import administration had contacted Customs to clarify that liquidation of entries from Japan of any subassemblies in question should be suspended and the duty for cell site transceivers should apply to subassemblies as well. Letter from Deputy Assistant Secretary for Import Administration, Commerce to Chairwoman Paula Stern, International Trade Commission, Pub. Doc. 143. (Exhibit 13, chronology of documents requested by Court at Oral Argument.)

In December 1984 the Commission published its determination in a report entitled "Cell-Site Transceivers and Subassemblies Thereof From Japan." U.S.I.T.C. Public. 1618, Investigation No. 731-TA-163 (Final) (1984). On January 3, 1985 Commerce published an antidumping duty order covering both cell site transceivers and related subassemblies. 50 Fed. Reg. 307 (1985).

As to Commerce's determination, plaintiff maintains that Commerce should not have included subassemblies in its final antidumping order on the following grounds:

1. The petition contained no allegations with respect to subassemblies and failed to request relief from subassembly imports, and Commerce improperly initiated its investigation covering cell site transceivers and related subassemblies.
2. Commerce did not make a final determination that subassemblies were the same class or kind of merchandise as cell site transceivers.
3. Commerce did not have legal authority to issue a final antidumping order that expanded the final determination to include subassemblies with cell site transceivers.

4. The record did not support a determination of sales at less than fair value with respect to subassemblies since the record established there were no sales of subassemblies during the period of investigation.
5. Plaintiff should not be barred by the doctrine of laches from asserting that subassemblies should not have been included in the final antidumping order because plaintiff acted in a timely manner and defendant-intervenor suffered no injury.

Defendant argues that since cell site transceivers and related subassemblies thereof were consistently defined as "one class or kind" of merchandise throughout the investigation, Commerce was not required to make a separate determination of less than fair value as to subassemblies for them to be covered by the final determination and antidumping orders. Defendant contends further that plaintiff is barred from challenging the inclusion of the subassemblies in the class or kind of merchandise because it failed to exhaust its administrative remedies by failing to raise the issue before Commerce during the investigation. Defendant-intervenor and the *amicus* support defendant's contentions.

As to the Commission's determination, plaintiff also maintains that the Commission should not have included subassemblies in its final injury determination on the following grounds:

1. Subassemblies were not properly included in the Commission's final investigation because Commerce made a determination of LTFV sales only with respect to cell site transceivers and not with respect to subassemblies.
2. The Commission's final determination of injury is not supported by substantial evidence on the record.
3. The doctrine of laches is inapplicable since plaintiff asserted its claim in a timely fashion and defendant-intervenor suffered no harm.

Defendant argues that Commerce's determination of LTFV sales included both cell site transceivers and subassemblies, and that the Commission properly considered subassemblies.

OPINION

I. *The Commerce Determination*

Antidumping duties are to be imposed if Commerce determines that:

> a class or kind of foreign merchandise is being, or is likely to be, sold in the United States at less than its fair value and the Commission determines that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of that merchandise.

19 U.S.C. § 1673 (1982). Procedures for the initiation of antidumping proceedings are set out at 19 U.S.C. § 1673a as follows:

> (a) Initiation by administering authority.—An antidumping duty investigation shall be commenced whenever the administering authority determines, from information available to it, that a formal investigation is warranted into the question of whether the elements necessary for the imposition of a duty * * * exist.
>
> (b) Initiation by petition.—
>
> (1) Petition requirements.—An antidumping proceeding shall be commenced whenever an interested party * * * files a petition with the administering authority, on behalf of an industry which alleges the elements necessary for the imposition of the duty imposed by section 1673 of this title, and which is accompanied by information reasonably available to the petitioner supporting those allegations. The petition may be amended at such time and upon such conditions, as the administering authority and the Commission may permit.

While it might have been better practice for the petitioner to have made specific allegations in regard to "related subassemblies" in the petition, it is clear that the petition's sweeping description of cellular technology and proposed cellular systems operations in the United States, together with its description of circumstances indicating sales at less than fair value, were sufficient to cover cell site transceivers as well as their related subassemblies. Petition at 7-18). At the beginning and throughout the investigatory process Commerce treated cell site transceivers and their related subassemblies as part of the same class or kind of merchandise. The Notice of Initiation of Investigation, 49 Fed. Reg. at 3100, the Preliminary Determination, 49 Fed. Reg. at 24,155, the Final Determination, 49 Fed. Reg. at 43,081, and the Antidumping Duty Order, 50 Fed. Reg. at 307, all indicate the scope of the investigation covered "cell site transceivers and related subassemblies."

Moreover, Commerce's contacts with plaintiff during the course of the investigation indicate that the scope of the investigation included subassemblies. On March 2, 1984 Commerce sent plaintiff a request for information. The request was accompanied by a letter, which stated in part:

> We are presently conducting an antidumping investigation involving cell site transceivers and related subassemblies from Japan. The merchandise covered by this investigation is part of the radio frequency (RF) equipment in the base station (cell site) of a cellular radio communication system. This single package RF equipment functions as a locating receiver and provides simultaneous two-way voice and data communications between the base station and the subscriber's mobile telephone by using different frequencies to transmit and receive. Subassemblies are an assemblage of component parts dedicated for use in cell site transceivers as defined above. *Cell site transceivers and related subassemblies* are currently classified under item number 685.2976 of the *Tariff Schedules of the United*

States Annotated (TSUSA). For your convenience, we have enclosed a description of the applicable TSUSA items.

Court No. 85-02-00185 Record at Doc. 24 (emphasis added). The request for information sent to plaintiff covered both cell site transceivers and related subassemblies. *Id.* at Doc. 23. Plaintiff responded to the portions of the questionnaire covering subassemblies, indicating that it had not sold cell site transceiver assemblies in the United States, third countries, or Japan. *Id.* at 38, response at 5. Furthermore, since the petitioner could not obtain samples of the merchandise and since plaintiff was presumably the only one that had them, no subassemblies having been imported into the United States, there was not adequate information in regard to the related subassemblies to enable the preparers of the petition to be more specific.

In any event plaintiff was aware from the very beginning that the antidumping investigation included the related subassemblies and that they were being treated by Commerce as the same class or kind of merchandise as cell site transceivers. At no time during the course of the investigation before Commerce, to and including the publication of the final determination, did plaintiff raise any question of whether or not subassemblies were included within the scope of the investigation or dispute. The fact that plaintiff endeavored to raise the issue before the publication of the final Order was of no effect since the issuance of the final antidumping Order was a ministerial act and not the final expression of the administrative determination. *Royal Business Machines, Inc.* v. *United States,* 1 CIT 80, 86, 507 F. Supp. 1007, 1012 (1980).

Plaintiff did raise the issue of whether or not the related subassemblies were included within the scope of the investigation; not before Commerce but before the Commission, which was in the process of making its final injury determination. Plaintiff clearly could have raised the issue before Commerce during the investigation and Commerce could have examined the objection to the scope of the investigation at that time. Instead, plaintiff slept on its rights. It did not raise the question until the matter reached the Commission. Laches would prevent plaintiff from raising the issue after the final determination by Commerce.

The Court does not have to rely upon laches, however, since plaintiff clearly failed to exhaust its administrative remedies. Generally, a reviewing court would usurp the function of the agency if it were to set aside an administrative determination upon a ground not previously presented, thereby depriving the agency of a chance to consider the matter. *Unemployment Compensation Commission of Alaska* v. *Aragon,* 329 U.S. 143, 145 (1946). It has been stated:

> The law is not in accord either with an absolute statement that a reviewing court may not decide an issue not raised before the agency or with an absolute statement that a reviewing court may decide such an issue. The law is that the review-

ing court has power to exercise discretion in the light of the circumstances and the court's idea as to what justice requires.

4. K. Davis, Administrative Law Treaties, § 26:7 at p. 444 (2d ed. 1983).[2]

The Court holds that in the absence of extraordinary circumstances excusing the neglect to raise before Commerce the issue whether or not the related subassemblies were within the scope of the investigation, the Court will not permit the plaintiff to raise the issue after Commerce closed its investigation. The Court finds not only did plaintiff fail to offer an excuse for not raising the issue before Commerce, but further plaintiff participated in the Commerce investigation proceedings as though related subassemblies were within the scope of the investigation. Plaintiff cannot be heard to complain at this juncture in the proceedings that the issue, which it wished to have considered but never brought up before Commerce, did not receive full consideration.

Even if the petition had been insufficient, Commerce had the authority to self-initiate an antidumping investigation as to the related subassemblies to determine whether or not the elements necessary for the imposition of duties existed. *See* 19 U.S.C. § 1673a(a)(1982). Commerce also has power to reconsider decisions to initiate an investigation into alleged violations of antidumping regulations. *Gilmore Steel Corp.* v. *United States*, 7 CIT 219, 585 F. Supp. 670 (1984).

As to plaintiff's motion for judgment upon the agency record regarding Commerce's determination, Court No. 85-02-00135, the Court holds:

(1) The allegations in the petition were sufficient and included subassemblies. Even if the petition were inadequate under the circumstances of this case Commerce had the power to self-initiate an investigation of related subassemblies.

(2) The final determination of Commerce included subassemblies as the same class or kind of merchandise as cell site transceivers.

(3) Commerce had the legal authority to issue the final dumping order which implemented its final determination and in-

---

[2] The Trade Agreements Act of 1979, eliminated *de novo* review and provided that judicial review under the antidumping and the countervailing duty law be upon the administrative record. 19 U.S.C. §§ 1516(a)(2) and (b)(1)(B).

The legislative history of the Act is interesting. H.R. Rep. No. 317, 96th Cong., 1st Sess. 181 (1979) states:

> The Bill further amends present law to eliminate *de novo* review of determinations or assessments made pursuant to the antidumping and countervailing duty laws. The present standard of *de novo* review is both time consuming and duplicative. The rationale for *de novo* review is the need to safeguard the rights of all parties to an antidumping and countervailing duty proceedings [sic] which are informal and nonadversial and not subject to Administrative Procedure Act (APA) requirements. However, the amendments made by Title I of the Bill providing for substantially increased access by all parties to information upon which the decision of the administering authority or the ITC is based together with the requirement of a record of the proceedings has removed the need for review of this type. Therefore, the Bill generally provides for a standard of review whereby the administrative level determination is upheld unless unsupported by substantial evidence on the record. Reviewable interlocutory determinations as well as final determinations made so early in the proceedings as to preclude the development of an adequate record, e.g., a determination not to initiate an investigation upon a receipt of a petition, will be upheld unless found to be arbitrary and capricious, an abuse of discretion, or otherwise not in accordance with the law.

cluded subassemblies with cell site transceivers in implementing the final determination.

(4) The record amply supports a determination of sales at less than fair value with respect to subassemblies since they were treated as one class or kind of merchandise throughout the investigation.

(5) Although plaintiff would ordinarily be barred by the doctrine of laches from asserting that subassemblies should not have been included in the final antidumping order because plaintiff failed to act in a timely manner by raising the issue before Commerce, the failure by plaintiff to exhaust its administrative remedies by raising the issue before Commerce precludes plaintiff from raising the issue before this Court.

II. *The Commission Determination*

When Commerce makes an affirmative determination that merchandise is being dumped, it is required to notify the Commission immediately and "make available to the Commission such information as it may have relating to the matter under investigation." 19 U.S.C. § 1673a(d)(1982). In making its final injury determination, the Commission is governed by 19 U.S.C. § 1673d(1)(b), which provides in relevant part:

> (1) In General.—The Commission shall make a final determination of whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, *by reason of imports of the merchandise with respect to which the administering authority has made an affirmative determination* under subsection (a)(1) of this section. (Emphasis added.)

Plaintiff's first challenge to the Commission's determination in this case is that the Commission improperly considered subassemblies in its investigation because the subassemblies were not properly included in Commerce's determination. Since the Court finds that Commerce's determination did properly encompass subassemblies, plaintiff's first challenge must fail. The Commission had before it a determination of Commerce that included subassemblies as well as cell site transceivers, and therefore the Commission properly considered those subassemblies.

Plaintiff also argues that the Commission's determination as to subassemblies is not supported by substantial evidence in the record because the Commission did not make separate findings of fact or conclusions of law regarding subassemblies. As noted earlier, Commerce's investigation treated the subassemblies as the same class or kind of merchandise as cell site transceivers. The Commission in its determination therefore properly investigated injury to only one domestic industry—the industry producing cell site transceivers and related subassemblies. The Commission was not required to make separate findings of fact as to subassemblies as its

investigation covered only one industry. Moreover, it is clear from the record that the Commission had before it information regarding both cell site transceivers and their related subassemblies.

Because the Court finds that the Commission's determination is supported by substantial evidence on the record and in accordance with law, it is unnecessary to address the question whether plaintiff's challenge is barred by laches. Accordingly, the Court holds:

(1) The Commission properly considered cell site transceiver subassemblies because they were within the scope of Commerce's determination.

(2) The Commission's determination that a domestic industry is injured is supported by substantial evidence on the record because the Commission properly treated the manufacture of cell site transceivers and related s bassemblies as one industry and had before it information regarding both.

III. *Conclusion*

Both Commerce's determination, challenged in Court No. 84-02-00185, and the Commission's determination, challenged in Court No. 84-02-00187, are supported by substantial evidence on the record and otherwise in accordance with law. Both determinations are therefore sustained, and plaintiff's motions in both cases are denied.

Customs Regulations Amendment Relating to the Customs Field Organization—Roberts Landing, Michigan

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Closing of Customs station.

SUMMARY: This document closes the Roberts Landing, Michigan, Customs station. Given the small volume of traffic crossing the Canadian-U.S. border at this point, and its proximity to other Customs stations, we believe the closure is warranted and in the public interest. This change will enable Customs and the Immigration and Naturalization Service to obtain more efficient use of their personnel, facilities, and resources, as well as realize a substantial annual savings.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

Customs ports of entry and stations are locations where Customs officers are placed for the purpose of accepting the entry of merchandise, collecting duties, examining baggage, clearing passengers, and enforcing the various provisions of the customs laws and other laws.

The significant difference between ports of entry and stations is that at stations, the Federal Government is reimbursed for:

(1) The salaries and expenses of its officers or employees for services rendered in connection with the entry or clearance of vessels; and

(2) Except as otherwise provided by the Customs Regulations, the expenses (including any per diem allowed in lieu of subsistence), but not the salaries of its officers or employees, for service rendered in connection with the entry or delivery of merchandise.

As part of Customs continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to importers, carriers, and the public, by a document published in the FEDERAL REGISTER on October 17, 1985 (50 FR 42036), Customs proposed to amend § 101.4(c), Customs Regulations (19 CFR 101.4(c)), by deleting Roberts Landing, Michigan, from the list of designated Customs stations.

The Roberts Landing Customs station, located in the Detroit, Michigan, Customs district, is one of three auto ferry stations on the St. Clair River between the Customs ports of Port Huron and Detroit. Roberts Landing is a river crossing only; there is no town or village on the U.S. side of the river. Customs has determined that it is not cost-effective to maintain this station in view of the following factors: Its traffic is almost exclusively non-commercial; the ferry boat at the landing is too small to transport any vehicle larger than a medium size camper; the station is closed each year for a period of from 2 weeks to 4 months due to various reasons (vessel repairs, weather, river ice, etc.); the other two ferry stations on the St. Clair River (Algonac, which is 3 miles south; and Marine City, which is 5 miles north) are so close to Roberts Landing that minimal inconvenience will be caused to diverted traffic, and these other two stations could easily handle any overflow without incurring any increase in their operating costs. The Immigration and Naturalization Service has decided not to fill their vacant Inspector position located there. Closing Roberts Landing would enable Customs to realize a savings of over $100,000 annually.

DISCUSSION OF COMMENTS

Twenty-four comments were received in response to the notice, all opposed. The comments came from both Canadian residents and U.S. residents. There were two basic reasons expressed by the commenters for disapproving the closing; the negative economic impact resulting from the loss of tourism on both sides of the border, and the personal inconvenience to area Canadian and U.S. residents. Although we appreciate the concerns of the commenters, they do not mitigate the Congressional mandate to make more efficient use of our personnel, facilities, and resources. The fact remains that Roberts Landing is one of three auto ferry stations within an eight mile stretch of border. The close proximity of the stations at Algonac and Marine City minimizes any inconvenience occasioned by the closing of Roberts Landing. Customs can save more than $100,000 annually at a station where there is virtually no commercial traffic. Thus, the closing the Roberts Landing is warranted. Ac-

cordingly, the list of Customs districts, stations, and ports of entry having supervision, in § 101.4(c) is amended to reflect this change.

LISTS OF SUBJECTS IN 19 CFR PART 101

Customs duties and inspection, Imports, Organization.

AMENDMENTS TO THE REGULATIONS

PART 101—GENERAL PROVISIONS

1. The authority citation for Part 101, Customs Regulations (19 CFR Part 101), continues to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 1, 66, 1202 (Gen. Hdnote 11), 1624, Reorganization Plan 1 of 1965, 3 CFR 1965 Supp.

2. The list of Customs districts, stations, and ports of entry having supervision, in § 101.4(c) is amended as follows:

By removing "Roberts Landing, Mich (Mail: Route 1, Aloonac, Mich.)." from the column headed "Customs stations" and by removing "Port Huron" from the column headed "Port of entry having supervision" in the Detroit, Michigan, Customs district.

EXECUTIVE ORDER 12291

Because the amendment relates to the organization of Customs it is not a regulation or rule subject to E.O. 12291, pursuant to § 1(a)(3) of that E.O.

REGULATORY FLEXIBILITY ACT

Pursuant to the provisions of § 3 of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601, *et seq.*), it is hereby certified that the amendment will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

DRAFTING INFORMATION

The principal author of this document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: March 14, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

[Published in the Federal Register, April 1, 1986 (51 FR 11013)]

19 CFR Part 6

(T.D. 86-72)

Customs Regulations Amendments Relating to Overflight Exemptions and Reporting Requirements for Aircraft Arriving in the U.S.

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by expanding the requirements for pilots to report notice of penetration of U.S. airspace, and by placing additional requirements upon those who seek an exemption from the landing requirements for aircraft arriving from areas south of the U.S.

Current regulations provide specifics regarding the requirements for reporting arrival, and include a list of designated airports at various border and coastline points at which designated aircraft must land. These amendments expand the coverage of existing requirements to: Include some flights arriving from Puerto Rico and all flights arriving from the U.S. Virgin Islands within the notice of penetration requirements; increase from 15 minutes to 1 hour the minimum time required for notice to be given prior to penetrating U.S. airspace; and require aircraft seeking exemptions from certain landing requirements to be equipped with functioning transponders and to provide additional justification for being granted an exemption.

The amendments are necessary because of the severity of the drug abuse problem, the major increase in illegal drug importations by use of aircraft, and the need for action to expand the effectiveness of drug smuggling enforcement. Customs has found that because aircraft arriving in U.S. airspace from certain areas south of the mainland U.S. are exempt from current reporting requirements, and because overflight exemption requirements are too lax, certain potentially high-risk flights are able to bypass the best drug interdiction efforts of Customs. These amendments seek to remedy that situation.

EFFECTIVE DATE: April 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Operational aspects: Thomas Hargrove, Office of Inspection and Control, (202-566-5607).

Legal aspects: John A. Mathis, Carrier Rulings Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229, (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

The National Narcotics Intelligence Consumers Committee has documented that the supply of illegal drugs to the U.S. market and the subsequent extent of drug abuse has reached monumental proportions. Illegal drug use increased an estimated 15 percent in the U.S. in 1984, according to the Committee. The severity of the drug abuse problem, the preponderance of drug users, and the major increases in volumes of illegal drug importations in the U.S. are indicated by the significant increase in drug-related deaths, medical care, arrests, and seizures.

The smuggler organization has solidified a dominant position in the U.S. through the penetration of strategic points in the economy. Areas to the south of the U.S. are major sources of illegal drugs destined for the U.S. Smuggling by air is the preferred mode of transportation for high-cost narcotics, with cocaine and marijuana smuggling representing particularly high risk areas. A Stanford Research Institute Study (not associated with Stanford University) indicates that magnitude of the air smuggling threat at approximately 6,700 flights, annually. Although recent air interdiction activities in the southeastern U.S. have resulted in many arrests and seizures, an end to the prevalence of drug abuse in the U.S. is not in sight.

To address this national problem, it is necessary to take action to expand the effectiveness of smuggling enforcement. In 1975, the Customs Regulations were amended by adding a new § 6.14 (19 CFR 6.14), to provide for a notice of intended arrival for private aircraft arriving in the U.S. via the U.S./Mexican Border.

Because of the magnitude of the drug problem, and in direct response to Executive and Congressional directives, by an interim regulation published as T.D. 82-52 in the Federal Register on March 24, 1982 (47 FR 12620), the notice requirements were extended to private aircraft arriving in the U.S. via the Gulf of Mexico, Pacific, and Atlantic Coasts. These interim regulations were adopted as a final rule by publication of T.D. 83-192 in the Federal Register on September 15, 1983 (48 FR 41381).

By publication of T.D. 84-236 in the Federal Register on November 29, 1984 (49 FR 46885), § 6.14 was further amended to extend the reporting requirements to certain commercial aircraft arriving from areas south of the U.S. By expanding the definition of private aircraft to include certain commercial flights, Customs sought to increase enforcement coverage to further stem the flow of illicit narcotics. In spite of previous efforts, we have found that there

remain certain gaps in the reporting requirements provided in Part 6, Customs Regulations (19 CFR Part 6).

Accordingly, by notice published in the Federal Register on April 1, 1985 (50 FR 12819), it was proposed to further amend Part 6, Customs Regulations, to enhance enforcement capabilities. The major thrust of the proposal was to extend the minimum advance notice of U.S. airspace penetration requirement from 15 minutes to 1 hour, to include aircraft arriving from the U.S. Virgin Islands and Puerto Rico in the notice requirements, to require aircraft pilots seeking exemption from the requirements to land at a designated airport, to require pilots to certify the aircraft to be equipped with a functioning transponder (to be activated during overflight), and to provide detailed reasons for the exemption request.

Based in part on our consideration of the comments received in response to the notice, we have decided to make some minor changes to the amendments as initially proposed. These include moving the definition of "Place" from § 6.1 to § 6.14, excluding from the advance notice requirements some flights from Puerto Rico (as explained later in this document), and including the boundaries of the Air Defense Identification Zone as the point beyond which advance reports of airspace penetration must be made.

Analysis of Comments

Eight comments were received in response to the April 1, 1985, Federal Register notice. Of these, two expressed wholesale support for the proposal, five were critical of at least some elements, and one offered general comments and suggestions for further amendments.

In addition to the amendments proposed to § 6.14, it was also proposed to amend § 6.1 by adding a definition of "place" to mean anywhere outside of U.S. airspace. Two commenters state that placement of the definition in § 6.1 is incorrect and could be confusing as concerns other sections within Part 6. It is stated that what is needed is more concise definition of "place", and that, to avoid confusion, the definition should appear in § 6.14 itself.

We agree. Accordingly, instead of amendment § 6.1, the definition is being added to § 6.14(e). The definition has also been altered to conform to the boundaries of the U.S. military Air Defense Identification Zone (ADIZ). This should eliminate all confusion since the boundaries of the ADIZ are well known to pilots.

One commenter expressed concern over the inclusion of Puerto Rico as a location from which aircraft must provide advance notice of U.S. airspace penetration.

We have reconsidered this matter and have determined that the advance notice requirement will not be necessary for flights from Puerto Rico which are conducting flight by Instrument Flight Rules (IFR). It is our understanding that nearly all flights between

Puerto Rico and the Continental U.S. are conducted under IFR and are, therefore, identifiable to Customs through liaison with the Federal Aviation Administration.

By far, the greatest amount of concern was expressed over the proposal to extend the required advance notice time limit from 15 minutes to no less than 1 hour prior to U.S. airspace penetration. The major objection raised is that inadequate communication facilities may exist in many of the more remote locations from which advance notice would be required.

We are aware that there may be some initial difficulties associated with the new rules. Customs personnel will work with members of the flying public to minimize any difficulties. Given the magnitude of the narcotics smuggling problems, however, any opportunity for making in-roads must be tried, potential problems notwithstanding. A 1-hour prior notification is not unique in the western hemisphere. Many of the locations from which extended prior notice would be required, themselves require 1-hour notice or even longer. Furthermore, the 1-hour time limit is a minimum. Customs will accept notification at any time longer than 1 hour, for example, at the time a pilot who intends to depart the U.S. files a flight plan with the FAA.

Executive Order 12291

This is not a "major rule" as defined in § 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that these amendments will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The Paperwork Reduction Act of 1980 requires that Customs must inform the public why it is collecting this information, how it will use it, and whether it must be given to Customs. Customs requires the information in order to carry out the laws and regulations which it administers. This regulation applies to private aircraft arriving in the U.S. via the U.S./Mexican border or the Atlantic, Pacific, and Gulf coasts, or any place in the Western Hemisphere south of 30 degrees north latitude, and it relates to the processing of the aircraft and its passengers. The information is used for arranging appropriate Customs services for arrival, inspection processing, and enhanced enforcement entry control for effective violator interdiction. The requirements are mandatory but the regulation provides a means for requesting an exemption from the landing requirements. The granting of the exemption is at the au-

thority of Customs. Pursuant to the Paperwork Reduction Act of 1980, the Office of Management and Budget has approved the collection of information requirements and assigned control number 1515–0098 to the reporting requirements contained in this document.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other Customs offices participated in its development.

Air carriers, Air transportation, Aircraft, Airports.

Amendments to the Regulations

Part 6, Customs Regulations (19 CFR Part 6), is amended as set forth below:

Part 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1624, 49 U.S.C. 1474, 1509:
§ 6.14 also issued under 49 U.S.C. 1372: § 6.25 also issued under 48 U.S.C. 1460(i).

2. The second sentence of § 6.14(a) is amended by removing the words "15 minutes", and inserting, in their place, the words "1 hour".

3. Section 6.14(b) is revised to read as follows:

§ 6.14 Private aircraft arriving from areas south of the U.S.

* * * * * * *

(b) *Advance report of penetration of U.S. airspace via Gulf and Atlantic Coasts.* All private aircraft arriving in the Continental U.S. via the Gulf of Mexico and Atlantic Coasts from a place in the western Hemisphere south of 30 degrees north latitude, from any place in Mexico, from the U.S. Virgin Islands, or (notwithstanding the definition of "United States" in § 6.1(b)) from Puerto Rico, which if from Puerto Rico, are conducting flight under visual flight rules (VFR), shall furnish a notice of intended arrival to Customs at the nearest designated airport to point of crossing listed in paragraph (g) of this section for the first landing in the U.S. The notice must be furnished at least 1 hour before crossing the U.S. coastline. The notice may be furnished directly to Customs by telephone, radio, or other means, or may be furnished through the Federal Aviation Administration to Customs. The requirements to furnish

a notice of intended arrival shall not apply to private aircraft departing from Puerto Rico and conducting flight under instrument flight rules (IFR) until crossing the U.S. coastline or proceeding north of 30 degrees north latitude.

4. Section 6.14(c)(5) is amended by removing the parenthetical word "(foreign)".

5. Section 6.14(c)(7) is revised to read as follows:

§ 6.14 Private aircraft arriving from south of the U.S.

* * * * * * *

(c) * * *

(7) Name of U.S. airport of first landing (designated airport listed in paragraph (g) of this section *nearest* to point of crossing unless an exemption has been granted in accordance with paragraph (f) of this section, or if the aircraft has not landed in foreign territory or is arriving direct from Puerto Rico, or if the aircraft was inspected by Customs officers in the U.S. Virgin Islands); and

6. Section 6.14(d) is revised to read as follows:

§ 6.14 Private aircraft arriving from south of the U.S.

* * * * * * *

(d) *Landing requirement.* Private aircraft required to furnish a notice of intended arrival in compliance with paragraphs (a), (b), and (c) of this section shall land for Customs processing at the *nearest* designated airport to the border or coastline crossing point as listed in paragraph (g) of this section, unless exempted from this requirement in accordancce with paragraph (f) of this section. In addition to the requirements of this paragraph, private aircraft commanders must comply with all other landing and notice of arrival requirements. This requirement shall not apply to private aircraft which have not landed in foreign territory or are arriving directly from Puerto Rico or if the aircraft was inspected by Customs officers in the U.S. Virgin Islands.

7. Section 6.14(e) is amended by removing the title *"Private aircraft defined"*., and by inserting, in its place, the title "Definitions", by designating the existing paragraph as § 6.14(e)(1), and by inserting a new paragraph thereafter designated as § 6.14(e)(2), to read as follows:

§ 6.14 Private aircraft arriving from areas south of the U.S.

* * * * * * *

(e) * * *

(2) The term "place" as used in this section means anywhere outside of the inner boundary of the Atlantic (Coastal) Air Defense Identification Zone (ADIZ) south of 30 degree north latitude, anywhere outside of the inner boundary of the Gulf of Mexico (Coastal) ADIZ, or anywhere outside of the inner boundary of the Pacific (Coastal) ADIZ south of 33 degrees north latitude.

8. Section 6.14(f)(1) (iii) and (xi), respectively, are revised to read as follows:

§ 6.14 Private aircraft arriving from areas south of the U.S.

* * * * * * *

(f) * * *

(iii) A statement that the aircraft is equipped with a functioning transponder which will be in use during overflight and that overflights will be made in accord with instrument flight rules (IFR);

* * * * * * *

(xi) Detailed reasons for overflight exemption, stated in terms of savings in cost and time, safety considerations, and convenience.

9. Section 6.25(c)(1) is amended by removing the words "which are not inspected by Customs officers in the Virgin Islands".

10. Section 6.25(c)(2) is amended by removing the words "which are not inspected by Customs officers in the Virgin Islands".

11. Section 6.25 is amended by removing paragraph (c)(3), and by redesignating paragraphs (c)(4) and (5) as paragraphs (c)(3) and (4), respectively.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: February 24, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

(T.D. 86-16)

Foreign Trade Zones; Specialized and General Provisions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule; correction.

SUMMARY: This document corrects two errors in a document which amended the Customs Regulations relating to foreign trade zones by providing a new audit-inspection method of zone supervision by Customs. The document was published as T.D. 86-16 in the FEDERAL REGISTER on Tuesday, February 11, 1986 (51 FR 5040).

FOR FURTHER INFORMATION CONTACT: Marcus Sircus, Regulatory Audit Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington D.C. 20229 (202-566-2812).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In FR Doc. 86-2399, appearing at page 5040 in the issue of Tuesday, February 11, 1986, on page 5063, in the second column, under the heading "§ 24.13 [Amended]," the explanation of the amendment to § 24.13 is incorrectly worded. The correct explanation reads as follows:

§ 24.13 [Amended]

2. Section 24.13 is amended by inserting, in the first sentence of paragraph (c), the words "a foreign trade zone operator" before the words "and bonded warehouse proprietors", and by inserting, in the first sentence of paragraph (f), the words "foreign trade zone operator or" before the words "Customs bonded warehouse proprietor".

On page 5064, in the third column, under the heading **"§ 191.165 Same condition drawback merchandise and merchandise not conforming to sample or specifications or shipped without the consent of the consignee."**, the first paragraph, with the heading "Drawback entry", is incorrectly cited, parenthetically, as paragraph "(d)". The correct parenthetical citation should be paragraph "(b)".

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

U.S. Court of Appeals for the Federal Circuit

(Appeal Nos. 85-2082, 85-2158)

ALSTHOM ATLANTIQUE AND COGENEL, INC., APPELLEES *v.* UNITED STATES, APPELLANT/CROSS-APPELLEE AND WESTINGHOUSE ELECTRIC CORP., APPELLANT

A. David Lafer, Commercial Litigation Branch, Department of Justice, of Washington, D.C., argued for appellant United States. With him on the brief were *Richard K. Willard*, Acting Assistant Attorney General, *David M. Cohen*, Director and *Velta A. Melnbrences*, Assistant Director.

Richard O. Cunningham, Steptoe & Johnson, of Washington, D.C., argued for appellant Westinghouse. With him on the brief were *W. George Grandison*, *Kevin J. Brosch* and *Barbara A. Pollack*.

Joseph F. Donohue, Sr., Donohue & Donohue, of New York, New York, argued for appellees.

Appealed from: U.S. Court of International Trade.

Judge PAUL RAO.

(Appeal Nos. 85-2082, 85-2158)

ALSTHOM ATLANTIQUE AND COGENEL, INC., APPELLEES *v.* UNITED STATES, APPELLANT/CROSS-APPELLEE AND WESTINGHOUSE ELECTRIC CORP., APPELLANT

(Decided March 24, 1986)

Before MARKEY, *Chief Judge*, RICH and SMITH, *Circuit Judges*.

SMITH, *Circuit Judge*.

In this antidumping case, appellants, the United States and Westinghouse Electric Corporation, appeal from a Court of International Trade decision remanding an administrative determination by the International Trade Administration, Department of Commerce (ITA), and holding that the ITA, during its review pursuant to section 751 of the Trade Agreements Act of 1979, could change the scope of an antidumping finding made by the Department of the Treasury (Treasury). We reverse.

I. Issues

The principal question before this court is whether the lower court erred, as a matter of law, in not dismissing as untimely, the challenge of appellees Alsthom Atlantique and Cogenel, Inc. (Alsthom) to Treasury's antidumping determination with respect to large power transformers from France. We also address whether the lower court erred in holding that the ITA has the authority, during the course of a section 751 review, to change the scope of an underlying antidumping determination made by Treasury.

II. Background

The lengthy chronology of events leading up to the current dispute began on March 11, 1970, when a petition was filed with the Treasury by Westinghouse Electric Corporation, requesting Treasury to initiate an antidumping investigation of large power transformers from France. The Westinghouse petition indicated a possibility that large power transformers from France were being, or were likely to be, sold at less than fair value within the meaning of the Antidumping Act of 1921, as amended.[1] On June 17, 1970, an Antidumping Proceeding Notice issued by Treasury was published in the Federal Register announcing its plans to institute an inquiry to verify the information submitted by Westinghouse and to obtain the facts necessary to reach a determination as to the fact or likelihood of sales at less than fair value.[2] Treasury proceeded to conduct its inquiry, which included an investigation of Alsthom Savoisienne, the corporate predecessor of Alsthom Atlantique.

On June 11, 1971, Treasury, in response to questions concerning the scope of its antidumping investigation, issued instructions indicating that the Antidumping Proceeding Notice with respect to large power transformers from France was being amended to clarify Treasury's intent in the original notice.[3] These instructions stated that the Antidumping Proceeding Notice applied to "all types of transformers rated 10,000 KVA or above, * * * including but not limited to shunt reactors." Treasury's notice explicitly indicated that Treasury was investigating, and that its findings would apply to, all types of large power transformers including shunt reactors.

On October 21, 1971, Treasury published a "Withholding of Appraisement Notice" with regard to large power transformers from France.[4] This notice announced Treasury's determination that there were "reasonable grounds to believe or suspect that the purchase price * * * of large power transformers from France is less, or likely to be less, than the foreign market value." The notice further indicated that Treasury was directing Customs officers to

[3] 36 Fed. Reg. 11,308 (1971).
[4] 36 Fed. Reg. 20,374 (1971).

withhold appraisement of large power transformers from France. On April 25, 1972, the United States Tariff Commission published its determination that an industry in the United States was being injured by less than fair value imports of large power transformers from France.[5] On June 14, 1972, Treasury published its finding of dumping with regard to large power transformers from France.[6] No further administrative action was taken with respect to large power transformers from France until after January 1, 1980.

The Trade Agreements Act of 1979 transferred the responsibility from the Customs Service to the ITA for determining the applicable antidumping duties.[7] The act also amended the Tariff Act of 1930 to provide for the annual review of "the amount of any antidumping duty." Pursuant to this authority, the ITA on March 28, 1980, published in the Federal Register a notice that it was conducting administrative review of 83 outstanding determinations of dumping.[8] On April 9, 1980, after the ITA announced its intent to conduct an administrative review and prior to its preliminary results of the review, Cogenel, Inc., Alsthom's subsidiary and United States importer of large power transformers from France produced by Alsthom, requested that the ITA "modify" the Treasury's antidumping finding by removing Alsthom Unelic (corporate successor to Alsthom Savoisienne, corporate predecessor to Alsthom Atlantique) from the finding on the basis of "changed circumstances" pursuant to 19 C.F.R. §§ 353.53–.54.[9]

On June 25, 1981, the ITA published a notice of "Preliminary Results of Administrative Review of Antidumping Finding" with regard to large power transformers from France.[10] Due to Alsthom's failure to provide specific information regarding the merchandise sold in its home market, the ITA preliminarily determined to postpone appraisement of entries and to establish a cash deposit rate based upon the best information available.

Following publication of the notice of the preliminary results of ITA's section 751 review, Alsthom requested a hearing to discuss whether shunt reactors were within the "class or kind of foreign merchandise" covered by Treasury's original antidumping order on large power transformers from France. The hearing was held on July 30, 1981. At the hearing, Alsthom asserted that shunt reactors were not subject to Treasury's antidumping order since there was never a valid finding that shunt reactors had been imported, had

[9] Under § 353.53, whenever the Secretary of Commerce determines that sales of merchandise subject to an antidumping order are no longer being made at less than fair value, and that there is no likelihood of resumption of sale at less than fair value, he may act to revoke or terminate, in all or in part, such order. However, § 353.54 requires a firm applying for a revocation of a dumping finding to demonstrate to the ITA that sales of the merchandise are no longer made at less than fair value, and to satisfy the ITA that there is no likelihood of resumption of sales at less than fair value.
[10] 46 Fed. Reg. 32,928 (1981).

been sold at less than fair value, or had injured or threatened to injure an industry in the United States.

On March 10, 1982, the ITA published its notice of "Final Results of Administrative Review of Antidumping Finding" with regard to large power transformers from France.[11] The ITA determined that shunt reactors were clearly included in Treasury's antidumping finding, using the same language set forth by Treasury in the original Antidumping Proceeding Notice of June 11, 1971. The ITA held that the scope of the antidumping finding could not be changed during a section 751 administative review since it was clear that shunt reactors were included in the subject class or kind of merchandise, large power transformers, throughout the administrative proceeding. The ITA further ruled that not all elements of a class or kind of merchandise must be exported to the United States during the period of investigation in order for such elements to be within the scope of an antidumping finding order and that not all elements must be sold at less than fair value.

Alsthom brought action in the Court of International Trade pursuant to 19 U.S.C. § 1516(a)(2) and 28 U.S.C. § 1581(c) challenging ITA's section 751 final results of administrative review with respect to large power transformers from France. The lower court, relying on its decision in *Diversified Products Corp.* v. *United States*,[12] declared the action timely, accepting Alsthom's assertion that it was contesting ITA's section 751 review of Treasury's antidumping determination of large power transformers from France, and not the underlying Treasury determination itself. The lower court issued a memorandum opinion and order remanding the case to the ITA because, in the view of the lower court, the ITA had erred in its conclusion that it had no authority, in the context of a section 751 review, to alter the scope of the antidumping finding established by Treasury.[13] For the reasons set out below, we hold that the lower court erred both (1) in not dismissing Alsthom's appeal as untimely and (2) in determining that the ITA has authority, during a section 751 review, to alter the scope of an antidumping determination established by Treasury.

III. Analysis

A. *Timeliness of Appeal.*

Judicial review of countervailing and antidumping duty determinations is governed by the Transitional Rules, section 1002(b)(3) of title X of the Trade Agreement of 1979.

> (3) CERTAIN COUNTERVAILING AND ANTIDUMPING DUTY ASSESSMENTS.—The amendments made by this title shall apply with respect to the review of the assessment of, or

[11] 47 Fed. Reg. 10,268 (1982).
[12] *Diversified Products Corp.* v. *United States*, 572 F. Supp. 883 (Ct. Int'l Trade 1983).
[13] *Alsthom Atlantique* v. *United States*, 604 F. Supp. 1234 (Ct. Int'l Trade 1985).

> failure to assess, any countervailing duty or antidumping duty on entries subject to a countervailing duty order or antidumping finding if the assessment is made after the effective date. If no assessment of such duty had been made before the effective date that could serve the party seeking review as the basis of a review of the underlying determination, made by the Secretary of the Treasury or the International Trade Commission before the effective date, on which such order, finding, or lack thereof is based, then the underlying determination shall be subject to review in accordance with the law in effect on the day before the effective date.

The Transitional Rules, in effect, set out guidelines indicating to the complainant the proper procedure he should follow in obtaining judicial review of an antidumping or countervailing duty determination.

Under the Transitional Rules, the complaint's initial inquiry is directed to whether the antidumping finding concerning the article in question was "made by the Secretary of the Treasury or the International Trade Commission before the effective date." If the antidumping finding was made after January 1, 1980, then irrespective of whether an assessment of antidumping duty was performed, the complainant may seek judicial review, pursuant to 19 U.S.C. § 1516a(a)(2) and 28 U.S.C. § 1581(c), of all section 751 administrative reviews within 30 days of the date they are published in the Federal Register. If, however, the antidumping finding was made prior to the effective date, then a further question must be addressed, namely, whether there has been an assessment of antidumping duty subject to the antidumping finding. If no assessment of such duty had been made before the effective date, then the Transitional Rules direct that review of the antidumping finding "shall be subject to review in accordance with the law in effect on the day before the effective date." Under such prior law, importers of the merchandise covered by Treasury's antidumping determination must wait until an entry of merchandise is liquidated, and then must protest that liquidation pursuant to 19 U.S.C. § 1514 (1976). Then, if that protest is denied as provided in 19 U.S.C. §1515 (1976), the importer may challenge that denial in the Court of International Trade pursuant to 28 U.S.C. § 1581(a).

Application of the guidelines set forth by the Transitional Rules to the present case directs our first inquiry to when the articles in question, shunt reactors, were subject to an antidumping funding. Treasury, from the outset, specifically included shunt reactors in the scope of its 1971 antidumping investigation of large power transformers from France. The Transitional Rules, therefore, direct our second inquiry to whether there has been an assessment of antidumping duty on shunt reactors prior to the effective date. Since no such assessment had been made, the Transitional Rules dictate the judicial review of the antidumping determination may only be obtained in accordance with the law in effect on the day

before the effective date. Therefore, we arrive at our conclusion that Alsthom's challenge was untimely and should have been made pursuant to 28 U.S.C. § 1581(a) only after exhausting the administrative procedures set forth by 19 U.S.C. §§ 1514-1515 (1976).

Alsthom attempted to challenge Treasury's inclusion of shunt reactors within the scope of its antidumping determination concerning large power transformers from France by bringing action in the Court of International Trade pursuant to 19 U.S.C. § 1516a(a)(2) and 28 U.S.C. § 1581(c). The lower court accepted Alsthom's appeal from the ITA relying on the previous Court of International Trade decision of *Diversified Products Corp.*[14] as authority. The lower court accepted Alsthom's position that Alsthom was contesting ITA's section 751 review of Treasury's antidumping determination, and not the underlying Treasury determination itself. However, as will be shown below, *Diversified Products* is distinguishable from the present case and it was error for the lower court to rely on it in accepting Alsthom's appeal of the ITA decision.

The history of the antidumping determination in *Diversified Products* began in 1971 when a complaint was filed with the Treasury by an intervenor requesting initiation of a dumping investigation of bicycle speedometers from Japan. In 1972, Treasury determined that bicycle speedometers from Japan were being sold at less than fair value. Shortly after enactment of the Trade Agreements Act of 1979, the ITA began its review of all prior dumping findings of the Treasury Department. This review included a determination whether double-gear hub drive speedometers, which had not yet been developed at the time of the 1972 dumping investigation, belonged to the class or kind of merchandise encompassed in the 1972 finding. During its section 751 review of the bicycle speedometer dumping determination, the ITA determined that double-gear hub speedometers were within the scope of the 1972 dumping finding. Diversified, pursuant to 19 U.S.C. § 1516a(a)(2) and 28 U.S.C. § 1581(c), appealed the ITA's determination to the Court of International Trade, contending that double-gear hub drive speedometers were beyond the scope of the 1972 antidumping determination. Although the underlying antidumping determination regarding bicycle speedometers from Japan was made by Treasury in 1972, the specific recognition of double-gear hub drive speedometers within the scope of Treasury's 1972 determination was not done until after the effective date.

The lower court mistakenly relied on *Diversified Products* as controlling in this case because of the following factual distinctions which, under the Transitional Rules, result in different procedural requirements for obtaining judicial review of antidumping or countervailing duty determinations. First in *Diversified Products*, the articles in question, double-gear hub drive speedometers, had not

[14] *Diversified Products*, 572 F. Supp. 883.

yet been developed at the time of Treasury's underlying antidumping determination of bicycle speedometers from Japan; while in the present case, shunt reactors had been developed prior to Treasury's antidumping determination of large power transformers from France. Second, in *Diversified Products*, it was the ITA which determined double-gear hub drive speedometers were within the scope of Treasury's antidumping finding; not Treasury, which in the present case had specifically included shunt reactors in the scope of its antidumping determination. Finally, in *Diversified Products*, double-gear hub drive speedometers were not determined to be within the scope of the underlying antidumping determination until after the effective date of the Trade Agreements Act of 1979; while in the present case, shunt reactors were included within the scope of the underlying antidumping determination prior to the effective date.

On appeal to this court, Alsthom asserts that its argument was not with the Treasury but with the ITA. Alsthom points out it was seeking a judgment in the lower court that the ITA determination "that shunt reactors were within the class of imported merchandise subject to the outstanding dumping order" was contrary to law. Alsthom specifically argues that: (1) transformers and shunt reactors are two separate classes or kinds of electrical equipment; (2) the Treasury, by including shunt reactors in its antidumping investigation of large power transformers from France, extended the scope of the investigation to include two classes or types of electrical equipment; (3) only merchandise found to have been sold at less than fair value can be included in an antidumping order; (4) the Treasury notice of sales at less than fair value did not mention shunt reactors; and (5) even assuming that shunt reactors were a specific type of large power transformer, none of them were imported.

Alsthom's assertion that its argument was not with the Treasury but with the ITA is untenable. In view of Alsthom's contentions as a whole, it is clear that Alsthom was seeking judicial review of Treasury's antidumping determination and not ITA's section 751 review. Alsthom's dissatisfaction with the Treasury's antidumping determination of shunt reactors cannot be cloaked in the guise of error on the part of the ITA in order to circumvent the Transitional Rules' procedural requirements for judicial review of antidumping determinations made prior to the effective date. We need not reach the merits of Alsthom's arguments concerning the inclusion of shunt reactors within the scope of Treasury's antidumping determination at this time.

B. *ITA Powers To Clarify Scope.*

The lower court, relying on *Diversified Products*, remanded this case to the ITA for a determination as to whether shunt reactors were within the class or kind of merchandise encompassed by large power transformers. The lower court specifically found the ITA to

be in error as to its initial determination that it had no authority to modify the scope of an underlying antidumping determination by Treasury. For the reasons set out below, we reverse the lower court on this issue.

Court of International Trade case law correctly recognizes that the ITA section 751 review of an antidumping determination of Treasury is limited by the scope of the underlying finding.[15] Although the ITA has the power, during a section 751 review, to determine whether an unclassified article is within the scope of an original Treasury antidumping finding,[16] the ITA cannot change the scope of an underlying antidumping determination when Treasury has *specifically* included the article within the scope of its underlying determination.[17]

Here, the Treasury made its antidumping determination in 1972. The Treasury's actions during its investigation indicate that its original less than fair value investigation involved a single class or kind of merchandise—large power transformers from France. The Treasury *specifically* determined that the class or kind of merchandise—large power transformers—included several forms of transformers including shunt reactors. There is no question that the class or kind of merchandise initially investigated by the Government included shunt reactors.

Alsthom contends that 19 U.S.C. § 1673 invested the ITA with the obligation to take up antidumping investigations where it found them in 1980 and to review every fact that was needed to fix the amount of dumping duty or deposit. Alsthom asserts that, in order for the ITA to perform this statutory task, the ITA first must have determined that there was an existing dumping finding that included shunt reactors, namely, whether shunt reactors are of the same type or class of merchandise as large power transformers. While it is true that the ITA must determine whether there was an existing dumping finding that included the item, once the ITA determines that the Treasury included the item under its original antidumping determination, the ITA's inquiry into that issue ceases. Alsthom's assertion, if accepted, would lead the ITA into an impossible task of reviewing de novo each and every Treasury antidumping determination to determine whether Treasury correctly included the article in question within the scope of its underlying antidumping determination. In a section 751 review, the ITA does not have the power to substitute its judgment for Treasury's when Treasury has specifically included an item within its antidumping determination.

[17] *Royal Business*, 507 F. Supp. at 1014.

IV. Conclusion

In view of the foregoing, we hold that Alsthom's challenge to the underlying antidumping determination made by the Treasury should have been dismissed by the lower court on the grounds of prematurity. The lower court further erred in determining that the ITA has the authority, during a section 751 review, to change the scope of Treasury's underlying dumping finding and in remanding the case back to the ITA.

Decisions of the United States Court of International Trade

(Slip Op. 86-30)

RAMON AZURIN AND GREGORIO ARANETA, PLAINTIFFS *v.* UNITED STATES AND WILLIAM VON RAAB, COMMISSIONER OF THE UNITED STATES CUSTOMS SERVICE, DEFENDANTS

Court No. 86-03-00336

Before DICARLO, *Judge.*

Plaintiffs, in an action for mandamus to compel the release of property in the custody of the United States Customs Service (Customs), move for a temporary restraining order preventing Customs from transferring copies of documents in Customs custody to any Committee of the United States House of Representatives, any representative of the Republic of the Philippines, or any other party, claiming that such transfer would violate Customs regulations, and plaintiffs' rights under the fourth and fifth amendments to the Constitution and to privacy.

Held: Plaintiffs, whose only interest in the documents is as agents for former president of the Republic of the Philippines, do not have a sufficient interest in the documents to assert that their rights to privacy will be violated by disclosure, nor do they have standing to assert the rights of the former president, who has not submitted to the jurisdiction of the Court.

[Plaintiffs' motion for a temporary restraining order is denied.]

(Decided March 17, 1986)

Anderson, Hibey, Nauheim & Blair (Eric I. Garfinkel and *Richard A. Hibey),* for plaintiffs.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, Civil Division, Department of Justice *(J. Kevin Horgan* and *Elizabeth Seastrum),* for defendants.

MEMORANDUM OPINION AND ORDER

DICARLO, *Judge:* Plaintiffs seek a temporary restraining order preventing the United States Customs Service (Customs) "from transferring * * * to any Committee of the United States House of Representatives, any representatives of the Republic of the Philippines, or to any other person"[1] originals or duplicates of property that arrived in the United States with Ferdinand E. Marcos, the

[1] Motion for Temporary Restraining Order at 1.

former president of the Republic of the Philippines, and his party on Februry 26, 1986.

Plaintiffs' motion is denied.

BACKGROUND

Arriving in the United States at Hickam Air Force Base, Hawaii, on February 26, 1986, Mr. Marcos and his party brought with them currency, documents, jewelry and other property. On March 7, 1986, plaintiff Araneta filed Customs Form 7501 and Entry Summary for certain property as "attorney-in-fact" for Mr. Marcos as importer of record.[2] On March 10, 1986, plaintiff Azurin executed a Customs Form 4790, Report of International Transportation of Currency or Monetary Instruments, on behalf of Mr. Marcos, covering currency. Neither plaintiff claims an ownership interest in any of the property currently in Customs custody.

Plaintiffs allege that all procedures incidental to Customs inspection and processing of the property were completed on March 12, 1986, but that Customs had received instructions not to release the property.

On March 13, 1986, plaintiffs, uncertain as to which court had jurisdiction, commenced mandamus actions in this Court and in the United States District Court for the District of Hawaii[3] seeking to compel Customs to release the property to plaintiffs.

In both mandamus actions it is alleged that Customs retention of the property violates section 142.19(b) of the Customs Regulations, 19 C.F.R. § 142.19(b) (1986), and plaintiffs' rights to freedom from unreasonable search and seizure, due process, and privacy. Plaintiffs invoke this Court's jurisdiction under 28 U.S.C. § 1581(i) (1) and (4) (1982). The Court finds that it has jurisdiction over the mandamus action.

Simultaneously with the filing of the actions for mandamus, plaintiffs sought temporary restraining orders in both courts to prevent Customs from releasing copies of the documents in Customs possession pursuant to formal requests from the Chairman and Ranking Minority Member of the Subcommittee on Asian and Pacific Affairs of the Foreign Affairs Committee of the United States House of Representatives and the Republic of the Philippines.[4] Plaintiffs claim a constitutional right to privacy would be violated by release of the documents.

At a conference immediately following the filing of plaintiffs' complaint and motion for restraining order, the Court directed that briefs be filed by the close of business the following day, and that counsel for both parties appear for oral argument on the motion on March 15, 1986.

---

[2] Copies of the customs documents were received by the Court on March 17, 1986.

[3] *Azurin* v. *von Raab*, Civ. No. 86-0189 (D. Haw.).

[4] These requests are described *infra* at p. 10.

On March 14, 1986 the Court was informed by plaintiffs' counsel that the District Court for the District of Hawaii had issued a temporary restraining order *ex parte* enjoining defendant for ten days from allowing access to the property described in the Customs Form 7501 'except to those persons entitled to access pursuant to lawful subpoena, other legal process compelling production, or pursuant to the laws or treaties of the United States." [5] Since the order issued by the district court did not unconditionally prohibit access to the documents, plaintiff did not withdraw their motion for restraining order in this Court.

The Temporary Restraining Order

Although the motion before the Court is for a temporary restraining order, plaintiffs in their brief say the criteria for granting a preliminary injunction are appropriately applied to its motion. Since defendants received notice of plaintiffs' motion, and both parties were afforded an opportunity to be heard orally and in writing, the Court will consider, under an appropriately relaxed evidentiary standard, the criteria for issuance of a preliminary injunction. *Levas & Levas* v. *Village of Antioch*, 684 F.2d 446, 448 (7th Cir. 1982); *Ragold, Inc.* v. *Ferrero, U.S.A., Inc.*, 506 F. Supp. 117, 122-23 (N.D. Ill. 1980); 11 C. Wright and A. Miller, Federal Practice and Procedure: Civil § 2951, at 499 (1973). These criteria are: (1) threat of immediate irreparable harm; (2) likelihood of success on the merits; (3) that the public interest would be better served by issuing rather than by denying the injunction; and (4) whether the balance of hardships on the parties favors issuing the injunction. *See Zenith Radio Corp.* v. *United States*, 1 Fed. Cir. 74, 76, 710 F.2d 806, 809 (1983); *S.J. Stile Associates, Ltd.* v. *Snyder*, 68 CCPA 27, 30, 646 F.2d 522, 525 (1981).

Irreparable Harm

An injury is irreparable if it cannot be undone through monetary remedies. *S.J. Stile Associates, Ltd.* v. *Snyder, supra; Spiegel* v. *City of Houston*, 636 F.2d 997 (5th Cir. 1981). Plaintiffs allege that their privacy rights will be irreparably injured if the documents are released. The Court agrees that "the right of privacy must be carefully guarded for once an infringement has occurred it cannot be undone by monetary relief." *Deerfield Medical Center* v. *City of Deerfield Beach*, 661 F.2d 328, 338 (5th Cir. 1981). But, for reasons stated in the following section of this opinion, the Court believes that plaintiffs have stated no privacy rights in this action, and, therefore, will suffer no irreparable injury if their motion is denied.

---

[5] *Azurin* v. *von Raab*, Civ. No. 86-0189, at 2 (D. Haw. Mar. 13, 1986) (temporary restraining order).

Likelihood of Success

"It is unnecessary for plaintiffs to establish likelihood of success on the merits with 'mathematical probability'. *Committee to Preserve American Color Television and Imports Committee* v. *United States*, 4 CIT 202, 204, 551 F.Supp. 1142, 1144 (1982)." *American Institute for Imported Steel, Inc.* v. *United States*, 8 CIT 314, Slip Op. 84-132, at 8 (1984).

Plaintiffs make two claims: that Customs is unlawfully holding their property, and should return it to them, and that Customs is about to release unlawfully copies of the property to third parties.[6] The Court will consider the likelihood of success of each of these claims.

1. The Mandamus Claim To Compel Customs To Release the Property to Plaintiffs

Plaintiffs claim that Customs refusal to release the property to them violates section 142.19(b) of the Customs Regulations, 19 C.F.R. § 142.19(b), and violates plaintiffs' constitutional rights to be free from unreasonable search and seizure, to due process, and to privacy.

Plaintiffs' contention that 19 C.F.R. § 142.19(b)[7] requires Customs to release property that it has reason to believe may have been imported in violation of the laws or treaties of the United States cannot withstand scrutiny. Section 142.19(b) does not compel Customs to release imported merchandise, but recites the conditions upon which merchandise may be released. Indeed, section 142.19(b)(2) says that merchandise "shall not be released" unless Customs "determines that the merchandise may be admitted into the commerce of the United States."

Section 499 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1499 (1982), provides in part:

> *Imported merchandise*, required by law or regulations made in pursuance thereof to be inspected, examined, or appraised,

---

[6] Plaintiffs' complaint states only the first of these claims; the second is contained in their motion for a temporary restraining order. At oral argument on March 15, 1986 plaintiffs orally moved, at the Court's suggestion, to amend their complaint to allege the second claim. Defendants have contested the Court's jurisdiction over this claim. The jurisdictional basis of the second claim is not alleged, but is presumably 28 U.S.C. § 1581(i). Since the Court denies the requested relief, it need not decide the jurisdictional issue. *See Secretary of the Navy* v. *Avrech*, 418 U.S. 676, 677-78 (1974) (per curiam) ("Without the benefit of further oral argument, we are unwilling to decide the difficult jurisdictional issue * * *. We believe that even the most diligent and zealous advocate could find his ardor somewhat dampened in arguing a jurisdictional issue where the decision on the merits is thus foreordained.")

[7] 19 C.F.R. § 142.19 states in relevant part:

> Merchandise, for which an entry summary serves as both an entry and an entry summary, shall not be released from Customs custody until an appropriate bond has been filed, or the entry has been liquidated, as follows:
>
> * * * * * * *
>
> (b) *After liquidation.* If a bond has not been filed in accordance with paragraph (a) of this section, the merchandise shall not be released before:
>
> (1) The entry has been liquidated and the full amount of all duties and taxes due, including dumping or other special duties and charges, has been paid or the right to free entry established.
>
> (2) The district director determines that the merchandise may be admitted into the commerce of the United States, and
>
> (3) All documents relating to the merchandise which are required by law or regulation have been filed.

> *shall not be delivered from customs custody,* except under such bond or other security as may be prescribed by the Secretary of the Treasury to assure compliance with all applicable laws, regulations, and instructions which the Secretary of the Treasury or the Customs Service is authorized, to enforce *until it has been inspected, examined, or appraised and is reported by the appropriate customs officer to have been truly and correctly invoiced and found to comply with the requirements of the laws of the United States* [emphasis added].

See United States v. *Garber,* 626 F.2d 1144, 1155 (3d Cir. 1980) ("customs custody of imported goods continues until the merchandise has been inspected, found to be correctly invoiced, and found to otherwise comply with the laws of the United States"). Customs regulations require that Customs hold imported merchandise until it has been examined. 19 C.F.R. §§ 142.3, 142.7 (1986).[8]

Defendants allege that Customs has not completed its inspection of the merchandise, and that there are conflicting claims to the imported property. The Central Bank of the Philippines has commenced an action in the United States District Court for the District of Hawaii seeking return of the currency. *Republic of the Philippines* v. *Marcos,* Civ. No. 86-0155 (D. Haw.). On March 14, 1986, the United States filed a motion to intervene, to file an answer, and a counterclaim in the nature of an interpleader in that action, in which the United States requests the District Court to determine the lawful owner of the currency and other merchandise currently in the possession of Customs. The Republic of the Philippines and the Asian and Pacific Affairs Subcommittee of the Foreign Affairs Committee of the House of Representatives have formally requested copies of all documents brought into the United States by Mr. Marcos and his party.[9] The purpose of both these requests is, in part, to investigate conflicting claims with respect to the ownership of the property claimed by plaintiffs.

Plaintiffs claim that *Fonseca* v. *Regan,* 734 F.2d 944 (2d Cir. 1984), supports their position that Customs must relinquish the property to them. In that case, plaintiff Fonseca sought to recover possession of a suitcase containing $250,000 misdirected to a New York airport from Bogota, Columbia. Plaintiff had no intent to enter the merchandise into the United States, nor did the United

---

[8] Customs laws and regulations grant Customs broad authority to search and impound merchandise arriving in the United States. *See, e.g.,* 19 C.F.R. §§ 162.5, 162.6.

[9] On March 6, 1986 the Republic of the Philippines through counsel requested that the United States provide "all documents of any kind whatsoever * * * including, but not limited to, asset books, deeds, notes, security instruments, stocks, bonds, any and all negotiable instruments and any and all records of any kind whatsoever." Letter from Mark D. Bernstein to George Roberts, Director, United States Customs Service (Mar. 6, 1986). By diplomatic notes exchanged March 15, 1986, the Republic of the Philippines and the United States entered into an agreement by which the United States agreed to provide the Philippines "with copies of documents requested by it and relevant to its investigation that are now in the possession of U.S. Customs Service and taken into custody in Honolulu on February 26, 1986. It is understood that these documents will be used only for legitimate governmental purposes." The letter from counsel and agreement were provided to the Court as exhibits by defendants at the March 15, 1986 oral argument. *See also* Convention Between the Government of the United States of America and the Government of the Republic of the Philippines with Respect to Taxes on Income, Oct. 1, 1976, Art. 26, T.I.A.S. No. 10417 (contracting parties agree to exchange information "for the prevention of fraud or for the administration of statutory provisions concerning taxes").

States "demonstrate any colorable claim adverse to that of Fonseca, or even the presence of a legitimate individual claimant." *Id.* at 950. In this action the property was submitted to Customs custody for entry into the United States, and there are claims adverse to plaintiffs.

Plaintiffs say Customs would be without authority to hold property even in a case where it believed the property was stolen outside the United States and entered in violation of 18 U.S.C. § 2314 (1982).[10] For the reasons stated above, the Court finds no support for this view.

Plaintiffs also contend that Customs refusal to return the property to plaintiffs violates their rights under the fourth and fifth amendments to the Constitution, and to privacy.

The Court finds there is little likelihood of success with respect to plaintiffs' fourth amendment claim. There is no fourth amendment interest with respect to information voluntarily given to a government agency; such information cannot be subject to unreasonable search and seizure.[11] *See Couch* v. *United States,* 409 U.S. 322, 335 (1973).

Plaintiffs' claim of deprivation of property without due process in violation of the Fifth Amendment is premature. Plaintiff cites as authority *United States* v. *Eight Thousand Eight Hundred and Fifty Dollars ($8,850) in United States Currency,* 461 U.S. 555 (1983). In that case the Supreme Court applied a four part test to determine if the length of time between seizure of property at the border and the initiation of legal process to determine rights in the property violated due process: length of delay, the reason for the delay, assertion of the claimant's right to recover the property, and prejudice to the claimant.[12] Here, the government has held the property less than three weeks. As stated *supra,* Customs says it has not finished inspecting the property, and that there are substantial indications of conflicting claims to the property. Plaintiffs have made only the barest allegation of prejudice in being deprived of use of the property.[13] *See United States* v. *Von Neumann,* 54 U.S.L.W. 4065 (U.S. Jan. 14, 1986).

Plaintiffs present no authority, and the court finds none, which compels Customs to release the imported merchandise to plaintiffs.

---

[10] 18 U.S.C. § 2314 provides in part:

> Whoever transports in interstate or foreign commerce any goods, wares, merchandise, securities or money, of the value of $5,000 of more, knowing the same to have been stolen, converted or taken by fraud * * *
>
> Shall be fined not more than $10,000 or imprisoned not more than ten years, or both.

See *United States* v. *Burger,* 728 F.2d 140 (2d Cir. 1984); *United States* v. *Noe,* 634 F.2d 860 (5th Cir.), *cert. denied,* 454 U.S. 876 (1981).

[11] For this reason, and for reasons discussed *infra,* plaintiffs have no constitutional rights to privacy violated by Customs continued retention of the property.

[12] The Court held that an 18-month delay in bringing forfeiture proceedings was reasonable since the government was diligently processing a mitigation petition and pursuing related criminal proceedings, and the claimant never indicated desire for speedy commencement of civil forfeiture proceedings.

[13] Plaintiffs' counsel alleges the denial of access to the property has caused plaintiffs "serious personal inconvenience and concern for unlawful invasion of their rights in the property." Affidavit of Richard A. Hibey, at ¶6.

The Court holds that plaintiffs have no likelihood of success, at the present time, on their mandamus claim.

2. The Privacy Claim To Enjoin Customs From Releasing Copies of the Property to Third Parties

Turning to plaintiffs' claims that their constitutional privacy rights are violated if Customs releases copies of the property to third parties, the question before the Court is whether plaintiffs assert a constitutionally protected interest in the property. Plaintiff Azurin asserts only that he executed a currency declaration form. Plaintiff Araneta alleges that he executed the entry as an "attorney-in-fact."

"Ordinarily, one may not claim standing * * * to vindicate the constitutional rights of some third party." *Barrows* v. *Jackson,* 346 U.S. 249, 255 (1952). Plaintiffs make no claim that there is some "genuine obstacle" to the third party's assertion of its own rights, *Singleton* v. *Wulff,* 428 U.S. 106, 114–16 (1976), or that the privacy rights of the third party would be "diluted or adversely affected" should that party appear. *Cf. Griswold* v. *Connecticut,* 381 U.S. 479, 481 (1962).

Plaintiffs do not provide any reason other than "convenience" why the party-in-interest, Mr. Marcos, is not a plaintiff in this action.[14]

The Court holds that since the plaintiffs have not asserted any ownership in the property or that they have any personal privacy right that is threatened with violation by Customs, and since they have not shown that they are entitled to assert the constitutional rights of third parties,[15] there is little likelihood that they will succeed on their claim seeking to enjoin release of copies or originals of documents.

---

[14] At oral argument, there was the following colloquy with plaintiffs' attorney:

JUDGE DiCARLO: Are you saying these gentlemen who are acting as attorneys have a privacy interest in the property? Or is their interest to get the property back in their possession?

MR. HIBEY: Their purpose is to get the property back into the lawful possession of their principal, Ferdinand Marcos.

* * * * * * *

JUDGE DiCARLO: My only question is privacy interest; the constitutional rights raised by the plaintiffs. Who has those constitutional rights? Are they personal * * * to the people who have direct interest in the property?

MR. HIBEY: My suggestion to the Court is that they are personal, but not necessarily exclusive, that they have—that there is an umbrella which covers both by virtue of the fact that the principal here is clearly identified. That instead of using a customhouse broker, which is, I understand is not an unusual way for papers to be processed, he simply used individuals within his own retinue.

JUDGE DiCARLO: There are some situations in which a person is unable to present his own privacy claims, raise his own constitutional rights, and things such as that. Is there any reason why the actual owner of the properties in this case is unable or was unable to be a plaintiff in this action and raise the personal right of privacy for himself?

MR. HIBEY: It was only a matter of convenience that caused the papers to be executed in the way that they were executed.

JUDGE DiCARLO: So there was no reason why the owner of the property could not have appeared as a plaintiff, could not have asserted his own privacy rights, and could not have signed an affidavit as to how he would be individually injured, is that correct?

MR. HIBEY: I think that's correct * * *.

Transcript at 18–19.

[15] The Court will not speculate why Mr. Marcos did not submit to the jurisdiction of the Court.

The Public Interest and the Balance of Hardships

Defendants argue that "[i]f the United States reneges on its promise to the new Philippine Government of President Aquino to release to a specially established Philippine commission copies of these documents for purposes of their examination and investigation, the foreign relations of this country with an important and strategically critical Far Eastern nation may be adversely affected." [16] In support of that claim defendants submitted an affidavit by Michael H. Armacost, Under Secretary of State for Political Affairs, describing the importance and extent of the relationship between the Philippines and the United States, the profound changes which have recently occurred in the Philippines, and the importance to the foreign policy of the United States to fulfill the nation's pledge to assist the Aquino government in its investigation of the Marcos assets.

Inherent in plaintiffs' argument is the claim that the public interest is better served by protecting their asserted constitutional privacy rights than by disclosing copies of the documents to third parties.

The Court recognizes that there may be circumstances in which the public interest requires that constitutional rights of individuals outweigh foreign policy concerns. However, since the Court finds that plaintiffs' constitutional rights are not threatened and that plaintiffs may not assert the constitutional rights of a third party, the Court holds that the public interest would be best served by denying the motion.

In view of the Court's finding that each of the above factors favors denial of the motion, the balance of the equities weighs in favor of defendants.

The motion is denied. So ordered.

Court No. 84-2-00252

Before WATSON, *Judge.*

OPINION

[Plaintiffs' motion for judgment on the agency record denied.]

(Decided March 19, 1986)

CRITICAL CIRCUMSTANCES

The court sustains the determinations of the Department of Commerce that criti-

[16] Defendants' Opposition to Plaintiffs' Motion for a Temporary Restraining Order at 25.

cal circumstances existed with respect to the importation of potassium permanganate from the Peoples Republic of China; and further sustains the determination of the International Trade Commission that the circumstances justified the retroactive imposition of antidumping duties in order to prevent the recurrence of material injury.

Brownstein Zeidman and Schomer (*Steven P. Kersner* and *Donald S. Stein* of counsel), for plaintiffs.

Richard K. Willard, Assistant Attorney General, *David M. Cohen*, Director, Commercial Litigation Branch, (*J. Kevin Horgan*, attorney Commercial Litigation Branch); *Berniece A. Browne*, Senior Trial Counsel, Office of the Assistant General Counsel for Import Administration, Department of Commerce; *Carol McCue Veratti*, attorney, Office of the General Counsel, United States International Trade Commission, for defendants.

WATSON, *Judge:* This action challenge agency determinations [1] which gave a retroactive effect to the imposition of antidumping duties on importations of potassium permanganate from the Peoples Republic of China (PRC). To achieve retroactive effect the Commerce Department had to make a final determination that "critical circumstances" existed under the terms of 19 U.S.C. § 1673d(a)(3)[2] and then the International Trade Commission had to make additional finding under 19 U.S.C. § 1673d(b)(4)(A)[3] that retroactive duties were needed to prevent a recurrence of material injury. Both of these determinations are challenged as being unsupported by substantial evidence and otherwise not in accordance with the law.

Normally, a determination that importations are being sold at less than fair value will begin to have an effect only as to those entries of merchandise entered after the date of publication of the notice of the preliminary determination by the Commerce Department. Liquidation of those entries will be suspended and the posting of security for the payment of estimated duty will be ordered in

---

[1] The final determination of the Department of Commerce was published in 48 Fed Reg. 57347.
The final determination of the International Trade Commission was published in 49 Fed Reg. 3148 and USITC Publication 1480 (January 1984).

[2] 19 U.S.C. § 1673d(a).
* * * * * * *
(3) Critical circumstances determinations.—If the final determination of the administering authority is affirmative, then that determination, in any investigation in which the presence of critical circumstances has been alleged under section 1673b(e) of this title, shall also contain a finding of whether—
(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or
(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and
(B) there have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

[3] 19 U.S.C. § 1673d(b)
* * * * * * *
(4) Certain additional findings.—
(A) If the finding of the administering authority under subsection (a)(2) of this section is affirmative, then the final determination of the Commission shall include a finding as to whether the material injury is by reason of massive imports described in subsection (a)(3) of this section to an extent that, in order to prevent such material injury from recurring, it is necessary to impose the duty imposed by section 1673 of this title retroactively on those imports.
* * * * * * *

the manner set out in 19 U.S.C. § 1673b(d).[4] However, in conditions known as "critical circumstances", under the terms of 19 U.S.C. § 1673b(e)(2)[5] the suspension of liquidation and the ultimate obligation to pay antidumping duty can apply to entries of merchandise made during the ninety-day period *prior* to the normal date of suspension of liquidation.

The law provides that if the Commerce Department finds that massive importations have occurred and there is either a history of dumping or actual or constructive knowledge by the importers that the merchandise under investigation is being dumped, then the ultimate determination can affect unliquidated entries made in the expanded, pre-suspension ninety-day period.

The "critical circumstances" which justify the expanded effect of the investigative determination can be determined by the Commerce Department as a preliminary matter under 19 U.S.C. § 1673b(e), or, even if the preliminary determination on that question is negative, can be found as part of the final determination under 19 U.S.C. § 1673d(a)(3).

As a preliminary matter, "critical circumstances" may be found on the basis of belief or suspicion by the Commerce Department that the statutory conditions are present. As a final matter, however, given the standard of judicial review to which it is subjected under 19 U.S.C. §§ 1516a(a)(2)(B)(i) and 1516a(b)(1)(B), the determination must be supported by substantial evidence.

In this case, because there ws no history of dumping of potassium permanganate from the Peoples Republic of China, the final determination depends first, on the existence of massive imports, a fact which is amply supported by substantial evidence, and, second, on a finding that the importers knew or should have known that the merchandise was selling at less than fair value. The latter finding is disputed by plaintiffs.

The determination by the Department of Commerce that importers knew or should have known that the potassium permanganate was being sold at less than fair value was expressed, at 48 Fed. Reg. 57349-50, as follows:

---

[4] 19 U.S.C. § 1673b

* * * * * * *

(d) Effect of determination by the administering authority.—If the preliminary determination of the administering authority under subsection (b) of this section is affirmative, the administering authority—

(1) shall order the suspension of liquidation of all entries of merchandise subject to the determination which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the notice of the determination in the Federal Register.

(2) shall order the posting of a cash deposit, bond, or other security, as it deems appropriate, for each entry for the merchandise concerned equal to the estimated average amount by which the foreign market value exceeds the Untied States price.

* * * * * * *

[5] 19 U.S.C. § 1673b(e)

* * * * * * *

(2) Suspension of liquidation.—If the determination of the adminstering authority under paragraph (1) is affirmative, then any suspension of liquidation ordered under subsection (d)(1) of this section shall apply, or, if notice of such suspension of liquidation is already published, be amended to apply, to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the date on which suspension of liquidation was first ordered.

> . . . After considering all of the circumstances in this industry, we conclude that U.S. importers knew or should have known that potassium permanganate from the PRC was being sold in the United States at less than its fair value. The following factors have led us to that conclusion:
> First, since U.S. importers admitted that the potassium permanganate bought at "competitive prices" in the European market and subsequently imported into the United States was PRC material, they were clearly aware of the price at which potassium permanganate from the PRC, both directly from the PRC and indirectly through Europe, was being sold for in the U.S. and European markets.
> Second, since importers were also aware of pricing of potassium permanganate in the U.S. market place from the two other alternative sources (Carus [the United States producer] and Spain), they were aware of the entire range of pricing in a market place where pricing is a major factor in determining sales.
> Third, since Spain is not a state-controlled economy country and the only other principal producer of the product that exports to the United States, importers knew or should have known, at least generally, what the value of the product is in market economy countries, and thus the minimum likely fair value of the PRC merchandise.
> Fourth, during the period of March through July, 1983, (from Initiation of this investigation), the unit price of potassium permanganate imported into the U.S. from the PRC was 22% less than permanganate imported from Spain (all other sources). Importers should have known how to anticipate our antidumping methodology for Spain. They clearly knew that potassium permanganate from the PRC was being sold well below the Spanish price.
> Fifth, knowing that potassium permanganate from the PRC was priced significantly below that sold by the only other non-U.S. market economy producer (i.e., the most likely source of our fair value standard), importers knew or should have known that the PRC exports were at less than fair value.
> Based on the preceding analysis, we determine that the unique circumstances found in this industry are such that we can impute knowledge of sales at less-than fair value to the importers even though they could not anticipate the exact basis for our fair value determination.

When the conclusions of the Commerce Department are reduced to essentials, the five supporting factors are really one—that the importer knew that the price at which they were importing was 22% below the price of importations from Spain. This is the most concrete and "damaging" piece of knowledge attributed to the importers—the price was 22% below the lowest price at which the merchandise was being sold to the United States.

The question then becomes whether this sort of knowledge, i.e., of price differential alone, is sufficient to establish or impute knowledge on the part of the importer that the product is being

sold at less than fair value. The Commerce Department is concerned that if it cannot make inferences and attribute knowledge of dumping based on knowledge of price differentials, massive injurious imports from state-controlled economies can enter with impunity during the first dumping investigation of a product from those countries.

This would come about because a foreign market value in a country with a state-controlled economy may not be immediately ascertainable under 19 U.S.C. § 1677b(a). This is a circumstance which is recognized in 19 U.S.C. § 1677b(c)[6] in which special indirect methods have been provided for determining the foreign market value of merchandise in state-controlled economies.

Although the issue is not without its difficulties, the court is of the opinion that in a close-knit international market for a fungible commodity, a price differential between the price from a state-controlled economy and the price from a market economy, of the magnitude involved here, is sufficient to alert importers to the fact that the product from the state-controlled economy is being sold at less than fair value. Accordingly, it may fairly be said that, even considering that there is no immediately ascertainable market value in the home market of a state-controlled economy and even absent any knowledge of how fair market value would ultimately be calculated for the country of production, the importers should have known that the price was "too good to be true" and too low to emerge unscathed from administrative scrutiny.

It must be admitted that this situation represents a minimal factual predicate for imputing knowledge to an importer and a considerable allowance of discretion to the agency. But in view of the possibility that otherwise the law could not cope with the first occurrence of massive, dumped imports from a state-controlled economy, it appears to be an unavoidable exercise of agency expertise in an emergency situation. When done with attention to the structure of the international market, the nature of the commodity and the magnitude of the price differential, it is a permissible determination and those factors constitute substantial evidence in these circumstances.

In sum, the determination of the Commerce Department is within the range of discretion it has been accorded, *Consumer Products Div., SCM Corp.* v. *United States,* 753 F.2d 1033 (Fed. Cir.

---

[6] 19 U.S.C. § 1677b

* * * * * * *

(c) State-controlled economies.—If available information indicates to the administering authority that the economy of the country from which the merchandise is exported is State-controlled to an extent that sales or offers of sales of such or similar merchandise in that country or to countries other than the United States do not permit a determination of foreign market value under subsection (a) of this section, the administering authority shall determine the foreign market value of the merchandise on the basis of the normal costs, expenses, and profits as reflected by either—

(1) the prices, determined in accordance with subsection (a) of this section, at which such or similar merchandise of a non-State-controlled-economy country or countries is sold either—

(A) for consumption in the home market of that country or countries, or

(B) to other countries, including the United States; or

(2) the constructed value of such or similar merchandise in a non-State-controlled-economy country or countries as determined under subsection (e) of this section.

1985), and is supported by the degree of evidence which has been found sufficient in such matters. *Atlantic Sugar, Ltd.* v. *United States*, 744 F.2d 1556, 1562 (Fed. Cir. 1984).

Plaintiffs have also challenged the final determination of the International Trade Commission (ITC) on the subject of critical circumstances for failing to separately find a causal link between the massive imports and the material injury.

The statutory language governing the ITC determination reads as follows:

> 19 U.S.C. § 1673d
>
> (b) * * *.
> (4) Certain additional findings.
> (A) If the finding of the administering authority under subsection (a)(2) of this section is affirmative, then the final determination of the Commission shall include a finding as to whether the material injury is by reason of massive imports described in subsection (a)(3) of this section to an extent that, in order to prevent such material injury from recurring, it is necessary to impose the duty imposed by section 1673 of this title retroactively on those imports.

In the opinion of the court, where a finding has been made that imports priced at less than fair value are being knowingly entered in massive quantities during an investigation, the ITC is not required by law or considerations of fairness to isolate the massive quantities and make them the separate subject of an injury determination.

In those circumstances it is sufficient if the ITC concentrates on the capacity of these massive imports to render ineffectual the normal imposition of duties (prospectively from the date of publication of the preliminary determination) and thereby bring about a recurrence of the material injury primarily caused by normal levels of importation.

It must be admitted that the language of 19 U.S.C. § 1673d(b)(4)(A) can be read as requiring that material injury be attributed to the massive imports by themselves, rather than to the entire corpus of normal and massive imports, as was done here. But that reading, although it is possible, does not harmonize with the special purpose of a provision for critical circumstances. In this instance, the clear emergency purpose of the provision justifies a greater than normal flexibility in its interpretation and in the analysis and treatment of massive imports entered during an investigation.

With some effort, it is possible to read this provision as speaking to the material injury caused by both normal and massive imports, with the participation of the massive imports being more as an instrument of recurrence than as an original or separate cause. It is even possible to read this provision as presuming the participation of the massive imports in the material injury caused by the normal

imports and focusing on whether that presumed participation is to an extent which necessitates the retroactive imposition of duty.

These are flexible readings, and the necessary result could have been expressed far more clearly in the statute. What is important however, is that these readings harmonize with the purposes of retroactive duty better than a rigid construction.

On the other hand, a strict interpretation of the language to require a separate injury determination for the massive imports, raises the problem that it may be administratively impossible to measure the actual injurious effect of massive importations entered during the investigation. This might be due to the time limits on the investigation and the possibility that the investigation ends before the normal measurable market response can be ascertained. While the degree of investigative difficulty would not be a factor in the face of a clear legislative requirement, it does influence the interpretation when reasonable alternatives are available.

This result is not unfair because it still requires the application of expertise to evidentiary facts regarding the massive imports, albeit not to the extent required if the massive imports were the subject of a discrete injury investigation. It is the massiveness itself which can be measured and evaluated.

The volume of the massive imports is the crucial subject. Given the underlying knowledge or pattern of dumping during an investigation and the peculiar urgency of the situation, it is sufficient if the ITC finds that the volumes will cause a recurrence of injury if retroactive duty is not imposed.

Given the express legislative intent to deter circumvention of the law by those who would increase imports during the process of investigation, it would seem that the purpose of the additional provision for critical circumstances is to prevent recurrence of the injury already being caused by previous imports. *See,* H. Rep. No. 317, 96th Cong., 1st Sess. 63 (1979).

Massive imports which arrive during the investigation and are found by the Commerce Department to have a history of dumping or to be knowingly bought at less than fair value do not have to be the subject of a separate injury analysis. Their injurious effect, coming on top of previous importations found to be injurious, may be easily and legitimately inferred. As to them, the requirement of additional findings is not meant to complicate the Commission's analysis of causation, but merely to require the Commission to determine whether the extent of massive imports will carry the injury already found to have occurred, beyond its normal duration unless retroactive duties are imposed.

On this subject, there is good reason to credit the expertise of the ITC. If a high degree of deference to the agency is justified anywhere, it is justified in its analysis of massive imports entered with questionable motives during an investigation. Cf. *Matsushita Elec-*

tric Industrial Co., Ltd. v. *United States,* 750 F.2d 924 (Fed. Cir. 1984).

The evidence of record clearly supports the determination that massive importations during the period from April through July 1983 were of such an extent that, in order to prevent the recurrence of material injury, retroactive duties had to be imposed. In April 1983 alone, importations were almost four times greater than in the entire period from April through July 1982. This being the case, the ITC's additional findings were, in these circumstances, supported by substantial evidence.

For the reasons discussed above the court finds that both determinations at issue here were supported by substantial evidence and were otherwise in accordance with the law. Accordingly, plaintiffs' motion for judgment is hereby denied and it is further

ORDERED that the Department of Commerce, International Trade Administration's final affirmative determination of sales at less than fair value of potassium permanganate from the Peoples Republic of China, 48 Fed. Reg. 57347 (December 29, 1983), and the International Trade Commission's final affirmative determination of material injury with respect to potassium permanganate from the Peoples Republic of China, 49 Fed. Reg. 3148 (January 25, 1984), be, and they hereby are, sustained in all respects.

(Slip Op. 86-32)

EAC ENGINEERING DIVISION OF THE EAST ASIATIC CO., INC., PLAINTIFF *v.* UNITED STATES OF AMERICA, DEFENDANT

Court No. 82-1-00096

Before: RE, *Chief Judge.*

SPARK DETECTORS

(Decided March 20, 1986)

Metzger, Shadyac & Schwartz (Carl Schwartz and Wesley K. Caine), for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch *(Florence M. Peterson),* for the defendant.

RE, CHIEF JUDGE: This action is before the Court pursuant to the Court's order of remand dated November 26, 1985, *EAC Engineering Div. of the East Asiatic Co.* v. *United States,* 9 CIT ——, 624 F. Supp. 569 (1985).

The question presented in this case pertains to the proper classification, for customs duty purposes, of certain merchandise imported from the Federal Republic of Germany, and described on the customs invoices as "spark detection systems." The merchandise was classified by the Customs Service as "optical instruments"

under item 712.05 of the Tariff Schedules of the United States (TSUS). Consequently, the merchandise was assessed with duty of 25 per centum ad valorem.

Plaintiff protested this classification, contending that the merchandise was properly classifiable under item 712.15, TSUS, as "Instruments and apparatus for measuring or detecting alpha, beta, gamma, X-ray, cosmic or similar radiations, and parts thereof," with a duty rate of 6.7 per centum ad valorem in 1980 and 7 per centum ad valorem in 1979. Alternatively, plaintiff contended that the merchandise was classifiable under either item 712.49, TSUS, a "basket" provision for electrical measuring and checking instruments, or under items 688.40 or 688.45, TSUS, depending upon the year of importation, as electrical articles not specially provided for.

On the parties' cross-motions for summary judgment, this Court determined that the Customs Service's original classification of the imported "spark detectors" as "optical instruments" under item 712.05, TSUS, was incorrect. *EAC Engineering Div. of the East Asiatic Co.* v. *United States*, 9 CIT ——, 623 F. Supp. 1255, 1261 (1985). Since material issues of fact pertaining to the plaintiff's proposed alternative classifications remained unresolved, the Court remanded the action to the Customs Service. The remand was intended to permit the Customs Service to consider the alternative classifications at the administrative level, and to determine the appropriate classification of the imported merchandise. In order to ensure expeditious resolution of this dispute, the Court retained jurisdiction over the action.

On remand, the Customs Service determined that the imported merchandise was properly classifiable under items 688.40 or 688.45, TSUS, depending upon the year of entry, as electrical articles not specially provided for. Plaintiff has advised the Court by letter that it is "fully satisfied" with Customs determination.

Based upon the Customs Service's determination on remand, and plaintiff's agreement that the imported "spark detectors" should be classified as electrical articles not specially provided for, it is hereby

ORDERED that the Customs Service reliquidate the subject merchandise under either item 688.40 or item 688.45, according to the date of entry.

(Slip Op. 86-33)

YURI FASHIONS CO., LTD., PLAINTIFF *v.* UNITED STATES, DEFENDANT AND AMERICAN FIBER/TEXTILE/APPAREL COALITION, DEFENDANT-INTERVENOR

Court No. 84-12-01807

Before DICARLO, *Judge*.

Plaintiff challenges exclusion of merchandise imported from the Commonwealth of the Northern Mariana Islands (CNMI), an insular possession of the United States.

Applying 19 C.F.R. § 12.130(b), a regulation issued pursuant to the President's authority to regulate textile imports, the Customs Service determined the country of origin of the merchandise was Korea and excluded the merchandise because it was not accompanied by export visas from Korea. Plaintiff says the merchandise is a product of the CNMI pursuant to General Headnote 3(a) of the Tariff Schedules of the United States, and that section 12.130(b) is *ultra vires* as applied to its merchandise. Plaintiff also seeks a declaratory judgment that (1) section 12.130 is invalid as applied to products of the CNMI and (2) a directive by the Chairman of the Committee for the Implementation of Textile Agreements (CITA) excluding some products imported from the CNMI from the application of section 12.130 is *ultra vires*.

Held: General Headnote 3(a) expressly speaks only to the rates of duty for articles imported into the United States from insular possessions. Congress has not limited its delegation of authority to the President to define products of "countries" for textile restraint purposes to exclude from such restraints imports from insular possessions. Plaintiff lacks standing to seek a declaratory judgment (1) that the regulation is invalid as applied to products of the CNMI, since plaintiff's merchandise is a product of Korea, and (2) That the CITA directive is *ultra vires*, since plaintiff fails to allege and facts indicating that it is adversely affected or aggrieved by the directive.

[Defendant's cross-motion for summary judgment granted.]

(Decided March 24, 1986)

Barnes, Richardson & Colburn (Andrew P. Vance and *Michael A. Johnson*) for plaintiff.

Donald C. Woodworth for *amicus curiae* Commonwealth of the Northern Mariana Islands.

Richard K. Willard, Assistant Attorney General, *David M. Cohen*, Director, Commercial Litigation Branch, Civil Division Department of Justice (*Velta A Melnbrencis*) for defendant.

Miller & Chevalier, Chartered (*Donald Harrison*) for defendant-intervenor.

Memorandum Opinion and Order

DiCarlo, *Judge:* Plaintiff challenges the exclusion of sweaters imported from the Commonwealth of Northern Mariana Islands (CNMI) and seeks a declaratory judgment that a regulation, 19 C.F.R. § 12.130(b) (1985),[1] defining textile products of insular possessions of the United States of purposes of quota restraints, is *ultra vires* and void.

Plaintiff's merchandise was denied entry on the grounds it was not accompanied by export visas from the Republic of Korea (Korea), which the United States Customs Service (Customs) maintained was the country of origin of the merchandise, pursuant to 19 C.F.R. § 12.130(b). Plaintiff says its merchandise is a product of the CNMI for all purposes, pursuant to General Headnote 3(a) of the Tariff Schedules of the United States (TSUS), and cannot be excluded from entry as a product of Korea by virtue of 19 C.F.R. §

[1] 19 C.F.R. § 12.130 was published as an interim regulation by T.D. 84-171 Fed Reg. 31248 (August 3, 1984) and as a final regulation by T.D. 85-38, 50 Fed. Reg. 8710 (March 5, 1985). Plaintiff's merchandise was excluded by virtue of the interim regulation. Since plaintiff's merchandise would also be be excluded under the final regulation, which differs, with respect to insular possessions, from the interim regulation only in form, the court considers the final regulation. *See infra*, note.

12.130(b). Plaintiff also argues that regulation is *ultra vires* as applied to the CNMI.

Plaintiff alleges jurisdiction pursuant to 28 U.S.C. §§ 1581(a)[2] 1581(i)(3) (1982), and seeks a declaratory judgment pursuant to 28 U.S.C. § 2201 (1982) and Rule 57 of the Rules of this Court.

The American Fiber/Textile/Apparel Coalition, a coalition of twenty-one American trade associations and unions whose members are involved in production of textiles and textile products, was granted leave to intervene as a party defendant in that part of this action brought under 28 U.S.C. § 1581(i).[3] The CNMI, through its Resident Representative to the United States, was granted leave to appear as *amicus curiae*.

Plaintiff moves, and defendant cross-moves, for summary judgment. The parties agree that no issues of material fact are disputed.

The Court holds that 19 C.F.R. § 12.130(b) does not conflict with General Headnote 3(a).

I. The Exclusion of Plaintiff's Merchandise

In November, 1984 plaintiff attempted to enter a shipment of sweaters processed in the CNMI from components made in Korea. The merchandise was accompanied by a completed Customs Form 3229, certifying that more than fifty percent of the total value of the merchandise was added by materials made and labor performed in the CNMI. Applying 19 C.F.R. § 12.130, Customs determined that the country of origin of the sweaters was Korea.[4] Since the merchandise was not accompanied by export visas from Korea, the merchandise was refused entry.

Plaintiff contends that General Headnote 3(a), TSUS, precludes application of 19 C.F.R. § 12.130 to its merchandise. Plaintiff says that its merchandise is a "product of manufacture" of the CNMI

---

[2] Plaintiff protested the exclusion of its merchandise and demanded action on the protest within 30 days pursuant to 19 C.F.R. § 174.21(b) (1984). Plaintiff brought the action under 19 U.S.C. § 1515(b) (1982) and 28 U.S.C. §1581(a) when no action was taken, and the protest deemed denied, after 30 days.

[3] 28 U.S.C. § 2631(j)(1)(A) (1982) provides that

> Any person who would be adversely affected or aggrieved by a decision in a civil action pending in the Court of International Trade may, by leave of court, intervene in such action, except that—
>
> no person may intervene in a civil action under section 515 * * * of the Tariff Act of 1930 * * *.

Thus intervention is not permitted where the court has jurisdiction under 28 U.S.C. § 1581 (a) over a cause of action to contest the denial of a protest under 19 U.S.C. § 1515.

[4] 19 C.F.R. § 12.130 changed the country of origin requirements for textiles and textile products subject to quantitative restraints. In order for a textile product manufactured in two countries to have the second country as its country or origin for quota purposes, the product must undergo "substantial transformation" in the second country. Section 12.130(b) states in part:

> For the purpose of this section * * * a textile or textile product, subject to section 204, Agricultural Act of 1956, as amended, imported into the customs territory of the United States, shall be a product of a particular foreign territory or country, or insular possession of the U.S., if it is wholly the growth, product, or manufacture of that foreign territory or country, or insular possession. However * * * a textile or textile product, subject to section 204, which consists of materials produced or derived from, or processed in, more than one foreign territory or country, or insular possession of the U.S., shall be a product of that foreign territory or country, or insular possession where it last underwent a substantial transformation. A textile or textile product will be considered to have undergone a substantial transformation if it has been transformed by means of substantial manufacturing or processing operations into a new and different article of commerce.

See Mast Industries, Inc. v. Regan, 8 CIT 214, 596 F. Supp. 1567 (1984) (upholding section 12.130 as within the authority delegated to the President under section 204 of the Agricultural Act of 1956, as amended, 7 U.S.C. § 1854 (1982)).

under General Headnote 3(a) for all purposes, and may not have another country as its country of origin for textile restraint purposes unless so provided for by act of Congress. The Court disagrees.

A. General Headnote 3(a)

By its terms, General Headnote 3(a)[5] regulates only the *duty* paid on imports from insular possessions, such as the CNMI. The headnote is captioned "Rates of Duty" and it expressly speaks only to the "rates of duty" for articles imported into the customs territory of the United States.

The Court agrees with the recent holding of the Court of Appeals for the Ninth Circuit that nothing in the headnote addresses quota or other restrictions:

> Headnote 3(a) applies solely to tariffs and duties * * *. [A]fter examining the common meanings of the words "duty" and "quota," we conclude that "duty" cannot be read to encompass "quotas" * * *. Consequently we hold that that Headnote 3(a) does not apply to quotas, and therefore, that it did not preempt the quota restrictions imposed [on the imported merchandise].

United States v. *Patel*, 762, F.2d 784, 790–91 (9th Cir. 1985). Plaintiff says that *Patel*, in which fraudulent violation of import laws was alleged, turned on very different facts than this case, and that the Ninth Circuit apparently overlooked headnote 6 of schedule 7, part 2, subpart E (setting a quota on timepieces imported from insular possessions), when the Court said that it "can find absolutely no reference to quotas in any part" of the TSUS. 762 F.2d at 791. But neither of these observations provide a reason why the *Patel* Court's interpretation of General Headnote 3(a) should not be followed.

The Court also disagrees with plaintiff's argument that the legislative history of General Headnote 3(a) indicates that Congress intended that provision to define the country of origin of merchandise imported from insular possessions for all purposes.

A tariff preference for goods from all insular possessions of the United States was first enacted as part of the Customs Simplification Act of 1954, Pub. L. 768, 68 Stat. 1136, 1139, § 401 (enacted as

---

[5] At the time of the attempted entry, in 1984, General Headnote 3(a) provided, in part:

Rates of Duty

(a) *Products of Insular Possessions.*

(i) Except as provided in headnote 6 of schedule 7, part 2, subpart E, and except as provided in headnote 3 of schedule 7, part 7, subpart A, *articles imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules, except that all such articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 50 percent of their total value* (or more than 70 percent of their total value with respect to watches and watch movements), coming to the customs territory of the United States directly from any such possession, and all articles previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund, or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, *are exempt from duty* [emphasis added].

section 301 of the Tariff Act of 1930), which stated in pertinent part:

> There shall be levied, collected, and paid upon all articles coming into the United States from any of its insular possessions * * * the *rates of duty* which are required to be levied, collected, and paid upon like articles imported from foreign countries; *except that all articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the United States, or of both, which do not contain foreign materials to the value of more than 50 per centum of their total value* * * * shall be admitted *free of duty* upon compliance with such regulations as to proof of origin as may be prescribed by the Secretary of the Treasury [emphasis added].

According to its legislative history, this provision was intended to

> provide for the *duty status* of importations from the insular possessions of the United States. The new section would provide that all articles imported from an insular possession of the United States * * * shall be dutiable at the same rates as are importations from foreign countries, except those which (1) are entirely of native origin or (2) *are manufactured in such possession and do not contain over 50 percent of foreign materials* * * *.

S. Rep. No. 2326, 83rd Cong., 2d Sess. (1954) *reprinted in,* 1954 U.S. Code Cong. & Ad. News 3, 3900, 3905 (emphasis added).

General Headnote 3(a) was enacted as part of the Tariff Schedules of the United States in 1962, by the Tariff Classification Act of 1962, Public Law 87-456, 76 Stat. 72. The *Tariff Classification Study* published by the Tariff Commission stated that:

> General headnotes 3 and 4 prescribe the conditions obtaining with respect to the *"Rates of duty"* columns numbered 1 and 2 in the proposed revised schedules. In doing so, general headnote 3 covers the substance of the special treatment presently accorded to products of insular possession (under par. 301 of the Tariff Act of 1930, as amended) * * *.

Submitting Report, Vol. 1, p. 17 (emphasis added).[6]

In 1966, Congress considered the tariff status of products of insular possessions in enacting headnotes to Schedule 7 of the TSUS to establish quotas on importation of timepieces and a special country of origin rule for buttons from insular possessions. The legislative history of Pub. L. 89-805, providing for the timepiece quota, states, in part:

> Under paragraph (a) of general headnote 3 of the TSUS articles, *the growth or product of a U.S. insular possession* outside

[6] *The Tariff Classification Study* is considered an important source of legislative history of the Tariff Schedules. *United States v. Andrew Fisher Cycle Co.*, 57 CCPA 102, 106-07, C.A.D. 986, 426 F.2d 1308, 1311 (1970); *see* 2 R. Sturm, *Customs Law and Administration*, § 52.2, 10-13 (1985) (citing cases).

> the customs territory of the United States, *are free of duty when imported into the U.S. customs territory if they do not contain foreign materials to the value of more than 50 percent of their total value.*

S. Rep. 1679, 89th Cong., 2d Sess. (1966), *reprinted in*, 1966 U.S. Code Cong. & Ad. News 4389, 4390 (emphasis added). The legislative history of Pub. L. 89-809, providing for the country of origin rule for buttons, describes General Headnote 3(a) as providing an "advantage" for goods from insular possessions.

> This advantage consists of *duty-free treatment* for articles coming from the insular possessions *If they meet two simple tests.* First, the article arriving from the prossession must have a value at least double the value of the foreign materials contained in it. *Second, it must have been subjected to some manufacturing or processing operation in the possession.*

S. Rep. 1600, 89th Cong., 2d Sess. (1966), *reprinted in* 1966 U.S. Code Cong. & Ad. News 4398, 4401 (emphasis added).[7]

From the legislative history of General Headnote 3(a), the Court draws two conclusions. First, nothing in the legislative history of General Headnote 3(a) known to the Court indicates that the headnote was intended to regulate anything other than rate of duty. *See Patel, supra.* Second, the legislative history indicates that Congress intended that General Headnote 3(a) grant duty-free treatment to merchandise which (1) is a growth, product or manufacture of an insular possession and (2) satisfies a specified percentage of its value derived from the insular possession. Congress has never specified how merchandise is to be defined as a growth, product or manufacture of an insular possession.[8] Congress presumably left definition of these terms to the Executive branch.

Plaintiff points to the quotas Congress enacted on timepieces imported from insular possessions, apparently to argue that Congress has reserved for itself authority to enact quotas on merchandise which met the rule of origin stated in General Headnote 3(a). But the fact that Congress has enacted quotas with respect to one kind

---

[7] Congress also amended General Headnote 3(a) in 1974 and 1983 to implement the Generalized System of Preferences and the Carribean Basin Initiative, respectively. The Trade Act of 1974, Pub. L. 98-618, 88 Stat. 1978, § 502; Caribbean Basin Economic Recovery Act, Pub. L. 98-67, 97 Stat. 392, § 214(a)(1)(B). Both enactments altered the foreign content permissible with respect to duty-free entry of goods from insular possessions. Neither enactment is accompanied by any indication that Congress created or approved any particular administrative test for "product" of an insular possession.

[8] *Amicus curiae* argues that General Headnote 3(a) establishes a single "value added" test, referring to legislative history of the Tariff Act of 1909, Ch. 6, 35 Stat. 11, § 5 (1909), and the Tariff Act of 1930, Ch. 497, 46 Stat. 590, § 301 (1930), which provided for duty-free treatment for imports from the Philippine Islands.

The two-prong test was established in the Customs Simplification Act of 1954, the first legislation to permit duty-free entry of imports from the CNMI. As Customs Ruling CLA-2 CO:R:CV:G 553239 PR, issued to plaintiff after promulgation of 19 C.F.R. § 12.130, recognizes, Customs had an established and uniform practice of defining "products" of insular possessions, a requirement that was additional to the value added test. In a previous ruling, Customs described that practice as follows:

> Whether an article is a "product" of an insular possession within the meaning of General Headnote 3(a), TSUS, depends upon whether substantial processing operations are performed in the insular possession. Customs has consistently ruled that Headnote 3(a) requires more than merely "some processing." Articles imported into the insular possession must undergo extensive operations to satisfy the requirement that the merchandise be the growth or production of the possession.

On August 2, 1985 Customs proposed a change in this established and uniform practice in order to conform the definition of product under General Headnote 3(a) with the country of origin rule of section 12.130(b). 50 Fed. Reg. 3193.

of merchandise hardly argues that it has not delegated to executive branch authority to adopt other country of origin rules for non duty purposes.

B. 19 C.F.R. § 12.130 and the CNMI

Plaintiff and *amicus curiae* argue at length that Customs had no authority to exclude products imported from the CNMI under 19 C.F.R. § 12.130 since (1) the source of executive power to regulate textile imports is section 204 of the Agricultural Act of 1956, as amended, 7 U.S.C. § 1854 (1982),[9] (2) that statute grants the President authority to issue regulations governing importation of products of "countries", and (3) the CNMI is not a country, but an insular possession in commonwealth status with the United States.[10]

But, plaintiff's merchandise was excluded because it was determined to be a product of *Korea,* not the CNMI. The President has been delegated broad authority under section 204 to negotiate textile restraint agreements with other nations, and to order the promulgation of regulations to carry out such agreements. *See American Association of Exporters and Importers—Textile and Apparel Group* v. *United States,* 751 F.2d 1239 (Fed. Cir. 1985). Pursuant to this authority, the United States entered into an agreement with Korea limiting imports of textile products from that country into the United States, and the President ordered 19 C.F.R. § 12.130 promulgated to prevent the circumvention and frustration of such agreements. *See* Exec. Order No. 12475, 49 Fed. Reg. 19955 (May 11, 1984). Plaintiff does not question the President's authority to negotiate such an agreement with Korea, or to order the promulgation of section 12.130 to carry out such agreements. *See Mast Industries, Inc.* v. *Regan,* 8 CIT 214, 596 F. Supp. 1567 (1984); *American Association of Exporters and Importers—Textile and Apparel Group* v. *United States,* 751 F.2d 1239 (Fed. Cir. 1985).

---

[9] Section 204 states in part:

> The President may, whenever he determines such action appropriate, negotiate with representatives of *foreign governments* in an effort to obtain agreements limiting the export from such countries and the importation into the United States of any agricultural commodity or product manufactured therefrom or textiles or textile products, and the President is authorized to issue regulations governing the entry or withdrawal from warehouse of any such commodity, product, textiles, or textile products to carry out any such agreement. *In addition, if a multilateral agreement has been or shall be concluded under the authority of this section among countries accounting for a significant part of world trade in the articles with respect to which the agreement was concluded, the President may also issue, in order to carry out such an agreement, regulations governing the entry or withdrawal from warehouse of the same articles which are the products of countries not parties to the agreement* [emphasis added].

[10] Since 1947 the United States has administered the Northern Mariana Islands as part of the Trust Territory of the Pacific Islands under a United Nations Trusteeship Agreement. Trusteeship Agreement for the Former Japanese Mandated Islands, 61 Stat. 3301, T.I.A.S. No. 1665, 8 U.N.T.S. 189. Under the Trusteeship Agreement, Art. 3, the United States, as Administering Authority has:

> full powers of administration, legislation, and jurisdiction over the Territory subject to the provisions of this Agreement, and may apply to the Trust Territory, subject to any modifications which the Administering Authority may consider desirable, such of the laws of the United States as it may deem appropriate to local conditions and requirements.

Article 8, § 4, of the Trusteeship Agreement gave the United States power to negotiate and conclude treaties and agreements with other nations on behalf of the CNMI.

The Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States, Pub. L. 94-241, 90 Stat. 263, (1976) printed at 48 U.S.C. § 1681, note (1982), was approved by act of Congress on March 24, 1976. Article 1, section 101 of the Covenant, provides: "The Northern Mariana Islands upon termination of the Trusteeship Agreement will become a self-governing commonwealth to be known as the 'Commonwealth of the Northern Mariana Islands', in political union with and under the sovereignty of the United States of America."

Plaintiff contends that Congress has limited its delegation of authority to the President under section 204 to define products of "countries" for textile restraint purposes to excluding from such restraints products subject to duty-free treatment under General Headnote 3(a). But the Court finds nothing in the legislative history of General Headnote 3(a) or section 204 which requires such an interpretation of these statutes. General Headnote 3(a) provides only for duty-free treatment for products of insular possessions. It is not impermissible for section 12.130(b), defining products for purposes of quantitative restraints on textiles, to affect products imported from insular possessions.

In effect, the country of origin of the merchandise was Korea for textile restraint purposes, and may have been the CNMI for duty and marking purposes.[11] This situation may be awkward, but there is no violation of General Headnote 3(a).

II. The Declaratory Judgment

Plaintiff asks for a declaratory judgment in several paragraphs in its complaint.[12] Plaintiff seems to request that the Court declare *ultra vires* and void (1) section 12.130(b) on its face and as applied (a) to plaintiff's merchandise; (b) to future shipments of plaintiff's merchandise; and (c) to "textile articles from" the CNMI; and (2) the notice of the Chairman of the Committee for the Implementation of Textile Agreements, limiting to 70,000 dozen the number of sweaters that may be imported from the CNMI without application of section 12.130 during the period November 1, 1984 to October 31, 1985.

Plaintiff seeks relief under the Declaratory Judgment Act, 28 U.S.C. § 2201 (1982).[13] The Customs Court Act of 1980, § 301, 28

---

[11] Since the merchandise was not entered, it was not assessed a rate of duty.

[12] Plaintiff's complaint does not set forth separate causes of action. Plaintiff requests declaratory relief in the following numbered paragraphs:

14. * * *. Plaintiff seeks a declaratory judgment that 19 CFR § 12.130, as applied to the imported merchandise and to future importations of textile articles from the Commonwealth of the Northern Mariana Islands, is an *ultra vires* Executive Act, contrary to statute, and void.

27. By Notice published at 50 Fed. Reg. 8650-51, March 4, 1985, the Chairman of the Committee for the Implementation of Textile Agreements, purports to permit a quantity of sweaters, not to exceed 70,000 dozen during the period November 1, 1984 through October 31, 1985, to enter the United States without application of 19 CFR 12.130, upon certification of the Government of the Commonwealth of the Northern Mariana Islands, pursuant to section 204, Agricultural Act of 1956, as amended. The provision is termed an "arrangement" and not an agreement.

28. Any arrangement or agreement propounded by the Executive Departments of the United States and the Commonwealth of the Northern Mariana Islands cannot be premised upon section 204, Agricultural Act of 1956, as amended, 7 U.S.C. 1854. Any such arrangement or agreement does not conform to said section and exceeds the power delegated thereby to the Executive by the Congress of the United States. Judgment is sought declaring the law in the premises.

37. 19 CFR 12.130 in so far as it purports to limit the importation of products of the Northern Mariana Islands by criteria not enunciated by the Congress of the United States in General Headnote 3(a), TSUS, in the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States, and in the legislation passed by the Congress of the United States in furtherance thereof, is a regulation beyond the power of the Executive to adopt. Judgment is sought declaring any such criteria contrary to law and void.

42. The determination of the country of origin of the imported merchandise upon the basis of 19 CFR 12.130 is contrary to law, since 19 CFR 12.130 is without statutory basis as applied to the insular possessions of the United States, and particularly to the Commonwealth of the Northern Mariana Islands. Judgment is sought declaring said regulation, as amended, adopted, and published on March 5, 1985 at 50 Fed. Reg. 8723-25, contrary to law and unenforceable in these respects.

[13] 28 U.S.C. § 2201 (1982) provides that "[i]n the case of actual controversy within its jurisdiction * * * any court of the United States * * * may declare the rights and other legal relations of any interested party seeking such declaration * * *."

U.S.C. § 2643(c)(1) (1982), creating the Court of International Trade, specifically granted the Court authority to "order any * * * form of relief that is appropriate in a civil action, including * * * declaratory judgments.[14] Although the Court has considered its jurisdiction to issue declaratory judgments under 28 U.S.C. § 1581(h) (1982),[15] *see 718 Fifth Avenue Corp.* v. *United States*, 7 CIT 195 (1984), apparently there has been no judicial opinion discussing the Court's authority to issue declaratory judgments under 28 U.S.C. § 2643(c)(1) or 28 U.S.C. § 2201.

Analyzing the Declaratory Judgment Act, the Supreme Court has been clear that "[t]he requirements for a justiciable case or controversy are no less strict in a declaratory judgment proceeding than in any other type of suit * * *. This court is without power to give advisory opinions * * *. It has long been its considered practice not to decide abstract, hypothetical or contingent questions." *Alabama Federation of Labor* v. *McAdory*, 325 U.S. 450, 461 (1945). The Court therefore will examine each issue with respect to which plaintiff requests declaratory judgment to determine whether it presents "a real, substantial controversy between parties having adverse legal interests, [and is] a dispute definite and concrete, not hypothetical or abstract." *Babbit* v. *United Farm Workers National Union*, 442 U.S. 289, 297-98 (1979).

Plaintiff concedes that section 12.130(b) validly regulates products of "countries". The Court has decided that plaintiff's merchandise was lawfully excluded pursuant to section 12.130(b) as a product of Korea. *See* pages 4-15, *supra*. Thus the Court has already held section 12.130(b) valid as applied to plaintiff's merchandise, and, by extension, future shipments of similar merchandise.

Plaintiff also challenges reference in section 12.130(b) to "products * * * of insular possessions" and application of the regulation to "products" of the CNMI.

An action under 19 U.S.C. § 1581(i) may be brought "by any person adversely affected or aggrieved by agency action within the meaning of section 702 of title 5." 28 U.S.C. § 2631(i) (1982). But plaintiff has not alleged that it is adversely affected or aggrieved by the regulation of products of insular possessions, since plaintiff's merchandise is a product of Korea and not the product of an insular possession. The Court may not issue a declaratory judgment "advising what the law would be on a hypothetical state of facts." *Aetna Life Ins. Co. of Hartford, Conn.* v. *Haworth*, 300 U.S. 227, 241 (1937).

---

[14] The Customs Court lacked power to grant equitable relief, and declaratory judgments sound in equity. *Alberta Gas Chemicals, Inc.* v. *Blumenthal*, 82 Cust. Ct. 77, 88, C.D. 4792, 467 F. Supp. 1245, 1254 (1979).

[15] 19 U.S.C. § 1581(h) provides that the Court

> shall have exclusive jurisdiction of any civil action commenced to review, prior to the importation of the goods involved, a ruling issued by the Secretary of the Treasury, or a refusal to issue or change such a ruling, relating to classification, valuation, rate of duty, marking, restricted merchandise, entry requirements, drawbacks, vessel repairs, or similar matters, but only if the party commencing the civil action demonstrates to the court that he would be irreparably harmed unless given an opportunity to obtain judicial review prior to such importation.

Plaintiff also lacks standing, on the present record, to challenge the directive of the Chairman of the Committee for the Implementation of Textile Agreements (CITA) to Customs, which permits 70,000 dozen sweaters to be imported from the CNMI without application of section 12.130 during the period November 1, 1984 to October 31, 1985.[16] Nothing in plaintiff's complaint, or in its briefs on the pending motions, alleged any facts to indicate that plaintiff was or would be adversely affected or aggrieved by the CITA directive.[17]

The Court holds that section 12.130(b) is valid as applied to plaintiff's merchandise, and that plaintiff lacks standing to claim that the regulation is invalid as applied to products of the CNMI or to challenge the CITA directive excepting 70,000 dozen sweaters imported from the CNMI.

III. Conclusion

The Court holds that General Headnote 3(a) of the TSUS regulates only duty paid on imports from insular possessions and does not define the country of origin of merchandise imported from insular possessions for all purposes; that plaintiff's merchandise was lawfully excluded pursuant to section 12.130(b) as a product of Korea; and that plaintiff lacks standing to challenge (1) section 12.130 as applied to products of insular possessions and (2) the CITA directive.

Defendant's motion for summary judgment is granted. So ordered.

---

[16] Plaintiff challenges the directive on two grounds. First, it says that the Executive, and his delegee CITA, have no authority under section 204, or any other law, to impose quotas on goods imported from insular possessions. Second, plaintiff says that under the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States, imports from the CNMI are "subject to the same treatment as imports from Guam", article 603(c), and that since the number of sweaters that may be imported from Guam, without application of section 12,130 during the period is 160,000, the directive limiting CNMI imports is contrary to law.

[17] The Court could consider a motion under Rule 59 of the Rules of this Court if plaintiff shows it is adversely affected or aggrieved by the CITA directive.

(T.D. 86-73)

Decision on Domestic Interested Party Petition Concerning Tariff Treatment of Hook and Eye Tabs Incorporated in Brassieres

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final decision.

SUMMARY: By a previous Federal Register notice, the public was advised that Customs had received a petition submitted on behalf of several domestic interested parties with respect to the tariff treatment of hook and eye tabs incorporated in imported brassieres. The metal hooks and eyes are manufactured and attached to continuous textile strips in the Philippines, imported into the U.S. duty-free under the Generalized System of Preferences and further processed into individual hook and eye tabs which are then exported and assembled abroad into finished brassieres. The petitioners contended that when the finished brassieres are imported, Customs is incorrectly excluding the value of the hook and eye tabs, and that no allowances should be made for the value of the tabs in the duty assessed on the brassieres because the processing in the U.S. is not sufficient to transform the strips into products of the U.S.

After further review of the matter, and consideration of the comment received in response to the notice, Customs agrees with the petitioners that these operations are not sufficient to transform the imported hook and eye tabs into domestic products. Accordingly, when the finished brassieres are imported into the U.S., the value of the hook and eye tabs will not be excluded from the dutiable value of the brassieres into which they were assembled.

EFFECTIVE DATE: May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Earl Martin, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pursuant to § 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), and Part 175, Customs Regulations (19 CFR Part 175), a domestic interested party petition was filed with Customs concerning the tariff treatment of hook and eye tabs incorporated in imported brassieres. The petitioners are manufacturers and producers of metal hook and eye components which are sewn by machine onto textile strips. These strips are placed on reels and then fed into sealing machines which sever the strips into individual tab units. After heat-sealing, these tab units are ready for incorporation into brassieres.

The imported merchandise is produced using nearly identical methods. However, unlike the domestically-produced merchandise which is produced in one location, the U.S., the imported merchandise is completed in two locations. The textile strips with the hooks and eyes attached are manufactured and produced in the Philippines. These strips are then imported into the U.S. where they are currently classified under the dutiable provision for "Hooks and eyes," in item 745.60, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202). However, these strips are eligible for duty-free treatment under the Generalized System of Preferences (GSP) provided for in Title 5 of the Trade Act of 1974, as amended (19 U.S.C. 2461 et seq.). The GSP provides that when an eligible article is imported into the customs territory of the U.S. directly from a country, territory, or association of countries listed in General Headnote 3(c)(i), TSUS, it shall receive duty-free treatment, unless excluded. These strips of uncut hook and eye tabs are being imported from the Philippines which appears on the GSP list of designated beneficiary developing countries whose articles receive duty-free treatment from the U.S. Accordingly, no duty is paid on these articles when they are imported.

Once in the U.S., these strips of hook and eye tabs are then cut into individual tab units, heat-sealed, then exported and assembled abroad into finished brassieres. The finished brassieres are then imported into the U.S. under the provisions for "Articles assembled abroad in whole or in part of fabricated components, the product of the United States, which (a) were exported in condition ready for assembly without further fabrication, (b) have not lost their physical identity in such articles by change in form, shape, or otherwise, and (c) have not been advanced in value or improved in condition abroad except by being assembled and except by operations incidental to the assembly process such as cleaning, lubricating, and painting * * *," in item 807.00, TSUS. The duty on these articles is based on the full value of the imported article, less the cost or value of any fabricated components which are products of the U.S. In Customs Ruling #053121 M, dated November 7, 1977, Customs determined that cutting and heat-sealing imported hook and eye

strips in the U.S. into individual hook and eye tab units substantially transforms the strips into products of the U.S. Since these completed tabs are considered to be products of the U.S. for purposes of item 807.00, TSUS, their value is excluded from the dutiable value of the imported brassieres.

The petitioners contended that this previous Customs ruling is erroneous. It is their view that hook and eye strips of foreign origin that are imported into the U.S. and merely cut and heat-sealed into individual tabs are not substantially transformed into products of the U.S. Accordingly, they claimed that the cost or value of the tabs should not be excluded from the dutiable value of the brassieres imported under item 807.00, TSUS.

Pursuant to § 175.21(a), Customs Regulations (19 CFR 175.21 (a)), before making a determination on this matter, Customs published a notice in the Federal Register on September 26, 1985 (50 FR 39067), inviting written comments from interested parties on the classification issue. In response, only one comment was received. The commenter agreed with the petitioners. Accordingly, after consideration of the petitioners' views and those of the commenter, and after further review of the matter, Customs has determined that hook and eye strips of foreign origin that are imported into the U.S. and merely cut and heat-sealed into individual tabs are not substantially transformed into products of the U.S. Therefore, after the effective date of this decision, the cost or value of the tabs will not be excluded from the dutiable value of the brassieres imported under item 807.00, TSUS, and Customs Ruling #053121 M, dated November 7, 1977, will be rescinded.

AUTHORITY

This notice is published in accordance with § 516(b), Tariff Act of 1930, as amended (19 U.S.C. 1516(b)), and § 175.21(a), Customs Regulations (19 CFR 175.21(a)).

Tuna Fish—Tariff Rate Quota

The tariff-rate quota for the Calendar Year 1986, on tuna classifiable under item 112.30, Tariff Schedules of the United States (TSUS).

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Announcement of the quota quantity for tuna for Calendar Year 1986.

SUMMARY: Each year the tariff-rate quota for tuna fish described in item 112.30, TSUS, is based on the United States pack of canned tuna during the preceding calendar year.

EFFECTIVE DATE: The 1986 tariff-rate quota is applicable to tuna fish entered, or withdrawn from warehouse, for consumption during the period January 1 through December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Karen L. Cooper, Acting Quota Program Manager, Admissibility Requirements Section, Commercial Compliance Division, Office of Commercial Operations, U.S. Customs Service, Washington, D.C. 20229 (202-566-8592).

It has now been determined that 81,092,100 pounds of tuna may be entered for consumption or withdrawn from warehouse for consumption during the Calendar Year 1986, at the rate of 6 percent ad valorem under item 112.30, TSUS. Any such tuna which is entered, or withdrawn from warehouse, for consumption during the current calendar year in excess of this quota will be dutiable at the rate of 12.5 percent ad valorem under item 112.34, TSUS.

(QUO-2-CO:C:C:A)

Dated: April 4, 1986.

WILLIAM VON RAAB,
Commissioner of Customs.

(T.D. 86-75)

Recordation of Trade Name: "CRYOMEC, INC."

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of recordation.

SUMMARY: On September 25, 1985, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "CRYOMEC, INC." was published in the Federal Register (50 FR 38939). The notice advised that before final action was taken on the application, consideration would be given to any relevant data, views, or arguments, submitted in opposition to the recordation and received not later than November 25, 1985.

Stremikon Corporation, a Michigan corporation, commented in opposition to recordation of the trade name, citing concern that "CRYOMEC, INC." is confusingly similar to Stremikon Corporation's "CRYO-MED" trademark registered on the Principal Register of the United States Patent and Trademark Office (Reg. No. 1,068,060) used for refrigerator installations and parts thereof. Cryomec, Inc. is the owner of the registered and recorded "CRYOMEC IN DESIGN" service mark (Reg. No. 1,228,721).

We find that the two marks lawfully co-exist. Therefore, genuine articles bearing the "CRYO-MED" trademark shall not be seized or detained as confusingly similar to "CRYOMEC, INC."

Accordingly, as provided in section 133.14, Customs Regulations (19 CFR 133.14), the name "CRYOMEC, INC." is recorded as the trade name used by Cryomec, Inc., a corporation organized under the laws of the State of California, located at 1265 North Kraemer Boulevard, Anaheim, California 92806. The trade name is used in connection with the following goods, manufactured in the United States: pumps, particularly reciprocating and centrifugal pumps for cryogenic liquids, cryogenic vaporizers, and conversion systems for converting cryogenic liquids to a gas, and related equipment, including heat exchangers.

EFFECTIVE DATE: April 11, 1986.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

Dated: April 8, 1986.

DONALD W. LEWIS,
Director,
Entry Procedures and Penalties Division.

U.S. Customs Service

Proposed Rulemaking

19 CFR Part 101

Proposed Consolidation of New Orleans, Gramercy, and Baton Rouge, Louisiana, Customs Ports for Marine Purposes

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed limited consolidation of ports.

SUMMARY: This document proposes to consolidate the ports of entry of New Orleans, Gramercy, and Baton Rouge, Louisiana, for marine purposes only. This change, if adopted, would enable Customs to obtain more efficient use of its personnel, facilities, and resources. It would eliminate duplication of port functions and permit better control of staffing resources without impairing services to area businesses or the general public. Moreover, it would simplify vessel entry and clearance procedures and reduce expenses and paperwork for all parties involved thereby enabling Customs to provide better and more economical service to carriers, importers, and the public.

DATE: Comments must be received on or before June 9, 1986.

ADDRESS: Written comments (preferably in triplicate) may be addressed to, and inspected at, the Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Operational Aspects: Richard C. Coleman, Office of Inspection (202-566-8157). Legal Aspects: Donald H. Reusch, Carriers, Drawback and Bonds Division (202-566-5732), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

The Customs Service field organization currently consists of seven geographical regions further divided into districts, with ports of entry within each district. Customs ports of entry are locations

(seaports, airports, or land border ports) where Customs officers or employees are assigned to accept entries of merchandise, collect duties, clear passengers, vehicles, vessels, and aircraft, examine baggage, and enforce the Customs and related laws.

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, Customs is proposing to consolidate, for marine purposes only, the ports of entry of New Orleans, Gramercy, and Baton Rouge, Louisiana, located in the New Orleans, Louisiana, Customs district in the South Central Region.

Inasmuch as these three ports are located within approximately 60 miles of one another on the Mississippi River and perform similar services, it was estimated that the proposed consolidation would significantly reduce expenses without impairing Customs ability to provide services to area businesses or to the general public.

Under this proposal, the laws and regulations administered and enforced by Customs relating to the entry of merchandise would continue to apply at the ports of New Orleans, Gramercy, and Baton Rouge, with each of these ports retaining its port code as well as its current geographical limits. However, the three ports would be considered to be one port for the purposes of the navigation laws. All of the requirements prescribed by the navigation laws administered and enforced by Customs, such as reporting the arrival and making formal entry of vessels arriving at the consolidated marine port from a foreign or another U.S. port (depending upon the vessel's nationality); and obtaining a permit to proceed between the consolidated port and other U.S. ports, would have to be complied with, as is now the case in existing consolidated ports.

It is anticipated that the proposed consolidation also will result in reducing penalties incurred under the navigation laws if carriers fail to enter and properly clear merchandise being shipped in a residue cargo movement within the consolidated marine port (i.e., the ports of New Orleans, Gramercy, and Baton Rouge), and will reduce paperwork for carriers, importers, and Customs, because of the reduction of penalty cases.

If this proposal is adopted, there would be no change in the current geographical limits of each port. However, it will be necessary to amend the list of Customs regions, districts, and ports of entry set forth in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), to reflect the consolidation of these ports for the purposes of the navigation laws.

Executive Order 12291

Because this proposal related to the organization of Customs, it is not a regulation or rule subject to E.O. 12291.

REGULATORY FLEXIBILITY ACT

It is certified that the provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604), are not applicable to this proposal because it will not have a significant economic impact on a substantial number of small entities.

Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although the proposal may have a limited effect upon some small entities in the affected areas, it is not expected to be significant because changes in the Customs field organization in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

LISTS OF SUBJECTS IN 19 CFR PART 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

PART 101—GENERAL PROVISIONS

PROPOSED AMENDMENT TO THE REGULATIONS

If the proposed consolidation of the ports of New Orleans, Baton Rouge, and Gramercy, Louisiana, for the purposes of the navigation laws, is adopted, the list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), will be amended as follows:

In the South Central Region—New Orleans La., under the column headed "Name and headquarters", the following phrase would be added under the listing "New Orleans, La."

> "(The ports of New Orleans, Baton Rouge, and Gramercy, consolidated for purposes of the navigation laws. See T.D. 86- ——
> 51 FR ——, ——— 1986.)"

COMMENTS

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

AUTHORITY

This change is proposed under 19 U.S.C. 66 and 1624 as well as the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR, 1949–1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101–5 (47 FR 2449).

DRAFTING INFORMATION

The principal author of this document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: March 14, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

U.S. Court of Appeals for the Federal Circuit

(Appeal No. 86-676)

MAST INDUSTRIES, INC., APPELLEE *v.* UNITED STATES, APPELLANT

Veronica A. Perry, Civil Division, Department of Justice, of New York, New York, argued for appellant. With her on the brief were *Richard K. Willard*, Assistant Attorney General, *David Cohen*, Director and *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office.

Michael P. Maxwell, Greenfield, Desiderio, Lebowitz & Silverman, of New York, New York, argued for appellee. With him on the brief was *Steven P. Florsheim*.

Appealed from: U.S. Court of International Trade.

Judge DICARLO.

(Appeal No. 86-676)

MAST INDUSTRIES, INC., APPELLEE *v.* UNITED STATES, APPELLANT

(Decided April 1, 1986)

Before BALDWIN, NIES, and ARCHER, *Circuit Judges*.

BALDWIN, *Circuit Judge*.

This appeal is from a decision of the United States Court of International Trade holding that a sleepshirt was designed, manufactured, marketed, and used as nightwear, and an order directing the U.S. Customs Service to permit entry of the merchandise under Item 384.5226 of the Tariff Schedules of the United States.

Appellant's arguments are adequately treated in the lower court's opinion No. 85-114, dated October 28, 1985. We affirm on the basis of that opinion.

HERAEUS-AMERSIL, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 82-4-00525

Before CARMAN, *Judge.*

MEMORANDUM OPINION

[Judgment for defendant.]

(Decided March 26, 1986)

Fitch, King and Caffentzis (*Richard C. King* and *Peter Fitch*) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman,* Attorney in Charge, International Trade Field Office, Commercial Litigation Branch, Civil Division (*Barbara Epstein*) for the defendant.

CARMAN, *Judge:* This case involves the proper tariff classification of "bell jars," otherwise described by plaintiff as "large, tubular articles, made of fused silica," with "[o]ne end * * * closed, in approximately hemispherical shape, and the other * * * open." The United States Customs Service (Customs) classified the merchandise under item 548.05, Tariff Schedules of the United States (TSUS), as articles of glass, other than tubes or tubing, not specially provided for. Plaintiff claims that the merchandise is more specifically classified under item 548.01, TSUS, as glass tubes.

Following are the relevant tariff provisions:

	Schedule 5, Part 3, Subpart D:	
	Articles not specially provided for, of glass:	
	Tubes and tubing with ends processed:	
[Claimed under:]		
548.01	Containing over 95 percent silica by weight.....	7% ad val.[1] 6.7% ad val. 6.4% ad val.

151-377 O - 86 - 2

*	*	*	* * * * *
[Classified under:]			
548.05	Other		12.5% ad val.
			11.8% ad val.
			11.0% ad val.

[1] As modified by T.D. 68-9, the rate of duty depends upon the year of entry. Plaintiff's merchandise was exported from West Germany and entered at the port of Newark from 1979 through 1981.

Upon a trial and submission of post-trial briefs, the Court concludes that the plaintiff has not overcome the presumption that the government's classification is correct by showing that the merchandise is more specifically described as tubes. *See* 28 U.S.C. § 2639(a)(1) (1982).

DISCUSSION

At trial, plaintiff offered into evidence a sample of the imported merchandise. It is cylindrical, white, and the texture of its exterior surface is sandy. The interior surface is smooth and glossy. One end is closed, in approximately hemispherical shape, and the other is open. The outside diameter of the sample is 11 inches. Its wall thickness is ⅜ inch and it is 20 inches high. The parties have stipulated, however, that the subject merchandise of this case ranges in sizes up to 36 inches in diameter and up to 94 inches high. Typical sizes are 18 to 36 inches in diameter, 24 to 94 inches high, and with ⅜ to ¾ inch wall thicknesses. All of the imported merchandise is similar in appearance to the exhibit, except for size.

The parties also stipulated that the merchandise is invoiced as Rotosil tubes with one end hemispherically closed, or as bell jars, and that the imported merchandise is not "tubing."

Plaintiff bases its claimed classification on the contention that the imported articles are commonly known as tubes. Plaintiff relies on various dictionary definitions of the word "tube" and concludes simply that "what is a 'tube' is not determined by size, material, or use, but by the shape of the article." Plaintiff's Brief 9. A sampling of one such dictionary definition, which is fairly representative, follows:

> 1. A long hollow cylindrical body, as of wood, metal, rubber, or glass, generally used for the conveyance of something through it, but often as a receptacle for holding something; a pipe.

Funk & Wagnalls New Standard Dictionary of the English Language (1942).

Plaintiff quotes the decision in *Terumo-America, Inc.* v. *United States*, 2 CIT 121, 132 (1981) (glass rods used in the manufacture of thermometers classified as tubing), which states, "The tariff schedules do not define tubes, and the *Tariff Classification Study, Explanatory and Background Materials* (1960) fails to shed light on

this question." From this, plaintiff surmises that the visual appearance of the articles and the testimony of its witness are determinative of the correct classification of the merchandise. The witness, Mr. Allan C. Kreutzer, vice president of marketing and sales for the plaintiff company, testified that the imported articles are known as tubes. Plaintiff fails, however, to cite and deal with the compelling body of relevant case law, which clearly shows not only that an article is not classifiable as a tube merely because it is called a tube, *see United States* v. *The A.S. Aloe Co.*, 20 CCPA 319, 322, T.D. 46111 (1932),[2] but also that the shape of the article as a tube is not controlling for customs classification purposes. *See United States* v. *Kelvin & Wilfrid O. White Co.*, 24 CCPA 327, 331, T.D. 48768 (1937). Where an article "has a function other than that performed by a tube, as that term is ordinarily understood," it is not properly classified as a tube. *United States* v. *E.H. Sargent & Co.*, 20 CCPA 172, 176, T.D. 45774 (1932). Plaintiff's statement that the use of the imported articles is "immaterial as to whether or not they are tubes," Plaintiff's Brief 6, is patently incorrect for customs classification purposes.

In the case at bar, the evidence at trial establishes that plaintiff's Rotosil articles are used for purposes not ordinarily associated with tubes. As Mr. Kreutzer testified,

> [T]he first use is as bell jars * * * in the semiconductor industry * * * for the manufacture of polycrystalline silicon by the Siemens process. This process uses the decomposition of the gas tri-chloro-silane. In this process a long, very thin, rod in the form of a hairpin of pure silicon is attached to a reactor plate, usually made of silver, and the tube or bell jar is placed over this rod and sealed against the reactor plate. The trichloro-silane and hydrogen are introduced via gas ducts in the reactor plate, and an electrical current passed through the silicon hairpin. The combination of these two chemicals and the electrical current causes a decomposition reaction, into pure silicon, which deposits on the hairpin, and hydrochloric acid gas, which is exhausted from the bell jar.
>
> After this process is complete, the pure silicon material is removed, and broken up into pieces. This material is then placed in other Rotosil or other brand of fused silica tubes or crucibles such as the imported articles, with the open end up. This polycrystalline silicon is then melted, and by dipping down a single pure crystal seed, a single pure crystal of silicon several inches in diameter and several feet long is pulled from the molten mass. This process is called the Czochralski process. Rotosil crucibles can also be used in other melting processes, including precious metals in the refining or casting operations, or melting any other material which is corrosive at high temperature.

[2] In contrast, an article may warrant classification as a tube even though it is not commercially referred to as a tube. *See, e.g., Winkler-Koch Engineering Co.* v. *United States*, 16 Cust. Ct. 42, 47, C.D. 982 (1946) (oil well casing classified as iron or steel tubes not specially provided for).

> After the single crystal which has been drawn from the crucible is further processed, it is sliced into wafers which, after substantial additional processing, become the micro-chips of electronics. In one of the steps of this processing, called epitaxy, the tubes are normally used closed end down, and in this orientation are called epitaxial reactors. In this process wafers sawn from the single crystal and further processed are loaded into graphite susceptors and covered with the tube. The end of the tube is sealed against a plate, and gases introduced into the tube through the plate sealing the open end. Epitaxy coats the wafers with pure silicon.

Transcript 114–16.

It is clear that the purposes of plaintiff's merchandise go well beyond those oridinarily associated with tubes, such as conveying gases or liquids or serving as mere receptacles.[3] In each of the following cases, the court classified, on the basis of use, tubelike articles of glass under provisions other than that for tubes.

In *E.H. Sargent & Co.*, the Court of Customs and Patent Appeals reversed the lower court and found that graduated Bunsen tubes, Roehrig tubes with projecting faucets, and absorption tubes open at both ends and having between these ends a succession of globular formations connected by small necks, were properly classifiable as scientific glass articles under paragraph 218(a), Tariff Act of 1930. The court did not elaborate on the function of each article, but indicated that their scientific purposes could not be accomplished by the use of mere tubes. 20 CCPA at 176.

The court found that a centrifuge sedimentation tube constructed for use in centrifugal machines and used to make urinary analyses is "a chemical article and more than a tube." *The A.S. Aloe Co.*, 20 CCPA at 323.

Finally, in *Kelvin & Wilfrid O. White Co.*, the court found that glass sounding tubes used to record the depths of ocean water also are more than tubes. The interior of each tube was coated with a chemical that changed color when coming in contact with salt water. The court observed:

> [W]hen scientific tubes or tubing are made into different completed articles which perform particular chemical or scientific purposes, they cease to be the tubes or tubing for which Congress made provision in subdivision (b) [paragraph 218, Tariff Act of 1930]. When the new article performs a function not performed by tubes or tubing, as those terms are commonly understood, the merchandise loses its character as tubes or tubing.

24 CCPA at 331.[4]

---

[3] The uses of tubes are not necessarily limited to conveying or holding something, but must nevertheless be uses that are ordinarily associated with tubes. In *Ball v. United States*, 8 Ct. Cust. Appls. 143, 146, T.D. 37271 (1917), the court found that "[t]he uses of steel tubes as material are so common and well known that in the absence of commercial designation we can not say the articles here are not steel tubes within the common understanding of that term." *Id.*

As Mr. Kreutzer's testimony indicates, the merchandise in the case at bar is designed to perform very special industrial functions—namely, to serve as bell jars for the manufacture of polycrystalline silicon by the Siemans process, as crucibles for the melting of silicon in the Czochralski process or for the melting of precious metals, and as epitaxial reactors for the coating of silicon wafers. Transcript 115–16. Further, Heraeus-Amersil manufactures articles to the particular specifications of each customer depending on the intended use. *See* Transcript 139–40. Importantly, the tubular shape of the articles is not nearly so important as the material from which the articles are made. *See id.* at 113. As Defendant's Exhibit A, a brochure of Heraeus Quarzschmelze, describes plaintiff's Rotosil bell jars:

> The inner surfaces of these bell jars are always fireglazed and very densely fused to an almost glassy finish, thus providing the best conditions for a clean and troublefree operation. The walls are otherwise opaque and therefore act as thermal insulators—a very desirable effect which contributes toward lower running costs. After a lining of the bell jars with an additional layer of pure transparent quartz glass was found to improve the purity of the deposited silicon significantly, the demand has increasingly shifted to bell jars fitted with the additional inner layer. The best in this respect are bell jars with an inner layer of synthetic quartz glass * * *.

It is clear that the articles are designed as "more than" conveyers of liquids or gases, or as mere receptacles. *See E. Green & Son* v. *United States*, 59 CCPA 31, 34, C.A.D. 1032, 450 F.2d 1396, 1398 (1971) (application of "more than" doctrine must be determined in each case on its own facts).

In discussing plaintiff's imported merchandise, plaintiff's witness Kreutzer discussed generally all of the similar merchandise manufactured by plaintiff, referring to the merchandise as tubes or tubing, sometimes qualified by the phrase "with one end closed," and otherwise called "bell jars, crucibles, furnace or diffusion tubes, furnace muffles, or reactors." Transcript 113, 137. Mr. Kreutzer also discussed similar merchandise manufactured by plaintiff in 1962 to 1963 referred to as cylindrical pipes with closed ends, cylindrical shape opaque muffles, or cylindrical pots. *Id.* at 117. But as plaintiff has developed the capability of manufacturing larger "tubes," *id.* at 116, and "their use in the semiconductor industry has grown, they have also acquired other names, depending upon the particular use to which the customer will apply them." *Id.* at 117. Mr. Kreutzer concluded, "The one term which properly

---

*The issue in *Sargent, Aloe* and *Kelvin* was whether the merchandise was classifiable as tubes or tubing under paragraph 218(b), Tariff Act of 1930. With the enactment of the TSUS, items 548.01 and 548.03 continued the existing rate treatment for tubes and tubing previously dutiable under paragraph 218(b). *See Tariff Classification Study, 5th Supplemental Report* 38, 114 (1963).

describes them, no matter in what orientation, or for what purpose used, is tubes with one end closed." *Id.*[5]

The shape of the articles or that they are called tubes, however, is not controlling. The major functions of the articles are not those of tubes. Their primary functions are as bell jars, epitaxial reactors and crucibles for the manufacture of silicon chips in the semiconductor industry. *Cf. E. Green & Son* v. *United States,* 59 CCPA at 35, 450 F.2d at 1399 (primary function of finned tubes to heat or cool water flowing through them warranted classification as manufactures of iron rather than as iron pipe or tubes). Although the tariff provision for tubes is *eo nomine,* use in this case, as in the other cited cases dealing with the classification of tubelike articles, is of paramount importance and cannot be ignored in determining the identity of the imported articles for customs classifications purposes. *See United States* v. *Quon Quon Co.,* 46 CCPA 70, 73, C.A.D. 699 (1959) (woven rattancore classified according to its use as parts of furniture notwithstanding the *eo nomine* tariff provision for "baskets").

CONCLUSION

Because plaintiff's imported merchandise is specifically designed and manufactured to perform functions not commonly understood to be those performed by tubes, plaintiff has not met its burden of proving that Customs' classification is incorrect by showing that the merchandise is more specifically provided for under item 548.01, TSUS, as glass tubes with ends processed. The Court accordingly sustains Customs' classification of the imported merchandise under item 548.05, TSUS, as other glass articles not specially provided for.

(Slip Op. 86-35)

EHRENREICH PHOTO-OPTICAL INDUSTRIES, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT

Court No. 76-5-01308

Before BERNARD NEWMAN, *Senior Judge.*

PHOTOGRAPHIC PRINTERS

Plaintiff challenges the classification by Customs of imported photographic enlarging printers as "enlargers" under item 722.18, TSUS, claiming that the merchandise should properly have been classified as "[e]quipment specially designed for photofinishing * * * not specially provided for" under item 722.94, TSUS. The print-

[5] It is noteworthy, nevertheless, that plaintiff in its catalogues and purchase orders distinguishes the subject imported merchandise from its tubing and refers to the imported articles by the names denoting the intended functions, i.e., Rotosil bell jars or crucibles. *See* Plaintiff's Exhibit 3, at 16, Plaintiff's Exhibit 4 at 26, and Defendant's Exhibit C. at 26 (price lists); Defendant's Collective Exhibit D *passim* (purchase orders).

ers are automated high speed machines designed to optically produce color photographic enlargements, called "prints", of the image on a photographic negative.

Held: Plaintiff failed to establish that the printers, which have the same basic features and function as prototype hand-operated enlargers, but are more automated and faster than the latter, do not fall within the common meaning of the term "enlargers"; also, plaintiff failed to prove its claim that there was a commercial designation for the term "enlarger" that excluded photographic printers.

While plaintiff showed that the printers are photofinishing equipment within the purview of item 722.94, they are specially provided for under the *eo nomine* provision covering enlargers in item 722.18, and are properly dutiable under that provision pursuant to General Interpretative Rule 10(c), TSUS.

In applying General Interpretative Rule 10(c), TSUS, an *eo nomine* provision is regarded as more specific than a use provision qualified by a "not specially provided for" clause. *United States* v. *E. Besler & Co.*, 64 CCPA 121, C.A.D. 1193, 557 F.2d 270 (1977).

[Judgment for defendant.]

(Decided March 26, 1986)

Serko & Simon (Joel K. Simon and *George S. Locker, Esqs.*, of counsel), for the plaintiff.

Richard K. Willard, Assistant Attorney General; *Joseph I. Liebman*, Attorney in Charge, International Trade Field Office, Commercial Litigation Branch; and *Judith M. Barzilay, Esq.*, for the defendant.

BERNARD NEWMAN, *Senior Judge:*

INTRODUCTION

This action presents for determination the proper classification, and hence rate of duty, for certain photographic enlarging printers imported by plaintiff from the United Kingdom and entered through the port of New York during the period of June 1973 through September 1975.[1] In liquidating the entries, Customs classified the imports as photographic enlargers under item 722.18 of the Tariff Schedules of the United States (TSUS), as modified by T.D. 68-9, and assessed duty at the rate of 7.5 percent ad valorem.[2] Relying on *United States* v. *E. Besler & Co.*, 64 CCPA 121, C.A.D. 1193, 557 F.2d (1977), defendant proposes as an alternative classification that the merchandise is dutiable under the provision for certain cameras in item 722.16, TSUS, as modified by T.D. 68-9, at the rate of 7.5 percent ad valorem. Plaintiff claims that the imports are properly dutiable under the provision in item 722.94, TSUS, as modified by T.D. 68-9, for equipment specially designed for photofinishing, not specially provided for, at the rate of 5 percent ad valorem.

The court finds that the merchandise was properly classified by Customs under item 722.18.

---

[1] Specifically, the imports comprise four models of Durst printers: ACS M 5/8 Miniprinter; ACS 78 MK2 Type O; M 6/12; and M 5/8 Type O. There are no material differences between these models for tariff classification purposes (Tr. 27).

[2] At the trial, plaintiff abandoned its claims with regard to entry No. K157732, which was one of the entries covered by the summons and complaint (Tr. 16). Plaintiff also abandoned the action respecting "various and assorted parts" covered by entry No. K232375. *Id.*

STATUTES INVOLVED

19 U.S.C. § 1202, Tariff Schedules of the United States:

Classified under:		
Schedule 7, Part 2, Subpart F:		
Photographic cameras (other than motion-picture cameras), photographic enlargers, and combination camera-enlargers:		
* * * * * * *		
722.18	Other enlargers and camera-enlargers	7.5% ad val.

FACTS

The record in this case comprises the testimony of three witnesses on behalf of plaintiff and three witnesses for defendant. Additionally, each party submitted various exhibits; the official entry papers were received without marking (Tr. 19).[3]

The pertinent facts are:

The merchandise in controversy consists of Durst printers, which are automated machines designed to optically produce color photo-

[3] At trial and in its reply brief, plaintiff alluded to defendant's affirmative response to plaintiff's request for an admission that the imports are other than enlargers (Tr. 3-4, 110-111). The court reminded counsel of an order of March 6, 1985 denying defendant's motion to withdraw its admission (Tr. 5, 109-110). However, at trial plaintiff did not offer defendant's admission into evidence, but rather submitted testimony and other evidence on the issue of whether the imports are enlargers, and did not object to defendant's evidence on that issue. Since defendant's admission was neither offered nor received in evidence, the admission is not part of the record in this case. *Avant* v. *Polaroid Corp.*, 441 F. Supp. 898 (D.C. Mass 1977), *aff'd*, 572 F.2d 889 (1st Cir. 1978), *cert. den.* 439 U.S. 837 (1978) (Rule 36 admissions not introduced into evidence by plaintiff would not be considered by the court.). *Cf. S.G.B. Steel Scaffolding & Shoring Co., Inc.* v. *United States*, 82 Cust. Ct. 197, 204, C.D. 4802 (1979) ("* * * to be considered by the court, answers to interrogatories must be introduced into evidence and cannot merely be judicially noticed."). Accordingly, the court cannot agree with plaintiff's contention that defendant's admission is conclusive of the issue of whether Customs' classification was correct.

graphic enlargements, called "prints", of the image on a photographic negative at high speed. Following is the basic process by which the imports print photographic enlargements: Under darkroom conditions, the operator of a printer loads it with photosensitive positive paper on which exposures will be made. The printers have a built-in paper transport mechanism that holds the photosensitive paper. A photographic color film negative is placed in the negative carrier of the printer. The operator then presses an "exposure" button to activate the machine. Durst printers have a light source, that when activated during printing, emits light through the photographic negative and then through a lens onto the positive paper.

The high speed printing process is automated and is not viewed by the operator. The end product produced by the imports is called a "print", which may be as large as 11 x 14 inches in size. Such print consists of the photographic positive containing a latent image which is not visible in normal room light, and must be finished by chemical processing to produce a viewable image in the form of what is ordinarily regarded as a "photograph".

Discussion

Defendant contends that based upon their primary design, construction and function, Durst printers are encompassed by the common meaning of the term "enlarger", and are also included within the dictionary definition of "camera" as articulated by the Court of Customs and Patent Appeals in *Besler, supra.* Respecting plaintiff's claim, defendant argues that the imports are not classifiable under item 722.94 because they do not finish the photo; and even assuming that the printers are photofinishing equipment, by virtue of General Interpretative Rule 10(c) they are more specifically provided for, either as cameras or enlargers.

Relying on the principle of "commercial designation", plaintiff insists that Durst printers are not known or regarded in the photographic industry as enlargers or cameras, but rather as "printers". Plaintiff also argues that the imports are not designed nor do they function as enlargers within the common or commercial meaning of that term, but are "more than" enlargers. In support of its claim under item 722.94, TSUS, plaintiff asserts that Durst printers are known and used as photofinishing equipment.

Common Meaning

Resolution of the classification issue in this case requires a determination of the meaning of the *eo nomine* provision for "enlargers" as that term is used in item 722.18, TSUS. Fundamentally, in the absence of a special commercial designation, the language of a tariff provision is to be construed in accordance with its common meaning. The common meaning of a tariff term is a matter of law to be determined by the court; and in making such determination,

the court may rely upon its own understanding of the word or term used and may consult standard lexicographic and scientific authorities. The testimony of witnesses respecting common meaning may properly be considered by the court, but such testimony is advisory only and has no binding effect on the court. *United States* v. *Corning Glass Works,* 66 CCPA 25, C.A.D. 1216, 586 F.2d 822 (1978); *United States* v. *E. Besler & Company,* 64 CCPA at 124; and *United States* v. *National Carloading Corp.,* 48 CCPA 70, C.A.D. 767 (1961).

In support of its position that the printers fall within the common meaning of the term "enlarger", defendant cites:

Webster's Third New International Dictionary (1963), p. 754:

> One that enlarges, *specif.:* an optical projector used to produce a photographic enlargement.

In addition to the foregoing lexicographic authority, the court has consulted:

McGraw-Hill Dictionary of Scientific and Technical Terms (3d ed. 1984), p. 546:

> enlarger [OPTICS] An optical projector used to project an enlarged image of a photograph's negative onto photosensitized film or paper. Also known as a photoenlarger.

and

McGraw-Hill Encyclopedia of Science & Technology (5th ed. 1982), Volume 10, p. 212:

> Contact and projection printers. Negatives provide the primary records of photography in the black-and-white field and to an increasing extent in color. In many cases, such as the document reproduction field, they may be more useful than the positives. In general, however, positive prints are required, and such prints are made from negatives in contact printers and projection printers (enlargers).
>
> * * * * * * *
>
> *Projection printers (enlargers).* These are optical projectors consisting of a lamp house and light source, a holder for a negative, a condenser or diffusing sheet, a projection lens designed to give optimum quality at relatively low magnifications, means for focusing for the desired magnification, sometimes automatically coupled to ensure good focus at all magnifications (autofocus enlargers), a support for the optical components, and a board or easel to carry the sensitive paper * * *. Projection printers may expose individual paper sheets or rolls of paper from single negatives or rolls of negatives.

Defendant insists that the component features and function of Durst printers coincide completely with the common understanding of the term "enlarger". Thus, defendant points out that the printers have a light source, a negative holder or carrier, a method of diffusing light, a lens, a means for focusing (or prefocusing), a sup-

port for the optical components and an easel which serves to hold or carry the photosensitive paper. Significantly, four of the witnesses who testified at the trial agreed that Durst printers fall within *Webster's* definition, *supra* (Tr. 88, 126, 227-28, 273-74). Consequently, the court is persuaded that Durst printers are, by design and function, photographic enlargers within the common meaning of that term, as contended by defendant.

In essence, plaintiff's position is that the provision for enlargers in item 722.18, TSUS, is limited to certain prototype hand-operated machines, which are more flexible in operation for certain specific uses than plaintiff's automated high speed printers. While it is true that the imports are automated machines rather than prototype hand-operated machines, this difference does not affect their classification. It is fundamental that an *eo nomine* designation without limitation or legislative intent, judicial decision or administrative practice includes all forms of the article. *National Carloading Corp., supra; Nootka Packing Co.* v. *United States,* 22 CCPA 464, T.D. 47464 (1935). On that score, the evidence of record clearly demonstrates that the imports possess the same basic components and function as hand-operated enlargers and are essentially "automated high-speed enlargers" (Tr. 129, 279-80, 302). Accordingly, the imports fall within the *eo nomine* provision for enlargers in item 722.18.

Plaintiff also seeks to exclude these imports from the common meaning of "enlarger" under the "more than" doctrine. That doctrine was succinctly articulated in *Robert Bosch Corp.* v. *United States,* 63 Cust. Ct. 96, 103, C.D. 3881 (1969):

> The principle is well settled that where an article is in character or function something other than as described by a specific statutory provision—either more limited or more diversified—and the difference is significant, it cannot find classification within such provision. It is said to be more than the article described in the statute * * *. *By contrast where the difference is in the nature of improvement or amplification, and the essential character is preserved or only incidentally altered, the applicable rule is * * * that an unlimited eo nomine statutory designation includes all forms of the article in the absence of a contrary legislative intent or commercial designation.* [Citations omitted; emphasis added.]

And as observed in *United States* v. *Texas Instruments,* 67 CCPA 57, 63, C.A.D. 1243, 620 F.2d, 269, 271-272 (1980):

> Only the most general of rules can be ascertained from the previous decisions dealing with the "more than" doctrine, and it appears that each case must in the first analysis be determined on its own facts. *E. Green & Son (New York), Inc.* v. *United States,* 59 CCPA 31, 34, C.A.D. 1032, 450 F.2d 1396, 1398 (1971) * * *.

In *Green, supra,* the Appellate Court further observed, 59 CCPA at 34:

> * * * In order to determine if an article is more than that provided for in a particular tariff provision, it is necessary to ascertain the common meaning of the tariff provision and compare it with the merchandise in issue.

See also Ozen Sound Devices v. *United States,* 67 CCPA 67, C.A.D. 1246, 620 F.2d 880 (1980); *The Englishtown Corporation* v. *United States,* 64 CCPA 84, C.A.D. 1187, 553 F.2d 1258 (1977).

Plaintiff's "more than" argument is predicated on various differences pointed out by its witnesses between prototype hand-operated enlargers and the automated Durst printers. Notwithstanding these differences, the court must observe the well settled rule that merchandise is to be classified on the basis of its primary design, construction and function. *See e.g. Asea, Inc.* v. *United States,* 7 CIT 128, Slip Op. 84-28, 587 F. Supp. 1072 (March 29, 1984), *aff'd* 3 CAFC ——, 748, F.2d 676 (1984); *United States* v. *Oxford International Corp.,* 62 CCPA 102, C.A.D. 1154, 517 F.2d 1374 (1975); *Trans-Atlantic Company* v. *United States,* 60 CCPA 100, C.A.D. 1088, 471 F.2d 1397 (1973).

The record is replete with testimony demonstrating that Durst printers have the same primary design, construction and function as prototype enlargers:

An enlarger's primary function is to produce photographic enlargements referred to as "prints"; a Durst printer has the same primary function and its end product is also referred to as a "print." An enlarger and a Durst printer, in addition to performing the same function, are utilized at the same point in the process of producing photographs from negatives. An enlarger enlarges the image on a photographic negative by projecting a light through a photographic lens onto photosensitive positive paper; a printer operates in the same manner and in fact uses the same paper as that used in an enlarger. In a Durst printer, the negative is placed between the light source and the lens, as it is in an enlarger. The lens in a Durst printer and in an enlarger is located between the negative and positive paper. A Durst printer and an enlarger have a negative carrier and also an easel or similar device that holds the photosensitive paper. A Durst printer and an enlarger have a mechanism for holding the elements at an exact designated distance from each other.

In an enlarger, the printing process takes place in the dark; in a Durst printer, the printer process also takes place in the dark, *viz.,* within an enclosed box.[4] If the printing process in either an enlarger or a Durst printer were exposed to light (other than from the machine itself) during operation, the image on the print would be totally exposed and the print ruined. The end product produced by

[4] As previously noted, Durst printers are loaded with photosensitive paper under darkroom conditions.

an enlarger contains a latent image that is not visible until after the print undergoes chemical processing to produce a viewable photograph; the same is true of prints produced by a Durst printer.

Plaintiff seeks to differentiate the imports from enlargers, for Customs classification purposes, on the basis of what essentially amounts to a trade-off between the automated and relatively high-speed printing characteristics of the imports[5] and the flexibility characteristic of traditional enlargers in controlling and manipulating the appearance of the prints, *e.g.* dodging, burning in and cropping.[6] On the basis of their *primary* design, construction and function, however, the imports are nothing more or less than automated high-speed photographic enlargers (Tr. 129, 302), as claimed by defendant. The facts that a traditional or prototype hand-operated enlarger is not used for high production printing, has controls to move the head and bellows, uses a blended light in a single exposure for each print rather than a triple exposure utilizing different colored lights, is used under darkroom conditions, requires a skilled operator and may produce special lighting effects, do not exclude the imports from the common meaning of the term "enlarger" (Tr. 324–25).

The further fact that Durst printer have a built-in paper transport ("roll easel")[7] does not make them more than enlargers since enlargers, by definition, customarily posses an easel or similar device for holding or carrying the photosensitive paper (Tr. 130). *See McGraw-Hill Encyclopedia of Science & Technology, supra.* Plainly, the *built-in* easel of the Durst printer is an integral part of the machine (Tr. 229), and is subordinate and incidental to its function of producing enlargements or prints. The court is far from persuaded that the built-in easel of Durst printers makes them combination articles, as contended by plaintiff, or that the easel gives the printers a use that is not possessed by enlargers. *Cf. Simon Omega, Inc.* v. *United States,* 83 Cust. Ct. 14, C.D. 4815 (1979) (phototypesetting machines capable of photographic enlargement incidental to their typesetting use, held more than simply "enlargers" within the purview of item 722.18, TSUS).

---

[5] The speed of the subject printers ranges from approximately 200 to 500 prints per hour (Tr. 30).

[6] "Dodging" is a technique whereby light is "held back" from a certain portion of a print during exposure, while the remainder of the print is being exposed (Tr. 147). "Burning in" is a technique whereby light is concentrated on a particular portion of a print while being "held back" from the rest of the print. Both dodging and burning in are specialized methods of manipulating the appearance of the final print (Tr. 148).

"Cropping" is a technique whereby a print is overmagnified so that a print smaller than the overmagnification can be produced. It is a method of eliminating undesired portions of the original print (Tr. 100–01). The record shows that cropping can be accomplished with some Durst printers, *viz.* the M 6/12 automatic cropping printer (Tr. 22–23) and ACS ¶8 MK2 cropping printer (Tr. 24), which is the high speed version of the Durst Miniprinter (Tr. 25). As in the case of a prototype enlarger, these Durst cropping printers are used for cropping with the aid of an operator (Tr. 92–93).

[7] A "roll easel" is a means of automatically moving the photosensitive paper (Tr. 186–87). It is noted that Durst printers have a built-in easel rather than an accessory easel, which is a separate piece of equipment that can be moved around from one enlarger to another (Tr. 187–88).

Commercial Designation

Plaintiff's main thrust is that in the photographic industry the term enlarger does not encompass "printers". Therefore, the court now considers plaintiff's argument that the tariff provision for photographic enlargers in item 722.18 must be construed in accordance with a "commercial designation"—a special interpretation commonly placed upon it by the particular industry involved—rather than common meaning.

Implicit in plaintiff's reliance upon the doctrine of "commercial designation" is the premise that the trade understanding of the tariff term in issue differs from its common meaning. Stated otherwise, the doctrine has no application where the commercial and common meanings are the same. *Stephen Rug Mills* v. *United States,* 32 CCPA 110, C.A.D. 293 (1944); *Draeger Shipping Co.* v. *United States,* 15 Ct. Cust. Appls. 190, T.D. 42234 (1927). Hence, as pointed out in *Excelsior Import Associates, Inc.* v. *United States,* 66 CCPA 1, 2, C A.D. 1212, 583 F.2d 513, 514, (1978):

> * * * The well-established rule respecting trade sense is that "before the plain understanding of a term can be deviated from it must be shown by plenary proof to have a different import in trade and commerce." *United States* v. *Wells Fargo & Co.,* 1 Ct. Cust. Appls. 158, 161, T.D. 31211 (1911). The Government relied on the plain understanding of the term "ornamented" articles. Thus, appellant had the burden of proving that "ornamented" textile articles, as used in the TSUS, had a *commercial designation or trade sense different from the common meaning or plain understanding of that phrase* * * *. [Emphasis added.]

In *Wells Fargo,* cited in *Excelsior,* the court further expounded upon commercial designation (1 Ct. Cust. Appls. at 161-62):

> It is a rule of statutory interpretation, confined not alone to the customs laws, but running through the universal scope of law, the "words and phrases are assumed to be used in their natural signification" and shall be so construed, the sole exception in customs adjudication being that commercial designation shall obtain over the common and accepted understanding of words where such is duly proven * * *
>
> * * * * * * *

The legitimate corollary of this often-pronounced rule of interpretation is that no meaning shall be given a word or phrase used in customs laws other than its ordinary or accepted meaning *except upon plenary proof that this extraordinary meaning is fully and completely understood and accepted throughout the United States by all of those dealing wholesale in that class of goods.*

> The rule is based upon the sound principle that customs laws are drawn in view of the lay understanding (first) of the trade subject thereto, and (secondly) for the information of merchants and dealers who are not lawyers, and perchance may

> not be skilled in the finesse of the English language and who, with a common lay understanding, will be completely informed by the plain words of the statute as drawn by Congress what duties are levied and what penalties they may expect for a violation of the law. [Emphasis added.]

While it is basic that tariff terms presumably carry the meaning given them in trade and commerce (*Ameliotex, Inc.* v. *United States,* 65 CCPA 22, C.A.D. 1200, 565 F.2d 674 (1977); *Esco Manufacturing Co., aka J. Hofert Co.* v. *United States,* 63 CCPA 71, C.A.D. 1167, 530 F.2d 949 (1976)), it is also well settled by a long line of decisions that the language of commerce is presumptively that language in common use. See *e.g., Rosenblad Corp.* v. *United States,* 49 CCPA 81, C.A.D. 800 (1962); *United States* v. *C.J. Tower & Sons of Buffalo, N.Y.,* 48 CCPA 87, C.A.D. 770 (1961); *Floral Arts Studio* v. *United States,* 46 CCPA 21, C.A.D. 690 (1958); *United States* v. *The Specialty House, Inc.,* 42 CCPA 136, C.A.D. 585 (1955); *United States* v. *E. Dillingham, Inc.,* 41 CCPA 221, C.A.D. 555 (1954); *C.J. Tower & Sons* v. United States, 41 CCPA 195, C.A.C. 550 (1954); *Hummel Chemical Co.* v. *United States,* 29 CCPA 178, C.A.D. 189 (1941); and *United States* v. *M.J. Brandenstein & Co.,* 17 CCPA 480, T.D. 43941 (1930).

Since plaintiff maintains that a special commercial meaning of the term "enlarger" excludes printers, plaintiff necessarily assumed the burden of proof on that issue. *United States* v. *Simon Saw & Steel Co.,* 51 CCPA 33, 38 C.A.D. 834 (1964); *The Specialty House, Inc.,* 42 CCPA at 141. Proof of commercial designation is a question of fact to be established in each case. *Tower & Sons* v. *United States,* 11 Ct. Cust. Appls. 261, T.D. 39080 (1922); *Florsheim Shoe Co., Division of Interco, Inc.* v. *United States,* 71 Cust. Ct. 187, C.D. 4495 (1973); *Daniel Green Shoe Co.* v. *United States (Transworld Shoe Corp., Party in Interest),* 58 Cust. Ct. 7, C.D. 2868, 262 F. Supp. 375 (1967). Commercial designation requires proof of the meaning of a term in the trade at the time of the enactment of the statute. *R.J. Saunders & Co., Inc.* v. *United States,* 49 CCPA 87, 89, C.A.D. 801 (1962); *The Hy-Glow Co.* v. *United States,* 58 Cust. Ct. 481, 486, C.D. 3023 (1967).

Consequently, plaintiff had the burden of establishing that, as used in the photographic industry at the time of the enactment of the Tariff Schedules, the term "enlarger" had a meaning which was general (extending over the entire country), definite (certain of understanding), and uniform (the same everywhere in the country). *Moscahlades Bros., Inc.* v. *United States,* 42 CCPA 78, 82, C.A.D. 575 (1954); *United States* v. *M. & D. Miller, Inc.,* 41 CCPA 226, 235, C.A.D. 556 (1954); *Nylos Trading Co.* v. *United States* 37 CCPA 71, 73, C.A.D. 422 (1949); *Stephen Rug Mills,* 32 CCPA at 116. Thus, the doctrine of commercial designation "was intended to apply to cases where the trade designation is so universal and well understood that the Congress, and all the trade, are supposed to have been

fully acquainted with the practice at the time the law was enacted". *Jas. Akeroyd & Co.* v. *United States*, 15 Ct. Cust. Appls. 440, 443, T.D. 42641 (1928). *See also United States* v. *Fung Chong Co.*, 34 CCPA 40, 42, C.A.D. 342 (1946); *Heads & Threads, Division of MSL Industries, Inc.* v. *United States*, 60 Cust. Ct. 308, C.D. 3374, 282 F. Supp. 484 (1968).

After careful review of the evidence of record and the legal principles applicable to commercial designation, the court finds that plaintiff failed to adduce any general, definitive and uniform trade understanding for the term "enlarger" that is at variance with the common meaning of the term.

In support of its argument that the imports are not enlargers as that term is commercially understood, plaintiff asserts that they are not called "enlargers" in the photographic trade. But on that score, it should first be pointed out that in plaintiff's own advertising literature and instruction manuals the imports are referred to as "enlarging printers" (plaintiff's exhibits 3 and 7 and defendant's exhibit B, C and D), and they are promoted in the trade as designed to produce "enlargements" or "high quality enlargements" (plaintiff's exhibit 2 and defendant's exhibits A, B and H). Moreover, Durst printers, while not "called" enlargers are "considered" by the professional photographic industry to be enlargers (Tr. 82-83). In any event, even though merchandise is commercially known by a specific name (*viz.*, "printers"), which name differs from a generic tariff description (*viz.*, "enlargers"), is not sufficient to exclude the merchandise from classification under the later designation. *See S.G.B. Steel Scaffolding & Shoring Co., Inc.* v. *United States*, 82 Cust. Ct. 197, 210, C.D. 4802 (1979), and cases cited; *Heads & Threads, supra.*

Plaintiff's Claim Under Item 722.94

Having concluded that the imports are described by the provision in item 722.18 for enlargers, under which they were classified by Customs, the court must consider whether the imports are also described by the provision claimed by plaintiff, *viz.*, item 722.94 covering photofinishing equipment.

Plaintiff's position if that the printers are described by item 722.94 because they are used as photofinishing equipment. The record substantiates that contention. Defendant, however, urges a highly restrictive interpretation of the provision for photofinishing equipment. According to defendant, the printers are not used as photofinishing equipment because the end product of the printer is a latent image contained on unprocessed photographic paper, which must undergo a chemical "finishing" process. This latter process, defendant insists, is photofinishing, and only the devices used to accomplish it are classifiable as photofinishing equipment. Stated otherwise, defendant's position is that only articles or devices which make the latent image visible, or are used in devices

that make the latent image visible, qualify for tariff classification as photofinishing equipment.

The tariff provision for photofinishing equipment is obviously a use provision. Indeed, the record establishes that the production of an enlarged latent image on photosensitive paper from a negative, which is the basic function of enlargers (including Durst printers), is essentially the initial step in "finishing" a photograph. Since this initial step is part of the photofinishing process, the printers by use are photofinishing equipment, as described in item 722.94. Defendant's interpretation, which limits the provision for photofinishing equipment to only those articles involved in the chemical "finishing" process, is unduly restrictive. This is confirmed in 3 *Summaries of Trade and Tariff Information* (1968), Schedule 7, p. 45,[8] wherein the United States Tariff Commission stated:

> Item 722.94 covers miscellaneous photofinishing equipment ranging from small print tongs (for handling prints) and film clips, to a complete film-processing machine.

Relative Specificity

Defendant posits that even assuming Durst printers fall within the provision for photofinishing equipment, they are nevertheless precluded from classification under item 722.94 by the doctrine of relative specificity. The court agrees.

General Interpretative Rule 10(c), TSUS, provides that an imported article which is described in two or more provisions of the tariff schedules is classifiable in the provision that most specifically describes it. This rule has been interpreted to mean that merchandise is classifiable under the tariff provision which is more restrictive and more difficult to satisfy. *Ozen Sound Devices, supra; Arthur J. Humphreys* v. *United States*, 56 CCPA 67, C.A.D. 956, 407 F.2d 417 (1969); *United States* v. *Simon Saw & Steel Co., supra.*

When the competing provisions are an *eo nomine* provision, such as item 722.18 for enlargers, and a use provision with a "not specially provided for" clause, such as item 722.94, the *eo nomine* provision prevails under Rule 10(c). In *Besler,* the Appellate Court stated (64 CCPA at 125):

> Appellees' claimed classification under item 722.94, TSUS, is merely a "not specially provided for" provision for all equipment which is specially designed for still picture photofinishing. It is not a specific *eo nomine* provision, as is the camera provision of item 722.16, TSUS. Absent a clearly shown contrary legislative intent, which is not present in the case at bar, a "not specially provided for" clause in a use provision ex-

---

[8] The *Summaries of Trade and Tariff Information* have been frequently referred to as an aid in determining the scope of tariff provisions. *See e.g.: Pistorino & Co., Inc.* v. *United States*, 66 CCPA 95, C.A.D. 1227, 599 F.2d 444 (1979); *American Bristle & Hair Drawing Co. et al* v. *United States*, 59 CCPA 104, C.A.D. 1048, 458 F.2d 524 (1972); *Tanross Supply Co., Inc.* v. *United States* 58 CCPA 26, 31, C.A.D. 1000, 433 F.2d 1332 91970). See also *Lyons Export & Import, Inc.* v. *United States*, 59 CCPA 142, 144, C.A.D. 1056, 461 F.2d 830 (1972); *The Englishtown Corporation* v. *United States*, 64 CCPA 84, C.A.D. 1187, 553 F.2d 1258 (1977).

cludes articles enumerated elsewhere by a description or *eo nomine* designation (citations omitted).

Here, plaintiff has not shown a contrary legislative intent to the application of the doctrine of relative specificity. Therefore, pursuant to Rule 10(c), the court holds that the Durst printers are more specifically provided for under the *eo nomine* provision for enlargers in item 722.18, TSUS, than under the "basket" provision for photofinishing equipment in item 722.94, TSUS.

CONCLUSION

For the foregoing reasons, Customs' classification of the Durst printers as "enlargers" under item 722.18, TSUS, is sustained, and this action is dismissed.[9]

Judgment will be entered accordingly.

(Slip Op. 86-36)

HUFFY CORP., ET AL., PLAINTIFFS *v.* UNITED STATES, DEFENDANT AND TAIWAN TRANSPORTATION VEHICLE MANUFACTURERS ASSOCIATION, DEFENDANT-INTERVENOR

Consolidated Court No. 83-8-01180

Before CARMAN, *Judge.*

MEMORANDUM OPINION

[Plaintiffs' motion for judgment upon the agency record denied.]

(Decided March 27, 1986)

Collier, Shannon, Rill & Scott (Michael R. Kershow and *Lauren R. Howard* on the motion) for the plaintiff.

Richard K. Willard, Assistant Attorney General; *David M. Cohen,* Director, Commercial Litigation Branch *(Velta A. Melnbrencis* on the motion) for the defendant.

Plaia & Schaumberg, Chartered (Herbert C. Shelley, Joel D. Kaufman, and *George W. Thompson* on the motion) for the defendant-intervenor.

CARMAN, *Judge:* Before the Court is plaintiffs' Rule 56.1 motion for judgment upon the agency record challenging the final determination of the United States Department of Commerce, International Trade Administration (ITA) of sales at less than fair value in *Bicycles from Taiwan,* 48 Fed. Reg. 31,688 (1983). Defendant opposes the motion, as does defendant-intervenor Taiwan Transportation Vehicle Manufacturers Association. All parties have submitted comprehensive briefs and the record is quite extensive.

---

[9] While in view of the disposition of this case, it is unnecessary to decide the merits of defendant's proposed alternative classification under the provision for cameras in item 722.16, TSUS, the record shows that the printers fall within *Webster's* broad generic definition of "camera" relied upon by the Appellate Court in *Besler* (Tr. 123, 226-27, 253, 272), which held that the *eo nomine* provision for cameras is more specific than the provision for photofinishing equipment in item 722.94. As with the term "enlarger", plaintiff failed to prove a general, definite and uniform commercial designation for the term "camera" that differs from the common meaning of such term.

The ITA investigated sixteen Taiwanese bicycle manufacturers and found that eleven of them either had no sales of *de minimis* sales at less than fair value. These eleven firms were thus excluded from the ITA's final determination. Plaintiffs argue that these eleven should not have been excluded, and that dumping margins should have been higher as to the remaining five. Plaintiffs claim that the ITA erred in four areas of its determination. Plaintiffis argue that: (1) the ITA improperly adjusted the United States price by adding a 4.71 percent import duty rebate; (2) the ITA improperly adjusted the United States price by adding a 4 percent harbor dues rebate; (3) the ITA should have conducted an investigation of below-cost sales in the home market; and (4) the ITA should have commenced a countervailing duty investigation based on information uncovered in the course of the antidumping investigation. For reasons given below, the agency determination is sustained.

I. *Adjustment to United States Price for 4.71 Percent Import Duty Rebate*

The Tariff Act of 1930 (Act), as amended, requires the assessment of an antidumping duty whenever it is determined that "foreign merchandise is being, or is likely to be, sold in the United States at less than its fair value," and such sales injure or threaten injury to an industry in the United States. 19 U.S.C. § 1673 (1982). To determine whether merchandise is sold in the United States at less than fair value, the statute calls for a comparison between the price of the merchandise in the United States and its price in a foreign market (either the home market or a third country, or a constructed price). The statute provides that a duty be assessed based upon that comparison:

> [T]here shall be imposed upon such merchandise an antidumping duty * * * in an amount equal to the amount by which the foreign market value exceeds the United States price * * *.

19 U.S.C. § 1673.

The comparison of the two prices must take into account different circumstances of sale involved in the United States and the foreign market. The Act provides for adjustments to the prices to reflect these differences, ensuring that the final comparison is as free as possible from costs or benefits specific to each market.

Section 772 of the Act, Pub. L. No. 96-39, Title 1, § 101, 93 Stat. 181 (1979) (codified at 19 U.S.C. § 1677a (1982)), describes the method by which the ITA is to arrive at the United States price. The section first describes United States price as "the purchase price, or the exporter's sales price, of the merchandise, whichever is appropriate." 19 U.S.C. § 1677a(a). The section then provides for certain adjustments to the United States price. Relevant here is the adjustment for import duty rebates:

> The purchase price and the exporter's sale price shall be adjusted by being—
>
> (1) increased by—
>
> * * * * * * *
>
> (B) the amount of any import duties imposed by the country of exportation which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States.

19 U.S.C. § 1677a(d)(1)(B). Congress allowed this adjustment because purchasers in the home market presumably must pay the passed on cost of import duties when they buy the merchandise. If the duties are rebated when the merchandise is exported, presumably no similar cost is passed on to purchasers in the United States. By adding the amount of the rebate to United States price this adjustment accommodates the difference in cost to the two different purchasers.

In this case the ITA allowed an upward adjustment in United States price based upon an import duty rebate granted by Taiwan to bicycle producers. The import duty rebate was 4.71 percent of the "domestic value added;" that is, "the difference between the f.o.b. value of the finished bicycle and the c.i.f. value of the components imported directly by the bicycle manufacturers themselves." 48 Fed. Reg. at 31,689. The rebate's purpose was to refund, upon exportation, the import duties that domestic parts manufacturers paid on imported raw materials and passed on to bicycle manufacturers. To arrive at the 4.71 percent rebate, the Taiwanese authority first analyzed the amount of specific imported raw materials in an average bicycle. Referring to the duty rate record for those materials, it calculated the duty paid by Taiwanese parts producers, and presumably passed on to bicycle manufacturers, on an average bicycle. The Taiwanese authority then compared the amount of duty paid on the raw materials in an average bicycle to the domestic value of an average bicycle to arrive at the 4.71 percent rebate amount.

The Taiwanese program is essentially an allocation scheme in which the cost of import duties on raw materials is allocated to each bicycle, based upon that bicycle's domestic content. An allocation of import duties may give rise to an adjustment to United States priced provided import duties are actually paid and rebated, and there is a sufficient link between the cost to the manufacturer (import duties paid) and the claimed adjustment (rebate granted).

This court first established the two-part requirement of actual cost to the manufacturer and sufficient link between that cost and the claimed adjustment in *F.W. Myers & Co.* v. *United States,* 72 Cust. Ct. 219, C.D. 4544, 376 F. Supp. 860 (1974). In that case, this court sustained the ITA's denial of an adjustment to foreign market value for overhead costs under a provision for adjustments for "differences in circumstances of sale." 19 U.S.C. § 161(b)(2)

(1976) (repealed). The manufacturer sought an adjustment for overhead expenses relating to sales in the home market but not the United States market. The court first noted that the manufacturer could not lump overhead costs together with selling expenses in "a stewpot labeled 'differences in circumstances of sale.'" 72 Cust. Ct. at 233, 376 F. Supp. at 872. Instead, the court ruled, a manufacturer must show "that each claimed expense had a reasonably direct effect upon the sales in the market under consideration." *Id.*

The court found further that even had the manufacturers established a link between the alleged costs and the home market sales, it had failed to prove that the costs were actually incurred. The court stated that:

> a basic concept of all value determinations by the court is that they must be based upon proof of *actual* costs or prices—*not* estimates, approximations or averages. Thus, use of percentages in calculating expenses or profits will be rejected if they are not based upon *actual amounts* of expenses incurred or profits added.

Id. at 234, 376 F. Supp. at 873 (citations omitted).

This court again considered an adjustment to foreign market value for differences in circumstances of sale in *Brother Industries, Ltd.* v. *United States,* 3 CIT 125, 540 F. Supp. 1341 (1982), *aff'd sub nom. Smith-Corona Group* v. *United States,* 713 F.2d 1568 (Fed. Cir. 1983), *cert. denied,* 104 S. Ct. 1274 (1984). The court there upheld an adjustment based upon an incentive rebate that the typewriter manufacturers gave to retailers in the foreign market but not the United States market. The manufacturers based the rebate amounts on total sales, which included merchandise other than the typewriters under investigation, and various models of the typewriters under investigation. Based on the percentage of sales of typewriters under investigation to total sales, and the percentage of each model to the total sales of typewriters, the ITA allocated a cost to the manufacturers for each typewriter sold. The court approved the ITA's method of allocating costs to arrive at the adjustment, stating:

> *F.W. Myers* teaching does not preclude the administering authority from allocating or apportioning *actual* costs among the various items to which they are attributable.

3 CIT at 149, 540 F. Supp. at 1363.

These cases involved adjustments to foreign market value for differences in circumstances of sale.[1] In *Roquette Freres* v. *United*

[1] 19 U.S.C. § 1677b(a)(4)(B) provides that:

> In determining foreign market value, if it is established * * * that the amount of any difference between the United States price and the foreign market value * * * is wholly or partly due to—
>
> * * * * * * *
>
> (B) other differences in circumstances of sales
>
> * * * * * * *
>
> then due allowance shall be made therefor.

States, 7 CIT 88, 583 F. Supp. 599 (1984), this court applied the same rule to a case specifically involving an adjustment to United States price based on import duty rebates. In that case, the European Economic Community (EEC) levied a duty on corn imports, and granted an "export restitution payment" on exported products containing corn. The ITA determined that this payment was not allowable as an adjustment under 19 U.S.C. § 1677a(d)(1)(B):

> The "import levy" and the "export restitution payments" are not directly linked to, or dependent upon, one another within the context of EC regulations. The exporters may receive these payments regardless o[f] whether or not they imported corn and paid the "import levy."

Sorbitol From France, 47 Fed. Reg. 6,459, 6,460 (1982). This court affirmed the ITA's determination in *Roquette Freres*, 7 CIT 88, 583 F. Supp. 599 (1984), agreeing that the rebates were not directly related to the firm's payment of import duties.

> Whenever a French manufacturer exports a product containing corn, the aforecited EC regulation provides for the payment of an export refund regardless of (1) whether or not the firm used imported corn, and (2) whether or not the firm paid any import levies.

7 CIT at 91, 583 F. Supp. at 602.

The court thus applied the rule for adjustments based on differences in circumstances of sale to adjustments for import duty rebates. As applied in this context, the rule is that the import duty must actually have been paid and rebated (or waived), and there must be a sufficient link between the payment and the rebate.

The ITA determined that both these conditions were satisfied by the Taiwanese rebate program. *See* 48 Fed. Reg. at 31,690. Although the Court will defer to the agency's expertise in these technical areas, the Court must still carefully review the agency's determination, under the appropriate standard, to ensure that it conforms to statutory requirements. *Rhone-Poulenc, S.A.* v. *United States*, 8 CIT 47, 592 F. Supp. 1318, 1334 (1984). This Court will uphold the ITA's determination unless it is "unsupported by substantial evidence on the record, or otherwise not in accordance with law." 19 U.S.C. § 1516a(b)(1)(B) (1982). Plaintiffs contend that the ITA's final determination, based in part on an adjustment to United States price for import duty rebates, is unsupported by substantial evidence because there is no evidence in the record that domestic parts producers paid any import duties on raw materials, nor is there evidence that the 4.71 percent rebate is linked to actual payment of import duties.

The only evidence in the record that supports the ITA's conclusion that Taiwanese bicycle parts producers actually paid import duties and that the payment of those duties is directly linked to the 4.71 percent import duty rebate granted bicycle manufacturers

is the Taiwanese authority's general description of how it arrived at the rebate amount. *See* Record at 946–48. There is no further evidence showing actual payment by parts producers or import duties or amount of raw materials actually imported, nor is there further evidence showing the quantity of raw materials actually contained in an average bicycle. Thus the Court must determine whether the assertion of the Taiwanese authority that import duties were actually paid and that there is a direct link between their payment and the 4.71 percent rebate is sufficient to support the ITA's finding that those facts existed.

The "substantial evidence" standard of review has been well explicated by this court in prior decisions. *See, e.g., Carlisle Tire and Rubber Co.* v. *United States*, 9 CIT ——, 622 F. Supp. 1071 (1985). It is "essentially a limited review of the agency determination, insuring that agency conclusions are reasonably drawn from some evidence, more than a mere scintilla, in light of the record as a whole." *Alhambra Foundry* v. *United States*, Slip Op. 85–130, at 6 (December 30, 1985). While the Court might draw a different conclusion from the evidence in the record, the applicable standard of review does not permit the Court to substitute its judgment for that of the agency. The record contains a general description of the Taiwanese rebate program, provided by the Taiwanese authority. The ITA accepted this as evidence that import duties actually were paid by domestic parts producers and accurately allocated to export bicycles. The Court finds that the Taiwanese authority's description of the plan was sufficient evidence from which the ITA could reasonably draw this conclusion.

Plaintiffs further contend that the 4.71 percent import duty rebate is actually a countervailable subsidy and the Congress did not intend dumping margins to be decreased by adjustments based upon countervailable subsidies.[2] Plaintiffs note that Congress intended the antidumping and countervailing duty statutes to work together; for example, the antidumping statute provides an adjustment to United States price in the form of an addition for countervailing duties imposed. *See* 19 U.S.C. § 1677a(d)(1)(D) (1982). It would defeat the purpose of the countervailing duty law, plaintiffs argue, if we allow an addition to the United States price for a rebate program that constitutes a countervailable subsidy.

To support their argument, plaintiffs point out that 19 U.S.C. § 1677a(d)(1)(C) provides an adjustment for tax rebates only if the tax is one directly upon the merchandise, that is, a so-called "indirect" tax. The Court of Customs and Patent Appeals found that relief from "indirect" taxes does not amount to a countervailable subsidy, while relief from "direct" taxes—those imposed on the producer rather than the merchandise—does amount to a countervailable subsidy. *American Express Co.* v. *United States*, 60 CCPA 86,

[2] Plaintiffs make the same argument with regard to the harbor dues rebate.

C.A.D. 1087, 472 F.2d 1050 (1973). The legislative history of 19 U.S.C. § 1677a(d)(1)(C) indicates that Congress consciously intended that tax remissions that constituted countervailable subsidies should not be used to reduce dumping margins. *See, e.g.,* Hearings on H.R. 6767 Before the House Comm. on Ways and Means, 93d Cong., 1st Sess. 135 (1973) (White House report).

Plaintiffs reason that if Congress did not intend such direct tax rebates to reduce dumping margins, it also must not have intended to reduce dumping margins by allowing an adjustment for import duty rebates that constitute countervailable subsidies. This reasoning is not persuasive. First, the distinction between direct and indirect taxes is more easily made than the distinction between an import duty rebate that is or is not a countervailable subsidy. More critically, however, Congress did make the distinction between subsidy and non-subsidy tax rebates is section 1677a(d)(1)(C) but made no such distinction regarding import duty rebates in section 1677a(d)(1)(B). The conclusion that must be drawn is *not* that Congress intended the same restriction to apply in the latter section, but rather that it *did not intend* it to apply.

Moreover, there are further reasons the court and the ITA should refrain from making a subsidy determination in the context of a dumping investigation. The determination of whether a countervailable subsidy exists is a complex one and Congress has provided a separate set of guidelines for the inquiry. In a dumping investigation the ITA is not seeking the same information or asking the same questions it would in a countervailing duty investigation. For this Court to disallow an adjustment to third country price because the import duty rebate is allegedly a countervailable subsidy would be to bypass the countervailing duty statute and essentially penalize the Taiwanese exporters without allowing them an opportunity at the agency level to have a full hearing on whether the rebates are a subsidy.[3]

II. *Harbor Dues Rebate*

Taiwan assesses a four percent *ad valorem* amount on all dutiable imports, termed "harbor dues." These dues are assessed on bicycle parts directly imported by bicycle manufacturers. Upon the export of completed bicycles containing imported parts, these dues are rebated. The ITA allowed an adjustment to United States price for this rebate under 19 U.S.C. § 1677a(d)(1)(B).

Plaintiffs contend that the ITA should not have added the four percent harbor dues rebate to the United States price. Plaintiffs argue first that the harbor dues represent a tax and not an import duty and that therefore the ITA should have conducted an investigation as required in section 1677a(d)(1)(C).[4] That section allows an

[3] Plaintiffs also contend that while no adjustment should be made to United States price based on the import duty rebate, such an adjustment should be made to third country price. Because the Court finds that the adjustment to United States price was proper, it need not address this contention.

[4] 19 U.S.C. § 1677a(d)(1)(C) (1982), provides:

Continued

adjustment to United States price for rebates of indirect taxes, but only if the ITA finds that the cost of the tax is actually passed on in the home market.

In its determination, the ITA stated:

> Whether the [harbor dues] assessment is considered a "tax" or "duty" is immaterial to the outcome of this investigation. If we treat the assessment as a tax, we would add the rebate to the United States price only to the extent that the tax is reflected in home market price. In this case, harbor dues would be included in the home market price.

48 Fed. Reg. at 31,690. The government continues this theme in its brief, in which it suggests that tax assessments are always passed on in the home market price and therefore their rebate always constitutes a proper adjustment to United States price. If this were true, then the statute's requirement that these rebates create an adjustment only to the extent the cost of the tax is passed on would be meaningless. Statutes should be interpreted in such a way that their parts are harmonized and no part is rendered meaningless. *See Beaver Products Co.* v. *United States*, 17 CCPA 434, 437, T.D. 43878 (1930). Congress included a special requirement in section 1677a(d)(1)(C) that it did not put in section 1677a(d)(1)(B). We must conclude that Congress recognized that not all taxes are passed on to the home market, and therefore required some showing that such a tax is passed on before its rebate could be the source of an adjustment.[5] To support an adjustment for a tax rebate there must be substantial evidence in the record to support the conclusion that the tax was passed on to the home market.

It is therefore material whether the harbor dues assessment in this case is a tax or an import duty. Plaintiffs contend that it is a tax because its ultimate purpose is to finance harbor services, which the government provides. In its determination, the ITA found that the ultimate purpose for which the assessments were used was not relevant to the issue of whether they were taxes or import duties. The ITA found that the dues assessment was an import duty because (1) it was "assessed in conjunction with other duties and administered in the same manner" and (2) it was not levied on duty-free merchandise.

The purchase price and the exporter's sales price shall be adjusted by being—
(1) increased by—

* * * * * * *

(C) the amount of any taxes imposed in the country of exportation directly upon the exported merchandise or components thereof, which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States, but only to the extent that such taxes are added to or included in the price of such or similar merchandise when sold in the country of exportation * * *

[5] The House report on the amendment creating the adjustment supports this conclusion:

[A]n adjustment for such [indirect] tax rebates would be permitted only to the extent that such taxes are added to or included in the price of such or similar merchandise when sold in the country of exportation. This is to insure that the rebate of such taxes confers no special benefit upon the exporter of the merchandise that he does not enjoy in sales in his home market. To the extent that the exporter absorbs indirect taxes in his home market sales, no adjustment to purchase price will be made and the likelihood or size of dumping margins will be increased.

H.R. Rep. No. 571, 93d Cong., 1st Sess. 69 (1973).

Generally, this court will defer to agency findings in areas where the agency has a particular expertise. In this case, the ITA determined that the harbor dues assessment was an import duty rather than a tax. The ITA provided objective criteria to support its determination. Such objective criteria are important in developing the law and providing guidance to future petitioners.[6] The Court finds that the ITA's determination that the harbor dues are an import duty is supported by substantial evidence on the record. Congress apparently did not intend rebates that are countervailable subsidies to reduce dumping margins; nevertheless, under section 1677a(d)(1)(B) an adjustment must be allowed unless a countervailing duty assessment is made under the appropriate statute and procedures.

III. *Failure To Conduct an Investigation of Below Cost Sales in the Home Market.*

The ITA declined to conduct an investigation of below cost sales in the home market because:

> Petitioners have not provided a credible basis for suspecting that substantial quantities of bicycles sold in the home market or to third countries have been made at prices which are less than the cost of production.

48 Fed. Reg. at 31,691.[7] This determination is not in accordance with the statutory requirement and places a higher burden upon the petitioner than the statute mandates. Section 773(b) of the Tariff Act of 1930 provides:

> *Whenever the administering authority has reasonable grounds to believe or suspect that sales* in the home market of the country of exportation, or, as appropriate, to countries other than the United States, *have been made* at prices which represent less than the cost of producing the merchandise in question, it shall determine whether, in fact, such sales were made at less than the cost of producing the merchandise. If the administering authority determines that sales made at less than cost of production—
>
> (1) have been made over an extended period of time and in substantial quantities, and
>
> (2) are not at prices which permit recovery of all costs within a reasonable period of time in the normal course of trade,
>
> such sales shall be disregarded in the determination of foreign market value.

---

[6] In a previous determination, the ITA concluded that this same assessment was a tax rather than an import duty and applied section 1677a(d)(1)(C). *Motorcycle Batteries from Taiwan*, 47 Fed. Reg. 9,264, 9,265 (1982). That determination is not now before the Court, nor does it necessarily establish a settled law with respect to this particular assessment. The Court notes, however, the importance of consistency in ITA determinations.

[7] Defendant in its brief also maintains that the petitioner's request for the investigation was untimely, although the agency made no such finding in its determination. Because of the Court's disposition of this issue, it does not decide whether a request for such an investigation is untimely if it is made, as here, within 62 days of the date on which the final determination is statutorily due. The Court notes, however, that in *Connors Steel Co. v. United States*, 2 CIT 242, 527 F. Supp. 350 (1981), *modified*, 3 CIT 79, 566 F. Supp. 1521 (1982), this court found that 51 days were sufficient.

19 U.S.C. § 1677b(b) (emphasis added). The statute requires only a showing that sales have been made at below cost, not substantial sales. It is for the agency to investigate and determine whether substantial sales were made.

In reviewing the record, however, the Court concludes that even if the appropriate statutory standard is applied, plaintiffs failed to present to the ITA sufficient evidence to create reasonable grounds to believe or suspect that sales were being made at below cost in the home market. Plaintiffs alleged that certain of the manufacturers sold bicycles in the United States at a significantly higher price than in the home market. Plaintiffs further alleged that a comparison of this information with the overall operating performance of each manufacturer indicates that the manufacturers would have had to sell the bicycles in the foreign market at less than the cost of production. Essentially, plaintiffs' argument is that when financial statements reveal an operating loss, the conclusion must be that merchandise is being sold at less than the cost of production. Operating losses, however, may be caused by a variety of factors which do not relate to that year's cost of production. For example, bad management or large capital investment that is not amortized could result in the showing of a loss or very small profit. Operating losses are not necessarily tied to actual sales, and may be realized if there are no sales at all. Moreover, as the ITA noted in its determination, "financial statements often reflect accounting adjustments which can distort operating performance significantly." 47 Fed. Reg. at 31,691.

IV. *Failure To Conduct a Countervailing Duty Investigation*

Plaintiff contends that during the course of its antidumping investigation, the ITA uncovered evidence of the existence of countervailable subsidies. Plaintiff argues that 19 U.S.C. § 1677d (1982) requires the ITA to investigate the potential subsidies in such a case. In its brief, however, plaintiff relies on only a portion of the statute. The statute provides in full:

> If, in the course of an investigation under this subtitle, the administering authority discovers a practice which appears to be a subsidy, *but was not included in the matters alleged in a countervailing duty petition*, then the administering authority—
>
> (1) shall include the practice in the investigation if it appears to be a subsidy with respect to the merchandise which is the subject of the investigation, or
>
> (2) shall transfer the information concerning the practice (other than confidential information) to the library maintained under section 1677f(a)(1) of this title, if the practice appears to be a subsidy with respect to any other merchandise.

19 U.S.C. § 1677d (1982) (emphasis added). Read as a whole, the statute appears to contemplate an investigation of one type of sub-

sidy in which the agency uncovers another type of subsidy.[8] The Court therefore finds that the ITA properly rejected plaintiffs' request that it conduct a countervailing duty investigation.

CONCLUSION

The final determination of the ITA regarding bicycles from Taiwan is affirmed because it is supported by substantial evidence in the record and is in accordance with law.

(Slip Op. 86-37)

BRITISH STEEL CORP., ET AL., PLAINTIFFS *v.* UNITED STATES, ET AL., DEFENDANTS AND ALLEGHENY LUDLUM STEEL CORP., ET AL., DEFENDANTS-INTERVENORS

Court No. 83-7-01032

Before BERNARD NEWMAN, *Senior Judge.*

REVIEW OF INTERNATIONAL TRADE ADMINISTRATION'S RESULTS OF REMAND PROCEEDINGS ON AGENCY RECORD PURSUANT TO RULE 56.1—STAINLESS STEEL PLATE FROM THE UNITED KINGDOM

Plaintiffs challenge the Results of Remand of the Department of Commerce, International Trade Administration (ITA), which determined that the British government's equity infusions into British Steel Corporation in fiscal year (FY) 1977/78 were made "on terms inconsistent with commercial considerations" within the meaning of 19 U.S.C. § 1677(5)(B)(i) and therefore constituted countervailable subsidies. According to plaintiffs, ITA's "reasonable investor" criterion for applying the term "commercial considerations" is irrelevant. Additionally, plaintiffs contest the revised valuation methodologies ITA utilized on remand allocating the benefits of the equity infusions over a 15-year period, representing the average useful life of capital assets in domestic integrated steel mills. Plaintiffs contend that in valuing the subsidies ITA should have applied generally accepted accounting principles, which would require that the benefits of the equity infusions be recognized ("expensed") solely in the year of receipt; and that the loan forgiveness must be amortized at the existing fixed interest rate over the remaining term of the loan.

HELD: The court affirms ITA's determination that the British government's equity infusions in FY 1977/78 were made "on terms inconsistent with commercial considerations" predicated on the "reasonable investor" test.

However, the court finds that ITA's revised valuation methodologies are unsupported by substantial evidence and contrary to law because they fail to reflect the commercial and competitive benefit of the subsidies to the recipient, which Congress intended to be the measure of the value of countervailable subsidies. But, the court rejects plaintiffs' contention that the benefits of the equity infusions must be expensed in the year of receipt in accordance with generally accepted accounting principles. The court agrees with plaintiffs' contention respecting the loan forgiveness.

The action is remanded to ITA for reconsideration of its valuation methodologies and recalculation of the benefits of the British government's equity infusions.

---

[8] The legislative history of this provision supports this interpretation:

> Under section 775 of the Tariff Act of 1930, as added by section 101 of the bill, if, in the course of a countervailing duty investigation under Title VII of the Tariff Act * * * the administering authority discovers a practice which appears to be a subsidy but was not included in the matters alleged in the countervailing duty petition, then it must include the practice in the ongoing investigation * * *

S. Rep. 249, 96th Cong., 1st Sess. 97, *reprinted in* 1979 U.S. Code Cong. & Admin. News 381, 483.

[ITA's Results of Remand affirmed in part; remanded in part.]

(Decided March 31, 1986)

Steptoe & Johnson (*Richard O. Cunningham, Charlene Barshefsky, William L. Martin II* and *Neil R. Ellis, Esqs.*, of counsel) for plaintiffs.

Collier, Shannon, Rill & Scott (*David A. Hartquist* and *Paul C. Rosenthal, Esqs.*, of counsel) for defendants-intervenors.

BERNARD NEWMAN, *Senior Judge:*

INTRODUCTION

The central issue presented, having significant international trade implications for foreign governments that make "equity infusions" in state-owned enterprises in poor financial health, is: Under what circumstances are such companies "uncreditworthy" thereby making the government's investments commercially unreasonable and hence countervailable subsidies under 19 U.S.C. § 1677(5)(B)(i). On this vital aspect of the case, the present opinion is a sequel to the court's previous decision, *British Steel Corporation* v. *United States*, 9 CIT ——, Slip Op. 85-26, 605 F. Supp. 286 (March 8, 1985), remanding the action to the United States Department of Commerce, International Trade Administration (ITA) for further proceedings, discussed below. Of transcendent importance in this case are the methodologies used by ITA on remand in valuing the alleged subsidies.

This court's decision of March 8, 1985 sustained ITA's final affirmative countervailing duty determination regarding stainless steel plate from the United Kingdom, 48 Fed. Reg. 19048, April 27, 1983 (Final), finding that the British government's equity investments in British Steel Corporation (BSC) from fiscal year (FY) 1978/79 to FY 1981/82 constituted countervailable subsidies within the meaning of 19 U.S.C. § 1671. However, pursuant to the Government's request (and over plaintiff's opposition), this action was remanded to ITA for: (1) redetermination of whether the equity infusions during FY 1977/78 [1] constituted countervailable subsidies; (2) supplementation of the administrative record with all information obtained and/or utilized by ITA in making its determination relative to the creditworthiness of BSC in FY 1977/78; (3) revaluation and recalculation of the subsidies affected by ITA's new methodologies described in the "Subsidies Appendix" to the Final Affirmative Countervailing Duty Determinations and Countervailing Duty Order in *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina*, 49 Fed. Reg. 18006, 18016 (April 26, 1984) (Final).

On September 9, 1985 ITA transmitted to this court its Results of Remand Proceedings ("Remand Results"), in which ITA deter-

[1] BSC's FY ends on March 31st. Thus, FY 1977/78 encompasses the period April 1, 1977 through March 31, 1978.

mined: (1) equity infusions by the British government in FY 1977/78 were made "on terms inconsistent with commercial considerations" within the meaning of 19 U.S.C. § 1677(5)(B)(i), and consequently, constituted countervailable subsidies; and (2) the benefits from the equity infusions during FYs 1977/78 to 1981/82 should, irrespective of the actual use of the funds, be amortized over a fifteen year period, representing the average useful life of renewable physical assets in the domestic steel industry.[2]

Oral argument was heard pursuant to plaintiffs' motion on March 11, 1986; at the conclusion, the court reserved decision.

Presently before the court is plaintiffs' motion under Rule 56.1 for judgment on the agency record in connection with the foregoing Remand Results. Seeking reversal and further remand, plaintiffs contend that the following aspects of ITA's Remand Results are unsupported by substantial evidence and otherwise not in accordance with law: (1) ITA's finding that the British government's equity infusions in BSC during FY 1977/78 were inconsistent with commercial considerations; (2) ITA's fifteen-year allocation period for amortizing the benefits associated with subsidy funds used for certain purposes other than acquisition of long-lived assets; and (3) ITA's methodology for calculating the benefits associated with the British government's loan forgiveness to BSC.

Defendants and intervenors have responded seeking affirmance of the Remand Results.

The Commercial Reasonableness of the British Government's Equity Infusions in BSC in FY 1977/78

Initially, the court addresses ITA's reevaluation of the commercial reasonableness of the British government's equity infusions in BSC in FY 1977/78.

Section 771(5) of the Tariff Act of 1930, as amended, 19 U.S.C. § 1677(5), embraces any subsidy "bestowed directly or indirectly on the manufacture, production, or export of any class or kind of merchandise" including: "[t]he provision of capital, loans or loan guarantees *on terms inconsistent with commercial considerations*" (emphasis added). In Slip Op. 85–26, this court construed the "commercial considerations" test concluding that an investment is consistent with commercial considerations if a reasonable investor could expect a reasonable rate of return on his investment within a reasonable period of time. Slip Op. 85–26 at 16. In its earlier decision, this court reviewed the financial history of BSC and found that for FYs 1978/79 through 1981/82, "given BSC's deteriorating financial condition and precarious situation, no private sector investor expecting a reasonable return on his investment within a reasonable time would have given any consideration whatever to investing in BSC during the period of its restructuring." *Id.* at 16. On remand,

[2] The Remand Results have not been published in the Federal Register.

ITA applied the same "reasonable investor" criterion in determining whether the British government's equity infusions in FY 1977/78—the year at issue in the present review—were "inconsistent with commercial considerations" within the meaning of the statute.

In reevaluating the commercial reasonableness of the equity infusions by the British government during FY 1977/78, ITA reviewed BSC's financial history, commencing with its establishment in 1967. The review covered such fundamental indicia of financial condition as net income of BSC, net income before interest and taxes, cash flow from operations, coverage of interest expenses, return on equity, return on sales and current assets and liabilities.

ITA also considered such additional pertinent factors as the substantial cost of forming BSC, leading to unfavorable financial results for the first few years of the company's existence; the enormous social costs borne by BSC because of the British government's policy decisions, such as keeping high-cost plants open to preserve jobs; BSC's massive losses; the extremely bleak prospects of the company expressed by its own chairman in BSC's 1976–77 annual report; and the dismal outlook for the world steel market in general.

Based on its analysis of the foregoing factors, ITA reached the following conclusion:

> After considering the results for fiscal years 1975–76 and 1976–77 and the outlook for the world steel market in general, a reasonable investor in 1977 would not have considered British Steel with its large losses, poor return on equity, and other signs of structural problems, to be a reasonable commercial investment.

Record on remand, document 1 at 7.

The court finds substantial evidence in the record of the bleak financial condition of BSC in FY 1977/78 and the precariousness of any expectation of future profitability. If ITA's application of the statutory expression "commercial considerations" is reasonable and not in conflict with the expressed intent of Congress, such interpretation is entitled to the traditional deference courts pay to agency interpretation. *Board of Governors, FRS* v. *Dimension Financial Corp.*, —— U.S. ——, 106 S. Ct. 681, 686 (1986); *United States* v. *Riverside Bayview Homes*, —— U.S. ——, 106 S. Ct. 455, 461 (1985); *Chemical Manufacturers Assn.* v. *Natural Resources Defense Council, Inc.*, 470 U.S. ——, 105 S. Ct. 1102, 1108 (1985); *Chevron, U.S.A., Inc.* v. *Natural Resources Defense Council, Inc.*, 467 U.S. ——, 104 S. Ct. 2778, 2881–83 (1984) and *Zenith Radio Corp.* v. *United States*, 437 U.S. 443, 450 (1978). *See also American Lamb Company* v. *United States*, 4 CAFC ——, —— F.2d —— (Appeal No. 86–560, decided February 28, 1986); *Smith Corona Group, Consumer Products Division, SCM Corp.* v. *United States*, 713 F.2d 1568, 1571 (Fed. Cir. 1983), *cert. denied*, 104 S. Ct. 1274 (1984); and *Consumer Products*

Division, SCM Corp. v. *Silver Reed America*, 753 F.2d 1033, 1039 (Fed. Cir. 1985). Furthermore, it is a cardinal principle that "[t]he court need not conclude that the agency construction was the only one it permissibly could have adopted to uphold the construction, or even the reading the court would have reached if the question initially had arisen in a judical proceeding". *Chevron, U.S.A., Inc.*, 104 S. Ct. at 2782 n. 11. *See also Chemical Manufacturers Association*, 105 S. Ct. at 1108; and *Consumer Products Division*, 753 F.2d at 1039.

Plaintiffs argue that ITA's "reasonable investor" test is irrelevant to the commercial reasonableness of the British government's equity infusions and contrary to law. According to plaintiffs, the British government, unlike an outside investor, could not simply abandon BSC and incur no further losses if it decided to close the firm, and therefore the steps the British government took as the sole investor in the corporation were reasonably taken to minimize its prospective losses. In short, plaintiffs contend that the overall operating results and financial ratios of a loss-incurring company are irrelevant to the issue of whether the British government's equity infusions were inconsistent with commercial considerations within the purview of the statute.

The nub of the dispute between the parties concerns the interpretation of the term "commercial considerations"—specifically, whether the statutory indicium of a subsidy prescribed by section 1677(5)(B)(i) permits ITA to assess the British government's equity infusions in BSC in FY 1977/78 from the standpoint of the reasonable outside investor, as claimed by defendants and intervenor. In essence, ITA considered whether a reasonable investor seeking to make a sound investment would have invested in BSC during the period in question given BSC's history, financial status and the outlook for the steel industry in general at that point in time. As stated by ITA (record on remand, document 1 at 23–24):

> When determining whether an equity investment is consistent with commercial considerations, the Department first looks for the value of the stock as determined by the market place. To the extent that a government procures stock at a market price, there is no subsidy. If a government pays a premium price for the shares, its investment is inconsistent with commercial considerations. When a firm's shares are not traded publicly, there is no market-determined price. Therefore, the Department must rely on information available to it that would be available to an investor at the time of the investment as a means of determining the commercial reasonableness of investments in the company.
>
> Such an investor will study the company's financial statements to assess the company's current health and past performance. To get an idea of what events and decisions underlie these financial results, as well as to understand management's views of the company's goals and future prospects, an investor

> will also examine carefully the other information contained in the company's annual reports. Then, to evaluate the company's prospects in a wider context, an investor will consider any available independent studies and forecasts of the industry in general.

In connection with the instant litigation, BSC commissioned an economic analysis by Dr. Joseph W. McAnneny of Economists, Incorporated (record on remand, document 7 (non-confidential version)).[3] Predicated on his analysis, Dr. McAnneny submitted the following arguments concerning ITA's methodology:

First, based on application of ITA's reasonable investor test to six integrated U.S. steel producers with unfavorable operating results in 1981-84, McAnneny would expect to find that none of these companies were able to attract capital. Yet, during the period 1981-84, all the producers raised debt and equity capital in significant amounts.

Second, ITA has created a *per se* rule—that continued investment in a failing company for any reason is inconsistent with commercial considerations—which rule conflicts with observed market behavior where frequently corporations reorganize around their profitable assets, rather than terminate all productive facilities.

Finally, ITA's reasonable investor test focuses primarily on recent and current financial performance to the exclusion of other relevant data, and neglects to consider possible remedies that a firm might take to reposition itself in a market or reduce operating costs and restore profitability.

In view of the foregoing shortcomings of ITA's test, as perceived by McAnneny, he proposes an alternative standard for determining whether investment in a loss-incurring corporation is inconsistent with commercial considerations. Specifically, McAnneny proposes application of two tests:

(1) The corporation should continue to operate (and the investor should continue to cover operating losses) for facilities where revenues exceed the variable costs of production and make some contribution to coverage of fixed expenses. Predicated on this test, plaintiffs maintain that the term "commercial considerations" permits ITA to assess the commercial reasonableness of equity infusions from the standpoint of the interest of the British government and BSC's management in minimizing its losses. Plaintiffs also posit that U.S. investors and lenders "customarily" inject funds in failing companies to minimize their losses, irrespective of any expectation of future profits.

(2) The investor should undertake all new investment schemes (or fund to completion existing investment schemes) where the discounted cash flows from the investment exceed the cost of the in-

[3] J. McAnneny, Calculation of Subsidies Under the Countervailing Duty Law: An Economic Analysis (July 8, 1985).

vestment (*viz.*, the net present value or "NPV" of specific projects or ventures are greater than zero).

Based on the application of the foregoing tests, McAnneny argues that investments by the British government in FY 1977/78 in BSC were consistent with "commercial considerations".

Capital-Raising Experiences of Six U.S. Steel Companies

As underpinning for their argument that BSC was creditworthy in FY 1977/78, plaintiffs heavily rely upon McAnneny's study of the capital-raising experiences of the six largest integrated U.S. steel companies during the three-year period 1982–84. In his study, McAnneny found that the three-year operating results of the six companies were as poor as or worse than those of BSC in the two years prior to FY 1977/78. Despite their unfavorable operating results, McAnneny found that each of the U.S. companies attracted significant amounts of debt and equity capital. Plaintiffs contend that under ITA's test, none of these companies should have been able to attract debt or equity capital, and consequently ITA erroneously determined that for FY 1977/78 investment in BSC was not commercially reasonable.

Defendants challenge the validity of McAnneny's conclusions on the grounds that: (1) he used a different time period, 1982–84, for his comparison of the returns on equity of the United States steel producers with those of BSC in FY 1977/78, thus failing to consider the different economic climate, different market and different investor expectations in the two time periods; (2) market and investor expectations would depend, in part, on the financial history of the domestic companies, as well as the prevailing economic conditions, which were not considered by McAnneny; and (3) McAnneny erroneously assumed that ITA looked only at BSC's performance for the two preceding FYs, 1975/76 and 1976/77, when in fact, ITA considered BSC's financial history for FYs 1973/74 to 1977/78. In short, defendants insist that the fact the U.S. companies raised debt capital in 1982–84 is irrelevant to the question of BSC's ability to obtain private investment in the different market prevailing in 1977–78; and that it is "sheer speculation to assert that, under ITA's test, the domestic companies would not have been considered commercially reasonable investments" (defendant's memorandum at 24).

The court agrees with defendants' position. The capital-raising ability of the United State firms having different financial histories and future prospects than BSC during the economic climate of 1982–84 does not refute ITA's finding that equity infusions by the British government in BSC in FY 1977/78 were inconsistent with commercial considerations.

"Variable Costs" Test

Plaintiffs further proffer McAnneny's "variable costs" test, *viz.*, that although a firm may show an overall loss, it should continue to operate so long as it can earn at least enough to cover its variable costs. The theory is that having covered variable costs, additional revenue can defray some of the fixed costs (costs that continue to exist even if production ceases, like rent). If a firm whose revenues did exceed its variable costs were to cease production, it would be foregoing revenue that could have helped to defray fixed costs. Accordingly, even though a firm may not be earning enough to cover its total costs (fixed plus variable, it would be economically rational to continue operations so that the overall loss would be minimized by the additional revenues. McAnneny maintains that equity funds used to help cover BSC's operating losses are not subsidies if BSC was covering its variable costs at the time.

As aptly pointed out by defendants, the variable cost test may be a useful analytical tool for the owner-manager as a means of deciding whether (and for how long) to continue operating a loss-incurring company, but the test is inapposite to investment decisions by private investors. Simply put, it would be unrealistic to expect a private sector investor to supply operating funds to a loss-incurring firm merely to permit the firm to continue operations to minimize its losses. Thus, while it may be perfectly rational for an owner to sustain loss-minimizing operations, it would not be commercially reasonable for an investor to provide funds for that purpose without adequate assurance of the future profitability of the enterprise and a return on his investment within a reasonable time. The record supports no such assurances for BSC in FY 1977/78. Under these circumstances, ITA properly rejected application of the variable costs test.

The court stresses here that equity infusions in loss-incurring companies do not *per se* confer a subsidy, and defendants have not so argued in this case. Defendants agree with plaintiffs that the sole fact a company has been incurring losses is not dispositive of whether investments are consistent with commercial considerations. On that score, defendants point out ITA found that equity investments in BSC in years prior to FY 1977/78 were consistent with commercial considerations despite the fact that the company was sustaining substantial losses.

Although not germane to the variable costs analysis, it should also be mentioned that McAnneny attempts to justify the British government's equity infusions in BSC on the theory that it is likely that "opportunity costs" in some form would have been incurred by BSC (*i.e.*, BSC's income would have fallen) had the British government failed to make its equity infusions in FY 1977/78. Again, such rationale may be applicable to the British government and BSC, who concededly had no option but to continue operation of BSC.

Nonetheless, avoidance of such opportunity costs by equity infusions are irrelevant to a reasonable investor analysis.

Net Present Value Test

Dr. McAnneny also urges that the Net Present Value (NPV) test be utilized in determining the commercial reasonableness of the British government's investments in BSC. Hence, McAnneny observes that under standard principles of economic analysis, the commercial reasonableness of capital expenditures by BCS on new projects must properly be judged against an evaluation of the NPV of each project. Thus, projects whose discounted cash flows show a positive NPV are commercially justified; projects whose cash flow show a negative NPV are not. According to plaintiffs, NPV analysis focuses upon whether investment in a new project is commercially worthwhile (positive), and it is irrelevant whether a capital project (or some combination of projects) returns the corporation to overall profitability. In support of NPV analysis, plaintiffs make reference to "concrete market examples" of private companies that had suffered heavy losses in successive years and nevertheless continued to make new capital investments.

Defendants, however, correctly observe that NPV analysis is largely predicated upon long-term earnings and interest-rate assumptions, which at best would be tenuous; and that BSC furnished analyses only of individual projects without any evaluation of those projects in terms of their effects upon BSC's overall operations and income-producing prospects.

While unquestionably NVP analyses were of importance to BSC's management, they were relevant to an outside investor only to the extent that the analyses showed how the investments in the individual projects would affect the overall operations and future profitability of BSC. Stated differently, from the investor's point of view, an investment would not be commercially reasonable if *overall* the company may still constantly lose money and never provide a reasonable return no matter how justifiable a company's decision respecting individual projects analyzed on the basis of NPV.

As stated by ITA in its remand results (record on remand, document 1 at 24-26):

> The plaintiff suggests that a better way of measuring the commercial reasonableness of investment in a company is to examine the company's decision on specific levels of production, capital expansion, and closing of plants. The Department agrees that a profit-maximizing company should use the types of analyses suggested by the plaintiff when making its managerial decisions on these issues, i.e., managers will attempt to set production at a level where marginal revenue equals marginal cost and will select among capital projects by comparing the net present values of alternative projects. However, while the Department does not take issue with the plaintiff on the eco-

> nomic validity of such tests, the Department believes tests of individual project decisions present too limited an appraisal of a company's overall condition to be the bases of the Department's methodology for evaluating purchases of equity. Such purchases relate to a company's operations as a whole, not just individual activities. Analyses of individual investment (disinvestment) projects, while laudable, are often meaningless in the context of a debate over the wisdom of equity purchases in a corporation. An individual project may be expected to be highly profitable, and indeed prove to be highly profitable once completed, yet the overall losses of the rest of the corporate investments may more than offset the new source of profitability. To the extent the Department should examine individual project appraisals, it should only do so if the respondent offering the appraisal also supplies contemporary analyses of the relevance of the project to the overall health of the corporation. For example, if a company is losing a billion dollars annually on all its investments and a new project provides a positive net return of $200 million, the company overall would still be losing $800 million annually and is, therefore, probably a bad equity investment.

Continuing, ITA commented (*Id.* at 26):

> British steel, in the several project analyses submitted in response to the draft results of the remand, has not provided any information as to the effect of these projects on the corporation's overall prospects for profitability. The Department's broader approach, which does not limit itself to an analysis of individual management decision but instead looks at the overall performance of the company in the context both of the company's views of its prospects and independent industry forecasts, gives a better picture of the overall condition of a company and the reasonableness of investment in it.

Another serious problem stressed in the Remand Results is that ITA

> might legitimately find a company that loses money year after year, and yet that same company can show it has never started a project without a thorough analysis that indicates the project will be profitable. An examination of the parts does not necessarily reflect the reality of the whole. [*Id.* at 27.]

The court holds that ITA properly declined to judge the commercial reasonableness of investment in BSC in FY 1977/78 on the basis of an economic analysis focused simply on the NPV of individual projects.

In sum, the court finds ITA's determination that the British government's investments in BSC in FY 1977/78 were inconsistent with commercial considerations, predicated upon its reasonable investor test, is supported by substantial evidence and otherwise in accordance with law.

ITA's Methodology for Valuing the Benefits From Equity Infusions

We now turn to the difficult issues concerning ITA's revised methodologies for valuing the benefits of the British government's equity infusions.

In its final determination in 1983, ITA calculated the value of the alleged subsidy benefits to BSC in accordance with the principles announced in *Certain Steel Products From Belgium*, 47 Fed. Reg. 39304, 39316 (1982) (Final) (Appendix 2). However, in its Remand Results, ITA followed the revised methodology announced in the 1984 proceedings involving steel imports from Mexico and Argentina ("revised methodology"). *Certain Carbon Steel Products From Mexico*, 49 Fed. Reg. 5142, 5148 (1984) (Preliminary); *Cold-Rolled Carbon Steel Flat-Rolled Products From Argentina*, 49 Fed. Reg. 18006, 18016 (1984) (Final). Under the revised methodology, ITA allocated the subsidies arising from the British government's equity infusions over 15 years, irrespective of the use to which the funds were put. Such allocation period subsumed a stream of benefits lasting the average useful life of integrated steel-producing assets, as determined by the United States Internal Revenue Service.

ITA's allocation method is explained (record on remand, document 2 at 40):

> To allocate these benefits over time, the Department has considered various allocation periods including a variety of fixed time periods and the average life of long-term debt for a company or country, but has concluded that there are no economic or financial rules that dictate the choice of any one particular allocation period. Therefore, the Department has chosen a standard period—the average useful life of a company's renewable physical assets as determined by the U.S. Internal Revenue Service. The Department has openly stated that its choice is arbitrary in the sense that there are several viable options from which it could choose. However, within the context of the countervailing duty law, which dictates a period reflecting the commercial and competitive benefit of the subsidy, the Department believes its choice is reasonable. In addition to reasonableness, this standard offers predictability in the outcome of Department proceedings and, more importantly, eliminates inconsistent results between companies and countries.

Plaintiffs vigorously object to the use of the 15-year amortization period respecting subsidy funds that were not used to acquire long-lived assets,[4] but rather were used for other purposes. Specifically, plaintiffs argue that based on generally accepted accounting principles (GAAP):

[4] There is no dispute that only a portion of the subsidy funds provided by the British government during FYs 1977/78 through 1981/82 were used for the acquisition of capital assets.

(1) The benefit of funds used to purchase assets prematurely retired must be expensed in the year of retirement.

(2) The benefit of funds used to cover operating losses must be expensed in the year of receipt.

(3) The benefit of funds used to cover redundancy and closure costs must be fully recognized in the year the decision is made to close the facility.

It is plaintiffs' position that ITA's across-the-board application of a 15-year amortization period for valuation of these "non-capital" subsidies is arbitrary, unsupported by substantial evidence of record, contravenes GAAP, and fails to reflect the commercial and competitive benefit of the equity infusions.[5]

Preliminary to discussion of the merits of the parties' contentions, it must be recognized that judicial deference should be accorded agency construction of a statute that it is charged with enforcing, particularly with respect to the broad discretion of the agency to apply reasonable methodologies in implementing the law. *American Lamb Co., supra; Consumer Products Division, SCM Corp.*, 753 F.2d at 1039; *Melamine Chemicals, Inc.* v. *United States*, 732 F.2d 924, 928 (Fed. Cir. 1984); *Smith-Corona Group, Consumer Products Division, SCM Corp.*, 713 F.2d at 1571; *Carlisle Tire & Rubber Co., Division of Carlisle Corp.* v. *United States*, 9 CIT ——, Slip Op. 85–110, 622 F. Supp. 1071 (October 24, 1985); and *Bingham & Taylor, Division, Virginia Industries, Inc., et al.* v. *United States*, 10 CIT ——, Slip Op. 86–14 (February 14, 1986) (judicial deference inapplicable where agency interpretation is contrary to statute and Congressional intent). Further, it should be stressed that ITA's methodology need not be the most reasonable in order to be upheld by this court, nor need it be the methodology that this Court would have selected had it been the decision maker. *Asahi Chemical Industry Co.* v. *United States*, 4 CIT 120, 123, 548 F. Supp. 1261, 1264 (1982).

In a recent decision, *Alhambra Foundry* v. *United States*, 9 CIT ——, Slip Op. 85–130 (December 30, 1985), the court, while recognizing that ITA in its discretion may choose one methodology or another in calculating the benefits of bounties or grants, pointed up that "any methodology employed must reasonably accurately reflect factual information in the administrative record" (Slip Op. at 9). Moreover, the Federal Circuit recently cautioned that the administering authority's discretion is not "unbounded". *Freeport Minerals Company* v. *United States*, Appeal No. 84–1591, decided November 7, 1985, Slip Op. at 4 (citing *Burlington Truck Lines, Inc.* v. *United States*, 371 U.S. 156, 166–68 (1962). And of course, "[t]he traditional deference courts pay to agency interpretation is not to be applied to alter the clearly expressed intent of Congress". *Board of Governors*, 106 S. Ct. at 686.

[5] Plaintiffs do not challenge the 15-year allocation period as applied to subsidy funds used to acquire long-lived assets.

Challenged here is ITA's methodology of allocating the benefits of the British government's equity infusion over 15 years, across the board irrespective of the use of the funds, representing the average useful life of capital assets in the integrated steel mills in the United States.

The legislative history of the Trade Agreements Act of 1979 shows that Congress recognized the concept of allocating the benefits of subsidies over a number of years, in conformity with the commercial and competitive benefit of the subsidy to the recipient:

> There is a special problem in determining the gross subsidy with respect to a product in the case of nonrecurring subsidy grants or loans, such as those which aid an enterprise in acquiring capital equipment or a plant. Reasonable methods of allocating the value of such subsidies over the production or exportation of the products benefiting from the subsidy must be used. *In particular, a reasonable period based on the commercial and competitive benefit to the recipient as a result of the subsidy must be used.* For example, allocating a subsidy in equal increments over the anticipated 20-year useful life of capital equipment purchased with the aid of the subsidy would not be reasonable if the capital equipment gave the recipient of the subsidy an immediate significant competitive benefit compared to what would be the situation without the capital equipment and compared to the competitive benefit the equipment would likely provide in the later stages of its useful life.

S. Rep. No. 249, 96th Cong., 1st Sess., at 85–86, 1979 U.S. Code & Ad. News at 472–473 (emphasis added).

Significantly, the Senate's report states that in allocating the benefit of the subsidy "a reasonable period based on the commercial and competitive benefit to the recipient as a result of the subsidy must be used". In the present case, ITA failed to adequately explain why a 15-year allocation period is reasonable based on the commercial and competitive benefit of the subsidies in question to BSC.

After careful review of ITA's methodology for allocating the benefits of the equity infusions, the court is constrained to conclude that linking the commercial and competitive benefit of the subsidies at issue to the 15-year average useful life of capital assets in the U.S. steel industry, while administratively convenient, is unreasonable and not in accord with Congressional intent that the benefits be allocated over a period of time reflecting *the commercial and competitive benefit of the subsidy to the recipient.*

The court recognizes that each of the valuation methodologies ITA considered has certain financial and economic "pitfalls" and an inherent element of arbitrariness. But the court fails to perceive any basis whatever in the legislative history of the Trade Agreements Act of 1979, logic or the facts of record for allocating the commercial and competitive benefit of the subsidies at issue over a

period linked to the average useful life of capital assets in the integrated U.S. steel mills.

ITA itself has conceded that the life of capital assets does not necessarily relate to the economic benefits of subsidy funds.

> [W]e recognize first that physical assets are often a *fairly small part of the cost of doing business,* and second that even in highly capital intensive industries the benefit of funds received * * * *has no particular relationship to the life of the machinery.*

Subsidies Appendix to *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina,* 49 Fed. Reg. 18006, 18018 (April 26, 1984) (Final) (emphasis added).

In the foregoing decision, ITA further candidly explained:

> We originally chose the average useful life of the assets because we believed the benefits of a grant somehow had a life approximating the life of the assets * * * *We now consider this belief wrong; the life of the benefits is not observable.*

Id. at 18021 (emphasis added).

Again, in *Certain Carbon Steel Products from Mexico,* 49 Fed. Reg. 5142, 5150 (Feb. 10, 1984) (Preliminary) ITA frankly stated:

> The "life" of the countervailable benefit is indefinitely diffused around the time that the cash benefit arises. Therefore, *the average life of equipment is arguably no more accurate a measure than simply choosing a number.* [Emphasis added.]

Fundamentally, "an arbitrary allocation of [the] benefit" cannot be sustained. *Michelin Tire Corp.* v. *United States,* 6 CIT 320, Slip Op. 83-136 (December 22, 1983), *vacated,* Slip Op. 85-11 (January 28, 1985).

As previously noted, plaintiffs maintain that the subsidies in dispute must be allocated in accordance with GAAP. Interestingly, a portion of the legislative history of the 1979 Act cited by plaintiffs indicates that Congress intended "relating the value of a subsidy *for acquiring assets* to their anticipated useful life, based on generally accepted accounting principles". H.R. Rep. No. 317, 96th Cong., 1st Sess. 75 (1979) (emphasis added). Hence, it is clear that Congress intended that GAAP should be used where the funds provide an enterprise with capital equipment or a plant. But, there is nothing in the legislative history of the 1979 Act suggesting that Congress expected that the value of a subsidy *not* used for acquiring assets be related to either the useful life of capital assets or to GAAP. Rather, in H.R. Rep. No. 317, *supra,* at 75, Congress stated that "[valuation] methods should include relating the benefit of the commercial advantage *"to the recipient"* (emphasis added). The subsidies at issue here—funds used by BSC to cover its operating costs (or defray operating losses), redundancy and closure funds and funds used to purchase assets prematurely taken out of use in the course of restructuring—obviously aid in keeping the recipient firm

in business and making it more efficient and competitive. Undoubtedly, therefore, the commercial and competitive benefit of these subsidies continue beyond the year of receipt and into subsequent accounting periods. *See* Slip Op. 85-26 at 22-23.[6] While plaintiffs are correct in asserting that *Michelin Tire Corp.* v. *United States*, 4 CIT 252 (1982), *vacated*, 9 CIT ——, Slip Op. 85-11 (January 28, 1985), suggested reliance on GAAP under certain circumstances, the *Michelin* court subsequently, upon further consideration of the matter, admonished against the use of valuation techniques that do not provide "a basic correspondence of the subsidy to the benefit." *Michelin Tire Corp., supra*, Slip Op. 83-136 at 3. "Expensing" the "non-capital" subsidies at issue in accordance with GAAP would not provide a correspondence of the subsidies to their benefit, and consequently GAAP should not be applied under the circumstances of this case.

Although previously rejected by ITA, with some justification,[7] intervenors nonetheless suggest that the benefit of the subsidies in question should be allocated on the basis that they relieve BSC of the necessity for issuing long term debt on a commercial basis. Intervenors' hypothesis is that the commercial and competitive benefit of the subsidies is not the specific uses to which the funds were put, "but rather in being able to avoid the alternative commercial cost of obtaining the funds. BSC thus gains a commercial and competitive advantage over nonsubsidized firms who must pay a commercial financing cost to get funds to carry out exactly the same purposes" (memorandum at 21).

Intervenors' proposal—for allocation of the subsidies in question on the hypothesis that long-term debt financing by BSC was the most likely commercial alternative to the government's equity infusions—comports with the following observations in *Michelin Tire Corp., supra*, Slip Op. 83-136, regarding the benefits of a subsidy:

> The benefits which must be withdrawn by payment of duty in the case of a subsidy are the benefits which result as a direct consequence of the subsidy. For a business, the direct consequences of receiving a gift of money normally are the elimination of the necessity of looking elsewhere for those funds and paying the price required by the alternative source of funds. The normal alternative sources of funding for business enterprises are two—the sale of shares in the business, carrying with it the obligation to share the profits, or the incurring of debt, carrying with it the obligation to repay the creditor with interest.

---

[6] In its prior decision, Slip Op. 85-26, at p. 23, this court expressly rejected plaintiffs' contention that capital assets confer no further benefit after they are prematurely retired, and that consequently ITA must recognize in full (expense) the undepreciated cost of the asset in the year that it is taken out of use in conformance with GAAP.

[7] *See* Fed. Reg. at 18018.

It's Been, Where It Is, Where It May Go, 12 Syracuse Journal of International Law and Commerce, 59, 110 (1985), in which the author observes:

> Despite possible objections that a company may raise money through equity issues or long-term loans, it is usually preferable to allocate the value of a grant over the life of long-term debt rather than allocate the grant over the average lifetime of assets. One cardinal principle of the countervailing duty law is that the subsidy is the money received, rather than whatever is purchased with that money. When coupled with the principle that the value of the subsidy is its value to the recipient, it is apparent that it is more consistent to view a grant as a substitute for a long-term loan rather than something somehow tied to a company's assets If one were to compare the grant to a long-term loan that a company would have to raise as an alternative (even to use a hypothetical long-term loan for a company that has none), and state that the amount of the subsidy is the difference between what the recipient of the grant must pay on the grant (nothing) and what the recipient would have been required to pay on a loan (principal plus interest), the result would be a subsidy that could very well be larger than the amount of the grant but would not violate GATT.

In summary, while the court need not at this juncture pass upon the merits of intervenor's suggested allocation technique, based upon long-term debt financing, the court ineludably concludes that ITA's 15-year allocation methodology, which links the commercial and competitive benefit of the equity infusions to the average useful life of capital assets in integrated U.S. steel mills, is neither supported by the record nor Congressional intent. Accordingly, the court finds that ITA's methodology is unreasonable and therefore not in accordance with law. Consequently, this action must be remanded to ITA for further consideration of other "viable options" that may more reasonably reflect the benefit of the subsidies in question.

British Government's Forgiveness of Indebtedness

In 1981, the British government forgave £509 million in long-term indebtedness owed by BSC to the National Loans Fund. In its Remand Results, ITA treated the loan forgiveness as an additional equity investment amortizable over 15 years.[8] For purposes of such amortization, ITA utilized an interest rate of 17.11 percent, representing the 1981 United Kingdom domestic corporate bond rate plus a risk premium. The weighted average interest rate on BSC's existing loans in 1981 was 11.57 percent.[9]

---

[8] As disclosed in BSC's annual report, the £509 million in loans forgiven in 1981 represents funds received by the corporation from 1967 through 1978. A similar loan forgiveness in 1971-72 occurred during the period in which ITA considered the British government's equity infusions to be consistent with commercial considerations and thus not to confer a countervailable benefit.

[9] The interest rate on BSC's loans ranged from 6.75 percent to 16.75 percent, with a weighted average rate for all of the loans of 11.57 percent.

Plaintiffs contend that ITA's methodology for calculating the benefit of the loan forgiveness, predicated upon 1981 interest rates and a 15-year amortization period, is arbitrary and fails to reflect the commercial and competitive benefit to BSC of the interest and principal payments forgiven. On that score, plaintiffs urge that inasmuch as the interest rates on the existing loans were fixed, absent the British government's forgiveness BSC would have *continued* to pay 11.57 percent—not a rate based on what new capital would have cost BSC in 1981, *viz.*, 17.11 percent. Plaintiffs also challenge ITA's 15-year allocation period as arbitrary since the remaining life of the loans in question was substantially shorter than 15 years and ITA inexplicably refused to use the repayment schedules associated with the forgiven loans.

The court fails to perceive any reasonable basis for ITA's action in valuing the benefit of the loan forgiveness on the basis of what it would have cost BSC to obtain new financing in 1981. BSC was incurring an average fixed interest rate of only 11.57 percent on the forgiven loans, and BSC would have been required to continue paying only that rate if the loans had not been forgiven. In evaluating the subsidy arising from the loan forgiveness, the commercial and competitive benefit to BSC is the actual financial burden that was removed by the loan forgiveness. Absent the loan forgiveness, BSC undoubtedly would have continued to pay 11.57 percent interest on its existing loans, and most assuredly BSC would not have refinanced its debt at a cost of 17.11 percent, which refinancing is implicit in ITA's methodology.

ITA's apparent predicate that but for the loan forgiveness by the British government, BSC would have relieved itself of its existing loans by new borrowing at the then current rate of 17.11 percent is, in the words of the United States Supreme Court, "economically senseless".[10] *Matsushita Electric Industrial Co. Ltd.* v. *Zenith Radio Corp.*, Appeal No. 83-2004, decided March 26, 1986. As previously emphasized, the commercial and competitive benefit of the subsidy to the recipient is the measure of the value of the subsidy. In the case of debt forgiveness, the commercial and competitive benefit to the recipient firm is debt extinguishment. Thus, it is logical that such subsidy should be measured by the actual interest and principal repayment obligations over the remaining life of the existing loans, rather than in accordance with hypothetical refinancing at a higher rate of interest than the firm is paying on its existing loans for an arbitrary period of years.[11]

---

[10] The obvious unreasonableness of ITA's loan forgiveness methodology may be illustrated by the following hypothetical case: In 1965 a British company borrows money from the government at an interest rate of 9 percent, to be repaid in 1982. In 1980 the government forgives the loan. The prevailing interest rate for corporate bonds in Great Britain in 1980 is 15 percent. Following the methodology applied to BSC in the present case, ITA would amortize the unpaid principal of the loan forgiven at 15 percent (plus a risk premium) over a period of 15 years.

[11] As pointed up by plaintiffs, ITA offered no explanation in the Remand Results for its refusal to calculate the benefits associated with the 1981 debt forgiveness based on the actual interest rate BSC was incurring, nor for its use of a 1981 interest rate for loans to BSC during the period 1967-77, nor of its choice of a 15-year

Continued

The short of the matter is ITA's methodology for valuing the benefits associated with the British government's 1981 loan forgiveness is contrary to law and unsupported by substantial evidence. Therefore, this action is remanded to ITA for revaluation of the benefits of the 1981 debt forgiveness consistent with the foregoing opinion.

CONCLUSION

The Remand Results are affirmed insofar as ITA determined that the equity infusions by the British government in FY 1977/78 were made "on terms inconsistent with commercial considerations" within the meaning of 19 U.S.C. § 1677(5)(B)(i), and therefore constitute countervailable subsidies.

ITA's valuation methodology in this case is unsupported by substantial evidence and otherwise is not in accordance with law because it fails to reflect the commercial and competitive benefit of the subsidies in question to the recipient.

It is, therefore, Ordered:

(1) The Remand Results are affirmed insofar as ITA determined that the equity infusions by the British government in FY 1977/78 were made "on terms inconsistent with commercial considerations" within the meaning of 19 U.S.C. § 1677(5)(B)(i), and therefore constitute countervailable subsidies;

(2) This action is remanded to ITA for reconsideration of its revised valuation methodologies and recalculation of the benefits of the British government's equity infusions consistent with this opinion; and

(3) ITA shall report the results of its recalculations and redeterminations to this court within 60 days after the date of entry of this order.

---

amortization period. Plaintiffs have advised the court that the interest differential between 17.11 percent and 11.57 percent based on a 1981 balance of £509 million results in an overvaluation of the loan forgiveness benefit of nearly £29 million.

NOTICE OF PROPOSED RULE CHANGES

The Committee on Rules and Practice of the United States Court of International Trade is considering several proposed amendments to the Rules of the Court.

The proposed amendments pertain to Rules 3, 4, 47, 48, 60, 62 and 75.

The Committee invites comment on the proposed amendments, along with suggestions for additional changes in the Rules.

Those who wish to present their views should submit an original and one copy of a written statement to the Committee, in care of Joseph E. Lombardi, Clerk of Court, by the close of business on Friday, May 16, 1986. Each statement shall be typewritten and not more than 10 double-spaced pages in length. It also should bear an indication whether the views contained therein are solely those of the author or are submitted on behalf of a particular organization.

Copies of the proposed amendments may be obtained by writing the Clerk of Court or by calling 212-264-2800.

NOTICE

The Procedural Handbook of the United States Court of International Trade, prepared by the staff of the Office of the Clerk, is now available. The Handbook provides basic information for the practitioner in processing actions under the court's Rules. It is intended to serve solely as a convenient guide and reference source, which consolidates and summarizes various procedures before the court.

The cost of the Handbook is $10.00. If you are interested in receiving a copy of the Handbook, please fill out the form below and return to:

19 CFR Part 101

(T.D. 86-76)

Customs Regulations Amendment Relating to the Customs Field Organization; Davenport, Iowa, and Rock Island and Moline, Illinois

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This notice changes the field organization of the Customs Service by establishing a new port of entry on a 2-year trial basis, at Davenport, Iowa, and Rock Island and Moline, Illinois. This change is being made as part of Customs continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public.

EFFECTIVE DATE: May 16, 1986.

FOR FURTHER INFORMATION CONTACT: Richard Coleman, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

Customs ports of entry are places (seaports, airports, or land border ports) designated by the Secretary of the Treasury where Customs officers or employees are assigned to accept entries of merchandise, clear passengers, collect duties, and enforce the various provisions of Customs and related laws.

The Quad-City Development Group filed an application with Customs requesting the establishment of a new Customs port of entry at Davenport, Iowa, and Rock Island and Moline, Illinois. A review of that application confirmed that the proposed port met the minimum Customs criteria for establishing ports of entry. These standards, published as T.D. 82-37 in the Federal Register on March 9, 1982 (47 FR 10137), list 2,500 consumption entries per year as the

minimum, potential Customs workload for establishment of a port of entry. The Davenport-Rock Island-Moline port committed itself to 3738 consumption entries per year in its application, approximately 150 percent of the 2,500 minimum required.

A notice proposing the establishment of the Davenport-Rock Island-Moline port of entry was published in the Federal Register on October 17, 1985 (50 FR 42035). In that notice, Customs stated that it was not certain if the major importers in the proposed port area would choose to incur the extra expense of importing their merchandise by in-bond shipments to the proposed port area, rather than to continue the simple and less expensive clearance of the merchandise at the first port of arrival at the U.S.-Canadian border or elsewhere. Therefore, the notice indicated that the port, if established, would be done so on a 2-year trial basis. Customs believes that a 2-year period will provide sufficient time for the port to establish itself and attract business. At the end of the 2-year period, the practicality of maintaining a port of entry at Davenport-Rock Island-Moline will be reevaluated in light of the actual Customs workload. The notice solicited public comment on the matter.

By T.D. 86-14, published in the Federal Register on February 5, 1986 (51 FR 4559), the criteria used in evaluating applications to establish ports of entry and stations were revised. The revisions reflect the increased minimum value for commercial entries, delete references to informal entries, and require a commitment by any applicant that is attempting to qualify for port or station status by satisfying the cargo workload standard (2,500 consumption entries), to make optimal use of electronic data transfer capability to permit intergration with Customs Automated Commercial System (ACS). Future port and station applicants must comply with T.D. 86-14, as well as with the applicable criteria in T.D. 82-37.

Discussion of Comments

All of the comments received in response to the notice favored establishment of the port. The commenters cited the benefits that such a port would provide to the region's growing international trade business as well as the over-all positive effect on the area's economic and employment outlook.

After analysis of the comments and further review of the matter, Customs is establishing, on a 2-year trial basis, a port of entry at Davenport, Iowa, and Rock Island and Moline, Illinois.

Changes in the Customs Field Organization

The Secretary of the Treasury is advised by the Commissioner of Customs in matters affecting the establishment, abolishment, or other change in ports of entry. Customs ports of entry are established under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and dele-

gated to the Secretary of the Treausury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949–1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101-5 (47 FR 2449).

Customs has determined that it is in the public interest to establish, on a 2-year trial basis, a port of entry at Davenport, Iowa, and Rock Island and Moline, Illinois. The limits of the port of entry of Davenport-Rock Island-Moline are as follows:

In Rock Island County, Illinois, the Townships of Andalusia, Blackhawk, Rock Island, South Rock Island, Moline, South Moline, Coal Valley, Hampton, Zuma, and Coe; in Henry County, Illinois, the Townships of Colona, Hanna, and Edford; and in Scott County, Iowa, the Townships of Buffalo, Blue Grass, Hickory Grove, Sheridan, Lincoln, LeClaire, Pleasant Valley, Bettendorf, and that area of the City of Davenport enclosed within the present limits of these townships.

List of Subjects In 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

PART 101—GENERAL PROVISIONS

To reflect this change, the list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), is amended by adding, "Davenport, Iowa, and Rock Island and Moline, Ill., including the territory described in T.D. 86 - 76." directly below, "CHICAGO, ILL., including territory described in T.D. 71-121." in the column headed, "Ports of entry" in the Chicago, Illinois district.

Executive Order 12291

Because this will not result in a "major rule" as defined in § 1(b) of E.O. 12291, the regulatory impact analysis and review prescribed by § 3 of that E.O. is not required.

Regulatory Flexibility Act

Pursuant to the provisions of § 605(b) of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601 *et seq.*), it is certified that the regulations set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, the regulation is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Customs routinely establishes and expands Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this amendment may have a limited effect upon some small entities in the area affected, it is not expected to be significant because estab-

lishing and expanding port limits at Customs ports of entry in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

DRAFTING INFORMATION

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

WILLIAM VON RAAB,
Commissioner of Customs.

Approved: April 3, 1986.
FRANCIS A. KEATING II,
Assistant Secretary of the Treasury.

U.S. Customs Service

Customs Service Decisions

DEPARTMENT OF THE TREASURY
OFFICE OF THE COMMISSIONER OF CUSTOMS,
WASHINGTON, D.C., *April 15, 1986.*

The following are decisions of the United States Customs Service which are of sufficient interest or importance to warrant publication in the CUSTOMS BULLETIN.

B. JAMES FRITZ,
Director,
Regulations Control and Disclosure Law Division.

(C.S.D. 86-11)

This ruling holds, under the substitution drawback law (19 U.S.C. 1313(b)), that a successor is allowed to designate, as the basis for drawback on articles manufactured by the successor *after* the date of succession, merchandise used by the predecessor *prior* to the date of succession.

Date: October 2, 1985
DRA-1-09-CO:R:CD:D
218254 MM/GS

REGIONAL COMMISSIONER OF CUSTOMS,
Chicago, Illinois 60603

Re: Further Review of Protest Number 3901-5000476 (Chicago)—Drawback Successorship—19 U.S.C. 1313(b)—19 CFR 191.32(a)(3)

DEAR SIR: This is in reply to the application for further review, filed on April 2, 1985, of a decision by the Regional Liquidation Branch not to allow drawback with respect to entries 84-102057-9, 84-104212-0, 84-104213-3, 84-104214-6, 84-102949-9, 84-106059-7, 84-107411-4, 84-110912-8.

Issues: 1. Will a corporation be approved as the successor of a division of another company, assuming all other requirements of successorship are met?

2. For purposes of substitution drawback (19 U.S.C. 1313(b)) may a successor designate as the basis for drawback on articles manu-

factured by it after the date of succession merchandise used by the predecessor prior to the date of succession?

3. For purposes of substitution drawback may a successor designate as the basis for drawback on articles manufactured by it prior to the date of succession merchandise used by the predecessor prior to the date of succession?

Facts: On July 5, 1983, Customs approved a drawback proposal of Occidental Chemical Corporation, PVC Resins Division (abstracted as T.D. 84-2-L) in which proposal Occidental Chemical claimed to be the successor to Firestone Plastics Company, a division of Firestone Tire and Rubber Company, under the latter's contract of September 16, 1980 (abstracted as T.D. 81-91-J).

Based on T.D. 84-2-L, Occidental Chemical, PVC Resins Division, filed the eight drawback entries noted above on which it received accelerated drawback. However these entries were liquidated "no drawback" and the drawback was repaid by Occidental Petroleum on eight U.S. Customs bills dated March 1, 1985. In addition Occidental protested the liquidation of the eight entries and it is this protest we now consider.

Law and Analysis: Occidental Chemical Corporation, PVC Resins Division, is the drawback successor of Firestone Plastics Company, a division of Firestone Tire and Rubber Company, under T.D. 84-2-L. There was precedent permitting a corporation to be successor to a division of another corporation. See for example T.D. 75-71-R.

The next issue to be considered relates to the rights of a successor under substitution drawback. Successorship as a concept was introduced into drawback at least as early as February 4, 1920. See T.D. 38286-G. When substitution drawback was enacted the concept was extended to it (T.D. 52749-N).

The following excerpts are from a Memorandum of June 14, 1963, concerning Headquarters views (at that time) with regard to the passage of drawback rights under successorship.

> When one corporation succeeds another, for drawback purposes the successor takes over whatever drawback rights were held by the predecessor. In the case of operations under 313(a), the form of the drawback right is clearly defined in that it is either in imported merchandise which on the date of succession has not been used by the predecessor, or it is in an article manufactured by the predecessor with the use of imported merchandise. There is no question that if the successor in either case completes the necessary steps under the drawback procedure, he can recover the duties paid on the imported merchandise. In fact then the drawack right does pass from the predecessor to the successor in 313(a) cases.

In the case of operations under section 313(b), the drawback right is less clearly defined, but it is nonetheless present in imported merchandise. In this regard, the Customs Court in the case of *General Motors Corporation* v. *United States,* C.D. 1587, which involved operations under section 313(b), stated at page 97:

> Ordinarily, when merchandise is imported as to which the drawback statute may become applicable, an inchoate right, or a "right accruing," arises, and as the merchandise progresses by way of manufacture or production in the United States, use in certain ways etc., the inchoate or accruing right ripens, until upon exportation of the merchandise or article in accordance with the statute and regulations pertaining thereto, the inchoate or accruing right becomes an absolute right to receive payment, as drawback, of the amounts specified by the statute.

If the drawback right in imported merchandise passes to a successor corporation in the case of operations under section 313(a), it must also pass to the successor in operations under section 313(b), unless such passage is prohibited by the drawback law or regulations. I can find no such prohibition in either section 313(b) of the Tariff Act of 1930, or Part 22 of the Customs Regulations. Pursuing this one step further, if a manufacturer who operates under section 313(b) receives imported merchandise but, before using such merchandise, is succeeded by another corporation, the successor clearly can use the imported merchandise and subsequently designate it as the basis for drawback. If on the other hand, the predecessor used the imported merchandise before the date of succession, there can be no question that the predecessor had a right to designate such merchandise. This right too must pass to the successor for otherwise it is a fallacy to say that a successor takes over the drawback rights held by the predecessor.

The "right to designate" having passed to the successor, the question then arises as to what exportations the imported merchandise covered by the right may be designated against. The predecessor had the right to designate the merchandise against articles manufactured by it after the date of receipt of the imported merchandise. In effect, the date of receipt of the imported merchandise was the date on which the "right to designate" was created, and the predecessor held such right until the date of succession. When the right is transferred by succession, the successor stands in the place of the initial holder of the right and therefore would be able to designate the merchandise covered by the right against articles manufactured by it (the successor) on and after the date on which the right first inured to the successor that is, the date of succession.

There follows an excerpt from the sample format for a successorship statement which was furnished by Customs for preparation of the successorship statement from as early as 1954 until 1979 when it was eliminated for reasons unrelated to the successorship question.

> On (date), the (Old Corporation), was succeeded by (New Corporation), and on the said date (or on (date)) the said (New Corporation) became entitled to all of the drawback rights accrued and accruing to the (Old Corporation) by virtue of the provisions of T.D. ————.

This format was furnished until the regulations were amended (T.D. 79-65) to eliminate supplemental statements (including successorship) in favor of revised statements to modify existing contracts.

Elimination of the supplemental statement was for administrative purposes only. The intent was to enable Customs to have all information relating to a drawback rate for a product in a single drawback statement under its individual Treasury Decision number rather than a rate holder having different rates for different products under one Treasury Decision amended numerous times. There was no intent to change in any way the drawback rights to be transferred from a predecessor to a successor.

It is evident therefore that under direct identification drawback the successor obtains the right to identify for drawback any and all merchandise (or articles) its predecessor could identify. Under substitution drawback the successor receives the right to identify and/or designate any merchandise/articles its predecessor could identify and/or designate. Under substitution drawback the successor receives the right to designate merchandise used by the predecessor as the basis for drawback only on articles manufactured by it after the date of succession.

Denial of drawback in the current case however is based on a ruling made in Service Headquarters on May 8, 1974, which was highlighted in the drawback seminar held in June 1974 and the notes resulting from that seminar. The following was disclosed upon review of that ruling.

A Delaware corporation, with factories in several states, divided itself into several corporations. The factories became separate corporations. One such factory was located in Texas and became the Texas corporation. Prior to formation of the new company 90,000,000 pounds of merchandise had been received at the Texas factory. The physical inventory at the time of formation of the new company was 20,000,000 pounds.

Headquarters was asked the procedures to follow to transfer the drawback rights to the Texas corporation. The reply of November 2, 1973, stated that the Texas corporation was to be treated as a successor and in that capacity could designate the 20,000,000 pounds on hand in inventory. However, when inquiry was made further as to the 70,000,000 pounds that had been used the reply of May 8, 1974, was that the Texas corporation could not designate this material as it had been used by the Delaware corporation, even though it had been held that the Texas corporation was successor.

The May 8, 1974, ruling was inconsistent with the November 2, 1973, ruling as well as the policy of transferring drawback rights under a successorship at that time. There is nothing in the file to support this inconsistency or a change from that policy. When the Texas corporation succeeded the operations at the Texas factory,

all drawback rights accrued or accruing to the predecessor at that factory were transferred to the successor on the date of succession. The May 8, 1974, ruling was incorrect and the traditional perogatives of successorship are reaffirmed.

The substitution drawback law requires that the same legal person use in manufacturing both the designated and substituted merchandise. The current ruling fulfills this requirement, since a successor is considered legally to be a continuation of the predecessor in the domain covered by the successorship.

Holding: 1. A corporation will be approved as the successor of a division of another company, assuming all other requirements of successorship are met.

2. For purposes of substitution drawback (19 U.S.C. 1313(b)) a successor is allowed to designate as the basis for drawback on articles manufactured by it *after* the date of succession merchandise used by the predecessor prior to the date of succession.

3. For purposes of substitution drawback a successor is not allowed to designate as the basis for drawback on articles manufactured by it *prior* to the date of succession merchandise used by the predecessor prior to the date of succession.

You are directed to allow the protest.

Effect on Other Rulings: The unpublished ruling of May 8, 1974, and any other rulings inconsistent with the above policy are hereby revoked.

(C.S.D 86-12)

This ruling holds, pursuant to 19 U.S.C. 1526(e), that counterfeit trademark violations exist on imported articles which bear markings that are indentical to or substantially indistinguishable from registered trademarks (including the names of famous designers) even though the goods produced by the trademark owners are only remotely related to the imported goods. The U.S. Customs Service will not give away or sell goods bearing counterfeit markings as defined in 19 CFR 133.23a unless the offending marks are removed or obliterated. All such goods will be destroyed pursuant to 19 U.S.C. 1611.

Date: October 22, 1985
TMK-3 CO:R:E:E
727744 SO

Mr. EFRAIN PICON,
Assistant District Director, C&V,
U.S. Customs Service,
P.O. Box 2112,
San Juan, Puerto Rico 00903

Dear Mr. PICON: In your memo of November 28, 1984, you asked for advice as to when a trademark recorded for one class of mer-

chandise is protected in another class. Specific problems have been encountered in cases where articles have been imported bearing famous trademarks registered for other lines of merchandise. Examples include (1) men's trousers from the Dominican Republic, hosiery from Panama and men's billfolds from Taiwan, all bearing the "Yves Saint Laurent" trademark (recorded with Customs for perfume and other articles in Class 51); (2) shirts from Panama bearing the "Oscar de la Renta" trademark (recorded for perfumery), and; (3) footwear manufactured in South Korea and imported from Panama bearing the "Kangaroo" trademark (recorded for handbags in Class 18). You asked us to furnish guidelines for use in determining whether the marks in question are "strong" marks.

You also mentioned our trademark recordation for "SEIKO," which states that "SEIKO" is a "strong" mark, and that "strong" marks are protected not only for articles to which the trademark is applied by the trademark owner (in this case watches, clocks and parts thereof in Class 27), but also for other goods which might naturally come from the same trademark owner. Please note that the numbered Classes of merchandise referred to above have been established for purposes of organizing the work of the U.S. Patent and Trade Mark Office and are not legally significant for purposes of establishing Customs' trademark violations.

It is firmly established that the owner of a trademark which is "original, arbitrary, financial, or a strong mark," may exclude or prevent anyone from the use of that trademark, not only for the commodity he manufactures and sells, but for a wide variety of products. Where the mark itself is inherently unique or has been the subject of wide advertising, it is a "strong" trademark. The courts have pointed out such outstanding examples of this type of trademark as "Kodak." or "Aunt Jemima." In these cases, the trademark laws protect the senior user's interest in being able to enter a related field at some future time, with his good reputation intact.

This issue is discussed in the Konica case (C.S.D. 79-410), copy enclosed. In that case, the Konica trademark was found to be a strong mark entitled to protection against infringing importations of watches, even though the "Konica" trademark had been applied exclusively to cameras and camera accessories. While it is not apparent from reading the *Konica* decision, we note that the trademark protected by Customs (Konica) appears in stylized script form. Even though the mark on the inexpensive imported watches was in block letters (KONICA) there was, nevertheless, a "counterfeit" trademark violation.

Applying the above guidelines to the specific questions you raised, we note that the protected trademarks "Yves Saint Laurent," "Oscar de la Renta" and "Kangaroo" are unique or "strong marks." The first two are the names of famous designers of a variety of high quality articles. The unauthorized use of the designers'

names on poor quality items would strongly tend to confuse the public as to the source of those items. While the kangaroo is a creature of nature, its use as a trademark for handbags is unique and not descriptive of the handbags in any way. Through advertising, the "Kangaroo" trademark for handbags has become a "strong mark." Therefore, in our opinion, Customs cannot sanction the unauthorized use of the mark "Kangaroo" on footwear as simply being descriptive of the article. Certainly, the ordinary purchaser at retail would not expect to be buying footwear made of kangaroo hide because the shoes being purchased are marked "Kangaroo." Accordingly, we are of the opinion that the trousers, hosiery, billfolds, shirts and shoes in question, if imported bearing, marks identical with or substantially indistinguishable from the "strong" trademarks "Yves Saint Laurent," "Oscar de la Renta" and "Kangaroo," applied without the authorization of the trademark owners, would be "counterfeit" trademark violations.

Section 526(e) of the Tariff Act of 1930, as amended (19 U.S.C. 1526(e)) provides for the seizure and forfeiture of merchandise bearing a couterfeit mark (within the meaning of section 1127 of Title 15) imported in violation of the provision of section 1124 of Title 15. A "counterfeit" is a spurious mark which is identical with or substantially indistinguishable from, a registered mark (15 U.S.C. 1127; 19 CFR 133.23a(a)).

Section 42 of the Act of July 5, 1946 (commonly referred to as the Lanham Act, 60 Stat. 440, 15 U.S.C. 1124) prohibits the entry at any customhouse of the United States of articles of imported merchandise which shall copy or simulate a U.S. registered trademark, provided a copy of such trademark registration is filed with the Secretary of the Treasury and recorded in the manner provided by regulations (19 CFR 133.1-133.7). Infringement of federally registered trademarks is governed by the test of whether defendant's use is likely to cause confusion, or to cause mistake, or to decive.

When comparing conflicting marks to determine whether or not they are "counterfeit," we must first determine that the marks are "spurious." The term "spurious" refers to marks that are applied to goods without authorization of the trademark owner. Therefore, genuine trademarked articles could not fall within the definition of the term "counterfeit." It is also important to compare the accused mark with the protected mark as it appears on the trademark owner's merchandise, and that the comparison be made from the perspective of an average purchaser rather than an expert. If, upon examination of the marks as they appear on the imported merchandise, an average purchaser would find them to be "the spitting image of," or "substantially indistinguishable" from the trademark owners' merchandise, then a "counterfeit" trademark violation is established. See *Montres Rolex, S.A., Plaintiff-Appellee, against Dennis Snyder, Regional Commissioner, U.S. Customs Service et al.*, U.S. Court of Appeals for the Second Cricuit, 718 F.2d 524; 220

151-378 O - 86 - 3

U.S.P.Q. 10. This was an appeal from a judgment of the U.S. District Court for the Southern District of New York, Vincent L. Broderick, Judge, declaring imported gold watch bracelets to be counterfeits and therefore subject to forfeiture under 19 U.S.C. 1526(e), and directing defendant U.S. Customs Service to dispose of the merchandise.

The imported articles in question, bearing marks which are "counterfeits" of the Customs protected trademarks "Yves Saint Laurent," "Oscar de la Renta" and "Kangaroo," are subject to seizure and forfeiture. The owner of the trademark shall be notified of the seizure and the quantity of the articles seized. Unless the trademark owner, within 30 days of notification, provides written consent to the importation of the articles, exportation, entry after obliteration of the trademark, or other appropriate dispositon, the articles shall be disposed of (after removal or obliteration of the "counterfeit" marks) as follows: (19 CFR 133.23a)

(1) By delivery to federal, state or local government agencies which have a need for them, or

(2) By gift to charitable institutions which have a need for them, or

(3) By sale at public auction, after 1 year from forfeiture, after first determining that no federal, state of local government agency or charity has a need for them, or

(4) By destruction, if they are unsafe or a health hazard.

Please note that there is no preference stated in the law or regulations (19 U.S.C. 1526(e) and 19 CFR 133.52(c)) between options (1) and (2) above, and that option (3) cannot be used unless the district director is satisfied that no government agency or charitable institution needs the goods. While it would appear that 19 U.S.C. 1526(e) authorizes Customs to dispose of forfeited articles with the "counterfeit" marks still in place in cases where it is not "feasible" to remove or obliterate the marks, we are no longer interpreting the law in that manner. We note that the Trademark Counterfeiting Act of 1984 (Public Law 98-473, 18 U.S.C. 2320) imposes criminal sanctions for trafficking in counterfeit goods. If Customs were to sell or give away forfeited articles bearing counterfeit marks, Customs would be acting contrary to the intent of Congress in enacting the Trademark Counterfeiting Act of 1984.

Therefore, articles forfeited to the Government bearing "counterfeit" marks shall no longer be given away or sold pursuant to options (1), (2) or (3) above unless the counterfeit marks are removed or obliterated. In cases where removal or obliteration of the marks is not feasible (the articles would be defaced, or obliteration would be disproportionately expensive considering the value of the articles), the articles shall be destroyed (19 U.S.C. 1611). However, before destroying a shipment of articles which would be useful to a government agency or charity, you may invite the trademark

owner or a potential donee agency or charitable institution to assist in removing or obliterating the "counterfeit" marks.

Copies of this decision will be circulated to all Customs officers for their guidance.

(C.S.D. 86-13)

This ruling holds, pursuant to 19 U.S.C. 1466, that drilling vessels are not subject to vessel entrance and clearance requirements and vessel repair duties at the time they initially "attach" to the outer continental shelf at a point where there is no existing artificial island, installation or other device attached to the seabed for purposes of exploring, developing or producing resources therefrom.

Date: 22 October 1985
VES-3-15/VES-5/VES-13
CO:R:CD:C 107852 PH

JOHN W. MCCONNELL, Jr., Esq.,
Haight, Gardner, Poor & Havens,
Federal Bar Building,
1815 H Street NW., Suite 501,
Washington, D.C. 20006

Dear Mr. MCCONNELL: In your letter of August 14, 1985, you state that recently a client brought a semi-submersible drilling rig from Alaska by way of Peru to a location in the Gulf of Mexico where it was attached to the seabed of the outer continental shelf (OCS) for the purpose of exploring for resources. The owner of the drilling rig sought to make formal entry with the local Customs office but entry was refused on the basis of Legal Determination 3100-02 and a Notice to Steamship Companies/Brokers and Others Concerned issued by the District Director of Customs in New Orleans on September 20, 1984 (84-140 VES-5-07:V:NO:DD TEH).

On the basis of the 1978 Amendments to the Outer Continental Shelf Lands Act of 1953 (OCSLA), you state that you believe that entry should be made and seek a ruling as to when such entry should be made. You state that you believe that equipment purchased for and repairs made to the vessel outside the United States should be subject to duty.

The 1978 amendments to the OCSLA, among other things, changed section 4(1)(a) of the OCSLA (43 U.S.C. 1333(a)(1)) to provide, in part, that the laws of the United States are extended to "* * * the subsoil and seabed of the outer Continental Shelf and to all artificial islands, and all installations and other devices permanently or temporarily attached to the seabed, which may be erected thereon for the purpose of exploring for, developing, or producing resources therefrom * * * to the same extent as if the outer Continential Shelf were an area of exclusive Federal jurisdiction lo-

cated within a State." Before the 1978 amendments, the corresponding part of section 4(a)(1) provided that the laws of the United States are extended to "* * * the subsoil and seabed of the outer Continental Shelf and to all artificial islands and fixed structures which may be erected thereon for the purpose of exploring for, developing, removing, and transporting resources therefrom, to the same extent as if the outer Continental Shelf were an area of exclusive Federal jurisdiction located within a State."

The intent of this change was stated to be "technical and perfecting and * * * meant to restate and clarify and not change existing laws." (House Conf. Report No. 95-1474, p. 80 (1978 U.S.C.C.A.N. 1679)). It was also stated in this Report about this change that the conferees were informed—

> that the U.S. Customs Service has interpreted existing section 4(a)(1) to mean that foreign-built production platforms are not subject to import duties when they are brought into OCS waters and attached to the seabed. Specifically, the Customs Service has stated that such platforms are not actually being imported to the United States until they are placed on the shelf and need not pay customs duties. 1 The conferees reject this interpretation and believe it is contrary to the intent of Congress in enacting the 1953 act. Moreover, to make it explicit that this interpretation should not be continued to be given effect, the conferees state that one of the purposes of this change in 4(a)(1) is to make it clear that U.S. customs duties are to apply to a platform, built overseas, and brought into OCS waters for placement so that it can be used to develop and produce OCS minerals.
>
> Under section 4(a)(1) of the conference report, Federal laws and "civil and political jurisdiction of the United States" are applicable to the subsoil and seabed of the OCS, to all artificial islands and "all installations and other devices permanently or temporarily attached to the seabed, which may be erected thereon" to explore, develop, produce or transport OCS mineral resources. Thus customs laws apply—as within the "political and civil jurisdiction" of the United States—to platforms constructed outside the United States and brought into OCS waters—as being "installations and other devices * * * which may be erected thereon".
>
> The Customs Service indicates that once the platforms are in place, machinery, equipment and other items placed on the structure are subject to duties. Of course, the conferees believe this is, and continues to be, the law. [*Supra*, pp. 80, 81.]

In response to the foregoing legislative history, the Customs Service issued Customs Service Decision (C.S.D.) 79-1. This decision held that foreign-built drilling and production platforms which are not vessels are dutiable upon their attachment, whether temporary or permanent, to the seabed of the OCS. The C.S.D. emphasized that only drilling platforms which are not vessels are dutiable

upon attachment to the OCS. It did not make vessels, whether drilling vessels or otherwise, subject to duty (vessels other than yachts and pleasure vessels are not subject to duty under the Tariff Schedules (General Headnote 5(g)), Tariff Schedules of the United States)), nor did it make them subject to vessel entrance and clearance requirements upon initial attachment to the OCS at a point at which there is no existing artificial island or installation or other device attached to the seabed for the purpose of exploring for, developing, or producing resources therefrom.

It was the position of the Customs Service before the 1978 Amendments and remains the position of the Customs Service that drilling vessels are not subject to the vessel entrance and clearance requirements at the time they initially "attach" to the OCS, as stated in the note you referred to in the September 20, 1984, Notice from the District Director of Customs in New Orleans. Accordingly, we concur with the decision of Customs in New Orleans in declining to accept formal entry of your client's drilling rig on its initial attachment to the OCS.

Under 19 U.S.C. 1466, equipments purchased in a foreign country for, and repairs made in a foreign country to a vessel documented under the laws of the United States to engage in the foreign or coasting trade or intended to be employed in such trade are dutiable "on the first arrival of such vessel in any port of the United States." In view of the specific language in section 1466 attaching duties on the first arrival in any *port* of the United States, we conclude that drilling vessels are not subject to vessel repair duties on their initial attachment to the OCS at a point at which there is no existing artificial island or installation or other device attached to the seabed for the purpose of exploring for, developing, or producing resources therefrom.

(C.S.D. 86-14)

This ruling holds that T.D. 85-91, which amended vessel entrance and clearance regulations as they relate to lightering operations, will: (1) apply to service vessels transporting import or export cargo to and from vessels on the high seas; (2) does not affect Customs treatment of aircraft going to and from vessels on the high seas; (3) does not affect the transportation of

passengers to and from vessels on the high seas; and (4) is anticipated to have little effect on outer continental shelf operations (19 CFR 4.3, 4.9, 4.20, 4.60, 112.1(b) and 112.1(f), 19 U.S.C. 1565 and 43 U.S.C. 1333(a)(1)).

From: Director, Carriers, Drawback and Bonds Division
Subject: Entry and Clearance of Vessels—Treasury Decision 85-91

With your memorandum of August 1, 1985 (VES-5-V:O:IC JHG), you forwarded a memorandum dated July 24, 1985, from the Port Director at Pascagoula, Mississippi, concerning Treasury Decision 85-91. The Port Director states that he is concerned with the possible changes Treasury Decision 85-91 may effect to the Customs treatment of service vessels and helicopters which transport merchandise and passengers to and from very large crude carriers (VLCC's) outside United States territorial waters. He states that he assumes that service craft bringing merchandise from VLCC's which requires Customs entry would be subject to the vessel entrance and clearance requirements by virtue of the amendments to the Customs Regulations effected by the Treasury Decision. He states that this would pose additional burdens on the service vessel operators but would greatly enhance Customs control of transportation of passengers and merchandise to and from VLCC's. On the negative side of the ledger, he states that the changes would increase the volume of documents and time involved in processing these vessels, some of which perform two or more trips per day to and from VLCC's.

The Port Director also asks about the effect of Treasury Decision 85-91 in the context of Customs Service Decision 85-37. This C.S.D. held, pursuant to 19 U.S.C. 1565 and regulations thereunder, that bonded merchandise to be moved from one place within a port to another must be transported by a Customs licensed and bonded cartman or lighterman. The C.S.D. held that launch service operators, if performing these services, must be licensed and bonded as lightermen. Finally, the Port Director asks about the effect of Treasury Decision 85-91 on offshore drilling operations.

Treasury Decision 85-91 amended sections 4.3, 4.9, 4.20, and 4.60, Customs Regulations (19 CFR 4.3, 4.9, 4.20, and 4.60), to require a vessel to obtain clearance if it is bound for another vessel on the high seas to either: (1) transship export merchandise which it has transported from the United States to that vessel; or (2) receive import merchandise from that vessel and transport the merchandise to the United States. A vessel is required to make vessel entry if it is returning from another vessel on the high seas after either: (1) transporting export merchandise out of the United States and transshipping the merchandise to that vessel; or (2) transporting

import merchandise to the United States after receiving the merchandise from that vessel. Treasury Decision 85–91, as stated therein, was issued to clarify the applicability of the entrance and clearance requirements of the navigation laws to vessels engaged in the lightering of import and export cargo between the United States and vessels located on the high seas.

The Port Director is correct in his assumption that service vessels bringing import merchandise from a vessel on the high seas to a port of the United States would be subject to vessel entrance and clearance requirements. This is also true of service vessels carrying export merchandise from a port of the United States to a vessel on the high seas. Treasury Decision 85–91 does not affect the Customs treatment of helicopters transporting merchandise and/or passengers to and from vessels on the high seas. Customs treatment of helicopters and other aircraft is, of course, governed by Part 6 of the Customs Regulations under which aircraft coming into any area from any place outside the United States (e.g., a vessel on the high seas) shall be entered in such area if landing is made therein and if carrying passengers for hire or commercial cargo (section 6.3, Customs Regulations). Also, the Treasury Decision affects only vessels transporting export or import merchandise or cargo between the United States and a vessel on the high seas, it does not affect such transportation of passengers.

Operators of service vessels which transport merchandise or cargo between the United States and a vessel on the high seas are *not* required to be licensed and bonded as lightermen. Customs Service Decision 85–37 was only concerned with the movement by service vessels of bonded merchandise between places *within* a port (see definition of "cartman" and "lighterman" in section 112.1(b) and (f), referred to in the C.S.D.). A vessel on the high seas is, of course, not within a port.

We anticipate that Treasury Decision 85–91 will have little, if any, effect on drilling operations on the United States outer continental shelf (OCS). Drilling vessels or platforms, artificial islands, and other devices or installations which are attached to the seabed of the OCS for the purpose of exploring for, developing, or producing resources therefrom are treated as if they were located within the United States for purposes of United States law (section 4(a)(1), Outer Continental Shelf Lands Act of 1953, as amended (43 U.S.C. 1333(a)(1))). Customs and navigation laws, including the coastwise laws, laws on entrance and clearance of vessels, and provisions of dutiability of merchandise are applicable to such vessels, islands, and devices or installations (see Treasury Decision 54281, and subsequent rulings on this subject published in the Customs Bulletin as Customs Service Decisions).

Because a drilling vessel, artificial island, or other device or installation attached to the OCS for any of the requisite purposes is treated as if it were a point within the United States, a service

vessel carrying merchandise or passengers between the United States mainland and such a vessel, island, or device or installation should be treated as though it is carrying merchandise between points in the United States. Such transportation, or transportation between drilling vessels, artificial islands, or other devices or installations attached to the OCS for any of the requisite purposes, is limited to coastwise-qualified vessels (i.e., United States-built, owned, and properly documented vessels). Imported merchandise transported from a drilling vessel, artificial island, or other device or installation attached to the OCS for any of the requisite purposes to a point in the United States or another such drilling vessel, artificial island, or other device or installation attached to the OCS has already been subject to entry and duty under the Tariff Schedules and is not treated as import cargo. Merchandise sent foreign from a drilling vessel, artificial island, or other device or installation attached to the OCS for any of the requisite purposes is, of course, treated as export cargo.

We appreciate your effort, and that of the Port Director, in considering this matter and in raising these very appropriate questions about it. Enclosed, for your information, are copies of a recent memorandum and letter also considering the effects of Treasury Decision 85–91.

(C.S.D. 86–15)

This ruling holds that imported merchandise, initially transported under a special permit for immediate delivery to an importer's premises, and is thereafter entered for transportation and exportation and exported, is not eligible for drawback under the substitution same condition drawback law, 19 U.S.C. 1313(j)(3).

Date: December 3, 1985
DRA–1–09–CO:R:CD:D
218407 RB

Issues: (1) Is imported merchandise eligible for drawback under the substitution same condition drawback law, 19 U.S.C. 1313(j)(3), when it is initially transported under a special permit for immediate delivery to the importer's premises, and is thereafter entered for transportation and exportation, and exported?

(2) Is perishable merchandise, such as fresh fruits and vegetables, eligible for drawback under the same condition drawback law, 19 U.S.C. 1313(j)(1) or (3)?

Facts: Fresh fruits and vegetables are imported at various times, and initially shipped under a special permit for immediate delivery to the importer's premises for examination and sorting, as authorized under 19 U.S.C. 1448(b) and 19 CFR 142.21(b). As a result, part of each shipment is entered for consumption, duty-paid, and the

balance is entered for transportation and exportation, and exported. The exported merchandise is made the subject of claims for drawback under the substitution provision of the same condition drawback law, 19 U.S.C. 1313(j)(3), and other imported merchandise entered for consumption, duty-paid, 2 or 3 days prior to the date of exportation is randomly designated as a basis for drawback.

Law and Analysis: (1) It has been observed that "[t]he express provisions relating to drawback under 19 U.S.C. 1313 fundamentally do not apply to imported merchandise until 'after its release from the custody of the Government. It is also acknowledged in this regard that same condition drawback, subsection (j), 'would apply to (imported) articles entered, or withdrawn from warehouse, for consumption' " (citations omitted) (Headquarters letter dated October 24, 1985, file DRA-1-09-CO:R:CD:D 218032 [imported merchandise entered for warehouse, and in Customs custody and control, not eligible for substitution same condition drawback if withdrawn and exported]).

In the present case, when transported to the importer's premises under a special permit for immediate delivery, the subject merchandise is considered as remaining in Customs custody (19 CFR 142.22(b); see T.D. 79-221, 44 F.R. 46794, the notice of proposed rulemaking leading thereto, 43 F.R. 55774 (1978), and T.D. 76-220, 41 F.R. 33248).

When thereafter entered for transportation and exportation, the merchandise continues in Customs custody. See *American Shipping Co.* v. *United States,* 65 Treas. Dec. 178, T.D. 46879. In that case, imported tomatoes, entered for transportation and exportation, were diverted for inspection at the request of the shippers, a consumption entry filed, duty-paid, and an unconditional delivery permit issued for the merchandise. The tomatoes, however, were subsequently exported through error. In denying a claim for refund of duty on the ground that no provision of law than existed justifying such action under the circumstances after the merchandise was released from Customs custody, the Customs Court stated in this respect that "[w]hen the consumption entry was made * * * and the delivery permit issued, possession and control passed from the Government to the importers * * *" (emphasis added) (*supra,* at 180) (also see *United States* v. *Maine Central Railway Co.,* 9 Ct. Cust. Appls., T.D. 38015; and *Illinois Central Railroad Co.* v. *United States,* 2 Cust. Ct. 422, C.D. 168).

Furthermore, in the October 24, 1985, ruling, cited above, concerning imported merchandise entered for warehouse, it was implicit that such merchandise, when withdrawn for exportation or for transportation and exportation, would thereby remain continuously in Customs custody until exported (also see T.D. 4843; and see *Hudson Shipping Co., Inc.* v. *United States,* 18 Cust. Ct. 17, 21, C.D. 1038).

Imported merchandise, initially transported under a special permit for immediate delivery to the importer's premises and then entered for transportation and exportation, and remaining in Customs custody and control, consequently, does not fall within the scope of section 1313, including, in particular, the provisions for same condition drawback under subsection (j).

Parenthetically, even if same condition drawback were applicable herein, the necessity that the claimant have "possession" of the substituted merchandise as contemplated by section 1313(j)(3) would not be met while the merchandise remains in Customs custody and control (see *American Shipping Co., supra*). In addition, it is axiomatic that the designated and substituted merchandise herein would not be fungible and in the same condition, if each is sorted respectively from the same import shipment.

(2) The term "merchandise" as used in section 1313, including subsection (j) thereof, means "goods, wares and chattels of every description" (19 U.S.C. 1401(c)). Assuming that there is compliance with the law and relevant regulations, therefore, perishable goods would be eligible for same condition drawback.

Holdings: (1) Imported merchandise is not eligible for drawback under the substitution same condition drawback law, 19 U.S.C. 1313(j)(3), when it is initially transported under a special permit for immediate delivery to the importer's premises, and is thereafter entered for transportation and exportation, and exported.

(2) Perishable merchandise, such as fresh fruits and vegetables, is eligible for same condition drawback under 19 U.S.C. 1313(j)(1) or (3), assuming that there is compliance with the law and applicable regulations.

(C.S.D. 86-16)

This ruling holds that fungible merchandise, entered temporarily free of duty under bond (TIB) for foreign sales and under consumption entries for domestic sales, may be commingled in storage and manufacture with the TIBs being cancelled on a first-in-first-out basis.

Date: December 9, 1985
CON-9-04-CO:R:CD:D
218370 MM/GS

Issue: If fungible merchandise is entered temporarily free of duty under bond (TIB) under item 864.05, Tariff Schedules of the United States, for foreign sales and under consumption entries for domestic sales, and is then commingled, may the TIBs be cancelled on a FIFO basis and the consumption entries identified for domestic withdrawals?

Facts: Cut rag tobacco will be blended in Germany and imported for use in manufacturing cigarettes. The tobacco to be used for

cigarettes for the domestic market will be entered for consumption with duty being paid thereon. The tobacco to be used for cigarettes for the export market will be entered under item 864.05, TSUS. All the imported tobacco will be fungible (i.e. commercially identical) and will be commingled in storage and manufacture.

Law and Analysis: An importer at the time of importation under item 864.05, TSUS, must have the intent to export the articles produced from the merchandise. If the articles or the merchandise are diverted to the domestic market, the importer is liable under its bond for twice the duties and in addition is subject to a penalty if it is established that the intent to export was not present at the time of exportation. Thus the importer will have to have on hand at all times sufficient merchandise and/or articles to cancel all of the open TIB entries. On the other hand merchandise which is imported under a consumption entry may be exported or used to manufacture articles which are exported.

Commingling of fungible TIB merchandise and other merchandise has previously been approved (C.S.D. 84-12). In the present case the importer proposes to commingle fungible tobacco imported under TIB and consumption entries and to cancel the TIB entries on a FIFO basis. In addition the importer would have on hand at all times sufficient merchandise or articles to cancel all open TIB bonds.

Holding: Fungible merchandise imported under TIB and under consumption entries may be commingled and the TIBs cancelled on a FIFO basis, provided the importer has on hand at all times in the commingled inventory sufficient merchandise (or articles manufactured therefrom) to cancel all outstanding TIBs.

U.S. Customs Service

General Notice

19 CFR Part 175

Supplemental Solicitation of Comments Regarding Tariff Classification of Prefinished Hardboard Siding

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Supplemental Solicitation of Comments.

SUMMARY: By notice published in the Federal Register on March 11, 1986 (51 FR 8338), the public was informed that Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard lap siding. Although the merchandise was accurately described in the notice, we believe it is advisable to supplement that description in order to clarify the precise issue in a case remanded to Customs for further review by the Court of International Trade. Therefore, this notice provides a revised description of the merchandise subject to review.

DATE: Comments (preferably in triplicate) must be received on or before April 25, 1986.

ADDRESS: Comments may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, Room 2426, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-8237).

FOR FURTHER INFORMATION CONTACT: Jeremy N. Baskin, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-8181).

SUPPLEMENTARY INFORMATION:

Background

By notice published in the Federal Register on March 11, 1986 (51 FR 8338), the public was informed that Customs is reviewing its position regarding the tariff classification of certain imported prefinished hardboard siding. Although the merchandise was accurately described in the notice, because of the technical issue being considered by the Court, the Department of Justice recommends that

we supplement the prior notice in order to clarify the description and avoid any possible doubt regarding the precise merchandise under consideration.

The product in question is a plank of hardboard, 7/16-inch thick, and either 9 or 12 inches wide. Approximately 1-inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline in the plank above. The planks are prefinished at the time of importation. Part of the prefinishing process involves the application of a newsprint paper face to the wet wood fiber mat, which mat has a water content of 70 percent. This occurs prior to compression and heat treatment which forms the hardboard planks, and prior to the sawing and finishing operations which form the prefinished siding. Acrylic latex paint is also applied to the planks prior to importation.

As fully discussed in the March 11, 1986, notice, because of the short deadline imposed upon Customs by the Court to report on our decision, Customs must quickly resolve this classification issue. Therefore, comments must be received within 10 days from the date of publication of this notice.

COMMENTS

Before making a determination on this matter, Customs will consider any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (2 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b) Customs Regulations (19 CFR 103.11(b)), between 9:00 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, Room 2426, U.S. Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, D.C. 20229.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Decisions of the United States Court of International Trade

(Slip Op. 86–38)

BADGER-POWHATAN, A DIVISION OF FIGGIE INTERNATIONAL, INC., PLAINTIFF *v.* UNITED STATES, DEFENDANT, RUBINETTERIE A. GIACOMINI, S.P.A., INTERVENOR

Court No. 85–4–00467

OPINION

[Plaintiff's motion for judgment on the agency record granted. Plaintiff's motion for access to confidential documents under protective order denied.]

(Decided April 2, 1986)

Stewart & Stewart (*Eugene L. Stewart, Terence P. Stewart, James R. Cannon, Jr.*) for plaintiff.

Richard K. Willard, Assistant Attorney General, *David M. Cohen,* Director, Commercial Litigation Branch, *Velta A. Melnbrencis,* Civil Division, Department of Justice, for defendant.

Law Office of Larry Klayman, P.C. (*Larry Klayman, John M. Gurley*) for intervenor.

RESTANI, *Judge:* In this action, plaintiff, Badger-Powhatan, a division of Figgie International, Inc., challenges the method of calculation used to determine the less than fair value (LTFV) margin in the antidumping duty order issued by the United States Department of Commerce International Trade Administration (ITA) regarding certain brass fire protection products from Italy. 50 Fed. Reg. 8354 (1985). Specifically, plaintiff claims ITA erred by failing to recalculate the LTFV margin after the International Trade Commission (ITC) determined that only a subclass of the class of merchandise sold at LTFV is causing material injury to an industry in the United States. Plaintiff has moved for judgment upon the agency record on the merits of its position.[1] CIT Rule 56.1. In re-

[1] Plaintiff also moves for access to confidential documents under protective order. Defendant opposes this motion, contending that release of these documents to plaintiff is unnecessary if the action is remanded for recalculation of the LTFV margin in accordance with plaintiff's position. Plaintiff's counsel indicated at oral argument that should the court remand the ITA final determination for recalculation, there would be no need to reach this issue inasmuch as the agency historically has provided access to such documents at the administrative level. Therefore, the court dismisses this motion without prejudice.

sponse, defendant seeks a remand of the action for a recalculation of the LTFV margin in accordance with the method proposed by plaintiff. Intervenor, Rubinetterie A. Giacomini, S.P.A. (Giacomini), opposes the positions of both plaintiff and defendant. It contends that the original determination is correct and that a recalculation of the LTFV margin is prohibited by statute.

The basic facts underlying this controversy are undisputed. Plaintiff is a domestic producer of brass fire protection products. On January 3, 1984, plaintiff filed an antidumping petition with ITA and ITC pursuant to 19 U.S.C. § 1673a(b) (1982). The petition alleged that imports of brass interior fire protection products were being, or were likely to be, sold in the United States, at less than their fair value. In addition, the petition alleged that such products materially injured or threatened to materially injure the domestic industry producing interior fire protection products. *See* 19 U.S.C. § 1673a(b)(1) (1982); 9 U.S.C. § 1673 (1982 & West Supp. 1985). The petition defined the class or kind of imported merchandise as brass valves, connections, nozzles, and couplings which serve as components in interior fire protection systems to control the flow and direction of water through such systems. The specific products involved were described as:

1. fire hose couplings (1½ and 2½ inch),
2. fog/straight steam nozzles (1½ and 2½ inch),
3. angle-type hose valve (1½ and 2½ inch),
4. wedge-disc hose gate valves (2½ inch),
5. single and double clapper siamese fire department connections (2½ inch inlet and 4 inch outlet),
6. pressure restricting valves, and
7. pressure regulating valves.[2]

On February 21, 1984, in response to plaintiff's petition, ITA published notice of initiation of antidumping investigations. *See* 19 U.S.C. § 1673a(c)(2) (1982) (requires ITA to make determination on petition and, if determination is affirmative, to commence investigation and publish notice in Federal Register); 49 Fed. Reg. 6396 (1984) (notice of initiation of antidumping investigations at issue). The notice of initiation of investigations indicates that the investigations were to cover the seven products described in plaintiff's petition. 49 Fed. Reg. 6396 (1984).

ITC issued a preliminary determination on March 1, 1984, that concluded that there was a reasonable likelihood that the brass fire protection products under investigation were causing material

[2] In its documents relating to this antidumping investigation, ITA identifies these products by their *Tariff Schedules of the United States* item numbers as well as by their names. 49 Fed. Reg. 47,066 (1984). The products are currently classified under the following *TSUS* numbers:
1. fire hose couplings—657.3540,
2. fog/straight steam nozzles—680.1480,
3. angle-type hose gate valves—680.1440,
4. wedge-disc hose gate valves—680.1430,
5. single and double clapper siamese fire department connections—680.1420,
6. pressure restricting valves—680.1440, and
7. pressure regulating valves—680.2740.

injury to United States industries. *Certain Valves, Nozzles, and Connectors of Brass from Italy for Use in Fire Protection Systems,* U.S.I.T.C. Public. 1500, Investigation No. 731-TA-165 (Preliminary), 49 Fed. Reg. 4046 (1984); 19 U.S.C. § 1673b(a) (1982). On July 10, 1984, ITA published an affirmative preliminary determination of sales at LTFV. 49 Fed. Reg. 28,083 (1984); 19 U.S.C. § 1673b(b) (1982). This determination was also based on an investigation that included all seven products. At that time ITA preliminarily determined the weighted-average margin of sales at LTFV to be 1.16%. *Id.* at 28,083, 28,084.

On November 30, 1984, ITA published its final affirmative determination of sales at LTFV. 49 Fed. Reg. 47,066 (1984). ITA identified the merchandise covered by the investigation as the same seven products. *Id.* at 47,066, 47,067. The determination announced a weighted-average LTFV margin of 3.47% for this class or kind of merchandise. *Id.* at 47,073. Following the signing of the final LTFV determination, the confidential versions of computer printouts containing LTFV margin calculations were disclosed to counsel for both Badger-Powhatan and Giacomini. After examining the data, counsel for Giacomini and Badger-Powhatan identified clerical and factual errors in the analysis. In response to these comments, ITA published an amendment to its final affirmative LTFV determination, changing the weighted-average LTFV margin for all seven categories of merchandise to 1.28%. 50 Fed. Reg. 1099 (1985).

Subsequent to the ITA determination that the seven products were being sold at LTFV, ITC issued its final determination on material injury. *Certain Valves, Nozzles, and Connectors of Brass from Italy for Use in Fire Protection Systems,* U.S.I.T.C. Public. 1649, Investigation No. 731-TA-165 (Final), 50 Fed. Reg. 7971 (1985); 19 U.S.C. § 1673d(b) (1982 & West Supp. 1985). ITC, by majority decision, determined that industries in the United States are materially injured by reason of imports from Italy of single and double clapper siamese connections and pressure-restricting valves. It further found that the other five products from Italy were not causing or threatening to cause material injury to a United States industry.

After being notified of the ITC findings, ITA published an antidumping duty order. *Antidumping Duty Order: Certain Brass Fire Protection Products from Italy,* 50 Fed. Reg. 8354 (1985); 19 U.S.C. § 1673e (1982). The order identified the merchandise covered by the investigation as the original seven products. It then noted the material injury findings of ITC, and issued the following order:

> [T]he Department directs United States Customs officers to assess * * * antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of certain brass fire protection products, which include single and double clapper siamese fire department connections and pressure restricting valves.

50 Fed. Reg. 8354–55. These duties are to be assessed solely on imports of single and double clapper siamese fire department connections and pressure restricting valves from Italy.[3] *Id.* at 8355. The estimated weighted-average antidumping duty margin adopted was that published in the amended final affirmative LTFV determination (1.28%), based on data on the aggregate value of Giacomini's U.S. sales of all seven products. *Id.*; 50 Fed. Reg. 1099.

Plaintiff now moves for judgment upon the agency record on the issue of the propriety of ITA's calculation of the estimated antidumping duty deposit rate based upon the weighted-average LTFV margin for all seven product categories.[4] Plaintiff argues that data relevant to the five product categories not subject to antidumping duties should not have been included in the LTFV margin calculations.[5] Instead, plaintiff contends, the estimated antidumping duty deposit rate should be based solely upon the weighted-average LTFV margin for the two product categories identified in the antidumping order. Defendant responds by agreeing to base future deposits of estimated duties upon a recalculated LTFV margin determined for the two products involved. To this end, it seeks a remand of the action to ITA for recalculation of the LTFV margin and amendment of the order. On the other hand, intervenor Giacomini contends that ITA's use of a weighted-average LTFV margin that includes margins for the entire class or kind is proper under these circumstances. Furthermore, it contends that a recalculation of the LTFV margin would constitute a prohibited second final determination. Intervenor, then, not only challenges the grounds supporting a change in the order, but also ITA's authority to implement such a change.

The first issue the court must address is whether ITA, having rendered its final determination as to the LTFV margin, may now alter the basis of its calculation.[6] It is now well established that

---

[3] In an independent proceeding before this court, plaintiff challenged the ability of ITA to issue an order that imposes duties on only a subset of the class or kind of merchandise as to which ITA has made an affirmative LTFV sales determination. This court held that an antidumping duty order cannot direct Customs to assess duties on a product unless ITA determines that it is in a class or kind of merchandise being sold at LTFV *and* ITC determines that the merchandise to be dutied is causing material injury to a domestic industry. *Badger-Powhatan* v. *United States*, 9 CIT ___, 608 F. Supp. 653, 656 (1985). The statute arguably could have been interpreted by the agency and the court to require duties to be imposed on the entire LTFV "class or kind of merchandise," as defined by ITA, so long as any industry in the United States was being injured by reason of imports within the defined class. The court reasoned, however, that ITC was required to determine which industry or industries are injured, according to specific statutory requirements. 19 U.S.C. §§ 1673(2), 1677(4)(A), (10) (1982 & West Supp. 1985). In this case, a majority of the commissioners found seven different industries to exist, only two of which were injured by reason of merchandise in the class defined by ITA. The court went on to approve, as consistent with the statutory scheme, the ITA practice of imposing duties only on merchandise "like" merchandise produced by the injured industry. *Badger-Powhatan*, 9 CIT at ___, 608 F. Supp. at 657.

[4] Plaintiff originally pled three counts against defendant. In its motion for judgment upon the agency record, plaintiff withdrew Counts I and III. Consequently, only Count II of the complaint is at issue here.

[5] These five products constituted 71% of the class or kind of merchandise originally subject to the investigation. *Badger-Powhatan* v. *United States*, 9 CIT ___, 608 F. Supp. 653, 657 n.2 (1985).

[6] In their briefs plaintiff and defendant appear to characterize the proposed recalculation as an amendment to the antidumping order, not as an amendment to ITA's final determination. This characterization is incorrect. It is clear that an antidumping order may not vary the terms of the underlying determination. *Royal Business Machines, Inc.* v. *United States*, 1 CIT 80, 86, 507 F. Supp. 1007, 1012 (1980), *aff'd*, 69 CCPA 61, 669 F. 2d 692 (1982). Because LTFV margins for the various products were not separately stated in the ITA final determination, the determination must be amended if the LTFV margin derived from the seven product categories is in-

Continued

amendment, before or after remand, is appropriate when the agency has utilized a legally improper method in making a determination or when the original determination contains an error of inadvertence or mistake. *Timken Co.* v. *United States,* 10 CIT ___ Slip Op. 86–17 at 9 (Feb. 20, 1986); *Melamine Chemicals, Inc.* v. *United States,* 8 CIT 105, 592 F. Supp. 1338, 1340 (1984); *Timken Co.* v. *United States,* 7 CIT 319, Slip Op. 84–63 at 3 (June 5, 1984); *Gilmore Steel Corp.* v. *United States,* 7 CIT 219, 585 F. Supp. 670, 674 (1984).[7] The court notes that all parties, including intervenor, seemed to accept the concept of amended final determinations when they participated in the calculation of a reduced LTFV margin following the original determination. *See* discussion *supra.*

The question has arisen as to whether the court may remand this matter without considering the merits. There is no indication anywhere in the statutory scheme that the agency, for policy or similar reasons, may simply change a final determination after an antidumping order is issued. If there is such a provision, defendant has not cited it. The court believes, rather that Congress expected a single and prompt final determination. After all, it provided very short time limits for decision-making. *See* 19 U.S.C. § 1673d(a) (1982 & West Supp. 1985). If the agency could amend determinations endlessly, it would be difficult to answer the question as to when a *final* determination would ever be made. The Supreme Court has ruled that the Interstate Commerce Commission cannot, without specific statutory authority, reconsider license and certificate decisions because of policy changes. *American Trucking Association* v. *Frisco Transportation Co.,* 358 U.S. 133, 146 (1958); *United States* v. *Seatrain Lines,* 329 U.S. 424, 429–33 (1947). This principle has been applied in other licensing cases. *See, e.g., Hirschey* v. *Federal Energy Regulatory Commission,* 701 F.2d 215 (D.C. Cir. 1983). This situation is analogous. The original determination and order resulted in a deposit rate which affects both domestic and foreign interests, just as a license decision affects those whose businesses must

---

correct. The amended final determination will then be incorporated into the order in accordance with 19 C.F.R. § 353.48 (1985), which reads in pertinent part.

> (b) *Calculation of the amount of the estimated duty to be deposited.* The deposit of estimated antidumping duties for each manufacturers, producer or exporter shall be equal to the amount by which the foreign market value of the merchandise exceeds the United States price of the merchandise, as determined in the affirmative final determination of the Secretary or the latest administrative review of such determination under § 353.53, or, if appropriate, under § 353.49.

[7] *Compare with Ceramica Regiomontana, S.A.* v. *United States,* 5 CIT 23, 557 F. Supp. 596 (1983), in which this court held that when a subsidy is eliminated after the issuance of a countervailing duty order, ITA does not have the authority to modify the estimated countervailing duty deposit rate outside the scope of the provisions of 19 U.S.C. §§ 1675(b) (changed circumstances) and 1675(a) (periodic review). *Ceramica Regiomontana* at 29–30, 557 F. Supp. at 602. Intervenor cites *Ceramica Regiomontan* for the proposition that ITA does not have statutory authority to issue a second final determination after issuance of an ITC final material injury determination inasmuch as the cited provisions adequately protect the interests of those seeking change. Contrary to intervenor's position, the court considers *Ceramica Regiomontana* to be consistent with the *Gilmore* line of cases. *Ceramica Regiomontana* involved a situation in which an event occurred *after* the issuance of the order that changed the facts upon which the calculation was made. *Id.* at 24, 557 F. Supp. at 598. In contrast, the case at bar involves a situation in which none of the underlying facts have changed, but one of the parties challenges the basis for the original calculation. Under *Melamine* and *Ceramica Regiomontana,* if the original calculation is in error, then the final determination may be amended; on the other hand, if circumstances affecting the calculation change after the issuance of the order, then the adjustment must be made pursuant to the changed circumstances or periodic review provisions.

be licensed. The statute contains no exceptions to the general rule that these adjudicatory-type decisions, which are relied upon, may later be changed for policy reasons, and the parties have cited no applicable judicial exceptions to the rule. That this principle may give way when errors are committed does not give the agency authority to upset final decisions where no errors have occurred. Therefore, in order to determine if remand is appropriate, the court must rule on plaintiff's motion for judgment on the agency record.

To determine whether ITA erred in not performing the recalculation, the court must ascertain whether Congress intended that a LTV recalculation occur in a situation in which the injury determination narrows the potential scope of the antidumping order and information is available in the administrative record from which to perform the recalculation. The parties offer different theories as to Congress' intent. Intervenor argues that the statutory scheme clearly precludes such a recalculation. Plaintiff argues that the legislative history indicates that a new calculation must be undertaken. Defendant agrees with plaintiff as to the results of this case, but it is difficult to determine if defendant believes it could reasonably arrive at a contrary result in a similiar situation.[8]

The statute, of course, is our primary guide in determining Congress' intent. *United States* v. *Hepp*, 497 F. Supp. 348, 349 (N.D. Iowa 1980), *aff'd*, 656 F.2d 350 (8th Cir. 1981) (citing *Reiter* v. *Sonotone Corp.*, 442 U.S. 330 (1979); *Simpson* v. *United States*, 435 U.S. 6 (1977); *Scarborough* v. *United States*, 431 U.S. 563 (1976)) ("[T]he starting point in any case involving the interpretation of a statute is the statute itself."). Intervenor notes that the statutory scheme provides for, in chronological order, a LTFV final determination (19 U.S.C. §1673d(a)(1) (1982)), a final injury determination (19 U.S.C. §1673d(b) (1982) West Supp. 1984)), and a final order (19 U.S.C. §1673e(a) (1982)). Intervenor argues that there is no room in the statutory scheme for a new determination modifying the LTFV determination where the products found to be causing injury are fewer than the products considered in arriving at the original LTFV margins.[9] Intervenor further argues that the high probability that LTFV margins will be inaccurate in situations in which the margin is based in part on imports not causing material injury is irrelevant. It notes that the LTFV margin contained in the anti-

[8] The court is of the opinion that if the facts of this case would allow ITA's original opinion to stand as a reasonable exercise of agency discretion, then remand is not appropriate. The court finds no support for remand to alter reasonable discretionary decisions where there is an objecting party. *See* discussion *supra*.

[9] Intervenor notes the possibility of a situation akin to the hypothetical conflicts problem of the endless "renvoi" if commissioners consider margins in making injury determinations, a current practice of some commissioners. *See, e.g., Iron Construction Castings from Canada*, U.S.I.T.C. Public. 1811, Investigation No. 731-TA-263 at 9 n. 34, 15 n. 56, 25, 40-41 (1986), *Heavy-Walled Rectangular Welded Carbon Steel Pipes and Tubes from Canada*, U.S.I.T.C. Public. 1808, Investigation No. 731-TA-254 at 13-14 (1986). Thus far, there has been no court determination sanctioning the use of margins analysis in arriving at an injury determination. If such practice is approved, the possibility of a true endless "renvoi" is too remote to be considered. Margins analysis is also more likely in cases where the margin is small and a negative determination is made. Here the margin will increase, and thus, there is no likelihood of further negative injury determinations as to specific products.

dumping duty order is considered an estimate, and that although the importer is required to deposit these estimated duties, the actual duties will be assessed based on the LTFV margin calculated during the section 751 periodic review. 19 U.S.C. § 1673e(a)(3) (1982) (deposit of estimated antidumping duties); 19 U.S.C. § 1675 (1982 & West Supp. 1985) (periodic review). Therefore, actual duties may vary substantially from estimated deposits even where there is no inconsistency between the ITA and ITC determinations.

Intervenor's argument focuses too closely on what is contained in the statute, without considering what is missing from the express statutory scheme. *United States* v. *Morton*, 104 S. Ct. 2769, 2773, *reh'g denied*, 105 S. Ct. 27 (1984) (statutes should be read as a whole); *Philbrook* v. *Glodgett*, 421 U.S. 707, 713 (1975) (same). Intervenor ignores the fact that Congress failed to tell ITA how to calculate the estimated antidumping duties. For example, 19 U.S.C. § 1673e(a)(3) (1982) states that ITA shall publish an anitdumping duty order which "requires the deposit of estimated antidumping duties pending liquidation of entries of merchandise at the same time as estimated normal customs duties on that merchandise are deposited." This provision does not provide any guidance as to how to calculate the estimated duties to be deposited. The only guidance as to calculation is provided in the overview provision, 19 U.S.C. § 1673 (1982 & West Supp. 1985), which states that once an affirmative LTFV determination and material injury determination are made as to certain merchandise, "then there shall be imposed upon *such merchandise* an antidumping duty * * * in an amount equal to the amount by which the foreign market value exceeds the United States price for *the merchandise*." (Emphasis added.) This court has defined the term "such merchandise" as merchandise which is both in a class of merchandise being sold at LTFV *and* which is causing material injury to a domestic industry. *Badger-Powhatan* v. *United States*, 9 CIT ___ ——, 608 F. Supp. 653, 656 (1985). Intervenor conceded at oral argument that the term "the merchandise" at the end of that sentence refers to the same merchandise as does the term "such merchandise." Thus, the antidumping duty actually imposed should be based, as far as is possible, on the LTFV margin for the merchandise that is actually subject to the duty. Intervenor argues that section 1673 does not address how estimated antidumping duties should be calculated, but only the manner of calculation of actually imposed duties. The agency, however, may have concluded that it is to calculate estimated deposits in the same way, inasmuch as the initial language of the regulation describing how ITA is to calculate the amount of estimated duty to be deposited, echoes the language of section 1673. 19 C.F.R. § 353.48(b) (1985); *see supra* note 6.[10] It should be noted

[10] If this is so, there apparently was a failure to consider this construction in connection with the *Carbon Steel Pipes* and *Color Television Receivers* administrative decisions discussed *infra*.

that defendant does not argue for this particular construction of its regulation.

Neither the statute, as indicated, nor the legislative history, explicitly refers to the question of recalculation when the ITA and ITC final determinations vary in scope. When such a legislative gap occurs, the court can infer that Congress did not consider the problem at issue. In such a case, "it is incumbent on the court to consider the policies underlying the statutory provision." *Four "H" Corp.* v. *United States,* 9 CIT ____, 611 F. Supp. 981, 984 (1985) (citing *Rose* v. *Lundy,* 455 U.S. 509, 516–18 (1982)).

The court notes the Supreme Court's admonition that in filling interstitial silences in statutes courts must proceed with caution and attend to the view of the administrative entity appointed to enforce the statute. *Ford Motor Credit Co.* v. *Milhollin,* 444 U.S. 555, 565 (1980). Intervenor argues that past ITA actions in cases similar to the one at bar constitute an interpretation of the statute by those officers charged with its administration. If this is so, such an interpretation would be entitled to considerable deference by the court. *Securities Industry Association* v. *Board of Governors,* 104 S. Ct. 2979, 2983 (1984); *Zenith Radio Corp.* v. *United States,* 437 U.S. 443, 450 (1978); *American Lamb Co.* v. *United States,* No. 86–560 at 13 (Fed. Cir. Feb. 28, 1986).

The court has looked at three cases cited by the parties to analyze ITA's decision-making in this area. In two cases relied on by intervenor, in which the ITC material injury determination was narrower in scope than the ITA LTFV determination, ITA, as it did in this case, apparently adopted without change the LTFV weighted-average margin contained in the ITA final determination. *Rectangular Welded Carbon Steel Pipes and Tubes from the Republic of Korea,* 49 Fed. Reg. 9936, 9939 (1984) (final determination of sales at LTFV); 49 Fed. Reg. 20,045 (1984) (antidumping duty order); *Color Television Receivers from Taiwan,* 49 Fed. Reg. 7628, 7638 (1984) (final determination of sales at LTFV), 49 Fed. Reg. 18,337, 18,338 (1984) (antidumping duty order). In contrast, in a third case, ITA recalculated the LTFV margin after the ITC determination eliminated one product from the scope of the order. *High-Capacity Pagers from Japan,* 48 Fed. Reg. 28,682, 28,688 (1983) (final determination of sales at LTFV), 48 Fed. Reg. 37,058, 37,059 (antidumping duty order). Defendant has not offered any explanation of how or why ITA recalculated the margin in the *High-Capacity Pagers* situation, but not in the *Carbon Steel Pipes* and *Color Television Receivers* contexts. In giving weight to an administrative determination, a court should consider not only its consistency with other pronouncements but the validity of the reasoning underlying it. *Adamo Wrecking Co.* v. *United States,* 434 U.S. 275, 287–88 n.5 (1978). Here there is no consistency and ITA offers no explanation for the inconsistency.

The other parties offer various explanations for the mixed results. Plaintiff suggests that the margins would not have been significantly affected in the first two cases, but that a significant difference in the third case mandated a recalculation. The difference, in fact, was significant in the third case, but no facts were presented regarding the potential change in the first two cases. Intervenor notes that the original determination in the third case stated separate LTFV margins for the relevant products. Thus, no amendment of the determination was required. In this case, the LTFV margins were not separately stated for each product, therefore, a recalculation based on review of the record would be required.[11] Although intervenor's explanation is intriguing, there is no statement from the concerned agency that this is its reasoning. In fact, its latest position in this case would indicate that it does not share this view. The court itself has difficulty accepting intervenor's formalistic approach. That approach would make the decision as to whether to apply a more accurate deposit rate solely the result of chance. That is, if ITA decides for whatever unrelated reason to state LTFV margins separately in its final determination, the deposit rates will be fairly accurate. If not, rates totally unrelated to the correct duty may be imposed. Furthermore, even if the three opinions should be harmonized in this way, it is difficult to say that three unexplicated decisions made during a short and recent time period constitute a consistent administrative practice, especially in light of the agency's new position. In any case, if there is an agency practice to be given weight in this case, the court is simply at a loss as to what that practice is.

Plaintiff has directed the court's attention to legislative history which demonstrates the importance that Congress placed on the deposit of the estimated duties. In particular, the report of the House Committee on Ways and Means indicates that the Committee viewed the inclusion of a provision requiring the deposit of estimated during duties as a critical change intended to expedite the assessment of antidumping duties. In discussing the new requirement that merchandise subject to an antidumping order be entered only upon deposit of estimated duties, the Committee stated:

> The Committee feels strongly that this practice [of allowing such merchandise to enter under bond] does not sufficiently deter dumping. Rather, it provides an incentive to exporters and importers to delay in submitting the information necessary to form the basis of an assessment. The Committee believes that the requirement of cash deposits will ensure that complete information will be submitted to the Authority in a timely manner.

[11] In this regard the *High Capacity Pagers* case is similar to *Plaw Knox Construction Equipment Co. v. United States*, 8 CIT 210, 596 F. Supp. 476 (1984) (corrected cash deposit instructions issued to Customs based on figures in an annual review determination).

H.R. Rep. No. 317, 96th Cong., 1st Sess. 69 (1979). Under the circumstances of this case, Congress' intent to prevent exporters and importers from delaying in providing information for accurate assessment of duties is furthered by tailoring the LTFV margins to only those products subject to the order. If the estimated duties are substantially less than the actual duties as a result of the failure to recalculate, then exporters and importers will benefit by delaying the calculation of actual duties. This potential problem is compounded by the fact that the first assessment of actual duties may not occur for approximately two years after the issuance of the order, 19 U.S.C. § 1675(a)(1) (1982 & West Supp. 1985), during which time the exporter or importer would deposit only a fraction of the amount of duties necessary to compensate for the dumping.[12]

Reading this legislative history to support recalculation in this case does not conflict with the statutory scheme. That the statute provides for only one final ITA determination is not dispositive. First, as discussed previously, various situations may give rise to valid amended determinations. Second, ITA could have avoided making a new amended determination by providing separate LTFV margins for each product. That, not foreseeing the ITC result, ITA chose to state an average margin for reasons of convenience does not relieve it of the burden of producing a proper calculation from information already available in the original administrative record.[13] In the absence of any definitive guidance it is sufficient justification for the court's conclusion that the result reached is both logical and fair, as well as not unduly burdensome. Therefore, the court concludes that the statutory scheme requires that estimated antidumping duties be as closely tailored to actual antidumping duties as is reasonable given data available to ITA at the time the antidumping order is issued.[14]

---

[12] Of course, there is the possibility that in other cases inclusion of the margins of non-injurying products would raise the deposit rate. This possibility does not prevent the conclusion that Congress favors reasonably accurate deposits. In theory, a duty rate that allows the foreign and domestic products to compete on an equal basis is what Congress intended, not a rate that puts the domestic product in an advantageous position.
